		Amount Written off as Irrecoverable	1,490
		Total Effective and Non-Effective Services £.	‡16,872,991

(a) This is a statement of the net Expenditure after deducting, in accordance with the Estimates, the Appropriations in Aid; the gross amounts are given in the Account of Army Expenditure for the year ending 31 March 1868.

* Average Numbers borne on the Regimental and Depôt Establishments during the year.

† These amounts are based upon the average Receipts of the three years last past; the sum actually paid into the Exchequer for the year ending 31 December 1868, is detailed on page 132. The amount included for Capitation Grant (Effective and Non-Effective) to be transferred to Imperial Funds by the Government of India is £.719,680, based upon the estimated numbers on the Indian Establishment for 1869–70, as detailed in Appendix No. 2, page 138, less the charge for Furlough Pay of Officers, which will be defrayed direct from Indian Revenues from 1 April 1869. (*See* page 16.)

‡ This Amount includes—

	£.
Expenditure on account of Abyssinian Expedition	1,272,066
Ditto - - ditto - - New Zealand War	506,192
£.	1,778,258

		£.	22,883	56,509	79,392	86,861

* In addition to the duty of supplying provisions, forage, fuel, and light, and transport, with the necessary Cash and Store Accounts, the Commissariat perform the following duties in the Colonies:

Raise and disburse all funds for Imperial purposes.
Make contracts and purchases for every branch of the Imperial Service.
Act as agents for the Navy in the absence of Naval Officers.
Carry on financial and store duties for the Convict Service, and at some stations have charge of Barracks and Military stores.

At home the duties are confined more to those peculiarly Commissariat.

Vote 2.—Commissariat Establishment, Services, and Supplies, Movement of Troops, &c.—*continued.*

TOTAL £.	987,825	1,114,127	18,426	144,728
DEDUCT,—				
* Value of Stores issued to, and charged against, other Departments and Establishments, as detailed below.	527,000	617,256	90,256	—
£.	460,825	496,871	108,682	144,728

NET DECREASE £. 36,046.

* VALUE OF STORES TO BE RECOVERED FROM—	£.
Indian Government, for Regiments on Indian Establishment	162,000
Indian Government, for Depôts on Indian Establishment	31,600
Admiralty, for Supplies to Royal Marines	35,000
Foreign Office, for Clothing for Legation Guard in China and Japan	200
Custom House, for Customs Officers	1,200
Volunteers, for Issues of Materials	11,000
Vote 8, on account of Militia	164,500
Vote 11, on account of Pensioners and Army Reserve	14,000
Vote 17, on account of Channel Isles Militia	5,500
Clothing and Necessaries issued on Repayment	102,000
TOTAL DEDUCTIONS £.	527,000

An Appendix to the Parliamentary Account of Army Expenditure will contain a Statement of the Expenditure of the above Amounts as restricted to the various Departments specified in the following Detail of the Vote, in comparison with the Estimates for each Department.

* These establishments also provide for the following additional services not defrayed out of Army funds:—

1. The clothing for the European troops in India.
2. The clothing for the Royal Marines.
3. Clothing materials to Volunteers on repayment.
4. Necessaries to the Militia on repayment.
5. The receipt, inspection, and issue of all clothing for the Metropolitan Police of London and Dublin, General Post Office, and Custom House, and Irish Constabulary.

The Government of India contributes 3 *l.* per cent. upon the value of the clothing issued to India, to cover establishment expenses. This amount is paid into the Exchequer as extra receipts. It also repays all charges connected with packing the clothing for shipment.

A sum, amounting to about 3,500 *l.*, is annually received for the sale of cuttings of cloth, which is also paid into the Exchequer as an extra receipt.

The Volunteers are charged 5 *l.* per cent. in addition to the contract price of the clothing materials, to cover all establishment expenses and inland freight.

Vote 3.—Clothing Establishments, Services, and Supplies—*continued.*

			Carried forward - - - £.		35,670	16,941	—	

* This is a work of maintenance, but as the sum required exceeds 1,000 *l.*, it is inserted in Part I.

** This service (which includes purchase of land) has been provided for in previous Estimates, in an item for the "Defences of Harwich and Newhaven."

† The original Estimate of 4,500 *l.* is reduced on account of the expense of the Foundations being less than was anticipated.

‡ The original Estimate of 1,500 *l.* is increased in consequence of the adoption of a different project.

§ The increase in the original Estimate (4,000 *l.*) is due to the cost of the Foundations required for the Crane being greater than was anticipated.

‖ The original Estimate of 4,500 *l.* is increased in consequence of the necessity, not contemplated in original Estimate, of building in the Mediæval style in harmony with the existing architecture, and also of a change of site, that originally selected proving to be "made" ground.

Vote 14.—Works, Buildings, and Repairs, at Home and Abroad—*continued.*

				Carried forward - - - £.	49,670	62,545	—	

* The original Estimate of 60,000 *l.* is increased in consequence of alterations made during progress of the work, and the closing of a public thoroughfare through the Barracks.

† The original Estimate of 10,000 *l.* is increased in consequence of the contract for the first portion of the work having exceeded the Estimate for that portion.

‡ This sum is taken to cover expenditure during 1869-70, to make good damage resulting from gales in January 1869. There has not been time to prepare a final project, and consequently the total Estimate cannot be inserted.

§ The original Estimate of 17,000 *l.* is increased in consequence of alterations required by Commissioners in Lunacy, and extension of boundary wall.

‖ Voted in Sanitary Grant for 1868-69.

* Original Estimate of 2,500 *l.* increased in consequence of Tender for Work exceeding the amount contemplated.

† £. 3,000 was voted last year under the following title:—"Storehouses for Miscellaneous Stores from the Tower." The amount of Total Estimate is reduced from 70,000 *l.*

‡ The commencement of this Service in 1868-69 was specially sanctioned by the Lords Commissioners of the Treasury.

§ Original Estimates of 260,000 *l.* increased owing to Convict Labour not being available for the Works, and to Cost of Land being in Excess of the sum anticipated.

‖ Original Estimate of 200,000 *l.* increased owing to Cost of Land being greater than was foreseen, and to extra Masonry in Escarps and Counterscarps, found necessary after excavation of ditches.

				Total, Part I., Abroad - - - £.	135,000	26,224	—	

* The original Estimate of 22,000 *l.* is increased in consequence of its having been decided to adapt the Barracks for European instead of Native Troops.
† The original Estimate of 10,300 *l.* is increased in consequence of the addition of a stable, &c.
‡ Voted in Purveyor's Grant for 1868-9.
§ A re-vote.
‖ The excess in original Estimate of 190,000 *l.* is due to additional works necessary for adapting the batteries to receive heavier guns than were at first contemplated; to a rise in the price of labour; and to extra cost of masonry, due to its having been found necessary to use cement in lieu of local limes.

VOTE 14.—WORKS, BUILDINGS, and REPAIRS, at HOME and ABROAD—*continued.*

ARMY ESTIMATES

OF

EFFECTIVE AND NON-EFFECTIVE SERVICES,

FOR 1869-70.

(Presented to Parliament by Her Majesty's Command.)

Ordered, by The House of Commons, *to be Printed,*
25 February 1869.

[*Price* 2 *s.*]

39.

Under 24 *oz.*

Vote 21 (REVISED).

FULL PAY OF REDUCED AND RETIRED OFFICERS, HALF PAY, AND PURCHASE OF FULL AND HALF PAY COMMISSIONS IN REDUCTION OF THE CHARGE FOR HALF PAY.

I. AN ESTIMATE of the SUM which will be required in the Year ending 31st March 1870, to defray the FULL PAY of REDUCED and RETIRED OFFICERS, HALF PAY, and the PURCHASE of FULL and HALF PAY COMMISSIONS within the limits of the Sums realised by the SALE of certain COMMISSIONS.

Four Hundred and Eighty Thousand Five Hundred Pounds.

II. SUB-HEADS under which this Vote will be accounted for.

	1869-70.	1868-9.	Increase.	Decrease.
	£.	£.	£.	£.
A.—FULL PAY OF REDUCED AND RETIRED OFFICERS	128,500	127,000	1,500	—
B.—HALF PAY AND MILITARY ALLOWANCES	341,000	331,500	9,500	—
C.—HALF PAY OF OFFICERS OF DISBANDED AND FOREIGN CORPS	11,000	12,300	- -	1,300
TOTAL REDUCED, RETIRED, AND HALF PAY £.	480,500			
PURCHASE of FULL and HALF PAY COMMISSIONS to an amount not exceeding the balance which for the time being may be in hand on the Reserve Fund, which is realised by the sale of the Commissions specified below.				
D.—PURCHASE OF HALF PAY COMMISSIONS OF CAVALRY, MILITARY TRAIN, FOOT GUARDS, AND INFANTRY	50,000	- -	50,000	—
E.—PURCHASE OF FULL PAY COMMISSIONS OF CAVALRY, MILITARY TRAIN, FOOT GUARDS, AND INFANTRY ON REDUCTION OF ESTABLISHMENT	40,000	- -	40,000	—
F.—PURCHASE OF FORMER DIFFERENCE BETWEEN THE VALUE OF CAVALRY AND INFANTRY COMMISSIONS	20,000	- -	20,000	—
G.—PURCHASE OF COMMISSIONS OF GENTLEMEN-AT-ARMS	4,800	- -	4,800	—
H.—PURCHASE OF COMMISSIONS OF CAVALRY AND INFANTRY TO CONFER PROMOTION ON OFFICERS OF LONG AND DISTINGUISHED SERVICE	5,000	- -	5,000	
I.—PURCHASE OF COMMISSIONS OF SUPERNUMERARIES CAUSED BY THE APPOINTMENT OF PAGES OF HONOUR TO THE FOOT GUARDS	2,400	- -	2,400	—
TOTAL PURCHASE of COMMISSIONS £.	122,200			
	602,700	470,800	133,200	1,300
DEDUCT,—a Sum equal to the Estimated Expenditure for Purchase of Commissions transferred from the Reserve Fund Account	122,200	- -	- -	Add— 122,200
£.	480,500	470,800	133,200	123,500

NET INCREASE £. 9,700

The Receipts on the Reserve Fund Account are limited to the proceeds of the—

(1.) Sale of the difference between the Full Value of an Infantry or Cavalry Commission, and that which an Officer is entitled to receive.
(2.) Sale of Commissions in Succession to Officers placed on the Supernumerary, Seconded, and Half Pay Lists.
(3.) Sale of every 3rd non-purchase vacancy in Foot Guards.
(4.) Interest on the investments of the Fund.

VOTE 21—*continued.*

See page 14 for Note required by the Treasury Minute, dated 30th April 1864, in order to afford the proper Explanation of the degree to which the Account has been affected by the Introduction and Adjustment of Transactions belonging to those rendered to Parliament in previous years.

William Brown, Accountant General, War Office.

We, the undersigned, declare to the best of our knowledge and belief, that no part of the Expenditure contained in the above Army Appropriation Account has been incurred without authority superior to that of the Department, in cases where such superior authority is required by the Regulations.

War Office, 31 December 1868.

H. W. G. Whiffin, Chief Auditor of Army Accounts.

William Brown, Accountant General, War Office.

I do hereby certify that this Account has been examined by officers under my directions in accordance with, and to the extent prescribed by, the 29th section of the Act 29 & 30 Vict. c. 39, and that, subject to the observations contained in my Report of 30 January 1869, the above is a correct Statement as an Appropriation Account of the Receipt and Expenditure for Army Services for the year ended 31 March 1868.

Wm. Dunbar,
Comptrollor General of the Receipt and Issue of Her Majesty's Exchequer, and Auditor General of Public Accounts.

(Examined) *H. T. D. Bathurst*, Inspector.

EXPLANATORY PAPER, showing the Details of the Appropriations in Aid, referred to in the foregoing Account.

EXPLANATORY PAPER, showing the Variation between EXPENDITURE and GRANTS for the SERVICES referred to in the foregoing Account for 1867-68.

EXCESSES.

VOTE No. 1.

GENERAL STAFF AND REGIMENTAL PAY, ALLOWANCES, AND CHARGES - -	£. 270,664 10 8

The Net Expenditure, beyond Grant on this Vote, as stated above, has arisen by Excesses on the undermentioned Items, and may be explained as follows:

ITEM.	EXCESS. £. s. d.	CAUSE.
General Staff Pay - - -	16,432 - -	A change in the mode of payment by which Officers of the Staff are paid monthly, instead of quarterly in arrear, and extra expenses incidental to the Abyssian War, caused an increase in the actual payments within the year ended 31st March 1868.
and Pay of Garrison Staff Serjeants	7,523 - -	
Regimental Pay - - -	91,820 - -	The strength of the Army serving at Home, was greater than the number prescribed by the Establishment for the Home and Colonial Services, owing to the Army in India being proportionately less, consequently an undue charge has fallen upon the Parliamentary Grant for the former.
Beer Money - - - -	6,710 - -	
Levy Money of Recruits - -	26,258 - -	A larger number of Recruits enlisted, and of men re-engaged than was provided for.
and Special Bounty to Men re-engaging in the Colonies, or about to embark for Foreign Service.	11,295 - -	
Purchase of Horses - -	4,230 - -	The re-mounting of the Division of the Military Train which returned home from New Zealand in course of the year 1867-68, on account of which no more than the sum of 3,000 *l.* was voted in course of the year 1867-68. Horses to the value of 4,465 *l.* were sold in the Colony, and the amount paid into the Exchequer, but the Expenditure for the purchase of Horses for the Military Train generally was 7,824 *l.*
Allowances to Discharged Soldiers.	13,300 - -	Limited Service Act.
Pay, &c., of Native Volunteers and Militia, during the period of the late Insurrection in New Zealand.	101,306 - -	The adjustment of the account with the Colonial Government for the period of the Native Insurrection in New Zealand, in conformity with the instructions given by the Lords Commissioners of Her Majesty's Treasury.
	278,874 - -	
Deduct,—		
Net saving on other items of this Vote.	8,210 - -	
£.	270,664 - -	

EXCESSES—*continued.*

VOTE No. 2.

COMMISSARIAT ESTABLISHMENT, SERVICES AND SUPPLIES - - - - - - - £. 1,143,650 5 1

This Excess is attributable,—

1st.—To a charge of 122,039 *l.* 9 *s.* 6 *d.*, which it has now become necessary to make in consequence of the adjustment of the War Office Account for the New Zealand War, credit on account thereof having been given in the Army Account for 1864–65 (*see* particulars in the Statement of Savings and Deficiencies for the same period, pp. 16, 17, No. 123, dated 20th March 1866).

2nd.—To Extra Expenses attending the frequent movement of Troops in various parts of the United Kingdom rendered necessary by exceptional circumstances.

3rd.—To the Abyssinian War.

VOTE No. 3.

CLOTHING ESTABLISHMENT, SERVICES AND SUPPLIES - - - - - - - - £. 217,187 19 8

The aggregate Excess upon these items falls upon,

1. Materials and Wages.
2. Making up and fitting Clothing.
3. Compensation.
4. Winter Clothing.
5. Regimental Colours.
6. Freight.
7. Implements.
8. Arrear Claims from India.
9. Claim upon New Zealand withdrawn.
10. Repayment Services,—

of which the respective sums of 43,140*l.* claimed from New Zealand, and 136,991 *l.* issued for the Abyssinian Expedition, have been covered by Grants, leaving a *bonâ fide* Excess of 37,056 *l.*, to be explained as follows:

1st.—The number of Men re-engaging during 1867–68, was four times that estimated for, and caused an Excess chiefly upon items 2, 3, and 4.

2nd.—The number of men in excess of the establishment during 1867–68, was 4,889, and the average cost of clothing is about 3 *l.* 10 *s.* per man.

3rd.—An increase was made to the Militia during 1867–68, and the Extra Clothing provided out of Army Votes; but, as the issues could not be completed before the 31st March 1868, the value could not be transferred to this Vote from Vote 8.

4th.—Another cause of Excess is owing to a deficiency in the Amounts recovered, the Indian Government having demanded less Clothing than was provided for. This deficiency is 8,290 *l.*; articles, however, to the full extent of this sum were not purchased, Cloth being the only commodity purchased in anticipation of the full demand, and this in accordance with an arrangement with the India Office.

This system of purchasing in anticipation of demand, ceases next year, and for the future India will make immediate payment for whatever is demanded; but, at the same time, it should be born in mind that this surplus purchase of cloth in 1867–68, caused a corresponding reduction in the Estimates for 1868–69.

VOTE No. 4.

BARRACK ESTABLISHMENT, SERVICES AND SUPPLIES - - - - - - - £. 32,854 11 8

This Excess may be accounted for as follows:—

1st.—The unforeseen movement of Troops in 1867–68, frequently to stations where insufficient Barrack accommodation existed, rendered extra Expenditure necessary for the hire of Barracks, Quarters, &c., and for washing and repairing Bedding.

2nd.—The contracts for Fuel and Light not having been so favourable as was calculated upon when the Estimates were prepared.

3rd.—To the increased attention paid to Sanitary Regulations, and to the provision of disinfectants against Cholera.

EXCESSES—*continued.*

VOTE No. 5.

DIVINE SERVICE - - - - - - - -	£. 4,931 12 7

This Excess is attributable to the necessity of engaging the services of Officiating Clergymen, both at Home and Abroad, when no commission Chaplains have been appointed.

VOTE No. 7.

MEDICAL ESTABLISHMENT, SERVICES AND SUPPLIES - - - - - - -	£. 14,717 15 7

This Excess is chiefly attributable to the following circumstances, viz.:—

1st.—The adjustment of the account with the Government of New Zealand for Advances during the period of the Native Insurrection, in conformity with the Instructions given by the Lords Commissioners of Her Majesty's Treasury.

2nd.—The employment of private Medical Practitioners beyond the extent contemplated, detachments of Corps having been so located as to lose the services of the Regimental Surgeons.

3rd.—The detention of more Officers of the Purveying Staff in New Zealand during the year than were provided for in the Estimates.

4th.—The necessity for opening additional Hospitals in the Colonies.

5th.—The purchase of Supplies for the use of the Abyssinian Expedition.

N. B.—Savings upon the other items of the Vote have reduced the aggregate Excess to the sum above stated.

VOTE No. 9.

YEOMANRY - - - - - - - - -	£. 1,319 15 5

This Excess is owing to a larger number of Men having come up for permanent duty during the year 1867–68 than was contemplated when the Estimates for that period were prepared.

VOTE No. 10.

VOLUNTEERS - - - - - - - -	£. 6,419 19 1

This Excess may be accounted for as follows:—

1st.—By altering the mode of issuing the Pay and Allowances to the Inspecting Staff, making it according to the Financial rather than the Calendar Year; the Charge therefore against the Sum voted represents disbursements for Five Quarters during 1867–68.

2nd.—By the appointment of additional Adjutants, not contemplated when the Estimates were prepared.

3rd.—The difficulties hitherto experienced in obtaining qualified persons as Serjeants Instructors to Volunteer Corps not having arisen in 1867–68, the Sum provided in the Estimates for that year proved insufficient.

VOTE No. 13.

MILITARY STORE ESTABLISHMENTS AND EXPENDITURE FOR WARLIKE STORES FOR LAND AND SEA SERVICE - - - -	£. 219,024 16 4

This Excess is attributable to,—

1st.—The increased activity at the Royal Arsenal, with reference to the Supply and Issue of Stores for the use both of the Army and Navy.

2nd.—The shipment of Military Stores for the use of the Abyssian Expedition.

3rd.—The disturbed state of certain parts of England and Ireland, causing a much larger Sum to be expended for Freight and Carriage than was contemplated.

4th.—The adjustment of the War Office Account with the Colonial Government of New Zealand, in conformity with the Instructions given by the Lords Commissioners of Her Majesty's Treasury.

5th.—The Re-payment to the Chinese Government of the value of certain Iron Ordnance returned to the Military Store Department from the late Anglo-Chinese Flotilla.

EXCESSES—*continued.*

VOTE No. 14.

SUPERINTENDING ESTABLISHMENT OF, AND EXPENDITURE FOR WORKS, BUILDINGS, AND REPAIRS AT HOME AND ABROAD - - -	£. 48,253 19 2

The Balances of the Net Surpluses and Deficiencies leaves the above result, which may be explained as follows:—

	£.	s.	d.
Excesses—			
1st.—Special and urgent Services ordered by Commanders of the Forces and Governors of Colonies, all of which were duly reported to the Lords Commissioners of Her Majesty's Treasury, and received their Lordships' approval. This sum is considerably increased on account of Expenses connected with the Abyssinian Expedition - - -	48,622	3	9
2nd.—The adjustment of the Army Account with the Colonial Government for the period ending with that of the Native Insurrection, in conformity with the instructions given by the Lords Commissioners of Her Majesty's Treasury. The Expenditure incurred has been for Road-making for Military Purposes, and Special Engineer Services, less a sum allowed for Repairs to Military Buildings - - -	27,587	7	11
3rd.—Purchase of the Camerata Building in Malta for conversion into Quarters for Married Soldiers, not provided for in the Estimates, but sanctioned by the Lords Commissioners of Her Majesty's Treasury - - - - - - - - - - - - -	18,000	-	-
£.	94,209	11	8
Savings:—			
The Balance of Savings beyond Excesses on the Expenditure at the other Stations is - - - - - - - - - - - -	45,955	12	6
The same arising from the abandonment or postponement of certain Works.			
Leaving an Excess of - - - £.	48,253	19	2

VOTE No. 15.

MILITARY EDUCATION - - - - - -	£. 336 2 1

This Excess has been mainly caused,—

1st.—By the extra number of Gentlemen Cadets under instruction at the Royal Military Academy Woolwich, in 1867–68, in consequence of the requirements of the Service in India, the cost of which was defrayed from the Indian Revenue, and the amount paid into the Exchequer as an Extra Receipt.

2nd.—The necessity for four Examinations at the Military Medical School in 1867–68 for the purpose of electing qualified Medical Men to fill Vacancies for Assistant Surgeons in the Army, having caused an unavoidable Excess upon the item for the Pay of the Probationers.

VOTE No. 16.

SURVEYS OF THE UNITED KINGDOM - - -	£. 5,694 6 10

This Excess may be explained as follows:—

1st.—In the Army Estimates for 1860–61 a sum of 4,000 *l.* was provided, under Vote 15, for the purpose of defraying Charges for the Survey of certain Military Stations, but owing to the Act of Parliament for regulating the Application of Monies raised for defraying the Cost of constructing the National Defences coming into operation in 1861–62, the Expenditure applicable to the Service first mentioned was defrayed from the Loan, instead of out of the 4,000 *l.*, thus causing a Saving thereon to a considerable extent. But, upon the re-adjustment of the Account for Payments from the Loan for National Defences, it became necessary to charge the Army Grants (Vote for Surveys of the United Kingdom) with the sum of 5,100 *l.*

2nd.—A liability contracted in course of the year 1866–67 on account of Supplies of Fuel and Light, the amount of which came into course of payment after the 1st April 1867.

EXCESSES—*continued.*

VOTE No. 18.

ADMINISTRATION OF THE ARMY - - - £. 1,478 16 9

This Excess is for the most part attributable to,—

1st.—The appointment of Major General Sir H. Storks and Major General Balfour for the purpose of establishing the Control Department of the Army, which extra expenditure was sanctioned by the Lords Commissioners of Her Majesty's Treasury in letters dated 24th December 1867 and 4th January 1868.

2nd.—A change in the mode of Payment, by which Officers of the Staff are paid monthly instead of quarterly in arrear, caused an increase in the actual payments within the year 1867-68 of the Pay, &c., of the Department of His Royal Highness the Field Marshal Commanding-in-Chief.

VOTE No. 19.

REWARDS FOR DISTINGUISHED SERVICES - - £. 789 15 7

This Excess is owing to a number of Officers having, through absence abroad and other causes, omitted to draw their Allowances for 1866-67 until 1867-68.

VOTE No. 24.

IN-PENSIONS - - - - - - - - - £. 55 1 1

This Excess arose from the increased Price of Provisions during the year 1867-68.

AMOUNT WRITTEN OFF, AS IRRECOVERABLE, BEING BALANCES DUE BY SUNDRY PERSONS - - - - £. 1,490 2 8

SAVINGS.

VOTE No. 6.

MARTIAL LAW - - - - - - - - £. 2,891 2 1

This Saving has resulted from the Charges on account of Travelling, Contingent, and Miscellaneous Expenses having fallen short of the sum estimated; and from the number of men confined in Military Prisons having been under the average of prior years.

VOTE No. 8.

DISEMBODIED MILITIA - - - - - £. 88,328 9 3

This Saving is mainly attributable to the Irish Militia not having been called up for annual training.

VOTE No. 11.

ENROLLED PENSIONERS AND ARMY RESERVE FORCE - - - - - - - - £. 19,207 5 7

No Expenditure having been recorded against the sum voted for the increased Charge for Men who were expected to volunteer, by commutation of Service, for enrolment in the Army Reserve Force, fully accounts for this saving.

SAVINGS—*continued.*

VOTE No. 12.

MANUFACTURING DEPARTMENTS - - - £. 82,881 18 6

This Saving may be chiefly accounted for as follows:—

1st.—The demands of the Service not requiring Stores to be manufactured to the full extent provided for in the Army Estimates, there was less activity at the commencement, and more at the latter part, of the year 1867–68 in the various Departments; consequently Stores were not purchased to the extent that was anticipated, and a less number of men were employed than was provided for in the Estimates.

2nd.—The Sums received as repayments for Services performed for other Departments and Votes, were much larger than was contemplated when the Estimates were prepared.

VOTE No. 17.

MISCELLANEOUS SERVICES - - - - £. 12,937 3 8

This Saving is attributable to,—

1st.—The provision made in the Estimates for 1867–68 having been larger than the demands for the various Services necessary for the suppression of contagious diseases during that period.

2nd.—The charges on account of equipping a ship for Hospital and Sanitary purposes, at Hong Kong, having been first defrayed by the Admiralty, and not repaid from Army Funds during 1867–68, a saving has been caused, which, however, must be considered as a liability to be hereafter disposed of.

VOTE No. 20.

PAY OF GENERAL OFFICERS - - - - - £. 3,127 16

VOTE No. 21.

PAY OF REDUCED AND RETIRED OFFICERS - £. 16,245 13 10

VOTE No. 22.

WIDOWS' PENSIONS AND COMPASSIONATE ALLOWANCES - - - - - - - £. 2,990 4 9

VOTE No. 23.

PENSIONS AND ALLOWANCES TO WOUNDED OFFICERS - - - - - - - £. 3,080 – 6

VOTE No. 25.

OUT-PENSIONS - - - - - - - £. 19,122 4 –

VOTE No. 26.

SUPERANNUATION ALLOWANCES - - - - £. 4,444 10 5

VOTE No. 27.

DISEMBODIED MILITIA AND YEOMANRY CAVALRY £. 2,472 – 4

These Savings are for the most part attributable to the Casualties during the financial year having been more numerous than was calculated upon when the Estimates for 1867–68 were prepared.

APPROPRIATION IN AID, BEING THE NET AMOUNT REALISED IN EXCESS OF ESTIMATE - - - £. 90,350 7 1

COPY of the APPLICATION to appropriate temporarily the SURPLUSES on certain VOTES for ARMY SERVICES for 1867-68, in Aid of DEFICIENCIES; and of the Treasury Reply thereto.

(7512—185.)

Sir, War Office, 31 December 1868.

I AM directed by Mr. Secretary Cardwell to forward, for the information of the Lords Commissioners of Her Majesty's Treasury, a statement showing a comparison of the Army Expenditure for the year 1867-68 with the Grants of Parliament, together with an abstract from the Explanatory Paper, in which are assigned the reasons for the variation between the sums charged and those voted for the sub-items in the Army Estimates; and to request you will move their Lordships to issue their authority to defray temporarily the excesses therein shown out of the surpluses (also detailed in that document), in conformity with the terms of the Act 30 & 31 Vict. c. 91, s. 22.

I am to add that the excesses of Expenditure beyond the Grants amount to 1,968,869*l.* 10*s.* 3*d.*, and the surpluses to 348,078*l.* 16*s.*, but in aid of the latter my Lords have authorised the sums mentioned in the margin.

Proportion of the Vote for the extraordinary expenses of the Abyssinian War,
£. 400,000.

Ditto, ditto, to make good the advances from the Treasury Chest in New Zealand, and from Army Grants, on account of the Native Insurrection,
£. 505,899. 14. 3.

I am, &c.
(signed) *D. Galton.*

The Secretary to the Treasury.

Sir, Treasury Chambers, 8 January 1869.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, for the information of Mr. Secretary Cardwell, that my Lords have had under consideration the statement enclosed in your letter of 30th December last, showing a comparison of Army and Militia Expenditure for the year 1867-68, with the Grants of Parliament for the same period, from which it appears that an excess has occurred on certain Grants (as per margin) and on account of irrecoverable debts for the year ended 31st March 1868, amounting in the whole to 1,968,869*l.* 10*s.* 3*d.*, while on the remaining Grants for the same year there is an aggregate surplus of 348,078*l.* 16*s.*

The sum of 505,899*l.* 14*s.* 3*d.*, granted per Act 29 & 30 Vict. c. 91, s. 11, in aid of Army Grants on account of the New Zealand War Expenditure, and the sum of 1,114,891*l.*, transferred to the credit of Army Funds out of the Vote of Credit for the Abyssinian War being brought to account in the present Statement, the actual Deficiency which remains to be met amounts to 348,078*l.* 16*s.*

In pursuance of the authority granted by the 26th section of the Act 30 & 31 Vict. c. 120, my Lords authorise the said sum of 1,968,869*l.* 10*s.* 3*d.*, being included in the account of Army Receipt and Expenditure for 1867-68, prepared under the provisions of the Act 9 & 10 Vict. c. 92, and approve of the surpluses on ordinary Grants, amounting, as stated, to the sum of 348,078*l.* 16*s.*, being applied towards the discharge of the deficiencies.

Examined,
H. T. D. Bathurst.

REPORT of the Comptroller and Auditor General upon the APPROPRIATION ACCOUNT of the RECEIPT and EXPENDITURE for ARMY SERVICES in the Year ended 31st March 1868, prepared and submitted for the Information of the House of Commons, in Pursuance of the 22nd and 32nd Sections of the Act 29 & 30 Vict. c. 39.

I. THE Account of the Receipt and Expenditure for Army Services for the year ended the 31st March 1868, has been rendered in a different form to that of previous accounts; the estimated amounts of appropriations in aid having been included therein; and has, therefore, the advantage of showing the gross Expenditure under each Vote, instead of the net Expenditure after deducting appropriations in aid.

II. The differences between the aggregate of each Vote, with the estimated appropriation in aid, and the sum expended under each head of the Votes, as shown in the Account, will be found in the Statement (A.) appended to this Report.

A.

III. I have to observe that, as regards Votes 3 and 7, the sums stated in the Account as deficiencies are not the full amount of the deficiencies. The difference between the actual Expenditure and the aggregate of the Vote, including the estimated appropriations in aid, which are taken at their full amount, is represented as the deficiency in each of these cases; but, as the receipts from appropriations in aid fall short of the estimated amount, the real deficiency is a larger sum than that stated, as appears by the following comparison:—

VOTE 3.

	£.	s.	d.		£.	s.	d.
Grant	570,000	–	–	Grant	570,000	–	–
Estimated Appropriation in Aid	603,910	–	–	Actual Appropriation in Aid	492,780	3	7
£.	1,173,910	–	–	£.	1,062,780	3	7
Expenditure	1,391,097	19	8	Expenditure	1,391,097	19	8
Deficiency stated in the Account £.	217,187	19	8	Actual Deficiency £.	328,317	16	1

VOTE 7.

	£.	s.	d.		£.	s.	d.
Grant	275,600	–	–	Grant	275,600	–	–
Estimated Appropriation in Aid	7,100	–	–	Actual Appropriation in Aid	6,752	16	1
£.	282,700	–	–	£.	282,352	16	1
Expenditure	297,417	15	7	Expenditure	297,417	15	7
Deficiency stated in the Account £.	14,717	15	7	Actual Deficiency £.	15,064	19	6

IV. On Vote 25, a surplus is shown in the Account; the real surplus is, however, less than that stated, as appears by a similar comparison:

	£.	s.	d.		£.	s.	d.
Grant	1,186,800	–	–	Grant	1,186,800	–	–
Estimated Appropriation in Aid	700	–	–	Actual Appropriation in Aid	502	9	11
£.	1,187,500	–	–	£.	1,187,302	9	11
Expenditure	1,168,377	16	–	Expenditure	1,168,377	16	–
Surplus stated in the Account £.	19,122	4	–	Actual Surplus £.	18,924	13	11

V. The total deficiencies on the Ordinary Army Votes, including 1,490 *l.* 2 *s.* 8 *d.* for irrecoverable Balances, as shown in the Account, amount to £. 1,968,869 10 3

This deficiency, it appears, has been diminished by special issues, under the following heads:—

New Zealand - - - - -	£. 505,899 14 3	
Abyssinia - - - - -	1,114,891 - -	
		1,620,790 14 3
Showing a deficiency, for which the sanction of Parliament will be required, of - - - - - - - - - £.		348,078 16 -

VI. To meet this deficiency, a sum of an equal amount has been applied, under the directions of the Lords of the Treasury, which is composed of the following items:—

	£. s. d.
Savings on other Votes, temporarily applied, in accordance with the 30 & 31 Vict. c. 120, s. 25 - - - - - - -	257,728 8 11
Excess of the aggregate receipts in aid over the estimated amount - - - - - - - - - - - -	90,350 7 1
£.	348,078 16 -

VII. With regard to the sum of 90,350 *l.* 7 *s.* 1 *d.* referred to, I have to observe, that certain sums were shown in the Army Estimates for 1867–68, under Votes Nos. 3, 7, 12, 13, and 25, as the amounts which it was estimated would be received in aid of Expenditure, amounting together to 984,246 *l.* Upon two of these Votes (Nos. 12 and 13) the amounts received exceeded the estimated amounts by an aggregate sum of 202,024 *l.* 17 *s.* 6 *d.*, while upon the three other Votes (Nos. 3, 7, and 25) the amounts received fell short of the amounts estimated by an aggregate of 111,674 *l.* 10 *s.* 5 *d.*; the difference between these two sums, viz.:—90,350 *l.* 7 *s.* 1 *d.*, is the amount which has been applied in diminution of deficiencies on Grants.

VIII. I have to refer to paragraph viii of my Report on the Army Accounts for 1866–67, and to the Treasury Minute of 14th of February 1868, printed therewith, as to the excess of receipts in aid beyond the estimated amounts; in accordance with the Report, and with the Treasury Minute referred to, it will appear that the sum of 202,024 *l.* 17 *s.* 6 *d.* should have been paid into the Exchequer as an Extra Receipt.

IX. In this view of the Account, it will be requisite that a Vote shall be taken for the sum of 202,024 *l.* 17 *s.* 6 *d.*, the net deficiency, as shewn in Statement B., appended to this Report.

B.

X. The Army Extra Receipts, as shown in the memorandum annexed to the Account, amounting to 512,214 *l.* 10 *s.* 8 *d.*, have been paid into the Exchequer.

XI. In accordance with the directions of the Lords of the Treasury, a note has been appended by the War Office to the Account, showing, under each Vote, the degree to which the Account of the financial year has been affected by the rectification of errors or omissions in the Accounts of previous years.

XII. Also, in accordance with the directions of the Lords of the Treasury, a statement has been annexed to the Account, showing the increased charge under the several Votes which has arisen out of the military operations in Abyssinia, and from the adjustment of the War Department Account with the Colonial Government of New Zealand, for advances made to defray the expenses connected with the Native Insurrection, &c.

XIII. The amount of the increased charge arising out of the Abyssinian Expedition, appears, by the statement, to be 1,272,066 *l.*, in aid of which, it is stated by the Treasury Letter of the 8th of January 1869, annexed to the Account, a sum of 1,114,891 *l.* has been issued out of the Vote of credit for that Expedition, which would leave 157,175 *l.* charged on ordinary Army Grants.

XIV. With respect to the statement of Expenditure in New Zealand, copies of correspondence with the War Department are annexed.

2.

XV. I have to notice, that a sum of 8,048 *l.* 11 *s.* 11 *d.* has been credited to Army Grants, being an amount due from the Colonial Government at Honduras. This sum appears to be the difference between the cost of maintaining troops in the northern district of Honduras, and their cost at Belize (their ordinary quarters); which difference the Legislative Assembly had pledged itself to make good. The principle recognised in other cases, in the preparation of the Army Estimates, however, appears to be, that all charges actually incurred on account of the Imperial Troops employed in defence of the Colonies, are provided for therein; and that contributions in aid of such Expenditure are paid into the Exchequer.

XVI. During

XVI. During the period of this Account the Colonial Government of Victoria has been relieved from claims against it, amounting to 1,725 *l.* 16 *s.* 1 *d.* The reduction of the claim arises, partly from the gift to the Colony of certain 32-pounder guns, and partly from the re-adjustment of the prices charged for other stores supplied.

XVII. Copies of a Letter from the War Office, and of its Enclosure, respecting the amount of Expenditure relating to the year 1867-68, not included in the Account, are submitted.

Wm. Dunbar,
Comptroller General of the Receipt and Issue
of Her Majesty's Exchequer, and Auditor General of
Public Accounts.

Exchequer and Audit Department,
30 January 1869.

(A.)

Sir, Exchequer and Audit Office, 30 November 1868.

I AM directed by the Comptroller and Auditor General to call your attention to the entries in the books of the War Office in respect of the "transfer of debit for the purpose of closing the several Accounts with the Colonial Government of New Zealand;" in consequence of the compromise of the respective claims between the Imperial Government and Colony of New Zealand.

On the receipt of the Treasury Minute, authorising the abandonment of the claims on the Colony, a letter was written from the War Department to the Treasury, suggesting that all the charges in respect of the Militia and Local Forces should be introduced into the Parliamentary Account, 1867-68.

To this the Treasury replied that "My Lords had no objection to the arrangement proposed, by which it would appear that the advances made to the Colony out of Army Grants on account of Local Militia and other Services not provided for in Army Votes, during the war, after giving credit to the Colony for certain items, will be sufficiently met by the sum of 505,899*l.* 14*s.* 3*d.* already advanced out of the Vote of Credit for the New Zealand War."

It would appear from the terms of this letter that the intention of the Treasury was that only charges for "Local Militia and other Services not provided for in Army Votes," should be included in the Parliamentary Account, and met, as far as possible, by the Vote of Credit.

The Lords of the Treasury do not appear to have contemplated the reversal of any Army charge already recorded against Army Votes, or the omission of any real Army Expenditure from the Parliamentary Account.

The following instances of such reversal occur in the entries referred to: 14,855*l.* 10*s.* 8*d.* credited to Vote 14, on account of the erection and maintenance of military buildings.

This sum was charged against Army Votes, in pursuance of Treasury authority of 15th September 1862, and was included in the prior year's statement in the Account for 1861-62.

£. 3,990 credited to Vote 2, Land and Water Transport, on account of horses purchased from the Colony by the Commissariat; charged to Army Votes in the Account for 1863-64.

The amount carried to the credit of Army Grants in respect of the Supplementary Vote of Credit, includes a sum of 16,400*l.* for "hire of Vessels," which amount was included in the Vote to cover the expense of the hire of the steam vessels "Wonga Wonga" and "Tasmanian Maid."

As the expense of the hire of these vessels has been charged on Navy Votes, it would appear that the sum of 16,400*l.* is due to Navy funds.

It is also observed that counter-claims put forward by the Colony, and now included in the compromise, are not recorded, although it would appear that a portion of such counter-claims are Army Expenditure. For instance, a sum of 75,955*l.* 1*s.* 5*d.* for river transport, appears to have been examined and admitted as chargeable to Army Votes.

This counter-claim by the Colony is met by the claim on the Colony for capitation; but by the mode of adjustment, net sums appear in the Account instead of gross amounts due to or from the Colony.

I am therefore directed by the Comptroller and Auditor General to request that he may be furnished with further information on the three points above referred to, viz.:

Reversal of charges already made against Army Votes.

Credit to Army Votes of a sum apparently due to Navy.

Net entries instead of gross.

I am, &c.
(signed) *C. L. Ryan.*

The Under Secretary of State for War,
War Office.

Sir, War Office, 7 December 1868.

I AM directed by the Secretary of State for War to acknowledge the receipt of your letter of the 30th ultimo, calling attention to the entries in the books of the War Office, in respect of the transfer of debit, for the purpose of closing the several Accounts with the Colonial Government of New Zealand, and requesting that the Comptroller and Auditor General may be furnished with further information on the subject.

With regard to the three points referred to in your letter; firstly,—

"Reversal of charges already made against Army Votes." It must be observed that in both the cases referred to in your letter, viz., the credit of 14,855*l.* 10*s.* 8*d.* to Vote 14, on account of the erection and maintenance of military buildings, and 3,990*l.* credited to Vote 2, on account of horses purchased from the Colony by the Commissariat, that the issues were withdrawn from the original Account prepared in this office, in consequence of Mr. Crosbie Ward having stated that they were in excess of the sums to be claimed by the Colony, and that it would be preferable to leave them in abeyance until claimed upon their own merits; but no such amount having been demanded, the credits have been taken as assets in the Settlement of the General Account.

Secondly.—"Credit to Army Votes of a sum apparently due to Navy."

The Secretary of State is of opinion that the transfer to the Admiralty of the 16,400*l.* referred

referred to would tend to create an embarrassment in the books of that office, which could only be set right by a transfer to the Treasury Chest, and possibly occasion the removal of the money once more to the credit of Army funds, or an informal payment into the Exchequer of a sum granted by Parliament.

Thirdly.—" Net entries instead of gross."

I am directed to observe, in regard to this point, that the following extract from a Treasury Minute of 1st August last, addressed to this office, justifies the net entries, to which exception is taken in your letter, viz. :—" My Lords see no objection to the arrangement proposed, by which it will appear that the advances made to the Colony out of Army Grants on account of local Militia and other Services, not provided for in Army Votes during the war, after giving credit to the Colony for certain items, will be sufficiently met by the sum of 505,899*l.* 14*s.* 3*d.* already advanced out of the Vote of Credit for the New Zealand War."

Under these circumstances, the Secretary of State is of opinion that it would not be advisable to make any alteration in the record of the Adjustment Account.

I am &c.
(signed) *W. Brown*

The Secretary,
Exchequer and Audit Office.

Sir, War Office, 11 January 1869.

In reply to your letter of the 6th January 1869, No. 88, I am directed by Mr. Secretary Cardwell to forward you the enclosed statement of Accounts received in this office, and not included in the Appropriation Account for 1867–68 ; and also of the Accounts relating to that year which had not been received in this office when the above Account for 1867–68 was closed.

I am, &c.
(signed) *W. Brown.*

The Secretary,
Exchequer and Audit Office.

1.—Statement of Accounts relating to the Year 1867–68, received in the War Office, which had not been examined or included in the Account for that Year.

Portsmouth Purveyor's Account, March Quarter, 1868.

2.—Statement of the Accounts which had not been received in the War Office when the Account for 1867–68 was closed.

Pay List, 7th Battery, 1st Brigade, R. A.	February 1868
Ditto, Additional Gunners, Honduras	1 October to 13 November 1866
Colonial Allowances, 50th Foot, Sydney	June Quarter 1867
Ditto ditto ditto	December Quarter 1867
Pay List, Army Hospital Corps, China	March Quarter 1868
Ditto ditto New Zealand	1867–68
Ditto ditto St. Helena	1 October 1867 to 31 March 1868
Bengal Presidency	1 October 1866 to 31 March 1867
Ditto	1867–68
Bombay	1 October 1867 to 31 March 1868
Madras	1867–68

Indian Government :—Account for Pay, &c., of Native Troops in Straits Settlements, 1867–68.

Copy of Treasury Minute, dated 22nd February 1869, on the foregoing Report of the Comptroller and Auditor General.

My Lords read the Report of the Comptroller and Auditor General on the Appropriation Account of the Grants for the Army Services for the year 1867–68, in which he states that the Account has been rendered in a different form to that of previous Accounts, the estimated amount of appropriations in aid—that is, the sums to be received from other departments, private individuals, or foreign Governments in repayment of the cost of services performed for them—being included therein, so that the Account has " the advantage of showing the gross Expenditure under each Vote, instead of the net Expenditure after deducting the appropriations in aid."

In the Account, as thus prepared, the net sums granted by Parliament are added to the amounts which it was estimated would be repaid by other Departments, &c., and the gross

gross Expenditure under each Vote is compared with the total thus arrived at, in order to show the amount of saving or deficiency upon the Estimate.

The Comptroller and Auditor General, though generally approving of the altered form of Account, disagrees with this mode of making the comparison between Estimate and Expenditure, and considers that in those cases where the appropriations in aid have realised *less* than the Estimate, the deficiency, as stated in the Account, should be increased, or the savings diminished. In the cases where the appropriations in aid have realised *more* than the estimated amount, no alteration of the results of comparison is suggested. In other words, he thinks that the Expenditure should be compared in some cases with the total amounts of the details of the Estimates presented to Parliament, and upon which the net Grants were based, and in other cases with figures which are partly made up of estimate, and partly of fact, and which are only ascertained at the end of the period to which the account relates.

My Lords are aware of the difficulties which surround this subject of the manner of applying and exhibiting the appropriations in aid; and it is evident that the apparent advantage of the present form of Account in which these sums are shown, as compared with former Accounts from which they were excluded, is but the result of a balance of objections which may be urged against either.

The great objection to which the former mode of stating the Account was open, was strikingly illustrated in the Account for the year 1866-67, in which a real excess of Expenditure of 59,862 *l.* beyond the gross Estimate for one of the Votes, was shown as a saving of 133,078 *l.*, in consequence of the appropriations in aid which were carried to the credit of the Vote having exceeded the estimated receipt by a sum of 192,940 *l.*

As was stated in the Treasury Minute of 10th February 1868, such a system introduced "into the Grant an element of great uncertainty, which occasionally places at the disposal of the Department large sums beyond the amount appropriated by Parliament to the service." Parliamentary Paper, No. 87, of 1868.

On the other hand, my Lords are not disposed to adopt the view of the Comptroller and Auditor General, by directing a transfer or surrender to the Exchequer of the excess of repayments over the Estimate on the one hand, and on the other, a transfer to Army funds from the Abyssinian Vote of credit of a precisely similar amount.

My Lords will give their further careful consideration to the question of the best mode of dealing with the appropriations in aid.

The total deficiencies arising on certain Votes of the Army Grant for 1867-68, amounting to 1,968,869 *l.* 10 *s.* 3 *d.*, have been diminished by sums applied out of the Votes for the New Zealand War and Abyssinian Expedition, amounting to 1,620,790 *l.* 14 *s.* 3 *d.*, leaving to be provided for, 348,078 *l.* 16 *s.* The total surpluses under other Votes, which have been temporarily applied in aid of deficiencies, amount to 257,728 *l.* 8 *s.* 11 *d.*, leaving as a net deficiency, 90,350 *l.* 7 *s.* 1 *d.* This last sum is the net amount received in excess of the sums deducted from the gross Estimate in respect of appropriations in aid, which has also been temporarily applied in full of the total amount of the deficiencies. My Lords will cause resolutions to be submitted to the House of Commons for sanctioning the application of the two sums last mentioned to meet the amount of the deficiencies otherwise unprovided for.

The only other observation in the Report which appears to call for notice, is that made in the 15th paragraph, in which the Comptroller and Auditor General notices that a sum of 8,048 *l.* 11 *s.* 11 *d.* has been credited to Army Grants, which should have been paid into the Exchequer, that sum being of the nature of a contribution by a Colonial Government in aid of Military Expenditure.

My Lords agree with the Comptroller and Auditor General as to the proper mode of treating this amount. As, however, an alteration in the Account in respect of this sum would merely have the effect of increasing by an equal amount both the net deficiency and the extra receipts payable into the Exchequer, and as the further deficiency thus created would be necessarily met by a transfer of the same amount from the Vote for the Abyssinian Expedition, my Lords do not consider it desirable to amend the account.

Transmit copy of this Minute to the Comptroller and Auditor General, and to the Secretary of State for War.

Let the Account, &c., and the Report of the Comptroller and Auditor General thereon, together with a copy of this Minute, be laid before the House of Commons.

ARMY.

APPROPRIATION ACCOUNT,
1867-68.

APPROPRIATION ACCOUNT of the Sums granted by Parliament for Army Services, for the Year ended 31 March 1868; together with the Report of the Comptroller and Auditor General, and Treasury Minute thereon.

for the Years 1847-8 and 1867-8 respectively (the former re-classified for the purpose Period), and the Causes of Variation.

Causes of Variation.

The following is a Statement of the Numbers of Men and Horses Voted for the Two Years.

	1847-48.		1867-68.	
	Men.	Horses.	Men.	Horses.
Royal Horse Artillery	616	451	2,387	1,516
Riding Establishment	23	15	225	122
Household Cavalry	1,308	822	1,317	825
Cavalry of the Line	7,078	4,978	10,023	5,889
Royal Artillery	10,015	590	18,195	2,426
Royal Engineers	1,738	-	4,693	307
Foot Guards	5,260	-	5,953	—
Infantry of the Line	84,798	-	74,557	—
Commissariat and Store Staff and Military Train Corps	-	-	2,699	996
Army Hospital Corps	-	-	1,000	—
West India Regiments	3,414	-	3,468	—
Colonial Corps	5,936	600	4,834	450
Indian Depôts of Cavalry and Infantry	604	-	7,894	300
	120,790	7,456	137,245	12,831

The principal Increases are as follows:—	£.
1. The Charge for the Pay of the increased force of Royal Artillery and Royal Engineers	495,414
2. The Charge for the Pay of the increased force of Cavalry	147,254
3. The Cost of the establishments of the Military Train, the Army Hospital, and the Commissariat and Military Store Staff Corps, all of which were raised subsequently to 1847	114,773
4. The Increase of Pay awarded to all Non-commissioned Officers and Men under the provisions of the Royal Warrant, dated the 1st August 1867	416,750
5. The Charge for Beer-money for the increased force	24,000
6. The operation of the Royal Warrant granting Good Conduct Pay	88,563
7. The establishment of Depôt Battalions	41,117
8. " " the Schools of Gunnery and Musketry	36,569
c9. The Charges for Depôts of Regiments of the Line serving in India, and similar expenses for the Artillery serving there	226,021
*10. Furlough Pay of Officers on leave from service in India	130,000

* These sums are included in the amount deducted from the Total Estimate for the year 1867-8, *see* p. 12.

This difference is mainly attributable to the increase in the numbers of both men and horses of the Army; the fixing the stoppage to be made from the soldiers' pay for the bread and meat ration at 4½ *d.* per diem, instead of the actual cost of the ration not exceeding 6 *d.*; and to the increased prices paid for provisions. The increased estimated charge for provisions, 1867-8, was 399,937 *l.*, and that for forage, 228,000 *l.*, beyond the estimated amounts in 1847-8.

The Commissariat charges for the troops in Ceylon, Australia, and Straits Settlements, have only of late years been included in the Army Estimates; they were formerly defrayed direct by those Colonies.

This Increase may be ascribed—

1. To the increase to the Army, as stated in the remarks opposite Vote 1.
2. To the operation of the Regulations for the issue of free kits, the charge for which was, in 1847-8, provided for under Vote 1, as Bounty to Recruits.
3. To additional issues both of clothing and necessaries to the men, and to the improved quality and pattern of the clothing.

11	Enrolled Pensioners and Army Reserve Force -	48,000	68,000	20,000	- -
	Carried forward - - - £.	5,784,977	10,105,900	4,320,923	—

CAUSES OF VARIATION.

1. An increased force is provided for.

2. Greater attention has been paid to sanitary arrangements, under which a larger space is allowed for each man in barrack rooms; a larger number of rooms, therefore, are occupied and furnished.

3. A more liberal allowance of fuel and light has been granted, and issues of stores and furniture for recreation rooms, gymnasia, &c. form a new charge.

4. Separate accommodation is given to married soldiers.

5. A large demand for hired buildings to be used as barracks, more particularly in the Colonies and Settlements abroad, has existed.

The establishment of the Chaplain's Department has been increased, mainly to meet the demands of camps and isolated stations which have been created since 1847.

This variation is the net difference between the following sums, viz.:

		1847–8.	1867–8.
		£.	£.
Gross Expenditure		52,337	87,370
Less—			
Amount of unissued Pay of Men in confinement		33,000	66,370
	£.	19,337	21,000
		£. 1,663	

The additional Expenditure has mainly arisen—

1. From there having been attached to the Department of the Judge Advocate General, three Acting Deputy Judge Advocates, for the purpose of attending Courts Martial in Ireland, Manchester, &c., and to render them more effective.
2. From the establishment of Military Prisons at Aldershot, Southwark, Shorncliffe, Barbados, Bermuda, Halifax, N. S., Malta, Mauritius, and Quebec.

The medical staff has been greatly increased, and higher pay has been granted.
The Purveyor's Department was practically created after the Crimean War.
The remuneration of the attendants in the hospitals has been considerably improved.
Special hospitals for the wives and families of soldiers have been established.
The hospital ration has been greatly varied and improved.

In 1847, the Militia consisted of merely the permanent staff; since then it has been completely organised, and the larger portion of it called out for training every year.

This small difference arises from a re-arrangement of the mode of meeting the charge for non-commissioned officers, who were formerly paid from the contingent allowance; they are now paid direct, and the allowance has been reduced to meet the charge.

This force was raised in 1859, the first Vote taken for the capitation rate and permanent staff was in the year 1861–2

The variation in this case represents the increased pay awarded by the Royal Warrant, dated 1st August 1867.

	Carried forward - - - £.	7,264,867	12,907,300	5,790,965	148,532

CAUSES OF VARIATION.

Since 1847-8 not only has there been a considerable increase in the Army itself, more particularly in Artillery, but the whole Militia and Volunteer Forces have been raised and organised. The whole of these forces have been armed with rifles, and for these much improved ammunition is required.

A complete revolution has also taken place in Ordnance, and much larger and more expensive classes of guns and carriages have been introduced.

Most classes of projectile are much more costly than formerly.

The fortifications at home and abroad have also been greatly enlarged and re-constructed, and it has been necessary to provide for their armaments, as well as for the armaments on the re-construction of the Navy.

This variation has mainly arisen from the erection of regimental schools and libraries, reading and recreation rooms, married soldiers' quarters, gymnasia, military prisons, billiard rooms, and from greater attention to sanitary requirements in barracks.

The difference between the Estimates for Educational Purposes for the two years under consideration has arisen thus:—

1. The establishment of the Council of Military Education, for the purpose of supervising the various institutions already in existence, and the Regimental Schools of the Army.

2. The number of cadets at the Royal Military College has increased from 180 to 300, including Queen's cadets, who are educated free of charge; there has been a corresponding increase of charge for both superintendence and instruction.
   The Royal Military Academy has become an institution of much greater importance and value, owing to the more advanced age to which cadets remain, and the higher studies pursued there; the superintendents are more highly paid, and the instructors are more numerous. The officers of Artillery and Engineers who are employed there as instructors are now supernumerary to the numbers of their corps, whereas formerly the charge for their pay was included with that for their regiments.

3. The establishment of a Staff College (independent of the Royal Military College) for the purpose of qualifying officers for filling higher army positions.

4. The creation of a Normal School as an adjunct to the Royal Military Asylum, for the training of regimental schoolmasters, &c.

5. The number of boys in the Hibernian Military School has been increased from 350 to 410, and their rations and clothing have been greatly improved.

6. The Department of Instruction of Artillery Officers has been strengthened, in order to train Officers of Artillery to take up the important positions of superintendence in the large manufacturing establishments.

7. The difficulty experienced in obtaining properly qualified candidates to fill vacancies in the rank of assistant surgeons of the Army, rendered it necessary to extend the Military Medical School. All candidates for the Medical Service of the Army undergo a special course of instruction and examination before appointment to commissions.

This additional expenditure was allowed by the Lords Commissioners of Her Majesty's Treasury, for the purpose of advancing the completion of the Surveys of the United Kingdom by a prescribed date.

This variation between the two estimated amounts is attributable mainly to the following new Services:

1. The establishment of the Ordnance Select Committee to investigate the merits of inventions, and to superintend and report upon the results attending experiments.

2. The cost of Special Committees appointed to investigate the qualities of gun-cotton, and to superintend the sanitary arrangements made in Hospitals and Barracks.

3. The purchase of Stores for Experimental Services generally, incidental expenses connected therewith, and Rewards to Inventors.

4. The expenses attendant upon carrying out the provisions of the Act for preventing Contagious Diseases.

5. The Pay, &c. of Military Attachés Abroad.

6. Other Services of a Special and Temporary character.

Vote.	Heads of Service.	Estimate.		Estimate, 1867–8.	
		1847–8.	1867–8.	Plus.	Minus.
		£.	£.	£.	£.

18	Administration of the Army - - - -	197,107	218,600	21,493	- -
	Carried forward - - - £.	7,461,974	13,125,900	5,812,458	148,532

Causes of Variation.

The difference here shown is a net result, or additional expenditure, less the sum of 34,947 *l.*, estimated in the year 1847-8 as an Army Charge for Postage, since defrayed from the Grants for Civil Services.

The Estimated Charge on account of the united offices for the Administration of the Army for the two years under consideration may be stated as follows:

1847-8.		1867-8.	
Staff:	£.	Staff:	£.
War Office	7,130		
Ordnance	13,682		
Commissariat	1,000	Secretary of State's Department	31,715
Army Medical Department	2,000		
Chaplain General	500		
Head Quarter Departments	17,098	Department of the Field Marshal Commanding in Chief	22,448
£.	41,410	£.	54,163
Salaries of Clerks, &c. &c.:		Salaries of Clerks, &c.:	
War Office	26,983		
Ordnance	74,805		
Commissariat	3,385	Department of the Secretary of State	131,739
Army Medical Department	1,687		
Chaplain General	281		
Head Quarter Departments	13,609	Department of the Field Marshal Commanding in Chief	27,280
£.	120,750	£.	159,019
Topographical Department	Nil.	Topographical Department	5,385
Postage:			
War Office	21,035		
Ordnance	8,000	Transferred to the Civil Service Estimates	Nil.
Head Quarter Departments	5,912		
	34,947		
Total £.	197,107	Total £.	218,567

	£.	
1867-8, Plus	21,460	
Additional Sum Voted	33	
Leaving the Sum of £.	21,493	per Estimates as the Excess.

But as no cognisance has been taken of the Postage of late years, the extra net expenditure amounted to 56,440 *l.*, which may be attributed—

1. Civil Staff.—To the withdrawal of the Secretary of State's Department from the Colonial Office, the appointment of the Director of Clothing, of Contracts, the Purveyor in Chief, the Superintendent of the Barrack Department, the Assistant Accountant General, the Assistant Solicitor, &c. Other new appointments were made, but they were for the most part substitutes for others whose functions and emoluments were nearly identical.

2. Military Staff.—To the amount of Lodging Allowances granted to the Head Quarter Staff being inserted in the Estimates for 1867-8 under Vote 18, while they were provided in a different Vote in 1847-8. Also to the employment of an extra Aide-de-Camp, Private Secretary to the Field Marshal Commanding in Chief, and additional officers in the capacity of Assistants and Deputy Assistant Adjutants, and Quartermasters General.

3. Clerical Staff, &c.—To the duties connected with the Augmentation of the Army, the alteration of Arms and Equipment for the soldier, the manufacture of re-armaments for Land and Sea Service, the periodical calling out of the Militia, the organisation of the Volunteer Forces, and the extension of Education in the Army. The audit of Commissariat Expenditure was also transferred from the Audit Office.

4. To the establishment of the Topographical Department to meet the requirements of the day in regard to military affairs.

Per Estimate, 1847–8 { Army - - - £. 6,419,384; Ordnance - - - 2,679,124; Commissariat - 494,432 } = £.				9,592,940	14,599,330	5,207,194	200,804

CAUSES OF VARIATION.

This Extra Expenditure is owing to the extension of the list of Serjeants, who, pursuant to Her Majesty's Warrant of the 19th December 1845, became entitled to receive annuities as rewards for distinguished and meritorious services; and to the establishment of Pensions to Non-commissioned Officers and Privates upon whom the distinction of the Victoria Cross had been conferred. The charges on account of rewards to officers were slightly larger in 1867–8 than in the earlier year.

These variations result from the casualties during the 21 years having been larger than the appointments to the several non-effective lists.

This fluctuation between the Estimates of the two years under consideration is partly the result of—

1. The withdrawal from the Army Estimates of the amount of payments on account of Prize Money authorised by the Commissioners of Chelsea Hospital; and
2. The reductions made in the establishment of, and the number of patients subsisted in, Kilmainham Hospital. In regard to the latter, the 207 persons were, in the year 1847–8, subsisted; but in 1867–8 no more than 141 were accommodated in that institution.

This variation is attributable to the casualties during the 21 years having been larger than the number of men pensioned.

This sum of 44,073 *l.* represents a net amount, the same arising from certain increases and diminution in the charges for superannuation allowances, &c. In the first place, the retirement of many of the members of the Clerical Staff formerly belonging to the separate departments, whom it was necessary, from length of service and other reasons, to place on the Pension List; the cost of which was considerably increased by the amounts awarded being high in consequence of the length of service. In the second place, the number of artificers, &c, to whom superannuation was granted, was larger than in the year 1847–8, arising doubtless from the increased demand for labour at the manufacturing departments and by every branch of the service. Gratuities under the Act 22 Vict. c. 26, have also of late years been granted in special cases.

The embodiment of the Militia in 1854–5, and the casualties in the non-effective lists of the Disembodied and Local Militia, to which but few new appointments have been made of late years, caused this fluctuation between the Estimates for this Service for the two years in question.

EXPLANATORY PAPER showing the TOTAL ESTIMATE (including certain Appropriations in Aid, ARMY, ORDNANCE, COMMISSARIAT SERVICES, and for the RESERVE

serving in India having been contributed from local revenues to Her Majesty's Exchequer for the purpose of repayment of the advances at home for

ABSTRACT showing the TOTAL ESTIMATE and EXPENDITURE for ARMY, ORDNANCE, and COMMISSARIAT SERVICES for the Years from 1847-8 to 1867-8 respectively, that for the Non-Effective and Reserve Forces being stated separately; and, STATEMENT detailing the VARIATION between the first and last Year.

(*Lord Elcho.*)

Ordered, by The House of Commons, *to be Printed,*
11 *August* 1869.

STATEMENT showing the AMOUNTS included in the ARMY ESTIMATES, 1869-70, for MILITARY PURPOSES in the COLONIES, and the Probable REPAYMENTS by the several Colonies on the same Account.

Note.—This Statement is exclusive of the cost of Arms, Accoutrements, Barrack, Hospital, and other Stores, the greater portion of which is supplied from this country, and the value of which cannot now be stated; it is also exclusive of any proportion of Recruiting Expenses, Head Quarter Administrative Expenses, and Non-effective Charges.

The establishment at each station of the various Departments of the Army is shown in detail (together with other particulars) in the several Appendices of the Army Estimates.

War Office,
23 February 1869.

EDWARD CARDWELL.

(PRESENTED TO PARLIAMENT BY HER MAJESTY'S COMMAND.)

Ordered, by The House of Commons, *to be Printed,*
26 *February* 1869.

STATEMENT showing the PROBABLE AMOUNTS that will be REPAID by the several COLONIES, and Paid into the Exchequer as COLONIAL CONTRIBUTIONS in Aid of MILITARY EXPENDITURE.

COLONY.	Probable Sum to be repaid by the Colony during the ensuing Year.

No. 2.

of the Subdivisions of the VOTES included in the foregoing Statement, together with the Causes of Variation and the Estimate.

EXPENDITURE, Less than Estimate.	EXPENDITURE, More than Estimate.	CAUSES OF VARIATION.
£. s. d.	£. s. d.	
- - -	16,432 7 5	This Excess originated— 1st. From the Charges for the pay of the General Staff for Home Service having been made for the period from 1st January 1867 to the 31st March 1868, it having been determined in future that the officers shall receive the amounts due to them one month in arrear, rather than three, as heretofore. 2nd. From certain extra expenses incidental to the Abyssinian Expedition.
- - -	7,523 5 1	This Excess arose for the most part from Extra Expenses having been incurred for Subordinates of the class here provided for proceeding to Abyssinia to be employed with the Expeditionary Force.
- - -	83 17 1	This Excess represents a liability for Colonial Services in 1866-67, which came into course of payment after the 1st April 1867.
- - -	91,820 8 7	This Excess has been chiefly caused by the following circumstances:— 1st. The strength of the portion of Her Majesty's Army serving at Home having been larger than the number prescribed by the Establishment, viz.:—

British Establishment.	Effectives: More than Establishment.	Less than Establishment.
Officers	128	–
Non-commissioned Officers	–	420
Trumpeters, Drummers, and Buglers	31	–
Rank and File	–	792
	159	1,212
Indian Depôts.		
Officers	69	–
Non-commissioned Officers	42	–
Trumpeters, Drummers, and Buglers	–	20
Rank and File	2,644	–
	2,914	1,232

While that of the Queen's Forces in India fell short of the same, to the extent of 170 Officers; 418 Trumpeters, Drummers, and Buglers; and 3,505 Rank and File; as shown by the monthly average taken from the numbers reported in the Adjutant General's Returns.

2nd. The amount granted by Parliament for increased pay to the Army proving insufficient, the number of claimants under the provisions of the Royal Warrant, dated 29th June 1867, having been larger than could have been expected when the Supplemental Estimate for the same was prepared.

- - -	1,834 2 3	This Excess may be ascribed to a larger number of Officers having preferred claims to additional pay for length of service than was anticipated.
- - -	117,694 – 5	

EXPLANATORY STATEMENT of the Sums Expended, "More or Less" than those Estimated, under each of the

Subdivisions of the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*continued.*

EXPENDITURE, Less than Estimate. £. s. d.	EXPENDITURE, More than Estimate. £. s. d.	CAUSES OF VARIATION.
- - -	117,694 - 5	
- - -	3,750 18 4	This Excess may be ascribed to the beneficial effects of the Schools, Libraries, and Instruction in Gymnastics, &c. The Estimate for this item of Expenditure was based upon the number of Men in receipt of Good Conduct Pay at the date when the Army Estimates were in course of preparation, but the number of Claimants since that period exceeded that contemplated.
- - -	6,725 8 8	This Excess is traceable to the same cause as that upon the item, "Pay."
- - -	580 3 3	This Excess is owing to a short Estimate.
1,001 10 11	- - -	This Saving may be ascribed to some Officers of the Royal Engineers having been on extended Leave of Absence whilst provision was made for the full amount of Extra Pay for the total Establishment of that Force.
- - -	596 2 2	The non-arrival of certain Corps from Foreign Stations at the time expected in 1867–68, whose contingent allowance was voted at the lower rate, contributed to this excess.
2,184 19 10	- - -	This Saving has arisen from the Estimate for Farriery Allowance for the Cavalry of the Line, Royal Artillery, &c., &c., having been based upon the Establishment, while the charge on account thereof was for the Horses actually effective, besides which one Cavalry Regiment was on Service in Canada, and drew Supplies from the Public Stores.
- - -	3,313 11 8	This Excess is owing to the increased Price of Provisions during the year 1867–68, which the usual Allowance in aid of the Stock Purse Fund of the Household Infantry proved insufficient to meet.
1,418 12 5	- - -	An anticipated increase of Expenditure was provided for in the Estimate, but circumstances prevented the arrangements in view at the commencement of the Financial Year being fully carried out.
164 11 8	- - -	This Saving may be ascribed to the Troops having been withdrawn from certain Stations Abroad, where Mess Allowance is granted, in consequence of Sickness.
1,022 11 5	- - -	This Sum represents a liability of the year 1867–68, which came into course of payment after the 1st April 1869.

EXPENDITURE, Less than Estimate.			EXPENDITURE, More than Estimate.			CAUSES OF VARIATION.
£.	s.	d.	£.	s.	d.	
5,792	6	3	132,660	4	6	
-	-	-	736	18	6	The sum of 11,608 *l.* was expended for this Service in course of the Year 1866–67, while the Estimate for that period provided for disbursements to the extent of 10,908 *l.*; consequently, as the Expenditure during the twelve months ended the 31st March 1868 exceeded that for the prior period by merely 220 *l.*, and the Estimate for the same by not more than 184 *l.*, the Excess now reported may be considered attributable to the doubtful data upon which the provision made in the Estimate was based.
-	-	-	3,010	-	1	This Charge is on account of the period from the 1st February to the 30th September 1867, for which no provision was made, as it was expected that the Island would have been garrisoned by Her Majesty's regular Forces instead of by Indian Native Troops. This Extra Expenditure has received the sanction of the Lords Commissioners of Her Majesty's Treasury in letters dated 10th February and 18th September 1868, respectively.
18,827	15	7	-	-	-	This Saving is owing to a less number of officers having been on leave of absence from India on private affairs, Sick leave, &c., than was expected.
-	-	-	309	13	8	This Excess represents charges for the payment of the Farriery Allowance and the difference between the higher and lower rates of pay to subordinates at this Depôt, when the various changes took place on vacancies occurring.
-	-	-	251	16	7	This Excess is partly attributable to an allowance having been granted to the Staff of Depôt Battalions in lieu of Stationery formerly supplied in kind by the Stationery Office, which arrangement was sanctioned by the Lords Commissioners of Her Majesty's Treasury in letter dated 31st October 1867; and partly by the Increased pay granted by the Royal Warrant of the 29th June 1867 to the Staff Serjeants.
-	-	-	347	12	8	In the Estimates for the year 1866–67 was provided a sum of 989 *l.* for defraying the Charges for Postage, and miscellaneous expenses of officers, while in that for 1867–68, no more than 429 *l.* was voted for the same Service. As the aggregate Expenditure for the Pay and Contingencies for the Recruiting District Establishment is about the same for each of the two years, this Excess is attributable to the item first referred to not having diminished to the extent expected; furthermore the duties of the Recruiting Districts have been more onerous in the latter year.

EXPENDITURE, Less than Estimate.			EXPENDITURE, More than Estimate.			CAUSES OF VARIATION.
£.	s.	d.	£.	s.	d.	
24,620	1	10	137,316	6	–	
508	9	6	-	-	-	This Item was for the first time shown separate in the Estimates for 1867–68; but owing to the charge for Recruiting Sergeants, &c., in stationary quarters being very fluctuating, no correct data could be established upon which to base the Estimate; a sum "on account" was voted, which subsequently proved to be more than sufficient.
102	17	9	-	-	-	An increased provision was made in the Estimates for the payment of these allowances as it was expected that the demand for the Services of Superintending Officers would be increased; but this expectation was not realised, as the Actual Expenditure for 1867–68 slightly exceeds that of the previous year.
-	-	-	4,764	–	5	This Excess has been caused by a larger number of Recruits having been raised, and of discharged Soldiers re-entering the Army under the superintendence of the Staff Officers of Pensioners, than could have been anticipated at the commencement of the financial year.
-	-	-	26,258	7	8	This Excess is owing to a larger number of Recruits having been raised, and of men re-engaging than was provided for, it not having been expected that more than the usual ratio of men would have entered the Army.
196	17	4	-	-	-	The employment of private Medical Practitioners in examining Recruits having been resorted to less than usual, conduced to this Saving.
1,276	–	–	-	-	-	This Saving may be ascribed to the Recruits raised not having travelled the distances for which Marching and Travelling Expenses, &c., were provided in the Army Estimates, 1867–68.
-	-	-	11,129	5	5	A number of men beyond that expected re-engaged in the Colonies, and caused this extra Expenditure; in aid of which a Supplemental Grant was made, and which proved inadequate.
-	-	-	-	-	-	—
1,257	16	8	-	-	-	This Saving is owing to a less number of Acting Veterinary Surgeons having been employed than for whom provision was made in the Estimates.
24	19	11	-	-	-	This Saving is the casual difference between Actual and Estimated Expenditure.

- - -	- - -	—
33 10 8	- - -	This Saving is the casual difference between Actual and Estimated Disbursements; the data upon which the calculation was based in framing the Estimate having been somewhat higher than the sums to which the Officers were entitled.
- - -	4,230 11 8	This Excess has partly arisen from the remounting of the Division of the Military Train which returned Home from New Zealand in course of the year 1867–68, for which no more than 3,600 *l.* was provided in the Estimates for that period, while the cost of the Horses purchased for the service of this Corps amounted to 7,824 *l.*; and partly to the per-centage of Casualties in the other arms of the service having been larger than contemplated. The extra expenditure, first referred to, received the sanction of the Lords Commissioners of Her Majesty's Treasury in letter, dated 5th August 1868.
- - -	535 4 4	This Excess may be ascribed to the same causes as that which has occurred on the item "Purchase of Horses."
46 14 4	- - -	This Saving is owing to the Charges of a contingent character having been less than could have been anticipated.

EXPENDITURE, Less than Estimate.			EXPENDITURE, More than Estimate.			CAUSES OF VARIATION.
£.	s.	d.	£.	s.	d.	
33,165	5	5	185,006	5	2	
2,092	4	8	-	-	-	This Saving has been occasioned by the Dividends arising from the Deposits by the Soldiers in the Military Savings Banks, which have been invested in Government Securities, exceeding the amount of Interest due to the Men during the year 1867–68, which circumstance caused the sum voted to lapse.
101	2	6	-	-	-	The Sum voted for this Service was one "on account," as the Expenditure fluctuates according to the circumstances which make it necessary to employ portions of Regiments away from Head Quarters, and place them in such positions as to need an Acting Staff.
-	-	-	251	5	-	The number of Officers promoted from the Rank of Non-Commissioned Officers having exceeded that for which a provision was made, caused this Excess.
-	-	-	13,300	3	6	This Excess is attributable to the operations of the Limited Service Act.
-	-	-	1,185	16	9	This Excess has partly arisen from the amount of Gratuities granted to Men of Meritorious Conduct, and invested in the Military Savings Banks, having been larger than in previous years; and partly from the number of men serving in the Australian Colonies, &c., having been discharged and become settlers under the provision of the Royal Warrant, dated 1st July 1848, exceeding that contemplated.
-	-	-	2,016	2	4	This Expenditure is owing to certain allowances consisting of Batta, &c., paid to troops serving in Abyssinia.
-	-	-	974	3	11	A diminution of the number of Non-Commissioned Officers, &c., employed in the capacities specified, during the year 1866–67, was contemplated, but the duties in the district offices of the Royal Artillery and in those of the Paymasters would not admit of the reduction contemplated.
42	6	9	-	-	-	The men employed in the various capacities specified under this head of Service had to be instructed in their duties, and as the number qualified in course of the year ended 31st March 1868 fell short of that expected, particularly in the rank of class instructors, the Establishment could not be completed.

EXPENDITURE, Less than Estimate.	EXPENDITURE, More than Estimate.	CAUSES OF VARIATION.
£. s. d.	£. s. d.	
35,913 10 11	202,733 16 8	
- - -	531 14 5	The men employed in the various capacities specified under these heads of Service had to be instructed in their duties, and the number qualified in 1867-68 to be placed on the Establishment was larger than was expected; in fact, a less amount was voted than in the previous year, it not being supposed that more than the 1,000 *l.* would be required. Hence the reason of this Excess.
1,322 4 8	- - -	In 1866-67 the Expenditure under this head amounted to 5,260 *l.* – *s.* 4 *d.*, and the sum provided in the Estimates for the same period was 5,450 *l.*; but in 1867–68 the Vote was 7,000 *l.*, and the Disbursements amounted to 5,677 *l.* 15 *s.* 4 *d.*, consequently it may be inferred that the exigencies of the Service did not vary; notwithstanding that the sickness which prevailed at certain Tropical Stations in the period first referred to caused a contrary expectation. Hence the Saving here reported.
- - -	3,250 14 1	The Abyssinian Expedition and other circumstances connected with the Service, rendered extra Expenditure under this head necessary.
63 17 6	- -	This Saving is owing to the charges on account of Insolvent Soldiers having been less during the year 1867-68 than in the prior period.
- - -	101,306 1 4	This charge represents the total advances made from Army Funds to the Local Government of New Zealand for the payment of Colonial Military Levies, &c., during the period of the late Native Insurrection, the amount of which was authorised by the Lords Commissioners of Her Majesty's Treasury, in Letter, dated 1st August 1868, to be charged against Army Funds, the same forming part of the sum of 505,899 *l.* 14 *s.* 3 *d.*, transferred from the Vote of Credit, amounting to 764,829 *l.*, granted by Parliament for the adjustment of the Advances from Army Funds, and by the Treasury Chest, New Zealand, on account of the War in that Colony.
- - -	105 17 3	This Excess has been caused byt he adjustment of the Account with the Colonial Government of New Zealand for Advances from Army Funds, for the purpose of defraying the Expenses incurred for the Local Militia Native Levies as above mentioned.

EXPLANATORY STATEMENT of the Sums Expended, "More or Less" than those Estimated,

(6883—147.)

Sir, War Office, Pall Mall, 11 February 1868.

I AM directed by Secretary Sir J. Pakington to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that a claim has been preferred by the Secretary of State for India, on account of advances from the revenue of India for the pay, &c., of Native Troops employed at Labuan, for the periods stated in the margin; and that no provision for the payment of the same was made in the Army Estimates for the current year (1867-68), it having been in contemplation to garrison the Straits Settlements and Labuan with troops belonging to Her Majesty's Regular Army, but which arrangement has not yet come into full operation.

From 1st February to 31 March 1867.	£. 1,358 1 2
For June Quarter, 1867	515 3 3
	£. 1,873 4 5

Under these circumstances I am instructed to request that you will move their Lordships to sanction the sum of 1,873*l.* 4*s.* 5*d.* being temporarily defrayed from the saving upon the ordinary Grants for the Army.

I am to add that the Hong Kong Corps, provided for, has not been raised.

I am, &c.

To the Assistant Secretary to the Treasury. (signed) *Douglas Galton.*

(6883—148.)

Sir, Treasury Chamber, 18 February 1868.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to state, for the information of Secretary Sir John Pakington, with reference to your letter of 11th instant, that my Lords approve of the sum of 1,873*l.* 4*s.* 5*d.*, the amount due to the India Office, on account of the pay of Indian Native Troops employed at Labuan, being temporarily defrayed as proposed, from the anticipated saving on the general Votes, in the event of Vote 1 not being sufficient to meet the expenditure.

6883—147.

I am, &c.

The Under Secretary of State, War Office. (signed) *Geo. A. Hamilton.*

(6883—151.)

Sir, War Office, Pall Mall, 10 July 1868.

WITH reference to Mr. Hamilton's letter of the 18th February last (2742—68), in reply to a communication from this Department, dated the 11th of the same month, respecting charges on account of the pay of the Native Indian Troops employed at Labuan during the quarter ended the 30th June 1867, I am directed by Secretary Sir John Pakington to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that a further claim for the repayment of advances made from the Indian Revenue in course of the subsequent quarter, has been preferred by the Secretary of State for India, and that the same, amounting to 1,742*l.* 4*s.* 6*d.*, has been debited in the books of this office against the Army Grants for the year ended the 31st March last, subject to their Lordships' approval, the service not having been provided for in the Army Estimates for that period.

I am, &c.

The Secretary to the Treasury. (signed) *Douglas Galton.*

(6883—153.)

Sir, Treasury Chambers, 18 September 1868.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 10th July respecting charges on account of the pay of the Native Indian Troops employed at Labuan, stating that a further claim for the repayment of advances made from the Indian Revenue during the quarter ended 31st September 1867, has been preferred by the Secretary of State for India in Council, and that the same has been debited in the books of the War Office against the Army Grants for the year ended 31st March last, to the amount of 1,742 *l.* 4*s.* 6*d.*

I am to request that you will signify to the Secretary of State my Lords' approval of the arrangement.

I am, &c.

The Under Secretary of State for War, &c. &c. &c. (signed) *William Law.*

(11 Depôt Battalion—206.)

Sir, War Office, Pall Mall, 24 October 1867.

IT being considered desirable that from the 1st January next the issue of stationery in kind to depôt battalions should be discontinued, and a commuted allowance granted in lieu, as in the case of battalions of the Line, but provision having been made in the Estimates of the Stationery Office for the supply in kind during the quarter from the 1st of January to 31st of March next, I am directed by Sir John Pakington to request that you will acquaint me whether the Lords Commissioners of Her Majesty's Treasury would

under each of the Subdivisions of the Votes included in the foregoing Statement, &c.—*continued.*

would object to the transfer from the Stationery Office to Army Votes of the sum of 220 *l.*, being the amount which would fall upon the latter by the arrangement in question being carried out from the 1st January.

I am to add that the change from the above date is desirable as stationery in kind has been issued year by year from 1st January.

I am, &c.

The Secretary to the Treasury. (signed) *E. Lugard.*

(26—General No. 170.)

Sir, Treasury Chambers, 31 October 1867.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to state, for the information of the Secretary of State for War, with reference to your letter of 24th instant, that my Lords see no objection to the arrangement proposed for the issue of a commuted allowance to depôt battalions in lieu of the present issue of stationery; and my Lords will be ready, should an excess be thereby caused on Vote 1, to sanction the transfer of the sum of 220 *l.*, being the amount provided in the Stationery Office Estimates for this service from 1st January (the date on which the new arrangement is to come into force) to 31st March next, to Army Votes, as requested in your letter. 11th Depôt Battalion, 206.

I am, &c.

The Under Secretary of State, War Office. (signed) *George Ward Hunt.*

(7500—2733.)

Sir, War Office, Pall Mall, 27 July 1868.

I AM directed by Secretary Sir John Pakington to forward, for the consideration of the Lords Commissioners of Her Majesty's Treasury, copies of a correspondence which has taken place between this Department and the Comptroller and Auditor General of Public Accounts, relative to an entry in the War Office books, crediting "Purchase of Horses, Cavalry of the Line, &c., Vote 1, 1867–68," with the sum of 4,465 *l.* 4 *s.* 10 *d.*, being the proceeds of the sale of horses in New Zealand, lately belonging to the detachment of the Military Train serving in that Colony, and to request that you will move their Lordships to decide whether that amount should be taken in diminution of the additional (unprovided) expenditure incurred in the purchase of remounts for that detachment, or paid over to the Exchequer as an extra receipt, as suggested by the Audit Office.

I am to observe that Sir John Pakington demurs to the course last mentioned, on the ground that the animals were serviceable, and were parted with from motives of expediency and economy, and also that a corresponding outlay necessarily took place in England in anticipation of the arrival of the detachment in question, which required a set-off for the purpose of adjusting the record of the previous year (1866-67), the sum realized on account of the deduction made in the Estimates having fallen short to the extent of 3,551 *l.* (*Vide* page 10 of the Statement of Savings and Deficiencies for 1866-67, p. 86, dated the 17th February 1868); thus, in the event of the sum in dispute being paid over to the Exchequer, the comparison of the expenditure for 1867–68 with that for 1866-67, would be disturbed, an apparent excess of expenditure being thrown upon the grants for 1867-68.

I have, &c.

The Secretary to the Treasury. (signed) *Douglas Galton.*

(7500-2749.)

Sir, Treasury Chambers, 5 August 1868.

THE Lords Commissioners of Her Majesty's Treasury have had under their consideration your letter of the 29th ultimo, enclosing a correspondence with the Comptroller and Auditor General respecting the appropriation of the proceeds of the sale of horses lately belonging to the Military Train in New Zealand. 7500—2733.

My Lords request that you will state to Secretary Sir John Pakington that if, as they understand from this correspondence, the whole of the expenditure required for the purchase of remounts for these troops was incurred in the years 1866-67, but the sale of the horses in New Zealand did not take place until the year 1867–68, they concur with the Comptroller and Auditor General that the sum of 4,465 *l.* 4 *s.* 10 *d.*, the amount of the proceeds of the sale, should be paid into the Exchequer as an extra receipt for the last-mentioned year: viz., 1867-68.

The more especially as it would appear from the Statement of Savings and Deficiencies for 1867, referred to in your letter, that, notwithstanding such expenditure, the whole sum expended in 1866-67, for the purchase of horses generally, was less than the sum estimated, by upwards of 4,000 *l.*

I am, &c.

The Under Secretary of State, War Office. (signed) *Geo. A. Hamilton.*

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont^d.*

CAUSES OF VARIATION.

This Saving is the result of a less number of Writers having being employed than that for which provision was made in the Estimates.

This Excess has been caused by Charges for Regimental Pay of Soldiers employed in this section of the Clothing Factory, and also for the Services of Commissionaires, for whom no provision was made.

This Excess is attributable to the services of a larger number of Writers having been needed.

This Saving has arisen from their having been a less demand for Clerical Assistance.

This Saving has accrued from the postponement or abandonment of certain Works.

This Excess has arisen from certain necessary Repairs not contemplated when the Estimates were in course of preparation.

This Excess is owing to there having been a larger demand for Fuel and Light.

- -	- -	The Aggregate Excess upon these Items is 217,147 *l.* 5 *s.*, and falls upon— 1. Materials and Wages. 2. Making and Fitting Clothing. 3. Compensation for „ 4. Winter Clothing. 5. Regimental Colours. 6. Freight. 7. Implements. 8. Arrear Claim from India. 9. Claim upon New Zealand withdrawn. 10. Repayment Services, of which 43,140 *l.* claim on New Zealand, and 136,991 *l.* Issues to Abyssinia, are covered by Grants, leaving a *bonâ fide* Excess of 37,016 *l.*, to be explained as follows, viz.:— 1. The number of Men re-engaging during 1867–68 was four times that estimated for, and caused an Excess chiefly upon Items 2, 3, and 4. 2. The number of Men in Excess of the Establishment during 1867–68 was 4,889; and the average cost of Clothing is about 3 *l.* 10 *s.* per man. 3. An increase was made to the Militia during 1867–68; and the extra Clothing was provided out of Army Votes; but as the issues were not completed before the 31st March 1868, the value could not be transferred from this Vote to Vote 8. 4. Another cause of Excess is owing to a deficiency in the amounts recovered, the Indian Government having demanded less Clothing than was provided for. This deficiency is 75,190 *l.* Articles, however, to the full extent of this sum were not purchased, cloth being the only commodity purchased in anticipation of the full demand, and this in accordance with an arrangement with the India Office. This system of purchasing in anticipation of demand ceases next year, and for the future India will make immediate payment for whatever is demanded; but at the same time it should be borne in mind that this surplus purchase of cloth in 1867–68 caused a corresponding reduction in the Estimates for 1868–69.

£. s. d.	£. s. d.	
- - -	253 8 11	This Excess has arisen upon the item "Contingencies," the amount of which depends more or less upon the current Expenditure of the Barrack Department.
- -	370 15 2	This Excess represents a net sum, the Charges on account of the Home having fallen short, while those for the Colonial Service exceeded the sums allotted to each. The sum of 136*l.* 5*s.* 5*d.* expended beyond the Grant may be attributed to the Barrack Establishments abroad requiring the assistance of extra Labourers than the number expected when the Estimates were prepared.
349 19 6	- - -	This Saving has been occasioned by the Reduction in the Number of Labourers, &c. employed in the Barracks at Home.
9,507 5 8	- - -	As the Vote for Stores is based for the most part on the cost of replacing the articles worn out, &c., this Saving may be ascribed to more economy being observed in the several Barracks at Home and Abroad.
2,000 - -	- - -	No Expenditure having been incurred in the purchase of Furniture for Billiard Rooms, the Sum voted for that Service has lapsed.
- - -	1,258 3 10	This extra Expenditure has been incurred in consequence of the more frequent moving of Troops rendering increased Washing necessary.
- -	2,071 19 7	This Excess has arisen from the increased price paid during the year 1867–68 for the supply of Palliasse Straw, the amount provided in the Army Estimates for that period being based upon that in force at the date when those documents were being prepared.

EXPENDITURE, Less than Estimate.	EXPENDITURE, More than Estimate.	CAUSES OF VARIATION.
£. s. d.	£. s. d.	
1,884 8 6	—	
3,998 6 9	- - -	This Saving has resulted from the number of men confined in Military Prison having fallen under the average for which provision was made in the Estimates, which average was calculated upon the number each prison was capable of accommodating, and that actually undergoing sentence in the prior year.
- - -	262 15 2	The clothing and necessaries required for the use of Military Prisoners, &c., are issued upon the demands made by the Governor, duly regulated by the state of the stock at the respective prisons, which required additions, the value of which caused the excess here reported.
- - -	149 - 11	This is a net excess caused by the expenditure at home falling considerably under the sum estimated, from the same reason as that assigned for the difference between the disbursements, and Vote for the charge for subsistence of men in Military Prisons, while the payments in the Colonies have exceeded the sum provided, in consequence of the supplies at the Cape of Good Hope and elsewhere, to garrison cells where prisoners are employed in the same manner as if confined in a regularly established Military Prison.
- - -	2,513 4 7	This Excess is ascribed, firstly, to the exceptional events in the United Kingdom, particularly in Ireland during the early part of the year 1867–8; secondly, to the payment of 700 *l.* on account of the trial of Ensign Cullen in Jamaica; and thirdly, to courts martial having been more frequently required in the Colonies than could have been anticipated.
- - -	1,402 9 10	This Excess is ascribed to there having been more charges for preventing desertion from the Regiments stationed in the dominion of Canada.
- - -	6,624 13 10	This Excess is attributable to the proceedings taken in connection with the exceptional circumstances arising in Ireland, and on account of a larger number of men being under sentence; which latter circumstance, however, has caused a larger deduction from the aggregate expenditure for the administration of martial law on accountof their unissued pay (*see* foot of this statement).
- - -	2,325 - 1	This Excess is mainly owing to the exceptional circumstances existing in Ireland, which necessitated a larger expenditure than was anticipated, but which may be considered as defrayed from the amount of unissued pay of men in prison, which exceeded in 1867–8 the sum abated on the Army Estimates of that year.
- - -	98 3 9	This Excess has been occasioned by more men having been employed as Provosts Sergeants at stations where no Military Prisons exist, than were contemplated when the Estimates were prepared.
5,882 15 3	13,375 8 2	
- - -	Deduct 10,383 15 -	This difference between actual and estimated Credit has arisen from the exceptional circumstances which existed in Ireland, causing more men to be imprisoned in civil gaols than were contemplated.

EXPENDITURE		CAUSES OF VARIATION.
Less than Estimate.	More than Estimate.	
£. s. d.	£. s. d.	
3,819 3 3	- -	This Saving is owing to the establishment of Assistant Surgeons having been incomplete, particularly that for Colonial Service.
407 14 3	- -	This Saving is attributable to the expenditure on account of Wages, Clothing, and Mess Allowance to Nurses, &c. having been less than was contemplated.
181 13 3	- -	This Saving has been caused by the requirements for the care and maintenance of Army Lunatics being less than were contemplated when the Estimates were prepared.
- -	7,721 2 5	This Excess has resulted,— 1. From the adjustment of the Account with the Local Government of New Zealand, for Advances from Army Funds for the service of Local Volunteers, Militia, and Native Levies during the period of the Native Insurrection. (*Vide* Instructions contained in correspondence with the Lords Commissioners of Her Majesty's Treasury, page 151, &c.). 2. From the Supplies for the use of the Abyssinian Expedition—an unprovided Service. 3. From the requirements at several Colonies having been larger than contemplated, owing to local circumstances.
- -	280 17 11	This Excess has been occasioned by the Detachments or Corps, &c. having been so located as to lose the services of Regimental Surgeons, and thereby obliged to employ private Medical Practitioners beyond the extent contemplated when the Estimates for 1867-68 were prepared.
59 - -	- -	The demand for these instruments being uncertain, it is impossible to form an accurate Estimate of the probable requirements.
201 - 8	- -	The exigencies of the Service not requiring the employment of the full number of Non-commissioned Officers as Compounders of Medicines, conduced to this Saving.

4,668 11 5	8,002 – 4	
592 3 8	- -	The non-employment of soldiers, in the capacities specified, contributed to this Saving.
- -	943 9 5	The detention in New Zealand, during nearly the whole year, of four Officers instead of one, taken in the Estimates, contributed to this Excess.
- -	2,386 19 5	The Estimate for Diets and Medical Comforts, required by the Purveying Department, for the Service of Regimental and General Hospitals, in the course of the year 1867–68, was augmented beyond that voted for 1866–67, in consequence of the expected increase in the price of Provisions; but the Actual Expenditure for the former remained at about the same amount as that for the latter period, thus causing the additional Sum granted by Parliament to lapse in favour of the Purchases made for the service of the Abyssinian Expedition, the Expenses for which have caused this Excess.
3,272 12 8	- -	This Saving represents a proportion of the Sum of 6,288 *l.*, deducted in the Estimates from the provision made therein for washing and repairing bedding and clothing in the hospital laundries; but as no charge could be raised against this Account to represent *bonâ fide* Payments for Wages, the Sum of 3,066 *l.* 11 *s.* 1 *d.* necessarily lapsed under this item.
873 3 11	- -	The Estimate for this Service was based upon the amount expended during the previous year; but the requirements of the Service fell short in the subsequent period beyond the amount contemplated.

£. s. d.	£. s. d.	
9,406 11 8	11,332 9 2	
- -	7,455 - 11	In the Estimates for 1867-68, a sum of 6,288 *l.* is deducted from the Aggregate Charge for this Service, as applicable to "Wages," "Fuel and Light," and "Miscellaneous;" but in the classification of the Actual Expenditure it was found impossible to identify any item as separately chargeable to these heads, and distinct from Washing, &c. proper. Hence the whole charge has gone to this head of Service; furthermore, it was found necessary to open additional hospitals in the Colonies during 1867-68, which also increased the Expenditure under this Item.
- -	324 3 -	In Canada an excess occurred upon this item, as an additional Hospital had to be hired, at Toronto; and in Jamaica there was increased Expenditure for Water Supply.
- -	4,074 14 4	This Excess may be ascribed to the same cause as that, as stated against the Items for "Washing and Repairing Hospital Bedding, Clothing, &c.," and "Miscellaneous Expenses." Furthermore, the necessity for opening additional Hospitals in the Colonies rendered this extra Expenditure unavoidable.
- -	948 19 10	This Excess is partly attributable to the same cause as that assigned for the extra Expenditure under the items, "Washing and Repairing Hospital Bedding, Clothing, &c.," and "Fuel and Light," and partly to Disbursements made on account of Purchases for the use of the Abyssinian Expedition.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont^d.*

CAUSES OF VARIATION.

This Excess has resulted from an increased charge for Travelling Expenses necessarily incurred by the Inspectors General of Militia, in the discharge of their duties.

This Excess has arisen from the Vacancies in the ranks of Non-commissioned Officers and Drummers having been less than contemplated at the commencement of the Financial Year 1867–68, the aggregate amount of lapsed pay being 2,237*l.* 3 *s.* 1 *d.*, while the sum abated on the Estimate was 4,303 *l.*

These Variations represent merely the casual difference between estimated and actual Disbursements.

This Excess has arisen from a larger number of Adjutants receiving the Allowance than was expected, the same being only admissible on their certifying that they actually employed the Servants for whom it was granted.

This Saving has been occasioned by a less number of Non-commissioned Officers and Drummers having been accommodated in Public Quarters than could have been expected when the Estimates for 1867–68 were prepared.

A larger number of Non-commissioned Officers and Drummers being on the Effective Establishment of the Permanent Staff, necessitated the employment of the Medical Officers to an extent beyond that originally contemplated.

This Excess represents a liability of the year 1866–67, which came into course of payment subsequently to the 1st April 1867.

This Saving is owing to the demands having been less than were contemplated when the Estimates were prepared.

This Saving is owing to the Militia Barracks and quarters occupied by the Permanent Staff not requiring repairs to the extent anticipated.

This Excess is the casual difference between actual and estimated Expenditure.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

The Services of a less number of Serjeant Instructors, &c., having been required during the Year 1867-8, by the Permanent Staff, and that of the Fatigue Men allowed by Regulation having been reduced.

This Excess is merely the casual difference between actual and estimated Expenditure.

This Saving has resulted from certain Claims not having been preferred within the Financial Year.

This Saving is attributable to the Irish Militia not having been called out for Annual Training.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

This Saving is partly owing to the Irish Militia not being called up for Training, and partly to the attendance at Head Quarters of a less number of Volunteer Non-commissioned Officers belonging to Corps of English and Scotch Militia not being required by the Commanding Officers thereof.

This Saving is attributable to the Irish Militia not having been called up for Annual Training.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*ª.

CAUSES OF VARIATION.

This Excess has been caused by the volunteering of a large number of men for service in the Militia of England and Scotland, and entailing Expenditure beyond the Sum provided in the Estimates for defraying the same.

This Saving has been occasioned by the Irish Militia not having been called up for annual Training, and likewise to the charge on account of Volunteers who engaged to serve in the Militia Reserve Force, having been less than contemplated.

This Saving has been occasioned by the Irish Militia not having been called up for annual Training, and by liabilities of 1867–68, which came into course of payment after the 1st April 1868.

This Excess has originated from the increased price of provisions in Great Britain.

This Saving is owing to the Irish Militia not having been called up for annual Training.

Ditto - - - ditto - - - ditto.

Ditto - - - ditto - - - ditto.

This Excess is caused by the requirements for Barrack Services being more than were contemplated when the Estimates were prepared.

This Saving is owing to the Irish Militia not having been called up for annual Training.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

This Excess is partly owing to the increased price of provisions, and partly to a less number of men under treatment in hospital, and thereby causing the sum realised by way of stoppage from pay to fall short of that abated on the Estimates to the extent of 810 *l.* 14 *s.* 2 *d.* It is to be observed that provision was made under this head for the expected requirements of the Irish Militia, but as that force was not called up for annual Training, the amount has been taken in Aid.

This Excess is the casual difference between actual and estimated Expenditure.

This Saving has been occasioned by the Irish Militia not having been called up for annual Training.

The Excess on this Item is owing to the very precarious nature of the service, which, from its special character, could never furnish conclusive data upon which to base an accurate Estimate.

This Saving has been caused by the number of Officers availing themselves of the opportunity of instruction at Hythe, Fleetwood, and Shoeburyness, or with Regiments of the Line, having been less than was contemplated at the commencement of the Financial Year.

This Saving is attributable to the Irish Militia not having been called up for annual Training.

Ditto - - - ditto - - - ditto.

It having been found necessary to employ a large number of officiating clergymen to perform Divine Service for the Militia than that for which provision was made in the Estimates.

This Saving may be attributed to the Irish Militia not having been called up for annual Training.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

This Saving is attributable to vacancies not being filled up promptly after they may have occurred.

This Saving is owing to fewer Effectives having been present than were estimated; the same arising from Absentees.

This Excess is owing to a larger number of Men having come up for Permanent Duty than was contemplated. The difference between the Gross Pay and Estimate amounted to 7,122 *l.* 18 *s.* 11 *d.*; while the sum deducted on the face of the Estimate for 1867–68, was 8,641 *l.*

The Expenditure under this head of Service fluctuates according to the requirements of the Yeomanry Cavalry Force. In 1867–68 it was necessary to expend a larger sum in Travelling Expenses of Officers appointed to inspect, the Cost of which was larger than that paid in 1866–67.

This Saving represents a liability contracted in 1867–68, but payable after the 1st April 1868.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont^d.*

CAUSES OF VARIATION.

This Excess has for the most part been caused by a change in the mode of Payment of the Pay and Allowances, &c., to the Staff of the Volunteer Rifle Force, viz., according to the Financial rather than the Calendar Year; consequently the charge against the sum of 6,900 *l.* voted, represents Disbursements for five quarters.

This Excess is mainly owing to the appointment, within the Financial Year, of additional Adjutants, the cost of which was not anticipated at the date of the framing of the Estimates. The Volunteer Force not having any fixed strength, the Estimates, if taken closely, are liable to an excess of this kind.

During the past two years, the full number of Serjeant Instructors to which Volunteer Corps were entitled, was incomplete, in consequence of difficulties having been experienced in obtaining qualified Persons to fill those situations, and a less sum was consequently provided in the Estimates for the year 1867–68.

This Excess is owing to the introduction and adjustment of certain transactions belonging to Army Accounts rendered to Parliament in prior years, the Amount of which is reported in Explanatory Paper No. 4, in conformity with the terms of the Treasury Minute, dated 30th April 1864.

This Saving is attributable to the Volunteer Force requiring less assistance from Officers of the Army than was contemplated at the period when the Estimates were compiled.

This Excess is attributable to sums due in previous years not having been claimed and paid till this year.

Carried forward - - - £.	478,458 17 5	492,573 - -	17,786 14 11	3,672 12 4

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

This Saving has arisen from the aggregate number of men, who received Pay as having been present on Parade during the year 1867–68, being less than was anticipated.

This Excess is owing to the number of men struck off the Army Reserve for absence, misconduct, re-enlistment, &c. being less than was expected when the Estimates for 1867–68 were prepared.

No men volunteered, by commutation of service, for enrolment into the Army Reserve Force upon the terms required. Hence the reason no expenditure has been brought against this Supplemental Grant.

The supplies of clothing actually issued, from 1st April 1867 to 31st March 1868, were in the aggregate larger than the clothing estimated as required for issue for the year 1867–8.

This Saving has, for the most part, arisen on the Items, Wages, Materials, and New Works, and partly by the orders not having been given for Manufactured Stores to the same extent as was provided in the Estimates for 1867–68; and also to others not being received at the Carriage Department, until so late in the year as to render it impossible that they could be completed. This Surplus is further augmented by the sum of 9,650 *l.* 13 *s.* 2 *d.* received as repayments for Services performed for other Departments, and Votes beyond the 17,000 *l.* abated on the Estimate, as shown at the foot of this Account.

This Excess represents, for the most part, the extra Expenditure incidental to Services performed for other Departments and Votes on account of which a sum, amounting to 3,906 *l.* 1 *s.* 10 *d.*, beyond the sum abated on the Estimates has been realised. There are other differences between Expenditure and Estimates, under the majority of Heads of Service into which the Disbursements for this Establishment are subdivided, the net amount of which has been likewise balanced by the Surplus on the above sum of 3,906 *l.* 1 *s.* 10 *d.*

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*^{d}.

CAUSES OF VARIATION.

This Saving is divisible into two parts, one of which represents the Surplus on the Sum voted for "Establishment," "Wages," "Materials," "New Works and Buildings," after the deduction of certain Extra Expenditure upon the other Heads of Service into which the Vote for this Factory is subdivided; and the other the Receipt beyond the amount abated on the Estimate as the probable sum to be realised by Repayments on account of Services performed for other Departments and Votes.

Those in the first category have arisen from the services of a less number of Writers being required, and from the demands for the manufacture of Warlike Stores not being in accordance with those for which a provision was made in the Estimates.

It is also to be observed that the Saving upon the Items specified would have been considerably larger had there not been Requisitions from other sources, the value of which amounted to 29,418 *l.* in excess of that contemplated.—*See* deduction at the foot of this Account.

This Saving is mainly owing to the Receipts as Repayments for services performed for other Departments, and Votes being larger than the amount abated on the Estimate.—*See* also deduction from the Gross Expenditure at the foot of this Account.

There have been Savings upon the Money provided for the payment of Wages and the supply of Materials, the amount of which has been supplemented by the economical working of this Factory, and the larger Receipts as Repayments for Supplies to other Departments and Establishments. This aggregate Saving, however, has been reduced by the increased charges on account of wear and tear of Buildings and Machinery, which in 1867–68 was larger than could have been anticipated at the commencement of the Financial Year. In regard to New Works, it may be stated that, with the exception of a small payment, the sum granted lapsed in favour of the unprovided Expenditure incurred for the maintenance of Buildings.

This Saving has, for the most part, been occasioned by the Medical Officers at this Establishment not appearing to have drawn the Allowance in lieu of Forage, Lodging, and Fuel to the extent contemplated.

This Saving is the casual difference between actual and estimated Expenditure.

This Saving consists of Surpluses on the provision made by Parliament for Wages and Materials required by these Factories, and the Receipts as Repayments for Services performed for other Departments and Votes. The cause of that which has accrued on the first and second Items arose from the orders to manufacture Small Arms for the Regular Service not having reached the Amount inserted in the Estimates; and that of the last originated in consequence of the Special Demands exceeding in value the Sum abated on the face of the Estimates on account thereof.

There are other Surpluses, as well as Excesses, beyond Vote upon other Items of Expenditure; but as they nearly balance, the variation may be looked upon as the casual difference between actual and estimated Expenditure.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

This Net Saving may be explained as follows:—

1stly. That the new Incorporating Mill erected in 1867-68 was not brought into operation, which circumstance caused a considerable portion of the Vote to lapse.

2ndly. That the Expenditure for Miscellaneous Services fell short of the expected amount, in consequence of a less demand for Travelling Expenses and Lock Tolls.

3rdly. That less Expenditure was required than the amount provided for the Maintenance of Machinery, owing to explosions having been less frequent.

4thly. That the exceptional state of London and its vicinity necessitated extra Expenditure to be incurred for Police beyond the sum originally estimated for that Service.

5thly. That the purchase of certain Lands at Hooksmarsh, Waltham Holy Cross, was contracted for in 1866-67, but not paid for until 1867-68, owing to the Legal Proceedings not having been completed.

This Net Saving has arisen as follows:—

1stly. Before all the Items, but two, of Expenditure into which the Estimate for this Establishment is subdivided, Surpluses have arisen, owing to there having been less activity at the commencement, and more at the latter part of the year 1867-68, necessarily reducing the purchase of Materials, and causing less wear and tear of Machinery and Buildings.

2ndly. A small excess of Charge for the service of Writers, Timekeepers, &c., and also for Wages, additional labour having been required to meet the exigences of the period when the same was most needed.

The Excess here reported may be ascribed to the provision made for the Purchase of Materials not being adequate to meet the direct Disbursements and the value of Stores issued to the Laboratory at Bull Point by the Officer in charge of the Military Store Establishment at the same place, when the former was called upon to manufacture Small Arm Ammunition on behalf of the Royal Laboratory at Woolwich. The Gross Charge for the Supply last referred to has been reduced by Savings on the Vote for "Wages," "Miscellaneous Expenses," "Buildings," &c.; the first of which was occasioned by a less number of Men having been employed than was provided on the Estimates; the second, by the Travelling Expenses having fallen short of the sum expected; and the third, by the postponement or abandonment of certain small Works and Repairs.

Copy of Application to the Treasury, and of Treasury Reply, applicable to this Vote, *see* page 156. There was also other Correspondence relative to expected Excesses beyond estimated amounts, but which were not found realised upon the closing of the Army Account for 1867-68; consequently the letters relative to the same have not been inserted.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

This Excess has arisen—

1stly. From Salary having been charged for the period from 1st January 1867 to the 31st March 1868, on account of the Inspector of Works, that officer previously receiving the same a quarter in arrear.

2ndly. From Travelling Expenses and Contingencies having been higher in amount, owing to the requirements of the department than could have been anticipated.

3rdly. From the erection of the Carpenters' Shop, and Stores attached to the Inspector of Works Department having been completed within the Financial Year, and duly paid for.

4thly. From certain charges on account of Clerks of Works, &c., who have been employed under the Inspector of Works having been raised against this Vote instead of Vote 14, where provision was made.

This Excess is mainly attributable to the duties of the Superintendent of Machinery having necessitated a larger outlay for Travelling Expenses and Contingencies than could have been foreseen.

The Excess of Receipts is owing to the Services performed for other Departments, and Votes having been larger than was contemplated, particularly by the Royal Carriage Department, Royal Gun Factory, and Royal Laboratory, Woolwich, the charges on account of which merge in those raised elsewhere, in the Army Appropriation Account.

of the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont^d.*

CAUSES OF VARIATION.

This Excess has been occasioned—
1. By the increased activity at the Arsenal with reference to the Supply and Issue of every description of Store for the use both of the Army and Navy, particularly in the shipment of those for the use of the Abyssinian Expedition; and,
2. By the disturbed state of certain parts of England and Ireland, causing a much larger Sum to be expended for Freight and Carriage than was contemplated.

This Saving is attributable to the Service not requiring an Expenditure to the extent contemplated.

An increased Sum was voted in 1867–68, for the purpose of defraying extra Expenditure under this head of Service, but owing to circumstances not contemplated when the Estimates for that period were prepared, this Saving has accrued.

A large proportion of this Excess is rather apparent than real, inasmuch as the Amount is met by a corresponding Sum included in that deducted from the Aggregate Expenditure under this Vote. But some of the Disbursements comprised in the remainder arose from the requirements for the Abyssinian Expedition; the adjustment of the War Office Account with the Colonial Government of New Zealand, for Supplies during the Native Insurrection in that Colony, and the Repayment to the Chinese Government for the Value of Arms returned into Store from the Anglo-Chinese Flotilla.

This Excess represents for the most part the Repayment to the Chinese Government of the value of certain Iron Ordnance retured to the Military Store Department from the late Anglo-Chinese Flotilla.

Purchases from Contractors of Supplies of Projectiles were restricted to the necessary requirements of the Service, owing to no final decision in regard to the best description of Missile for the use of the Army and Fleets. Hence the Saving here reported.

This Excess represents a portion of the value of Gunpowder returned into the custody of the Military Store Department by the late Anglo-Chinese Flotilla, and repaid to the Chinese Government.

This Sum represents a liability incurred during the year 1866–67, which did not come into course of payment until after the 1st April 1867.

The provision in the Estimates has lapsed in consequence of there having been no demand upon the Royal Laboratory for a supply of Gunpowder Barrels, &c. during the year 1867-68, although when the Estimates for that year were prepared, a supply to the extent stated was expected.

This Item having been inserted separately in the Estimates for 1867-68, for the first time, a Sum on account was merely voted for the purpose of defraying the demands which were expected at the date when the Army Estimates were prepared, but which subsequently were not received from the Admiralty and elsewhere.

This Item having appeared separately for the first time in the Army Estimates, 1867-68, the Sum voted was merely one *on account*, for the purpose of meeting certain demands which fell short of the amount expected at the commencement of the Financial Year. Hence this Saving.

of the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*ª.

CAUSES OF VARIATION.

This Sum represents the Cost of Repairs which became indispensably necessary to the Machinery of the Military Store Department during the year 1867–68. No Expenditure under this head was contemplated when the Estimates for that period were prepared. Consequently it may be considered a liability incurred in the course of the year 1866-67, which came into payment after the 1st April 1867.

This Excess arose from the requirements of the Abyssinian Expedition, and the adjustment of the War Office Accounts with the Colonial Government of New Zealand for Stores supplied during the period of Native Insurrection in that Colony.

A change in the Pattern of Accoutrements for the several arms of the Service was contemplated when the Estimates for 1867-8 were framed to meet the requirements occasioned by the adoption of the Snider Small Arms, but which has not yet been determined upon. Hence the reason of this large Saving.

This Saving has resulted from the Service not requiring purchases to the extent contemplated when the Estimates were prepared.

The demand for the supply of Timber for the Service of the Military Store Department having exceeded the quantity expected, contributed to this Excess.

This Excess is attributable to two causes—

1. Supplies on repayment, credit for which has been given by a deduction from the Aggregate Expenditure reported under this Vote; and,
2. The requirements of the Abyssinian Expedition.

This Credit represents the Aggregate Value of Stores supplied to the Indian and Colonial Governments, Regiments of the Line, Militia, Volunteer Rifle Corps, Manufacturing Departments, and other Establishments, on account of which Receipts and Transfers have taken place. The net difference here reported consists partly of Sums realised beyond those stated above as Savings on the Vote for certain Items of Expenditure, and partly of others which were required in discharge of the Excess of Expenditure beyond the Grant for Materials for Packing, Purchase and Repair of Small Arms, Iron Ordnance, and Miscellaneous Stores, &c.

EXPENDITURE, Less than Estimate.	EXPENDITURE, More than Estimate.	CAUSES OF VARIATION.
£. s. d.	£. s. d.	
1,760 2 3	- - -	There was a Saving on the Staff at the West Coast of Africa, and at the Straits Settlements, and also on the sum taken for Reliefs.
284 17 6	- - -	This Saving accrued principally upon the Colonial Allotment of this Vote, in consequence of the Surveys at Gibraltar, Malta, and Nova Scotia, not having progressed in the ratio contemplated when the Estimates for 1867-68 were prepared.
149 16 11	- - -	The Amount taken was approximate, as the Expenditure cannot in all cases be foreseen, as it fluctuates according to circumstances.
- - -	80 9 1	This Excess is the casual difference between actual and estimated Expenditure.
- - -	50,370 6 9	The principal Causes of Excess upon this Item are as follows, viz.: 1. The cost of Huts at Hong Kong, a necessary and very urgent Service, in consequence of the Sickness which prevailed at that Station. 2. Road making in New Zealand for Military purposes and special Engineering Services during the period of Native Hostilities in that Colony, the Cost of which was, in the first instance, to have been defrayed from the Colonial Revenue; but in consideration of the local Government withdrawing a counter-claim for Advances for Her Majesty's Military Services, the Lords Commissioners of the Treasury allowed the Amount due to the War Department to be charged in the Army Appropriation Account for 1867-68, in which also appears as a receipt, the Sum of 505,899 *l.* 14 *s.* 3 *d.*, transferred to the credit of Army Funds in aid of the above, and other Disbursements, the same being a proportion of the Grant (764,829 *l.*) for making good the Advances from the Treasury Chest, New Zealand, and the said Army Funds "on account of the War in New Zealand." 3. The urgent and unforeseen or Special Services in the Colonies, and elsewhere (including Abyssinia), the Amount of which, particularly that portion of the Expenditure ordered by Governors and Commanders-in-Chief in the Colonies, has been from time to time reported to the Treasury, and received the approbation of the Lords Commissioners. 4. The Purchase of the Buildings at Valetta, Malta, known as the Camerata, for the purpose of Conversion into Quarters for Married Soldiers, the payment for which was sanctioned by the Lords Commissioners of Her Majesty's Treasury, in Letter dated 28 December 1867, the same to be defrayed temporarily out of the Savings on this Vote generally; the circumstances which made the Acquisition of this Property desirable having justified the Outlay. There have been other Excesses of Expenditure beyond the Sums estimated for the ordinary Services; but they have been met by Savings accruing upon Works, &c., which have been either abandoned or postponed.

of the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont^d.*

CAUSES OF VARIATION.
This Saving is attributable to a less Sum having been paid as Fees to Examiners, and for Travelling Expenses and Contingencies, than was expected at the commencement of the Financial Year 1867-8.
This Excess has arisen for the most part from the Disbursements denominated "General Expenses" having been larger than usual, in consequence of a larger number of Gentlemen Cadets having been under instruction between the 1st April 1867 and the 31st March 1868, than was estimated for, owing to the sudden preparation of Royal Engineer Officers for India.

of the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont^d*.

CAUSES OF VARIATION.
This Saving is owing to the number of Students having fallen short of that for which a provision was made in the Estimates in respect of Maintenance, Washing, &c. &c.
This Saving has been caused by less Disbursements having been made during the year 1867–8, on account of Pay of Non-Commissioned Officers and Men; Wages, &c. of Civilian Servants; Expenses of Students and General Expenses, in consequence of a less number of Officers and others availing themselves of the advantages offered by the Staff College.

the Votes included in the for egoing Statement, together with the Causes of Variation, &c.—*cont*^{d}.

CAUSES OF VARIATION.

This Excess may be ascribed to extra Expenditure having been incurred for Detachment Schoolmasters and Soldier Assistants, and others, whose engagement may be of a temporary nature, and who may have been employed for the purpose of meeting the exigencies of the Service.

This Saving has accrued from the Charges on account of Provisions, Clothing, and Laundry Expenses of Students and Pupils, and the Disbursements for Provisions and Clothing for the Serjeants and Servants having been less than were contemplated, in consequence of the diminution in the number under instruction at this Institution.

CAUSES OF VARIATION.

This Saving is the casual Difference between actual and estimated Expenditure.

This Saving is the casual Difference between actual and estimated Expenditure.

This Excess is attributable to the requirements of the Service necessitating four Examinations of Probationers during the year 1867–68, for the purpose of electing qualified Medical Men to fill vacancies in the rank of Assistant Surgeons of the Army. In the Estimates was provided a sum of 2,200 *l.* for defraying the Pay of Probationers at the Military Medical School in 1867–68, for the period of Four Months, at the rate of 5 *s.* per diem, while the Charges were as follows:

					£.	*s.*	*d.*
June Quarter, 1867	4,361 days, at 5 *s.*				1,090	5	–
September „ „	1,623 „ „			}	1,080	–	–
„ „ „	1,344 „ 10 *s.*			}			
December „ „	5,388 „ 5 *s.*				1,347	–	–
March „ 1868	2,262 „ „			}	1,174	10	–
„ „ „	1,218 „ 10 *s.*			}			
				£.	4,691	15	–

In aid of which the Indian Government contributed a Sum which has been paid into the Exchequer as an "Extra Receipt." A further diminution of the aggregate Excess above pointed out has taken place, by Savings upon other Items of Expenditure on account of this Establishment.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.

The Excess of Expenditure beyond the Grants for the Totals of the Items comprised in the General Heads "Pay &c.," "Miscellaneous Expenses," and the "Publication of Maps" has, for the most part, arisen from the Surveys and Services performed for other Departments and Votes, the cost of which is deducted from the aggregate charges for the Surveys of the United Kingdom:—

	£.	s.	d.
The former having been - - - - - - - -	16,600	18	10
And the latter - - - - - - - - -	16,122	8	9
Leaving a difference of - - - - - - - -	£. 478	10	1

which may be ascribed to a liability on account of fuel and light contracted in 1866-67, but not discharged until subsequently to the 1st April 1867.

This Excess originated partly from the same cause as that on the Items, Pay, &c. of Establishment and Miscellaneous Charges, and partly from the introduction of an item applicable to an account rendered to Parliament in a prior year, the circumstances relative to which may be explained as follows:—

In the Army Estimates for 1860-61, a sum of 4,000*l.* was provided under Vote 15 for the purpose of defraying charges for the survey of Military Stations, but owing to the Act of Parliament for regulating the application of monies raised for the construction of the National Defences coming into operation in 1861-62, expenditure applicable to the service first mentioned was defrayed from the loan instead of from the 4,000*l.*, thus causing a saving thereon to a considerable extent. Upon the adjustment of the account for the loan, the sum of 5,170*l.* 16*s.* 9*d.* was ascertained to apply to Army Funds, and that amount consequently appears as an unprovided charge upon the Survey Grant for 1867–68.

See above; and Explanation as to the Cause of Variation upon Item 1, "Pay, &c."

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont.*

CAUSES OF VARIATION.
The continued consideration given to Armaments for Land and Sea Service caused an increased Expenditure under the Item of a contingent character beyond the sum contemplated when the Estimates for 1867–68 were prepared.
This Excess is incidental to the varied character of the Experiments at Shoeburyness and Woolwich during the Year 1867–68.
Inventions were not submitted for the consideration of the Secretary of State for War to the extent contemplated; hence the reason of this Saving.
The number of Competitors for these Prizes fell short of that for whom a provision was made in the Army Estimates. The Sum voted by Parliament for this Service was one merely "on Account."
The Service not requiring the expenditure of the full Sum voted for the Allowance to Civilian Members and Travelling Expenses of this Committee, as contemplated, conduced to this Saving.
This Excess has arisen from the Sanitary Services of the Army compelling the Civilian Member of this Committee to make more frequent visits at certain stations during the Financial Year 1867–68.
This Charge represents a liability of the Year 1866–67, which came into course of Payment after the 1st April 1867.
This Saving has resulted from the Charges for the Allowances, Stores, &c., falling short of the Amount contemplated. Demands for Stores in particular fluctuate according to the requirements of this Establishment.
This Saving has resulted from the demands for Clothing required for these Corps during the Year being less than was anticipated when the Estimates were framed.
This Expenditure was incurred in Travelling, and other Expenses of this Committee for which no provision was made.

£. s. d.	£. s. d.	
6,107 6 4	13,640 18 –	
87 2 6	- -	This Saving has been occasioned by the Extension of the Telegraphs at Head Quarters and London Barracks, &c., which it was deemed expedient to carry out during the year 1867–68, not requiring the whole sum provided.
- -	11 5 10	This Excess has been occasioned by the contingent Expenses incidental to the Working of the Signals being necessarily larger than were expected.
21 1 5	- -	This Saving is the casual difference between actual and estimated Expenditure.
5 5 –	- -	This Saving represents an unclaimed Subscription, which may come into course of payment after the 1st April 1868.
12,656 16 9	- -	This Saving is attributable— 1st. To the Provision made in the Estimate for 1867-68 having been larger than the demands for the various services necessary for the suppression of Contagious Diseases during that period; yet, at the date that document was in course of preparation, it could not have been anticipated that the *bonâ fide* Expenditure would have been so limited. 2nd. The Charge for the Moiety of the Expenses of the Committee on Contagious Diseases (Naval and Military) having been included in the Army Appropriation Account for 1866–67, the claim preferred by the Admiralty on account thereof arriving in time to be so dealt with; furthermore the Expenditure applied to the year 1865–66, and became properly an Item to be reported in the Statement required by the Treasury Minute, dated the 30th April 1864, showing to what degree the account of the period referred to had been affected by the introduction and adjustment of Transactions belonging to those rendered to Parliament in previous years.
11,660 14 3	- -	The Charges on account of Equipping a Ship for Hospital and Sanitary purposes at Hong Kong were first defrayed by the Admiralty, and afterwards repaid from Army Funds; this saving, therefore, must be considered as a liability to be hereafter disposed of.
—	—	
146 1 –	- -	This Saving represents certain Subscriptions which did not come into course of payment within the financial year.
224 19 1	- -	This Saving is a liability of the year 1867–68, which did not come into course of payment until subsequently to the 1st April 1868.
681 1 11	- -	The Scheme for instructing Soldiers in Trades and Callings not having been fully developed in consequence of but few Corps having adopted it. Hence the Saving here reported.

31,590 8 3	13,652 3 10	
- -	2,073 12 3	This Excess is owing to the War Department requiring more extraneous legal assistance than was contemplated at the commencement of the Financial Year. The service rendered was important, and fully justified this extra Expenditure.
- -	1,835 11 8	As the Expenditure incurred for Advertisements in the Public Newspapers at Home and Abroad is dependent upon the demand of Stores for the numerous Establishments of the War Office, the Excess now reported is attributable to the purchases on account thereof having been more extensive than during the last few years upon the charge for which the sum estimated was calculated.
—	—	
- -	91 - 9	This Excess is attributable to a larger demand for specie at certain stations than heretofore.
35 16 -	- -	This Saving may be considered a liability of 1867–68, which came into course of payment after the 1st April 1868.
339 19 3	- -	Officers and men having sustained less loss in their Equipment by the causes specified by the Royal Warrant having reference thereto, occasioned this Saving.
64 16 -	- -	This Saving has originated partly by the Adjustment of the Account with New Zealand of advances made and stores supplied to the Local Government during the period of native hostilities (*Vide* Correspondence, page 151, &c.); and partly by the necessity for granting Field Allowances having passed away.
- -	- 11 -	This Excess is the difference between actual and estimated Expenditure.
65 16 9	- -	The full Establishment for this Department not having been determined upon during the year 1867–68 contributed to this Saving.
—	—	
- -	225 12 -	The Transfer of Officers in charge of Barrack and Military Stores was more frequent during the financial year 1867–68 than was contemplated when the Estimates were prepared, consequently that Service necessitated additional charges under this head of Expenditure.
192 19 6	- -	The demand for the issue of Medals during the year 1867–68 not equalling the average upon which the Estimates for that year were based.
- -	1,474 - 7	The demand for Services of a special nature having been larger than was anticipated led to this Excess.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*^{d}.

CAUSES OF VARIATION.
This Excess is attributable to the appointment of Major General Sir H. Storks and Major General Balfour for the purpose of establishing the Control Department of the Army, which extra Expenditure was sanctioned by the Lords Commissioners of Her Majesty's Treasury, in Letters dated 24th December 1867 and 4th January 1868.
This Saving has resulted from vacancies in the Junior Class of Clerks not having been filled up to the complete establishment.
This Saving is owing to the employment of extra labour having been less during the year 1867–68 than was contemplated.
This Excess is ascribed to the requirements of the War Department necessitating more travelling, and Expenditure of an exceptional nature connected with the Abyssinian Expedition.
This Excess has arisen from a liability applicable to 1866–67 having been paid subsequently to 1st April 1867.
The Charges for the purchase of Maps, Colouring and Binding Plans, Repairing Presses, have been less during 1867–68 than was contemplated, hence the reason of this Saving.
The Charge for the Forage and Lodging Allowances to the Staff of H. R. H. the Field Marshal Commanding in Chief having been made for five quarters, viz.: from the 1st January 1867 to 31st March 1868, contributed to this Excess.
This Saving has arisen from the changes which have taken place in this department through retirement or other causes.
This Saving has resulted from the changes which have taken place in this office through retirement or other causes.
This Excess has arisen from Charges of a contingent character, which cannot be always accurately estimated.
This Saving is owing to the Charges of a contingent character having fallen short of the amount contemplated when the Estimates for 1867–68 were being prepared.

the Votes included in the foregoing Statement, together with the Causes of Variation, &c.—*cont*[d].

CAUSES OF VARIATION.
This Saving is mainly attributable to the retirement of two Senior Clerks, and the death of a third, and the consequent promotions in the office of the Secretary to the Hospital, the salaries of the latter being at the lower rate.
This Excess may be ascribed to the increased prices of provisions.
This Saving has originated from the Casualties during the financial year 1867–68.
This Saving has resulted from a falling off in the sums charged under the item "Contingencies," which at all times is of a fluctuating character.

VOTE 14.—WORKS, BUILDINGS, AND REPAIRS AT HOME AND ABROAD.

CORRESPONDENCE WITH THE TREASURY.

(General, No. 2—5,404.)

Sir, War Office, 13 August 1867.

I AM directed by Secretary Sir John Pakington to transmit to you, for the approval of the Lords Commissioners of Her Majesty's Treasury, the enclosed returns of "Urgent and Unforeseen Services," Vote 14, for the quarter ended 30th June last, amounting, as per accompanying Schedule, to 11,968 *l.*

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Douglas Galton.*

(13,325—67.)

Sir, Treasury Chambers, 26 August 1867.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 13th instant, enclosing the Schedule of "Urgent and Unforeseen Services," Vote 14, for the quarter, to 30th June last, and my Lords request that you will convey to Secretary Sir John Pakington their approval of this expenditure, amounting to 11,968 *l.*

I am, &c.

The Under Secretary of State for War. (signed) *Geo. A. Hamilton.*

(General, No. 2—5,531).

Sir, War Office, 29 October 1867.

I AM directed by Secretary Sir John Pakington to transmit to you, for the approval of the Lords Commissioners of Her Majesty's Treasury, the enclosed returns of "Urgent and Unforseen Services," Vote 14, for the quarter ended 30th September last, amounting, as per accompanying Schedule, to 14,218 *l.*

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Douglas Galton.*

(16,866—67.)

Sir, Treasury Chambers, 9 November 1867.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 29th ultimo, transmitting returns of "Urgent and Unforeseen Services," Vote 14, 1867-8, for the quarter ending 30th September, amounting to 14,218 *l.*

I am to request that you will signify to the Secretary of State my Lords' approval of the said expenditure.

I am, &c.

The Under Secretary of State for War. (signed) *George Ward Hunt.*

(General, No. 2—5,623.)

Sir, War Office, 27 January 1868.

I AM directed by Secretary Sir John Pakington to transmit to you, for the approval of the Lords Commissioners of Her Majesty's Treasury, the enclosed returns of "Urgent and Unforeseen Services," Vote 14, for the quarter ended 31st December last, amounting, as per accompanying Schedule, to 33,070 *l.*

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Douglas Galton.*

---

and Repairs at Home and Abroad, with the Savings and Excesses, &c.—*continued.*

(1,976—68.)

Sir, Treasury Chambers, 29 February 1868.

THE Lords Commissioners of Her Majesty's Treasury have had before them the returns of "Urgent and Unforeseen Services," Votes 12 and 14, authorised during the quarter ended 31st December 1867, submitted in your letter of the 27th January; and my Lords request that you will convey to Secretary Sir John Pakington their approval of this return, amounting in the whole to 33,070 *l.*

I am, &c.

The Under Secretary of State, War Office. (signed) *Geo. A. Hamilton.*

(General, No. 2—5,763.)

Sir, War Office, 10 June 1868.

I AM directed by Secretary Sir John Pakington to transmit to you, for the approval of the Lords Commissioners of Her Majesty's Treasury, the enclosed returns of "Urgent and Unforeseen Services," Votes 12 and 14, for the quarter ended 31st March 1868, amounting, as per accompanying Schedule, to 11,966 *l.*

I am, &c.

The Secretary to the Treasury. (signed) *Douglas Galton.*

(9,525—68.)

Sir, Treasury Chambers, 22 June 1868.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 10th inst., enclosing a statement of "Urgent and Unforeseen Services," Votes 12 and 14, authorised during the quarter ended 31st March 1868.

I am to request that you will signify to the Secretary of State my Lords' approval of the charges, amounting to 11,966 *l.*

I am, &c.

The Under Secretary of State, War Office. (signed) *G. Sclater-Booth.*

(Severn, 15—698.)

Sir, War Office, 1 January 1868.

I AM directed by the Secretary of State for War to request that you will obtain the sanction of the Lords Commissioners of Her Majesty's Treasury to the expenditure, during the currant financial year, 1867–68, of a sum of 3,000 *l.*, under the following circumstances:—

In the Army Estimate of 1867–68 a sum of 10,000 *l.* was voted by Parliament for Commercial Harbour Defences; this amount has been applied to the construction of works for the defence of the Severn; and the progress of the works has been such, that unless a further sum be appropriated this year, they will have to be suspended, and loss would thereby be incurred.

Owing to the contractor for the works having failed to carry them on, they are being executed by day-labour under the Royal Engineer Department, and the sum that will be required previous to the 1st April next, in addition to the amount noted in the Estimates 1867–68, can therefore be restricted to what is necessary to prevent loss on plant and to avoid dismissing useful workmen, who it would be otherwise necessary to discharge, and who, probably, could not well be replaced.

Under these circumstances, an additional sum of 3,000 *l.* will suffice.

I am to add, that this expenditure will not involve any excess on the total estimate for the works for defence of commercial harbours, and that savings will be effected on other items on Vote 14, sufficient to cover the contemplated payments.

I am, &c.

The Secretary to the Treasury. (signed) *D. Galton.*

(Severn, 15—713.)

Sir, Treasury Chambers, 11 January 1868.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 1st instant, requesting the sanction of this Board to an expenditure of 3,000 *l.* in the construction of works for the defence of the Severn during the current financial year, in addition to the sum of 10,000 *l.* already expended thereon, voted by Parliament in the Estimates for 1867-68, for Commercial Harbour Defences.

I am to request that you will signify to the Secretary of State my Lords' approval of the temporary appropriation of the sum proposed; such expenditure not to involve any excess on the total estimate for the works for defence of commercial harbours, and to be covered by savings on other items of Vote 14.

I am, &c.

The Under Secretary of State for War. (signed) *George Ward Hunt.*

(No. 098—156.)

Sir, War Office, 22 August 1867.

WITH reference to former correspondence on the subject of the transfer of the Straits Settlements from the Indian to the Imperial Government, and to that portion of the Treasury Minute received with your letter, 2nd June 1866 (90, 081—6), which agreed that no charge for barrack accommodation for any troops stationed in the settlements for Imperial purposes, ought to fall upon the settlements, I am directed by the Secretary of State for War to request the authority of the Lords Commissioners of Her Majesty's Treasury to proceed, without delay, in rendering Tanglin Barracks, near Singapore, fit to receive a wing of an European regiment, at a cost of 8,000 *l.*

I am to add, that until these barracks are fit for occupation, that part of the arrangement made with respect to the Straits Settlements, under which this wing of an European regiment is to be stationed in the settlements for Imperial purposes, cannot be carried out.

It is probable that there will be difficulty in executing the entire work within the present financial year, and that the expenditure, up to 31st March next, will not exceed 6,000 *l.* Towards defraying this, I am to state that there is a sum of about 3,000 *l.* still available on the amounts voted in the present year's Estimates for barracks at the Straits Settlements; the balance it is proposed to defray from savings to be effected on Vote 14 generally.

I am to request the favour of an early reply, in order that instructions may be sent to the station by the mail of the 26th instant.

I am, &c.

The Secretary to the Treasury. (signed) *D. Galton.*

(No. 13,468—67. 098—158.)

Sir, Treasury Chambers, 24 August 1867.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to state, for the information of the Secretary of State for War, with reference to your letter of 22nd instant, that my Lords approve of the proposed expenditure of 8,000 *l.* for the purpose of rendering Tanglin Barracks, near Singapore, fit to receive a wing of a European regiment; and of the excess which will be thereby caused in the item for this service in the Estimates for the current year, being temporarily defrayed, as recommended, from the general savings on Vote 14.

I am, &c.

The Under Secretary of State for War. (signed) *George A. Hamilton.*

(Woolwich, 7—1,546.)

Sir, War Office, 23 October 1867.

I AM directed by the Secretary of State for War to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that signs of settlement having been observed in Pavilions A, B, and C of the Herbert Hospital at Woolwich, it has been found necessary to carry out certain remedial and precautionary measures, such as underpinning, &c.

The

and Repairs at Home and Abroad, with the Savings and Excesses, &c.—*continued.*

The cost is estimated at 1,065 *l.*, and I am to request their Lordships' sanction to this expenditure, which it is proposed to defray from savings generally on Vote 14, Part 3.

I have, &c.

The Assistant Secretary, Treasury. (signed) *D. Galton.*

(16,451—67. Woolwich, 7—1,550.)

Sir, Treasury Chambers, 28 October 1867.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to convey to you, for the information of Secretary Sir John Pakington, with reference to your letter of 23rd instant, the approval of the Board, of the temporary appropriation of the sum of 1,065 *l.* from the expected savings on Vote 14, Part 3, to provide for the expense of underpinning a portion of the Herbert Hospital, Woolwich, which has shown signs of settlement; as recommended in your letter.

I am, &c.

The Under Secretary of State for War. (signed) *George Ward Hunt.*

(Canada, 16—169.)

Sir, War Office, 20 November 1867.

I AM directed by Secretary Sir J. Pakington to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that for the extra troops recently sent to Canada, the Canadian Government agreed to provide additional barracks, but would not hold itself responsible for the supply of any "barrack furniture not forming a portion of the buildings themselves."

This arrangement was concurred in by the Secretary of State for War.

The Canadian Government consider stoves as coming within the meaning of the exceptional clause, in which view the Secretary of State for the Colonies concurs, and Sir J. Pakington, being of opinion that the expenditure under this head cannot be recovered from the Provincial Government, directs me to request their Lordships' approval of an outlay of 2,960 *l.* 17 *s.* 10 *d.* for stoves and pipes, which has been incurred by the General Officer Commanding, being charged under the head of Urgent and Unforeseen Services ordered by Governors, &c. abroad, and defrayed from savings anticipated on Vote 14.

I am, &c.

The Assistant Secretary, Treasury. (signed) *D. Galton.*

(18,056—67. Canada, 16—178.)

Sir, Treasury Chambers, 4 December 1867.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 20th ultimo, requesting the sanction of this Board to an expenditure of 2,960 *l.* 17 *s.* 10 *d.*, on account of stoves and pipes furnished to the additional barracks provided for the extra troops recently sent to Canada.

I am to request that you will signify to the Secretary of State my Lords' approval of the outlay to be charged under the head of Urgent and Unforeseen Services ordered by Governors, &c. abroad, and defrayed from savings anticipated on Vote 14.

I am, &c.

The Under Secretary of State for War. (signed) *George Ward Hunt.*

(Nova Scotia, 2—353)

Sir, War Office, 11 November 1867.

I AM directed by the Secretary of State for War to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the General Hospital at Halifax having been destroyed by fire, provision for 2,000 *l.*, towards the 21,000 *l.* required for a new hospital, was made in the Estimate 1867-8, and the work is being carried out.

Under date the 29th July 1867, the General Officer Commanding strongly recommended, as no suitable premises could be hired, that a temporary barrack should be at once erected to accommodate men displaced to make room for the sick.

Secretary Sir John Pakington expressed his regret that such delay in pointing out the necessity for this service had taken place, and as no estimate was furnished, nor information given as to where or how it was proposed to erect the buildings required, he instructed the General Officer Commanding to take such steps as he might consider to be absolutely

 necessary

necessary for the housing of the troops, and to report his proceedings, and the expenditure involved.

The General Officer Commanding now reports that he has authorised the erection of a barrack, with out-buildings, for 120 men, and that he has issued his warrant for 3,060 *l.*

Sir J. Pakington directs me, therefore, to request their Lordships' approval of this expense being charged under the head of Urgent and Unforeseen Services ordered by General Officers Commanding abroad, Vote 14.

I am, &c.

The Under Secretary, Treasury. (signed) *D. Galton.*

(17,536—67.)

Sir, Treasury Chambers, 20 November 1867.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 11th instant, requesting the approval of this Board to the expenditure of 3,060 *l.*, in erecting a barrack for the temporary accommodation of the troops at Halifax, who have been displaced to make room for the sick during the erection of a new hospital to replace that destroyed by fire.

I am to state, for the information of the Secretary of State, that before my Lords approve of so large an expenditure for the erection of this building, they would request that they may be furnished with the information given by the General in Command with regard to his not hiring the necessary accommodation for the troops, and that they may also be informed whether there is any probability of the building being turned to any other purpose when it may be no longer required for a barrack.

I am, &c.

The Under Secretary of State for War. (signed) *George Ward Hunt.*

(Nova Scotia, 2—364.)

Sir, War Office, 28 November 1867.

WITH reference to your letter dated 20th instant (17,536—67), respecting the erection of a barrack for the temporary accommodation of the troops at Halifax, Nova Scotia, I am directed by the Secretary of State for War to transmit, for the information of the Lords Commissioners of Her Majesty's Treasury, the accompanying copy of a letter from the general officer commanding on the subject, and to state that, in order to carry out the sanitary requirements now considered essential for the troops, additional buildings for various purposes are required, so that this barrack can be fully utilised under any circumstances.

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Longford.*

Sir, Halifax, Nova Scotia, 29 July 1867.

IN transmitting herewith, for your approval, plans of the General Hospital proposed to be built in this city, to replace that which was burnt down a few months ago, I beg leave to point out the absolute necessity of this building being completed with the utmost dispatch, as the Glacis Barrack is now occupied as a temporary hospital, thereby depriving me of barrack accommodation for 134 men.

Moreover, the sick now in the Naval Hospital are liable to be turned out of it any day (as was nearly the case last week) in the event of a man-of-war arriving from the West Indies with cases of yellow fever or any contagious disease on board, which is frequently the case at this season of the year.

It will be seen, therefore, that the immediate erection of a new hospital is a thing of the utmost importance.

I am informed by the Commanding Royal Engineer that, if the money for this building be granted at once, he could complete it by March 1869.

Under any circumstances, it will be necessary that immediate orders shall be given to build another wooden barrack, to accommodate the men who have been removed from that of the Glacis, as no house or store can be hired fit for a barrack in the city; unless it be thought advisable to send two companies back again to Prince Edward Island, which, however, I cannot recommend, as the expense of their going there and returning to Halifax in the spring to work at the defences would cost about 1,200 *l.* (which would have to be paid by the Imperial Government), and that sum would go far to build a new small barrack, which is much required here.

I have, &c.

(signed) *Hastings Doyle,*
Major General Commanding.

---

and Repairs at Home and Abroad, with the Savings and Excesses, &c.—*continued.*

(Nova Scotia, 2—368. 18,610—67.)

Sir, Treasury Chambers, 7 December 1867.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 28th ultimo, further respecting the erection of a barrack for the temporary accommodation of the troops at Halifax, Nova Scotia.

I am directed to state, for the information of the Secretary of State, that having regard to the explanation afforded by the enclosed letter from the General Officer Commanding, my Lords will not withhold their consent to the expenditure incurred in erecting this temporary barrack within the limit of 3,060 *l.* being charged to Vote 14, under the head of Urgent and Unforeseen Services ordered by General Officers Commanding abroad.

I am, &c.

The Under Secretary of State for War. (signed) *George Ward Hunt.*

(Malta, 2—1,579.)

Sir, War Office, 20 December 1867.

I AM directed to acquaint you, for the information of the Lords Commissioners of Her Majesty's Treasury, that the want of proper accommodation for married soldiers and for stores at Malta has long been felt, but there has been a difficulty in the way of making sufficient provision, owing to eligible sites, as regards sanitary position, not being available.

A large building in Valetta, commonly known as the "Camerata," and capable of affording excellent accommodation for 103 married non-commissioned officers and men, and their families, besides giving ample space for stores, was offered some time ago to the Secretary of State for War, but the price demanded (36,000 *l.*) was so extravagant that negotiations for its purchase were broken off.

Recently, however, the proprietor, Mr. Consolani, has consented to accept 18,000 *l.*, which it was proposed to pay in two instalments; the first in 1868-69, and the second in 1869-70, but the Solicitor of the War Department has pointed out that, in consequence of the building being already mortgaged to the extent of 20,000 *l.*, this course will prove very inconvenient, inasmuch as it will not only delay possession being obtained until the whole purchase money is paid, but it will also involve the payment of interest on the balance remaining unpaid.

As Secretary Sir John Pakington considers that the acquisition of these premises will be of great advantage to the public service, and that it is very desirable to obtain immediate possession, he directs me to request their Lordships' sanction to the amount of 18,000 *l.* being expended in effecting this purchase, and to the excess on the grant for married soldiers' quarters which it will occasion, being defrayed from savings on Vote 14 generally.

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Edward Lugard.*

(19,981—67. Malta, 2—1,616.)

Sir, Treasury Chambers, 28 December 1867.

THE Lords Commissioners of Her Majesty's Treasury have had before them your letter of the 20th instant, requesting the sanction of this Board to the purchase of a building in Valetta, Malta, known as the Camerata, for married soldiers' quarters and for stores, for the sum of 18,000 *l.*

I am to state that, in consideration of the desirableness of the object which the Secretary of State has in view, my Lords will not refuse their consent to the temporary application of the amount to this purpose, such excess on the grant for married soldiers' quarters, as it may occasion, to be defrayed from savings on Vote 14 generally.

I am, &c.

The Under Secretary of State for War. (signed) *Geo. Hamilton.*

EXPLANATORY PAPER, No. 3, showing the PARTICULARS of the EXPENSE of URGENT and UNFORESEEN SERVICES at the under-mentioned COLONIES, and not provided for by Parliament, but which have been allowed under the several Authorities quoted hereafter, and charged under the Special Head of "Services ordered by Governors, &c."

(53—New Zealand—3027.)

Sir, War Office, Pall Mall, 22 June 1867.

I AM directed by Sir John Pakington to forward, for the information of the Lords Commissioners of Her Majesty's Treasury, a copy of a communication which has been received from Deputy Commissary General Strickland, together with a memorandum for the guidance of the officers entrusted with the compilation of the accounts, and extract from a statement detailing the claim on the part of the Government of New Zealand to repayment of a portion of the advances from local funds on account of the expenditure occasioned by the late native hostilities for steam transport on the Waikato River, the same being liable to be defrayed from Imperial funds, in conformity with an agreement; and to state that the sum ascribed to be due (viz., 75,955 *l.* 1 *s.*) has been credited by Commissary-General Stanley Jones in his accounts with the Colony.

As there is a probability of the Grants for the year 1866-7 falling short of the aggregate expenditure, irrespective of this additional charge for 1865-6, and prior years, I am further instructed to request that you will move their Lordships to give such instructions respecting the disposal of the sum in question as they may deem necessary, Sir John Pakington being of opinion that the amount should merge into the general excesses, subject to an explanation in the statement of savings and deficiencies to be submitted to Parliament for the year ended the 31st March 1867, and to be made good by a Vote to cover excesses, should the contingency at present anticipated be realised at the closing of the Parliamentary accounts in September next.

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Douglas Galton.*

(53—New Zealand—3136.)

Sir, War Office, Pall Mall, 3 September 1867.

WITH reference to the communication from this Department, dated 22nd June last, relative to a claim preferred by the Local Government of New Zealand to repayment of the sum of 75,955 *l.* 1 *s.* 5 *d.*, which had been advanced by the Colonial revenue on account of charges incurred for the steam transport on the Waikato River during the late native hostilities, I am directed by Secretary Sir John Pakington to request that you will move the Lords Commissioners of Her Majesty's Treasury to give such instructions as their Lordships may think necessary in regard to the mode of charging the same; viz., whether against Army Grants for the year 1866-7, to which the item more properly belongs as a prior year transaction, for which the officer appointed by the Treasury to effect a settlement of the general account between the respective Governments, admitted that this country was liable; or against the army funds for a subsequent period, Sir John being of opinion that the adoption of the first would be the more correct course.

I am also instructed to suggest, whether a compromise might not be effected in respect to the other items of expenditure maintained by the Colonial authorities to be defrayable from Imperial funds, which, together with the sum first adverted to, amount to 262,674 *l.* 11 *s.* 4*d.*, while the sum due on account of capitation grants to the 31st October 1864, as shown by the account rendered, was 287,150 *l.* 16 *s.* 8*d.*, the latter of which was not covered by the 4 per cent. debentures held by their Lordships, and thus close the army portion of a complicated account, leaving a part of the capitation grant in favour of disbursements, for solely native objects, between the 1st January and the 31st October 1864, according to agreement—say, 24,476 *l.* 5 *s.* 4*d.*

Should, however, the above views be entertained, there would remain for adjustment merely the advances from the Treasury chest, as stated in the margin.

I am, &c.

The Assistant Secretary to the Treasury. (signed) *Douglas Galton.*

(53—New Zealand—3383.)

Sir, Treasury Chambers, 28 March 1868.

I AM directed by the Lords Commissioners of her Majesty's Treasury to transmit to you herewith, for the information of the Secretary of State, with reference to your letters of the 22nd June and 3rd September last, copy of a Minute of this Board on the subject of the adjustment of the accounts between the Imperial Government and the Colonial Government of New Zealand.

I am, &c.

The Under Secretary of State, War Office. (signed) *Geo. A. Hamilton.*

Treasury Minute, dated 28th March 1868.

The First Lord of the Treasury, and the Chancellor of the Exchequer, state to the Board, that Her Majesty's Government have had under consideration the claims advanced on behalf of the Imperial Treasury against the Colonial Government of New Zealand, and the counter-claims preferred by the latter, in regard to the expenditure incurred in the military operations during the late war in that Colony.

From the summary which has been prepared by direction of this Board, it would seem that the account furnished by Commissary-General Jones, in accordance with the instructions forwarded to him on 24th March 1866, shows that the sum charged against the Colony up to the 30th September 1866, amounted to 1,304,963 *l.*, but that he had given credit to the Colony for expenditure on account of services performed for the Imperial Government, &c., to the amount of 127,781 *l.*, leaving a balance of debt due to the Imperial Government of 1,177,182 *l.*

This account does not, however, include claims on the part of the Admiralty to the amount of 45,000 *l.*

It would, however, appear from the same summary, that Major Richardson, the officer appointed by the Colony to act in concert with Commissary-General Jones in the inquiry while admitting the statement furnished with his Report, claims against the Colony, as stated in Commissary-General Jones's account to the extent of 759,621 *l.*, prefers counter-claims on behalf of the Colony, amounting to the sum of 906,856 *l.*, inclusive of the sum of 500,000 *l.* on account of debentures realised; and he therefore contends, that instead of the Colony being indebted to the Imperial Government, a sum of 147,235 *l.* really remains due to the Colony.

This statement having been submitted for the consideration of Commissary-General Jones, that officer has stated his opinion that, with the exception of a sum of about 100,000 *l.* included in the credit given to the Colony in his account which forms a portion of the counter-claims, and possibly of some further items to a small amount, which he considers may fairly be allowed in favour of the Colony, these claims are for services which it was understood the Colonial Government had agreed to perform at their own cost.

The Chancellor of the Exchequer further states that, having been informed by his Grace the Secretary of State for the Colonies that Mr. Fitzherbert had arrived in this country with instructions from the Colonial Government of New Zealand, amongst other things, to come to some settlement with regard to these claims he (the Chancellor of the Exchequer) had, when Financial Secretary to the Board, in company with the Permanent Secretary, attended at several conferences at the Colonial Office on the subject, at which Mr. Fitzherbert was present; that it was found, however, that although it was proposed to recommend that the item on account of the Fencibles, that for compound interest, the increased charge for capitation, and other charges, amounting in the whole to 460,000 *l.* and upwards, should be withdrawn, and ultimately an offer was made to abandon any further claim on the part of the Imperial Government on the payment by the Colony of the sum of 150,000 *l.* Mr. Fitzherbert, though inclined to admit to a certain degree the justice of the Imperial claims, did not consider himself in a position to agree to such a compromise, and at the same time argued that the Colony ought not to be called on to make any further payment beyond the 500,000 *l.* debentures already realised.

The First Lord and the Chancellor of the Exchequer state that the matter in this stage was brought under the consideration of Her Majesty's Government, who were of opinion that it might fairly be questioned how far certain of the charges against the Colony could be maintained, either on the ground of equity or policy; taking into consideration the great difficulty of defining, with any precision, what portion of the expenditure could be charged to Imperial and the Colonial funds respectively, such expenditure having been frequently incurred on verbal and probably not very explicit instructions, given under circumstances of great pressure; and that although, in the case of roads and works of that character, calculated to be of permanent benefit to the Colony, much doubt existed whether a considerable period must not elapse before such benefit could accrue. And adverting to the protracted correspondence and inquiry which must necessarily result from any further attempt at investigation, and the great improbability of its leading to any satisfactory result; while the delay incident to such further proceedings could not fail to have an injurious effect on the financial position of the Colony at a period when it is about to contract a large loan, the necessity for which has been caused by the same reasons which have led to the Imperial expenditure.

Her Majesty's Government had, under the circumstances above stated, arrived at the conclusion that, on the Colony consenting to withdraw any claim on their part, all urther claim in respect to this expenditure should be abandoned on the part of the Imperial Government, and that Her Majesty's Government were further induced to come to this decision by the consideration that the Colony had undertaken to defray from its own resources the entire cost of future internal defence, thus relieving the Imperial Government from the risk of being involved in future military oparations and from the expense of maintaining

taining a large military force in New Zealand, and having regard to the heavy losses sustained by the Colony in consequence of the war, which has resulted in taxation at the rate of 6 *l.* 5 *s.* per head per annum on the entire population, European and native.

The First Lord and the Chancellor of the Exchequer recommend that the decision of Her Majesty's Government should be accepted as final.

My Lords approve.

Transmit copy to the Colonial Office, with reference to letters of 26th September and 2nd October, and previous correspondence.

Transmit copy to the Admiralty.

Transmit copy of this Minute to the War Office, with reference to their letters of 22nd June and 3rd September last.

(53—New Zealand—3383.)

Sir, War Office, Pall Mall, 22 July 1868.

With reference to the Minute which accompanied Mr. Hamilton's letter of the 28th March last (7066/68), relative to the adjustment of the account between the Imperial Government and the Colonial Government of New Zealand, I am directed by Secretary Sir John Pakington to forward, for the information of the Lords Commissioners of Her Majesty's Treasury, a statement of account detailing the balances, as shown by the records of this Department, the same being irrespective of the proportion (viz., 505,899 *l.* 14 *s.* 3*d.*) of the sum of 764,829 *l.* granted by Act 29 & 30 Vict. c. 91, s. 11, for the purpose of making good the advances from the Treasury chest in New Zealand and army funds, on account of expenditure caused by the war in that Colony, which has been transferred to the army credit in the books of the Paymaster General.

As, however, none of the transactions connected with the pay, allowances, &c. &c. of the local militia and native levies employed in suppressing the insurrection in New Zealand, have appeared in the appropriation account of army receipt and expenditure, and it being contrary to practice to introduce therein balances due from other funds, I am to acquaint you that Sir John Pakington is of opinion that it would be advisable to insert the full charges incurred, and to place the sum of 505,899 *l.* 14 *s.* 3 *d.*, received under their Lordships' sanction, on the debit side of the Army Account, now in course of preparation, in the same manner as receipts from votes of credit, by which arrangement Parliament will have an opportunity of seeing to what extent the integrity of the Army Accounts has been disturbed by the adjustment of the claims against, and the counter claims on the part of, the Local Government of New Zealand. Before giving any final instructions upon the subject, the Secretary of State wishes to learn whether their Lordships see any objection to the adoption of the course suggested.

I am, &c.

The Secretary to the Treasury. (signed) *Douglas Galton.*

(53—New Zealand—3416.)

Sir, Treasury Chambers, 1 August 1868.

The Lords Commissioners of Her Majesty's Treasury have had before them your letter of 22nd ultimo, further relating to the adjustment of the accounts between the Imperial Government and the Colonial Government of New Zealand. 53—New Zealand—3383.

I am to state, for the information of the Secretary of State, that my Lords see no objection to the arrangement proposed, by which it will appear that the advances made to the Colony out of Army Grants on account of local militia and other services, not provided for in Army Votes, during the war, after giving credit to the Colony for certain items, will be sufficiently met by the sum of 505,899 *l.* 14 *s.* 3 *d.* already advanced out of the vote of credit for the New Zealand war.

I am, &c.

The Under Secretary of State for War, &c. &c. &c. (signed) *Geo. A. Hamilton.*

COPY of the Application to Appropriate temporarily the Surpluses on certain Votes for Army Services for 1867–8, in Aid of Deficiencies, and of the Treasury Reply thereto.

(7512—185.)

Sir, 30 December 1868.

I AM directed by Mr. Secretary Cardwell to forward, for the information of the Lords Commissioners of Her Majesty's Treasury, a statement showing a comparison of the Army Expenditure for 1867–8, with the Grants of Parliament, together with an Abstract from the Explanatory Paper, in which are assigned the reasons for the variation between the sums charged and those voted for the sub-items in the Army Estimates; and to request you will move their Lordships to issue their authority to defray temporarily the Excesses therein shown, out of the Surpluses (also detailed in that document), in conformity with the terms of the Act 30 & 31 Vict. c. 120, s. 26.

I am to add that the Excesses of Expenditure beyond the Grants amount to 1,968,869 *l.* 16 *s.* 3 *d.*, and the Surpluses to 348,078 *l.* 16 *s.*; but in aid of the latter my Lords have authorised the sums mentioned below:—

Proportion of the Vote for the Extraordinary Expenses of the Abyssinian War - - - - - - - - -	£.	400,000	- -
Do. do. granted to make good the Advances from the Treasury Chest in New Zealand, and from Army Grants on account of the Native Insurrection - -		505,899	14 3

I have, &c.

The Secretary to the Treasury. (signed) *D. Galton.*

(7512—187.)

Sir, Treasury Chambers, 8 January 1869.

I AM directed by the Lords Commissioners of Her Majesty's Treasury to acquaint you, for the information of Mr. Secretary Cardwell, that my Lords have had under consideration the statement inclosed in your letter of 30th December last, showing a comparison of Army and Militia Expenditure for the year 1867–8, with the Grants of Parliament for the same period, from which it appears that an excess has occurred on certain Grants (as per margin), and on account of irrecoverable debts for the year ended 31st March 1868, amounting in the whole to 1,968,869 *l.* 10 *s.* 3 *d.*, while on the remaining Grants for the same year there is an aggregate surplus of 348,078 *l.* 16 *s.*

19 - - - -	789 15 7
24 - - - -	55 1 1
Irrecoverable Debts -	1,490 2 8
TOTAL - - £.	1,968,869 10 3

The sum of 505,899 *l.* 14 *s.* 3 *d.*, granted per Act 29 & 30 Vict. c. 91, s. 11, in aid of Army Grants on account of the New Zealand War Expenditure, and the sum of 1,114,891 *l.*, transferred to the credit of Army Funds out of the Vote of Credit for the Abyssinian War being brought to account in the present statement, the actual deficiency which remains to be met amounts to 348,078 *l.* 16 *s.*

In pursuance of the authority granted by the 26th section of the Act 30 & 31 Vict. c. 120, my Lords authorise the said sum of 1,968,869 *l.* 10 *s.* 3 *d.* being included in the account of Army Receipt and Expenditure for 1867–8, prepared under the provisions of the Act 9 & 10 Vict. c. 92, and they approve of the surpluses on ordinary Grants, amounting, as stated, to the sum of 348,078 *l.* 16 *s.*, being applied towards the discharge of the deficiencies.

I am, &c.

The Under Secretary of State, War Office. (signed) *A. S. Ayrton.*

BALANCE SHEET, showing the LEDGER BALANCES on the 30th September 1868, the Date on which the foregoing Appropriation Account of RECEIPT and EXPENDITURE was Closed.

N.B.—To obviate the necessity of introducing into the following Statement the separate results of all the Accounts, the Balances in the Ledger are shown in *Classes*, except in those instances in which it has been deemed advisable to add special explanations, with a view of illustrating the principle upon which the Account has been prepared and the final Balance struck. The Account is one of Receipt and Expenditure within the Year, and has been kept open for *Six Months* after the expiration of the Year to which it refers, in order that all Payments posted within that period, relating to the said Year, may be included in it, and the whole Expenditure on Imprest be audited before declaring the Balances. The Postings of the Receipts and Payments comprised in that Account being therefore spread over a period of *One Year and Six Months*, the proof of the correctness thereof may be shown either by the Balance which remained on the Books at the Date to which the Account of Receipt and Expenditure extends (viz., 31 March 1868) ; or by those which remained at the Date when it was definitely closed (viz., 30 September 1868). The Balance Sheet to the latter Date is given, as it exhibits a more complete Statement of the Accounts.

ARMY (VARIATION OF NUMBERS, &c.).

STATEMENT showing the VARIATION of the NUMBERS of HER MAJESTY'S BRITISH FORCES;

AND

EXPLANATIONS of the DIFFERENCES between the AMOUNTS PROPOSED in the ARMY ESTIMATES for EFFECTIVE SERVICES for 1869–70, and the AMOUNTS VOTED for EFFECTIVE SERVICES for 1868–69.

War Office,
25 February 1869.

EDWARD CARDWELL.

(PRESENTED TO PARLIAMENT BY HER MAJESTY'S COMMAND.)

Ordered, by The House of Commons, *to be Printed*,
26 *February* 1869.

STATEMENT, showing the DIFFERENCE between the NUMBERS on the Establishment of the Regiments and Depôts in the United Kingdom of Regiments in India, in 1868-69, and those PROPOSED for 1869-70.

VOTE A.

Numbers in 1868-69	136,650
Numbers Proposed for 1869-70	125,529
Decrease, 1869-70	11,121

DECREASES.

Royal Horse Artillery:

A Reduction has been made in the number of Waggons and Carts attached to the Horse Artillery; a proportionate Decrease therefore takes place in the number of Artificers and Drivers. The Assistant Surgeons attached to the Artillery have not been included in the Regimental numbers — 173

Household Cavalry:

By the adoption of the Squadron Organization in the Cavalry, a Reduction has been effected of 4 Cornets in each of these three Regiments — 12

Cavalry of the Line:

The Squadron Organization reduces 4 Cornets per Regiment in each of 17 Regiments; one Major has been added for the Regiment returning from India — 67

Eight Men per Squadron, and 13 Non-Commissioned Officers in all, are reduced by the same arrangement — 557

624

Royal Artillery:

Two Batteries of Garrison Artillery have been reduced; four Field Batteries have been converted to Garrison Batteries; the Depôt Brigade has been concentrated at Woolwich and reduced in its numbers. The number of Waggons and Carts attached to the Field Batteries have also been reduced, and a less number of Drivers therefore provided — 1,271

Royal Engineers:

The Engineer Train has been reduced by — 49

Infantry of the Line:

The Battalions recalled from the Colonies will be reduced by two Companies, and the Depôts of Battalions serving in the Colonies by two Ensigns and 20 Men. Every Battalion serving at Home, and not preparing for Service Abroad, will be reduced by 40 Men. The Battalions serving in the Colonies will be reduced by 80 Men each, except those in Ceylon, Mauritius, Straits Settlements, and China, and Australia, which will be strengthened. These changes, with some minor modifications, effect the following Reductions:—

Captains	30	
Lieutenants	30	
Ensigns	90	
		150
Non-commissioned Officers		204
Corporals	50	
Privates	7,130	
		7,180
		7,534

West India Regiments:

Reduction of one Regiment	867
Less, addition of one Company to each of the other Three Regiments	300
	567

Ceylon Rifle Regiment:

Officers, Non-commissioned Officers, and Men of Four Companies — 347

Royal Canadian Rifles:

Officers, Non-commissioned Officers, and Men of Four Companies — 402

Gun Lascars:

Two Companies from Straits Settlements — 176

11,155

INCREASES.

Royal Malta Fencible Artillery:

34 Rank and File, which were reduced from this Corps last year, have been again added, as it has not been relieved of the Coast Guard duties as then contemplated — 34

TOTAL DECREASE — 11,121

VOTE B.

NATIVE INDIAN TROOPS, serving in China and Straits Settlements.

Numbers Proposed for 1869-70	1,760
Numbers Voted for 1868-69	880
Increase, 1869-70	880

EXPLANATIONS of the DIFFERENCES between the ESTIMATES 1868-69 and 1869-70.

	£.
TOTAL ARMY ESTIMATES 1868-69 - -	15,455,400
TOTAL ARMY ESTIMATES 1869-70 - -	14,230,400
Decrease - - -	£. 1,225,000

VOTE 1.

GENERAL STAFF AND REGIMENTAL CHARGES.

Decrease - - - £.435,400.

*A. B.—Reductions have been made in the General Staff in Canada, Cape of Good Hope, Malta, Nova Scotia, West Indies, and Jamaica.

The Pay of a Major General has been provided for the Inspector General of Engineers, on the separation of the duties of the office from that of Director of Works, which has not been filled up.

C.—The Reduction in Numbers, as detailed in the previous page, is the cause of the Decrease in the Charge for Pay. There is an Increase, however, in the Charge for the additional 1 *d.* a day to Men who have re-engaged.

The Pay of Officers on Furlough from India, hitherto included in this item, will be paid direct by the Indian Government from 1st April next. A re-arrangement as to the mode in which the Charge is to be calculated for Recruiting the Drafts for Regiments serving in India is now under consideration. The transfer of the Charge for Furlough Pay to India occasions a Decrease of £.136,000, as compared with last year; the receipts from India, which are paid into the Exchequer, will fall off to a similar amount.

The Staff of Four Depôt Battalions has been reduced.

D.—The Charges for Good Conduct Pay and Good Shooting have considerably increased.

E.—The Increase in the Number of Troops at Home causes an Excess in the charge for Beer Money and Mess Allowance.

F.—The Regimental Serjeant Instructors of Musketry and Fencing will receive, in future, a higher Rate of Regimental Pay in lieu of the Extra Duty Pay; a Reduction, therefore, arises under the latter sub-head.

The Reduction of the Depôt Battalions effects a considerable Saving in Clerks.

H.—A Regiment of Her Majesty's Native Indian Army will be stationed at the Straits Settlements during the year 1869-70, pending a re-consideration of the Garrison necessary for its Defence; this item does not bear the Charge for Provisions and Barrack Expenses which were included in the Estimate given last year for one Regiment.

K.—As Recruits are no longer accompanied by an Escort when proceeding to join their Regiments, a considerable Saving has arisen.

L.—In consequence of the Reductions which have been effected in the Number of Men, a less number of Recruits will be required during 1869-70.

Q.—Each Cavalry Regiment has been reduced by 24 horses. By the Reduction of the Waggons and Carts in the Horse and Field Artillery, and the conversion of four Field Batteries to Garrison Batteries, 806 horses are reduced. A less sum, therefore, is required for purchase of Remounts than for last year. The Mounted Corps returning from Canada will, however, require horses on their arrival in England.

R.—The Estimate for Pay, &c. for the School of Gunnery, last year, was in Excess of the required Sum.

U. V.—The Estimate for Stores used in the Instruction of Engineers at Chatham, and of the Army generally, in Field Works, &c., has been included in the Store Vote (Vote 13), as the issues are made from the General Store.

Y.—Additional Gymnastic Instructors are appointed as the various Gymnasia in course of construction are completed. An Instructor, with the rank of Staff Serjeant, is placed in charge of each Gymnasium.

* These letters refer to the several sub-heads of the Votes as detailed in the Army Estimates; the pages referred to are those of the Army Estimates.

DD.—On the withdrawal of a portion of the Troops from Hong Kong and Mauritius, a less Number of Men is required to perform the fatigue duties of the Europeans in those climates.

EE.—The Funds at present invested are sufficient to meet the Charge for additional Interest on Savings without a Grant for 1869–70.

GG.—An increased Charge for Travelling is provided for, as the Number of Officers at Home will be in Excess of last year.

VOTE 2.

COMMISSARIAT ESTABLISHMENTS, SERVICES, &c.

Decrease - - - £. 106,900.

A. B. C.—The consolidation of the work of the Supply Departments at several Stations under the Control System, and the Reduction of the Force in Canada, Mauritius, &c., has led to a Reduction in the Number of Officers and Subordinates in the Commissariat Department. No alteration has yet been made in the Rates of Pay, or the position of Officers performing the duties of the New Control Department.

D.—The Stores hitherto provided in this item have been included in Vote 13.

E. F. G. I.—The Reduction in the Number of Men and Horses, and the withdrawal of Troops from several Colonies, is the cause of the Decrease of Estimate for Provisions, Forage, Transport in Colonies, and Colonial Allowances.

H.—The larger Force at Home, and the movements necessary on the arrival of Troops from Abroad, require increased provision to meet the Expense of Railway Charges.

VOTE 3.

CLOTHING ESTABLISHMENTS SERVICES, &c.

Decrease - - - £. 36,046.

A. B. C. D.—The Clothing Factory lately existing at Woolwich has been removed to Pimlico, and consolidated with the larger factory; by this arrangement various economies have been effected, including a reduction in the Establishments.

E. to K.—The Reduction in the Force to be maintained during 1869–70, as well as the decrease in the demand for new Clothing for the Militia, gives rise to the Decrease on these various items.

The Increase under Item G., however, is owing to the intention to obtain by purchase larger quantities of made-up Clothing, as shown in the detail of the Sub-Head given on page 27.

The Reduction on the Item H., Compensation for Clothing, is also due to new arrangemements in reference to the issues to Men re-engaging.

The Decrease in the deduction from the Vote is mainly due to the repayment for the Militia Clothing being estimated to be less than last year; but no repayment will be made as hitherto for Clothing for Barrack Establishments, Military Prisons, and Educational Establishments; the Cost of these Services has therefore been added to this Vote, and is stated on page 27, and also in the Votes for those Establishments. This arrangement will admit of a more correct Audit of the Expenditure.

VOTE 4.

BARRACK ESTABLISHMENT, SERVICES, &c.

Decrease - - - £. 193,393.

A. B. C.—The Reductions effected by the consolidation of the Departments under the Control System are the cause of the decreases under these Sub-heads.

D.—The cost of clothing of Barrack Serjeants is charged against Vote 3, from which Vote the expenditure in the first place has always been made.

E.—The greater portion of Barrack Stores has always been in the first place obtained through the medium of the Store Department, and subsequently charged on issue against the Barrack Vote. On the amalgamation of the various Supply Departments, the inconvenience and expense of maintaining separate Stores of the same Articles for the several Services has been found to be great, and it has therefore been determined to include provision for all Stores as far as possible in one Vote; this arrangement will also secure a more accurate audit of expenditure by the Appropriation Auditor. The charge for Barrack Stores has been therefore transferred to Vote 13, and a large economy already secured.

F. to J.—The Reduction which has taken place in these items arises from the Reduction in the Number of Men; the Charge for Rents and Lodging Money is much less than last year owing to the withdrawal of Troops from Canada and China.

VOTE 5.

DIVINE SERVICE.

Increase - - - £. 950.

A. B.—A Reduction has been made in the Number of Staff Chaplains.

C. D.—The provision for the Capitation Allowances to Clergymen of various Denominations officiating to the Troops, which has been made in the Estimates during the last Two Years, has been found insufficient to meet the Charges; and for this reason, and also because a larger Number of Troops will be stationed at Home and all available Barracks occupied, an increased Vote has been taken.

VOTE 6.

ADMINISTRATION OF MARTIAL LAW.

Decrease - - - £. 21,000.

C.—The Expenses of Courts Martial, including the Travelling of Witnesses, &c., are very uncertain; the Expenditure has recently been in excess of the Estimate, and an increased Sum has been therefore provided.

F.—As in consequence of recent Regulations, it is contemplated that a large Number of Men will be confined in Military Prisons, who have hitherto been imprisoned in the Garrison Cells, a larger Sum has been estimated for Subsistence of Men.

The Charges for Clothing and Stores have been removed to Votes 3 and 13, for the reasons before stated.

H.—As the Barrack Cells will be relieved by the Military Prisons, less provision is made for Subsistence in the former. Charges for Stores and Clothing, hitherto transferred from other Votes against this item, will in future remain chargeable to those Votes.

The Increase in the Deduction from the Vote is owing to the Increase in the Rate of the Pay of the Men, which was not calculated on in the Estimates for 1868-69.

VOTE 7.

HOSPITAL ESTABLISHMENT, SERVICES, &c.

Decrease - - - £. 14,003.

A.—A large Reduction has been made in the Establishment of Medical Officers, but as it is not intended to place on Half-pay any of the Junior Officers who have recently passed by Examination into the Service, it has been found necessary to provide Pay for those remaining Supernumerary until absorbed, as shown in the Appendix, p. 172; this, in a measure, accounts for this item not showing a Decreased Charge; the Increase arises from the very large Number of Medical Officers who during the Year will become entitled to an Increase of Pay for Length of Service.

C. to E.—The Decreases on these items arise from the Decrease in the Number of Men.

G.—The Charge for Subsistence of Lunatics is decreasing; all Officers are now handed over to their Families at once, and the Men are as rapidly as possible transferred either to the charge of their Friends or of their Parish.

H. I. J.—The Reduction effected in the Charge for the Purveying Department is consequent on the Establishment of the Control System, under which the Duties of the several Departments have been amalgamated.

K. M.—The Reduction in the Charge for Diets and Washing is due to the Decrease in the Number of Men.

L.—The Charge for Furniture, &c., has been transferred to Vote 13.

N.—The Reduction of the Charge for Rents arises on the Withdrawal of Troops from Colonies in which Quarters were hired for Hospitals.

O. P.—The Charges for Fuel and Miscellaneous Services for Hospitals do not vary with the Number of Men, but with the Number of Wards occupied; there are slight Excesses on both these items.

VOTE 8.

MILITIA AND INSPECTION OF RESERVE FORCES.

Decrease - - - £. 34,087.

A.—The Travelling Expenses of Inspectors of all the Reserve Forces are provided in this Vote, as well as the Office and Clerks' Allowance.

An Aide-de-Camp has been granted to the Inspector General.

C.—No provision is made for the Training of the Irish Militia, but a largely increased Number of the English and Scotch Militia will be trained; the Saving, therefore, under this item is less than might have been anticipated, by not providing for the Irish Militia.

Increases of Pay are provided for several ranks of Officers, to equalise them with the Army Rates.

E.—Increased Allowances are provided to meet the Expenses of Officers when called up for Training.

G.—Bounty for an Increased Number of Militia is provided; this is issued to all Men Enrolled, irrespective of their being trained, and includes the Irish Militia.

H.—It is intended that several Militia Regiments shall be brought together for Drill and Exercise, and a larger Sum than for last Year is provided to cover their Travelling Expenses.

J.—The demands for Clothing from the various Regiments are less than for last Year, the Regiments being now fairly supplied.

K.—The Expense of the Hiring of Ground for Exercise, and Rifle Ranges, &c., is less than the Sum provided last Year.

The Charge for Stores and Maintenance of Barracks has been removed to Votes 13 and 14.

VOTE 9.

YEOMANRY CAVALRY.

Increase - - - £. 1,264.

A. B.—The Charge for the full Establishment of the Yeomanry was not shown last Year; the complete Establishment is now included, and the Estimate has been framed with reference to the Expenditure for last Year's Training.

VOTE 10.

VOLUNTEER CORPS.

Increase - - - £. 28,880.

A, B. C. D.—A larger Number of Adjutants are provided for additional Consolidated Corps. The Number of Efficients and Extra Efficients is much greater than last Year, as shown in the Table.

VOTE 11.

ARMY RESERVE FORCE, &c.

Increase - - - £. 16,500.

A. B. C. E.—The Increase in the Reserve Force is the cause of the increased Estimate.

D.—The Pay and other Expenses of Pensioners enrolled as the Convict Guard in Western Australia have recently been provided in the Civil Estimates; but as these Men receive their Pay, &c. under Regulations of the War Office, and the Services are administered by Officers of the Army Departments, the Charge has been transferred to the Votes of the Department responsible for the Details of the Expenditure.

VOTE 13.

STORE AND MANUFACTURING DEPARTMENTS, AND WARLIKE STORES.

Decrease - - - £. 341,370.

A. B. C.—The Decrease on the Charges for Establishments is owing to the Consolidation of the various Supply Departments under the Control System.

The Reduction in the Charge for the Purchase and Manufacture of Stores is due to the institution of a careful Revision of the requirements of the Service, on which it has been found advisable largely to reduce the Issue and Consumption of Stores.

H.—It is considered advisable to increase the Stock of Saltpetre, as a Material for Gunpowder.

J.—Conversions by Contractors of a larger Number of Guns than was anticipated when the Estimates for 1868-69 were framed, have been ordered, and provision has been made for the Cost of their Completion.

U.—The Transfer of the Charge for all Barrack, Hospital, and Miscellaneous Stores to this Vote is the cause of the Increase under this Head.

VOTE 14.

WORKS AND BUILDINGS.

Decrease - - - £. 84,417.

A Reduction of Expenditure is proposed under every item of the Works Vote; the Increase under Sub-head J. is apparent only. The Increase of 22,200 *l.* there shown, arises from a transfer of the Works of less than 1,000 *l.* from Part I., where they have hitherto appeared in lump Sums under Headings for Special Services. The Works amounting to more than 1,000 *l.* are shown as distinct Services in Part I., and the Total Estimate for each is given.

The principal New Works proposed are—

New Prison at Aldershot.
Canteen at Aldershot.
New Barrack at Glasgow.

VOTE 15.

ESTABLISHMENTS FOR MILITARY EDUCATION.

Decrease - - - £. 11,154.

The Decreases under the several Heads of this Vote arise from the transfer of the Charges for Clothing and Stores to Votes 3 and 13.

The Estimate for the Military Medical School does not provide for the Pay of Probationers, as, owing to the Number of Supernumerary Medical Officers now serving, it will not be necessary to admit any more into the Service this Year.

VOTE 16.

SURVEYS OF THE UNITED KINGDOM.

Decrease - - - £. 100.

VOTE 17.

MISCELLANEOUS SERVICES.

Decrease - - - £. 52,060.

A.—The Ordnance Select Committee has been abolished, and in its place it has only been necessary to retain a smaller Establishment at Woolwich; a considerable reduction of Expense has by this means been effected.

B.—The Expenditure for Stores, &c. for Experimental Services will be henceforth charged to Vote 13.

C.—A Reward has been provided for Captain Moncrieff for his Invention of a Gun Carriage.

G.—The demand for Clothing for the Channel Isles Militia is less than for last year.

J.—No provision is necessary for a Grant in aid of Drainage Works at Gibraltar.

L.—The Force of Metropolitan Police at several of the Factories has been strengthened; and the Charge for Police, which includes Travelling Expenses, employed in carrying out the provisions of the Contagious Diseases Prevention Act, has been increased, in order to provide for the probable extension of the Act.

M.—The Equipment of a Hospital Ship at Hong Kong has been completed.

O.—The Charge for Stores issued to Men being instructed in Trades, &c., has been transferred to Vote 13.

Z.—It has been decided to issue a Medal for Service in New Zealand.

VOTE 18.

ADMINISTRATION OF THE ARMY.

Decrease - - - £. 1,210.

A. B.—Pending the Departmental Enquiry into the War Office, the following Appointments in the Office of the Secretary of State for War have been Abolished:—

Director of Works.

Director of Stores.

Superintendent of Barrack Department.

Purveyor in Chief.

The three last have been reduced on the adoption of the Control System.

C.—An Assistant Quartermaster General has been reduced in the Office of the Field Marshal Commanding in Chief.

F.—The Annual Increase of Pay for Service is the cause of the Excess in this Charge.

H.—A Reduction in the Number of Men employed for the Topographical Department has been made.

SOLDIER LABOUR (ALDERSHOT, &c.)

RETURN to an Address of the Honourable The House of Commons, dated 9 March 1869;—*for*,

"COPY of the latest REPORTS on the Result of employing SOLDIER LABOUR on INCIDENTAL REPAIRS of BARRACKS, and on NEW WORKS at *Aldershot* and the *Curragh* Camps; also at *Parkhurst*, in the *Isle of Wight*, and *Woolwich*."

War Office, 6 April 1869.

EDWARD CARDWELL.

ABSTRACT of the REPORTS included in this RETURN.

ALDERSHOT.

IT is estimated that a saving of about 10 per cent. on incidental repairs, rising up to 50 per cent. on some new works, has attended the employment of soldier labour. A larger number of military superintendents are required for military labour than for work performed by civilians.

CURRAGH.

The employment of soldiers at the Curragh has been attended with the most satisfactory results. The saving is estimated at 39 per cent.; to work the system satisfactorily it is essential that the troops should remain for a considerable time at each station, and that they should be superintended by officers and non-commissioned officers of Royal Engineers.

PARKHURST.

It is estimated that a saving of 30 per cent. has resulted from the employment of soldier labour. The hearty co-operation of all concerned is essential for the successful employment of soldier labour.

WOOLWICH.

A saving, estimated at 20 per cent. on incidentals and 25 per cent. on new works, has attended the employment of soldier labour. A continuance of the system will develope its advantages in a higher degree.

REPORT on the Advantage of using MILITARY LABOUR.

Royal Engineers' Office, Aldershot,
22 March 1869.

Sir,

IN reply to your Memorandum of 8th instant (40,005—438), I have the honour to make the following report:—

I have during the last fortnight, having kept the subject purposely open for that time, taken the opportunity of checking sundry minor works, performed by Infantry and Sapper soldiers in this command.

The former, to take them first, have been employed as labourers, chiefly. Their labour in this form has effected a saving, varying from 10 per cent. on incidental repairs to 50 per cent. on some new works.

The system of employing the few artificers to be obtained from the line has not been fully developed, as it might be with an effort, and it is impossible to report satisfactorily on that branch of the subject.

Sappers as labourers only, are not very valuable. There is no loss in their labour, certainly, but little gain.

Sappers as artificers, are to be viewed differently. Under proper superintendence, at a station like this, their employment should save from 20 to 50 per cent. It has saved 50 on some large jobs, lately performed here during the period of my observation; on scattered incidental works the saving may be less.

I have, &c.
(signed) *Cha. C. Chesney*, Lieut Col.,
for the Colonel Royal Engineers, absent on leave.

The Director of Works,
War Office.

Barracks.—Curragh Camp.

Employment of Military Labour.

Sir, Dublin Castle, 17 March 1869.

In obedience to the instructions contained in your Memorandum on the above subject, dated W.O., 8th March 1869 (40,005—438), I have the honour to inform you that the employment of the labour of soldiers at the Curragh Camp during the past year has produced the most satisfactory results.

The barrack incidental repairs of about half of the buildings have been well and expeditiously performed by soldiers of the Royal Engineers and line regiments at a saving of nearly 40 per cent. of the total cost to the public.

Soldiers have also been employed on new works, and it has been found that in large services where the work is of a straightforward character, that a great percentage of saving can be effected.

Subjoined are the data from which the per-centage is derived.

Barrack Incidentals.

	£.	£.
Military labour		820
Materials for labour		640
	£.	1,460
Cost if done by triennial contractor	£.	2,040
Saving due to military labour, or 39·70 per cent.	£.	580

In order more fully to explain to you the manner in which this saving has been effected, I forward herewith tables showing the approximate saving on all items during the past year, also the actual saving from 1st July to 31st December 1868.

It would appear that the above is a sufficient proof of the great advantage that accrues to the employment of military labour; but I should add, in simple justice to Colonel Chesney, R.E., and the officers of Royal Engineers who have worked under him, that this favourable result could not have been produced had they been less assiduous in their superintendence, and less intelligent in their direction of the skilled labour placed at their disposal.

My opinion is, that such a system as that now in full work at the Curragh, when in the hands of thoroughly capable officers of Royal Engineers, assisted by trained non-commissioned officers of Sappers, may be extended to all barracks in occupation, with the sole proviso that the moves of troops take place at rare intervals; but that as long as the troops only remain in any particular barrack for a short time, it would be impossible to extend the system; and I would further remark, that it would not be possible to carry out the system of military labour fully, unless the skilled labour supplied by regiments of the line could be supplemented by Sappers, and superintended entirely by officers and non-commissioned officers of Royal Engineers.

I have, &c.
(signed) *Lothian Nicholson*,
Colonel, R.E., A.A.G., R.E.,
for Colonel, Royal Engineers, Ireland, on leave.

The Under Secretary
of State for War.

Curragh District.

TABLE showing the Saving on Items in the B. A. E., 1868-9, which have been executed by Military Labour.

Item.	Service.	Saving on Items completed.	Anticipated Saving on Items in Progress.	Approximate Saving due to the Employment of Military Labour.	Remarks.
		£.	£.	£.	
1 & 12	External painting	-	597	300	
2 & 13	Repairs prior to ditto	-	76	17	
8	Field officers' quarters	-	18	18	Only half the item by military labour.
11[a]	Canvas and paper, 20 officers' rooms	-	4	4	Only a small portion by military labour.
30	Repair angles and sills of huts	-	25	20	
32	Renew drying posts	-	2	2	
33	Alterations, serjeants' mess, F. square	7	-	7	
38	Surface of Curragh and repair of roads	-	nil	30	There will be no saving on these items, but the roads have been put in a better state of repair, and the ranges more improved than if military labour had not been available.
40	Repairs to rifle ranges	-	nil	20	
41	Repair of roads	nil	-	25	
109	Repair machicoulis	3	-	3	
110	Incidentals, barrack	-	600	600	Rather more than one-third by military labour.
111	Ditto - hospital	-	100	6	Only a small portion done by military labour.
113	Postmaster's quarters, additions	17	-	14	
114	Additional orifices, &c.	-	nil	2	
117	E. chaplain's quarters	7	-	7	
Special -	Reading and recreation rooms	-	15	15	
„ -	Providing pack store	18	-	14	
„ -	Ventilation of cells	-	2	1	
„ -	Married soldiers' quarters	-	120	120	
Vote 4 -	Repairs to fire engines	-	-	8	
„ -	Ditto - targets	-	-	2	
	Totals £.	52	1,559	1,235	Approximate.

The actual saving in six months (1st July to 31st December 1868) was £. 620. 3. 2¾.

Curragh, February 1869.

(signed) *F. R. Chesney*, Lieutenant Colonel,
District Commanding Royal Engineer.

TABLE showing Amount Saved by substituting Military for Civil Labour at the Curragh Camp, between 1st July and 31st December 1868.

Average Number Present.		Number of Working Days.	Average Number Daily on the Works.	Total Number of Days on the Works.	Amount of Pay.	Cost if provided by Contractor.	Difference.	Deduct for Difference in the Number of Hours employed per Day.	Saving.	Remarks.

BARRACKS.—PARKHURST.

Employment of Soldiers on Part 3. Incidentals.

Royal Engineers' Office, Parkhurst,
Sir, 11 March 1869.

WITH reference to Commanding Royal Engineer's Memorandum of the 9th instant on War Office Memorandum (40,005—438), dated 8th instant, I have the honour to report:—

The result which has attended the employment of the labour of soldiers on Barrack Incidental Repairs has been very satisfactory; the works have been properly performed, and with expedition.

The per-centage calculated from the last quarter of the year (this being the only quarter during which the estimated amount was accurately determined) would be 35 per cent. of saving by employing the soldiers, instead of a contractor.

The estimated expenditure for civil labour was 159 *l.* 5 *s.*; the actual expenditure (the soldiers doing the work) was 103 *l.* 6 *s.*, the saving being 56 *l.* nearly.

Calculating by the data thus obtained, the saving on the total expenditure for the year, viz., 303 *l.*, would be 106 *l.* nearly.

The success of the scheme is in a great measure due to the hearty co-operation of the late commanding officer, Colonel Jeffreys.

Disadvantage arose from time to time by the men employed having to join their respective regiments, so that the shops were often required to be re-arranged with fresh men. This inconvenience, incidental to a depôt battalion, would not of course be felt in a regiment.

It is to be remarked that the co-operation of all concerned, especially of the commanding officer, is absolutely necessary for the successful employment of soldiers

I have, &c.
(signed) *A. B. M'Hardy*,
Lieutenant, Royal Engineers.

The Commanding Royal Engineer,
Portsmouth.

FORWARDED to the Director of Works with reference to the Memorandum quoted. The per-centage of saving to be relied on is hardly as great as 35 per cent., but may be put at an average of 30 per cent. I concur with Lieutenant M'Hardy as to the success of the scheme requiring the hearty co-operation of all concerned, which it has had, and I may add, that I consider it due in a great measure to his own intelligence and unremitting labour.

(signed) *W. C. Hadden*, Colonel,
Commanding Royal Engineers,
Portsmouth.

13 March 1869.

BARRACKS.—PARKHURST.

Employment of Soldiers on New Works.

Royal Engineers' Office, Parkhurst,
Sir, 11 March 1869.

WITH reference to Commanding Royal Engineer's Memorandum of the 9th instant on War Office Memorandum (40,005—438), dated 8th March 1869, last paragraph, I have the honour to report:—

The soldiers have been employed successfully in new works, such as building meat store, fitting up hot water bath and circulation, water supply, distribution, and drainage, and painting. About 418 *l.* have been paid during the year for such services. The saving, estimated at 35 per cent. on amount which would have been charged for civil labour, would be 225 *l.*

The

The same per-centage of saving has been applied to these services as was shown in letter of this day's date from this office on the subject of the saving on the incidental item. The reason is, that none of the new services were measured up after completion, so that the amount which would have been charged for civil labour is not known.

I have, &c.

The Commanding Royal Engineer, Portsmouth.

(signed) *A. B. M'Hardy*, Lieutenant, Royal Engineers.

Forwarded to the Director of Works with reference to the Memorandum quoted in connection with the similar report on the employment of soldiers in barrack incidentals forwarded this day.

(signed) *W. C. Hadden*, Colonel, Commanding Royal Engineers, Portsmouth District.

13 March 1869.

Soldiers employed on Barrack Incidental Repairs and New Works.

Royal Engineers' Office, Woolwich, 11 March 1869.

Sir,

In reference to 40,005—438, War Office, 8th March 1869, I have the honour to report as follows :—

1. The saving due to the employment of soldiers on incidental barrack services in Woolwich this financial year has been about 20 per cent. compared with contractor's charges.

2. The works have been as well and quite as expeditiously performed as if done by a civilian contractor's agency.

3. On new works the saving has been about 25 per cent., and the works have been quite as well and as expeditiously performed as by the usual contractors.

4. The employment in Woolwich of soldiers of other corps than the Royal Engineers, has only been tried since last June, commencing with very small numbers, still limited. Yet, notwithstanding the difficulties of a first start, the result has been thoroughly satisfactory.

5. A continuance of the system on a larger scale will, I am certain, develope its advantages in a higher degree.

I have, &c.

(signed) *W. Driscoll Gosset*, Colonel, Commanding Royal Engineers.

OFFICERS' REPORTS on the Result of Employment of MARINE LABOUR, 1867–8.

CHATHAM - -	The Superintending Engineer reports, that the system has worked well, and the general results are satisfactory.	Colonel Commandant reports, "I have found the artificers and labourers employed by the Department of Works efficient soldiers in the brigade and in the battalion. Their conduct is good. Scarcely has a complaint been brought to me against any of them." "They appear to me to like the work, and being so employed, I am sure makes them better soldiers, and therefore more valuable to the State."
WOOLWICH -	Clerk of Works begs to state that the execution of the work by marine labour has worked very satisfactorily.	Colonel Commandant reports, "I approve of the system of employing marines under the Clerk of Works."
FORTON - -	Clerk of Works reports, that "under a constant, proper, and efficient supervision, the system will work economically and beneficially for the public service; the men are, with few exceptions, punctual and steady to their work."	Colonel Commandant reports, "I am of opinion that the employment of the artificers of the corps on the barrack work is not only a saving of expense, but an advantage to the service, as it enables mechanics who enlist to improve themselves in their respective trades, and in cases of emergency affords a supply of workmen ready for service whenever they may be required."
PLYMOUTH -	Clerk of Works reports, "The work has been satisfactorily carried out by the system adopted. The artificers, &c. who have been continuously employed from the beginning, are now well-accustomed to the work, and are quite capable of doing what is required.	Colonel Commandant reports, "I am of opinion that the employment of marine artificers in carrying out the ordinary repairs of the barracks has been very satisfactory, the work having been well done at less cost than would have attended the employment of contractor's men, and with less delay.
EASTNEY - -	- - - - -	Colonel Commandant reports, "I have little to remark on the accompanying very satisfactory report of the employment of the men of the Royal Marine Artillery at Eastney and Fort Cumberland. "Irrespective of the actual gain in money, I consider that such employment has other advantages. "It offers a reward to deserving men, and encourages good conduct. "These men, while serving, keep up a knowledge of their former trades; on discharge, instead of becoming a burden to their parishes, they can earn their bread. "On actual service in war they would be most valuable, could assist in engineering operations, &c. "Discipline is improved, and drill and appearance on parade not injured in any way whatever."

CORRESPONDENCE

BETWEEN

Mr. George H. Daw and the War Office on the Subject of the Reports on Breech-loading Arms presented to Parliament in 1868.

Presented to both Houses of Parliament by Command of Her Majesty.

Sir, 57, Threadneedle Street, July 4, 1868.

I have to acknowledge the receipt of a copy of the reports of the "Breech-loading Arms Sub-Committee," dated 12th February 1868, with the Appendix, dated the 16th March 1868, in reply to my application of the 9th April last, made by me in order that I might have the means of defending my interests from the prejudicial attacks which interested parties were making upon them in the public journals. My object was not to receive a gratuitous copy after the printed copies could be publicly bought in the shops.

In looking over the report I have respectfully to draw attention to and to complain of the insertion of a woodcut which in no way properly represents my cartridge, and the defects of which are calculated to do me serious injury. There is also a misstatement of the weight of my cartridges per 60 rounds, which is incorrectly stated as 6 lbs. 3 oz., instead of 5 lbs. 11 oz. The remarks as to liability to explosion are neither correct nor true, my anvil having been in use for seven years without one single accidental explosion having been recorded. The statements with regard to fouling are also incorrectly made, the fouling referred to having occurred with the service powder and ball, as explained in my letters of the 19th and 28th February last to the Committee, and which in justice to myself ought to have been noted in their report. The single missfire which occurred ought also to have been explained, as it happened through the piston of the rifle having clogged with the beeswax in filling round the cap of previous Boxer cartridges fired from the same arm. The same cartridge exploded with a clean piston.

I have also to complain of the unfairness of printing certain letters of Col. Boxer's commenting upon the cartridges sent in by me without any means of explanation being afforded on my part, the bullet claimed by Col. Boxer as his having been known to me in all its fundamental principles many years ago, when carrying out experiments for the late General Jacob and the late Captain Morton Spearman.

I have the honor to be, &c.
(Signed) George H. Daw.

To the Right Honourable
The Secretary of State for War.

Sir, August 5, 1868.

7669
1671

I am directed by the Secretary of State for War to acknowledge the receipt of your letter of the 4th ult., and in reply to forward the enclosed copy of a memorandum from the Sub-Committee on Small Arms, to whom your representations, in regard to their report of the 16th March on the subject of your ammunition, were referred.

I am, &c.
(Signed) J. St. George, M.-General,
Director of Ordnance.

G. H. Daw, Esq.,
57, Threadneedle Street, E.C.

23949.

[*Price* ½*d.*]

Pres. O.S.C.

The Sub-Committee have compared the woodcut in their report with the drawing in Mr. Daw's specification, No. 2203, 4/9/61, from which it was copied, and cannot detect any material difference between the two, certainly none sufficient to do Mr. Daw any injury.

The only defects they can point out are common to both, viz., that the base cup and body of cartridge are shown as one, and the dotted line representing the cap is too thin.

With regard to the weight of Mr. Daw's ammunition as laid down in their report, the Sub-Committee, by authority from the Secretary of State, permitted Mr. Daw to enter the competition with government powder and bullets. This bullet weighed 480 grains, and the total weight of Mr. Daw's cartridges, per 60 rounds packed, was found to be 5 lbs. 13 ozs., but, inasmuch as this bullet was not in use in the service, when the W.O. advertisement was published, the Sub-Committee considered that it would be unfair to other competitors to credit Mr. Daw with the advantage of the lighter bullet, and therefore weighed his ammunition with the same bullet as that used in the standard ammunition, viz., the 525 gr. bullet.

With reference to liability to accidental explosion the Sub-Committee adhere to their opinion that the Daw cartridges are as little liable to accidental explosion as the cartridge laid down as the standard in the W.O. advertisement.

With reference to fouling, Mr. Daw observes that the powder and bullets in his cartridges were of government manufacture, but the same powder, bullets, and lubrication were used in firing the pattern IV. government ammunition, which did not foul. The Sub-Committee were obliged to consider all cartridge competitors as responsible for the entire cartridge submitted, there being no restriction as to any part of it, except the beeswax lubrication.

With reference to the missfire, the Sub-Committee are unable to say whether the attendant circumstances were such as are represented by Mr. Daw, they can only repeat the wording of their report, viz., "Experiments were made to determine the possibility of utilizing the old cases of the Daw cart-" ridge. Twenty cases were re-loaded and re-capped, the cartridges were then fired and found to be " serviceable.

" There was only one missfire, &c."

With regard to Colonel Boxer's letters, the Sub-Committee considered it quite unnecessary to refer them to Mr. Daw, as their own remarks contained in their report show that they differed from Colonel Boxer upon every point raised by him.

(Signed) H. C. Fletcher.
29/7/68.

WAR OFFICE,
23rd March 1869.

LONDON:
Printed by George E. Eyre and William Spottiswoode,
Printers to the Queen's most Excellent Majesty.
For Her Majesty's Stationery Office.

RETURN to an Address of the Honourable The House of Commons, dated 23 February 1869;—*for*,

"COPIES of the CORRESPONDENCE which commenced about October 1867 between Major General *Guy*, C.B., then in command of Her Majesty's Troops in *China* and *Japan*, and the War Office, relative to the SCALE of CONSOLIDATED ALLOWANCES promulgated in 1866, for the OFFICERS serving in *China* and *Japan*:"

"And, of the STATEMENT handed by the Officer Commanding the Troops in *Japan* in October 1867 to the Major General at his Inspection of the 9th Regiment of Infantry relating to it."

War Office,
19 March 1869.

EDWARD CARDWELL.

— I. —

CORRESPONDENCE relative to the CONSOLIDATED ALLOWANCE in *China* and *Japan* generally.

(3145.)

Major General *Guy* to the Military Secretary, Horse Guards.

Sir, Head Quarters, Hong Kong, 29 October 1867.

ON the occasion of my recent visit of inspection at Yokohama, I received from Colonel Knox, commanding 2nd battalion, 9th Regiment, a memorandum, copy of which I have now the honour to submit to the consideration of His Royal Highness the Field Marshal Commanding in Chief.

It is an undoubted fact that the necessary expenses to which officers serving in Japan are subjected, exceed even those which prevail in China.

A few weeks after the 2nd battalion, 9th Regiment, arrived in Japan, the benefit arising from the Itzeboo Exchange (which had for some time previously steadily diminished) ceased altogether; the troops have therefore derived no advantage from this source since the 1st July 1866; notwithstanding this fact, however, the officers serving in Japan have been subjected to a reduction of one-fourth of the allowances granted in China, thereby placing the former in the doubly disadvantageous position of having to meet largely increased and still increasing expenditure upon reduced allowances, and they naturally consider this to be a great hardship.

In justice, therefore, to the officers now serving in Japan, and to those who may hereafter be stationed there, I am induced to bring the case to the notice of the Field Marshal Commanding in Chief, trusting His Royal Highness may be pleased to recommend a favourable consideration of it to the Right Honourable the Secretary of State for War.

I have, &c.
(signed) *P. M. N. Guy*,
Major General Commanding
in China and Japan.

MEMORANDUM.

The officers of the 2/9th Regiment desire on this occasion to revert to the hardship of the 25 per cent. deduction from the consolidated allowances, and most respectfully to request that your Excellency will represent the matter to His Royal Highness the Field Marshal Commanding in Chief.

2. It is assumed this deduction was decided upon by the Secretary of State of War because of the advantages derived from the treaty rate of exchange. If this is not embodied in the warrant, it was so stated in the House of Commons.

Your Excellency is aware that, so far as this battalion is concerned, no benefit whatever has been derived from the official exchange, but that, on the contrary, a deficit has accrued which has to be made good to the Itzeboo Exchange Committee.

3. From the former appeals your Excellency is acquainted with the grounds of the request, and it is unnecessary to detain you with any reiteration of details. From residence in both stations, you are conversant with these, and your Excellency knows that the rate of messing for officers in Japan is higher than in Hong Kong, and that due allowance being made for the comparative severity and length of the winter, the other ordinary expenses to which officers are liable are also in excess. There can be no difficulty in establishing these facts.

4. This deduction of allowances, moreover, has been exacted from officers serving in a camp where the quarters, originally provided by the Japanese Government as a temporary measure, are very inferior, and where the necessary addition of ante-room, cellar offices to the mess buildings, &c. have been procured at the expense of the battalion.

Camp, Yokohama,
2 October 1867.

Most respectfully submitted on behalf of the officers under my command.

(signed) *T. E. Knox*, Col.,
Lt. Col. Comg. 2/9 Regt.

(True copy.)
(signed) *W. Roberts*, A. M. S.

(083—3—1425.)

The Assistant Under Secretary, War Office, to the General Officer Commanding, *China*.

Sir, War Office, 30 January 1868.

WITH reference to your letter of the 29th of October last, addressed to the Military Secretary, relative to the present scale of officers' allowances in Japan, I am directed to request that you will take steps to obtain the most trustworthy evidence in your power in regard to present cost of living in China and Japan respectively, and that you will forward the same, with full detail of the current prices of the several items of necessary expenditure, for the consideration of the Secretary of State for War.

I am to refer you to the report of your predecessor, Sir J. Michel, dated 11th March 1862, on a similar subject, and to request that, as far as possible, the same means may be adopted for procuring the information required as were adopted on that occasion.

I am, &c.,
(signed) *Douglas Galton.*

(3373.)

Major General *Brunker* to the Secretary of State for War.

Sir, Head Quarters, Hong Kong, 17 June 1868.

IN accordance with instructions contained in War Office Letter (No. 083—3—1425) of the 30th January 1868, I have the honour to enclose proceedings of boards of officers assembled by my orders at Yokohama and Hong Kong, for the purpose of obtaining the fullest information both in regard to the cost of living and the several items of necessary expenditure at these stations.

2. It

2. It will be observed from the report of the Hong Kong Board, that the cost of living at this station has increased within the last 10 years 25 to 30 per cent., this conclusion having been arrived at from the combined testimony of the leading firms in the Colony.

3. The average of an officer's mess expenses at Hong Kong deduced from the three messes at the station, consisting of 36 officers, and extending over a period of two to three months, was found to be 104 dollars 38 cents, showing an increase of 30 per cent. on corresponding expenses in 1859; to this amount must be added wages of boy coolie and allowance for washing and chair coolies about 28 dollars, which gives a total necessary monthly expenditure of 132 dollars 38 cents; while at "Japan," from an average of four officers' expenses of different corps, extending over periods varying from 6 to 13 months, the monthly expenditure is shown to be 154 dollars.

These sums do not include the expenses attending use of punkahs, which I consider most necessary, and the benefit derivable from which can be best estimated by a reference to the improved sanitary condition of the troops since their introduction into this garrison.

4. I take this opportunity of bringing to your notice the grievous discrepancy which exists between the rates of pay drawn by the officers of the 29th Native Infantry lately arrived, and others in my command; the anomaly is strange, as the officers are serving together, perform the same duties, and have like expenses. This is naturally felt by officers of Queen's regiments as an excessive hardship, and I trust it will not be deemed out of place here, my quoting a clause from the report of the Select Committee lately appointed to inquire into the employment of Indian troops in the Colonies, as it bears on the subject in question, and is strongly confirmatory of my opinion that the pay of officers serving together should be assimilated.

"The pay received by English officers is much lower than that received by Indian officers of similar grade. His Royal Highness the Duke of Cambridge expressed to us very emphatically his opinion, to which much weight must be attached, that wherever Native and British soldiers were serving together, it would be absolutely necessary to place the officers of the two services at least approximately on an equality in this respect."

5. Both boards report upon the disadvantages under which officers rest in consequence of their not being able to avail themselves of the change afforded by leave of absence, without drawing upon their private resources; this is more especially the case in respect to Hong Kong, which, in itself, has so little of local interest to recommend it, that I consider it most essential that officers should be in a position to avail themselves occasionally of the recreation given by short periods of absence.

Since receipt of War Office Letter, No. 083—3—1420, of 4th February 1868, directing the issue of Consolidated Allowances to cease during the periods when at sea, the restrictions as regards leave have been still further increased; but I trust that a further consideration of the matter as advocated by my letter, No. 3331, of 12th May last, may cause a revision of the instructions on this head.

I would direct attention to that portion of the report of the Yokohama Committee which shows that the salaries of the banking houses and Peninsular and Oriental Company's subordinates vary from 300 *l.* to 500 *l.* per annum, exclusive of board, lodging, and medical attendance, which income they receive also while on leave in England, one year in six, their passages being paid to and fro.

6. Officers in this command have of late been liable to still further expenses in consequence of the privilege formerly allowed them of receiving Admiralty packages having been discontinued; when the high rate of freight is considered, and it is remembered that a great part of an officer's equipment has to be supplied from England, the expense entailed by the deprivation of this privilege is apparent as one of much moment.

7. I, in conclusion, beg to refer you to the oft-repeated despatches of my predecessors, viz., Sir J. Michel, Sir C. Van Straubenzee, and others, all of which have borne testimony to the steadily increasing expenses of this station, a fact which the enclosed reports fully support up to this time, and I trust that a

further consideration of the question may lead to an increase of allowances received by the officers of this command, which, at least as regards Hong Kong, enjoys, not without truth, the reputation of being one of the least attractive stations.

I have, &c.

Actg. A. M. S.

Sir, Hong Kong, 18 May 1868.

WE have the honour to report that, in compliance with General Order, 1st April 1868, as the committee therein appointed by the Major General commanding in China and Japan, we assembled for the first time the 3rd April, to obtain evidence with regard to the present cost of living in China, as per instructions conveyed in War Office Letter, No. 083—5—1425, 20th January 1868, enclosed with your letter, No. 3196, 1st April, 1868.

We were furnished with a copy of Sir J. Michel's Report, 11th March 1862, but the various offices were searched in vain for a copy of the proceedings of the Board to which it makes reference, and which the instructions laid before us desired us to take as our model in procuring information.

We therefore determined to have recourse to the measures adopted by Colonel Haythorne's Board in 1858, viz., to address the leading firms in town for lists of prices of goods, salaries of clerks and their necessary expenses; we also addressed the Colonial surgeon, Dr. Murray, whom, from his experience in China of 23 years, we considered well qualified to give an opinion as to the expenses which are necessary in this climate.

We adjourned from time to time, pending replies to the inquiries which we had instituted, and re-assembled whenever there was matter for consideration.

We annex the answers which we have received to our inquiries, and beg to tender the following observations:—

The firms of Messrs. Jardine, Messrs. Gibb, and the Oriental Bank, are of opinion that the cost of living has advanced 25 or 30 per cent. since 1858; and Dr. Murray considers that they have doubled since 1848.

In comparing the present statement of expenses with those of 1858, it must be borne in mind that, in the latter year, under the heads of "Monthly Subsistence" and "Daily Messing," Messrs. Gibb and Messrs. Dent included wine and beer, while in the present statement, the amounts under the same heads are exclusive of wine and beer, except by Messrs. Gibb, in reply to Question No. 2, "Monthly Subsistence."

There are three messes in Hong Kong, viz., the Royal Artillery and Royal Engineers, the 73rd, and the Wing Ceylon Rifles.

We

We addressed commanding officers, and have obtained from the presidents of the messes the following averages for one month, including messing, wine and beer, lighting, mess servants,* and general charge.

		For One Month.
		Dols. *Cts.*
Deduced from an average of two months - - - -	R. A. & R. E., 6 officers (an officer acts as caterer); each officer - - - -	109 –
From an average of two months	73rd Regiment, 24 officers (messman employed); each officer - - - -	104 10
From an average of three months	Ceylon Rifles, 6 officers (messman employed); each officer - - - - - -	100 4

(This shows an increase of upwards of 30 per cent. on the corresponding expenses in 1859.)

There are, then, the further necessary expenses of—

Boy, 8 dollars per month.
House coolie, 3 dollars (*i.e.*, one between two officers, or additional to a chair coolie).
2 chair coolies at 6 dollars each - - - 12 dollars.
Washing - - - - - - - - 6 to 7 „

and, for mounted officers, 20 dollars per month for the wages of a horse boy and keep of one horse.

We beg to point out that, in the proceedings of the Board of 1858, punkahs and the attendant expenses were not included. The Colonial surgeon is of opinion that they are indispensable, "but not at night."

We would, however, point to the fact that it is found necessary to allow punkahs for the soldiers night and day in the hot weather; and the advantage of a night's rest in a hot climate is indisputable, and the difference between what may be obtained under a punkah and without one is known to all who have resided in hot climates.

Chair coolies with a very light day's work with the chair, but not otherwise, would be available for the punkah service by day, but not at all at night.

From the extremes of heat and cold, light and warm clothing in variety is necessary, and, like all articles (whether clothing or food) procured from Europe, is very expensive, owing to the heavy losses to which the merchants are exposed by the rapid deterioration and decay of all goods in this climate, principally from mildew, moth, and white ant.

As stationed in a climate which enjoys, not without reason, but a bad reputation, we consider it most sound to urge that there should be at least the same facilities for taking recreation by short periods of leave within this command as are afforded in better climates, in places possessed of more local interest than Hong Kong.

The heavy expense,† however, of the shortest trips from this island, puts it out of the power of the majority of officers to attempt this. Still further, should private affairs make it urgent for an officer to proceed home, or should sickness in a married officer's family, in this dangerous climate, present to him the fact that immediate change of climate is absolutely necessary, he must abide the consequences of not seeking that change, or involve himself in a debt which may oblige him to leave the service.

We have, &c.
(signed) *N. Gawler*, Colonel,
Commandant of Hong Kong,
President.
L. Hook, Major, Ceylon Rifles.
Geo. H. Phillips, D. A. C. G.

The Assistant Military Secretary,
&c. &c. &c. Hong Kong.

Extract from General Orders.

General Orders. Head Quarters, Hong Kong, 1st April 1868.

I. A Board of officers will assemble at the Garrison Office to-morrow morning at 11 a.m., to inquire into such matters as shall be laid before it.

President:
Colonel Gawler.

Members:
Major Hook, C. R. | Dep. Assist. Com. Gl. Phillips.

By Order,
(signed) *R. Maxwell*, D. A. A. G.

---

* *i. e.*, cook and one or two coolies, and a waiter to keep in order the mess apartments and property.

† Rendered still heavier by the recent order withdrawing the consolidated allowance during periods when at sea, in moving from one part of the command to another.—*N. G.*, Colonel.

Sir, Military Secretary's Office, Hong Kong, 1 April 1868.

I HAVE the honour, by direction of the Major General Commanding, referring to General Order, No. 1, of this date, to forward copy of War Office Letter (No, 083—3—1425) which will, as far as relates to China, form the subject-matter upon which the Board will report.

General Straubenzee's letter, dated 21 May 1858.
Proceedings of Board, dated 23 November 1858.
Enclosures to ditto, marked A.
Memo. by D. A. C. G. Ross, 18 December 1858.

Proceedings of the Committee of 1862 cannot be traced, but copy of Sir J. Michel's letter of 11th March in that year is enclosed, as well as the data (as per margin, to be returned) upon which his Board appear to have based their report.

I have, &c.
(signed) *Geo. W. Thompson,*
Acting Assist. Military Secretary.

Colonel Gawler.

REPLIES of Messrs. *Jardine, Matheson, & Co.*

Questions.	*Answers.*
1. WHAT are the average rates of salaries given to gentlemen employed in professional and mercantile houses, according to service?	From 750 to 4,500 dollars per annum, exclusive of board and lodging; the latter sum usually denotes from 12 to 15 years' service.
2. What is the average cost of the subsistence of each such gentleman, exclusive of lodging and servants?	Sixty dollars per month, exclusive of wine and beer.
3. How much does a gentleman pay monthly for his washing?	Six to eight dollars.
4. Do you consider chairs, as a means of conveyance to town or country, necessary?	Undoubtedly, or health and efficiency must suffer.
5. Do you consider punkahs necessary?	In summer unquestionably so.
6. In a bachelor officer's establishment where no regimental mess is available, how many servants do you consider necessary?	1 body and table servant. 1 cook. 1 house coolie. 2 chair coolies and messengers. — 5 in all.
7. What are the average rates of wages per month?	
For a cook - - - - - -	Twelve dollars
For a boy - - - - - -	Eight to ten dollars.
For a coolie - - - - - -	For house, six dollars.
For a chair coolie - - - -	Six dollars.
For a labourer coolie, punkah coolies -	Four to six dollars.
8. Can one description of servants be got to do the work of another?	Chair and punkah coolies, &c., will do anything; house coolies will not do out-door work; table and body servants will not act as coolies.
9. What amount do you consider should cover the messing of an officer daily at a mess maintained in a suitable and liberal scale, and what should cover the daily expenses of an individual officer living by himself?	Sixty dollars per month, messing together; 85 dollars per month messing alone, exclusive of wine and beer.
10. What proportion or rate do your present household expenses, including everything, bear to those of 1858?	Twenty-five per cent. above 1858.

Hong Kong, 4th April 1868. (signed) *Jardine, Matheson & Co.*

REPLIES of Messrs. *Gibb, Livingstone, & Co.*

Questions.	*Answers.*
1. What are the average rates of salaries given to gentlemen employed in professional and mercantile houses, according to service?	In mercantile houses salaries average from 200 *l.* to 1,000 *l.* per annum at exchange of 4 *s.* 6 *d.*, according to position and length of service, with lodging and servants.
2. What is the average cost of the subsistence of each such gentleman, exclusive of lodging and servants?	One hundred dollars per month, including wine and beer.
3. How much does a gentleman pay monthly for his washing?	Six to seven dollars a month.
4. Do you consider chairs, as a means of conveyance to town or country, necessary?	Certainly.
5. Do you consider punkahs necessary?	Certainly.
6. In a bachelor officer's establishment where no regimental mess is available, how many servants do you consider necessary?	Six (6.)
7. What are the average rates of wages per month?	
For a cook - - - - -	Ten dollars a month.
For a boy - - - - -	Six to seven dollars a month.
For a coolie - - - - -	Six dollars a month.
For a chair coolie - - - -	Six dollars a month.
For a labourer coolie - - -	Four dollars a month.
For punkah coolies - - -	Work done by chair coolies
8. Can one description of servants be got to do the work of another?	With difficulty, but as a rule, chair coolies are employed to pull the punkah, and fill and empty their employer's bath tubs.
9. What do you consider should cover the messing of an officer daily, at a mess maintained in a suitable and liberal scale, and what should cover the expense of an individual officer living by himself.	Two dollars and a half daily, exclusive of wine. Five (5) dollars per day, exclusive of wine and beer, including table servants, cook, and extra coolies.
10. What proportion or rate do your present household expenses, including everything, bear with those of 1858?	We consider that our present expenses, as compared with those in 1858, are twenty-five (25) per cent. higher.

Hong Kong, 6 April 1868. (signed) *Gibb, Livingstone, & Co.*

REPLIES of the Manager of the Oriental Bank.

Questions.	*Answers.*
1. What are the average rates of salaries given to gentlemen employed in professional and mercantile houses, according to service?	From 200 *l.* to 1,000 *l.* per annum, with board and lodging.
2. What is the average cost of the subsistence of each such gentleman, exclusive of lodging and servants?	From 80 to 100 dollars per month.
3. How much does a gentleman pay monthly for his washing?	From five to seven dollars.
4. Do you consider chairs, as a means of conveyance to town or country, necessary?	Yes.
5. Do you consider punkahs necessary?	In hot weather they are indispensable.
6. In a bachelor officer's establishment where no regimental mess is available, how many servants do you consider necessary?	Five (5) at least; cook, house boy, house coolie, two chair coolies.

7. What are the average rates of wages, per month?	
For a cook - - - - -	10 to 12 dollars per month.
For a boy - - - - -	8 to 10 „ „
For a coolie - - - - -	5 to 7 „ „
For a chair coolie - - - -	6 „ „
For a labourer coolie - - -	4 to 6 „ „
For punkah coolies - - - -	4 to 6 „ „
8. Can one description of servants be got to do the work of another?	In a small establishment a house coolie could act as bath coolie and bazaar coolie, and the chair coolies could do the duty of punkah coolies.
9. What do you consider should cover the messing of an officer daily, at a mess maintained in a suitable and liberal scale, and what should cover the daily expense of an individual officer living by himself?	Two and a half dollars per day in a mess of not less than six (6) to eight (8) persons; and five dollars per day for an officer living by himself.
10. What proportion or rate do your present household expenses, including everything, bear to those of 1858?	Expenses have increased about 30 per cent.

(signed) *Jas. Berwick*, Acting Manager,
Hong Kong, 11 April 1868. Oriental Bank Corporation, Hong Kong.

Sir, Hong Kong, 7th April 1868.

In reply to your favour of the 3rd instant, and which unavoidable business has compelled me to delay attending to sooner, I am glad to place at the disposal of the Committee of which you are chairman, the result of nearly 23 years' experience of residence in China, and shall be pleased to answer any special questions you may wish to put to me.

In the first instance, then, I beg to state that the following constitute the principal requisites for the maintenance of health in this climate, on the part of the better class European population:—

1st. Roomy and well-ventilated dwellings.
2nd. Well-cooked and varied nourishment.
3rd. A certain amount of stimulants.
4th. Means for obtaining exercise in hot weather, other than by walking.

Taking these items *seriatim*—

1st. House-rent is one of the heaviest causes of expense. Rents have always been high in Hong Kong, and have not materially changed for four-roomed houses in a good healthy situation, which can scarcely be obtained under 60 dollars to 70 dollars a month.

2nd. In warm weather the appetite is so seriously affected, that a much greater variety and a more generous diet is necessary to maintain health than would be be required in a cooler and less trying climate.

This can only be done by a heavy expenditure, and I do not think it possible to provide a suitable table at less than 50 dollars a head.

Table expenses have nearly doubled since 1858.

3rd. Stimulants are not a luxury, but a necessity in the warm weather. Many men who are abstemious from alcoholic drinks in Europe on principle, find it absolutely necessary to partake *freely of stimulants* in this climate.

I should estimate the necessary expenditure for this item at 20 dollars per month for a single man.

4th. In the summer months, or nearly eight months in the year, it is unsafe to go about without the protection of a chair.

During the same time, walking exercise sufficient to maintain health is scarcely possible.

I am in the habit of recommending horse exercise, and find it one of the most valuable adjuncts to what I consider the best treatment here; viz., the preventive.

I have, &c.
Colonel Gawler, (signed) *J. J. Murray*, M. D.,
Commandant, &c. Colonial Surgeon.

REPLIES of Doctor *Murray*.

Questions.	*Answers:*
1. What are the average rates of salaries given to gentlemen employed in professional and mercantile houses, according to service?	In my own profession the lowest salary is 300 *l.* a year and quarters; few men, however, make less than 1,000 *l.* a year.
2. What is the average cost of the subsistence of each such gentleman, exclusive of lodging and servants?	Varies from entire salary to any sum; 50 dollars a month is the lowest amount for food alone.
3. How much does a gentleman pay for his washing?	Six (6) dollars.
4. Do you consider chairs as a means of conveyance to town or country necessary?	Certainly.
5. Do you consider punkahs necessary?	Certainly, in hot weather, but not over the bed.
6. In a bachelor officer's establishment, where no regimental mess is available, how many servants do you consider necessary?	See next answer.
7. What are the average rate of wages per month?	
For a cook - - - - -	8 to 20 dollars.
For a boy - - - - -	6 to 12 „
For a coolie - - - - -	6 to 7 „
For a chair coolie - - - -	6 to 7 „
For a labourer coolie - - -	2 dollars for removing night soil.
For punkah coolies - - -	Six to seven dollars; this is unnecessary, as I do not consider punkahs at night requisite, and during meals the other coolies can pull the punkah.
8. Can one description of servants be got to do the work of another?	Not in a decent establishment; the chair coolies and house coolies combine their functions.
9. What do you consider should cover the messing of an officer daily, at a mess maintained in a suitable and liberal scale, and what should cover the daily expense of an individual officer living by himself?	I can scarcely answer this question further than I have already done.
10. What proportion or rate do your present household expenses, including everything, bear to those of 1858?	They are nearly double; wages have more than doubled since 1848.

(signed) *J. I. Murray*, M.D.
Colonial Surgeon.

Sir, Hong Kong, 5 April 1868.

IN reply to your letter, dated 3rd April, I have the honour to inform you, that the sum paid for messing daily by the officers is 1 dollar 25 cents. The greatest expense connected with the mess is the sum of 43 dollars, paid monthly by the comprador for cooks and servants in the mess kitchen.

Total expenses of mess, 229 dollars a month.

(signed) *G. J. Burne*,
Lieut. Col. 73rd Regiment.

There is also a monthly expense of 166 dollars for servants, oil lamps, punkahs, &c. &c.

The regiment has bought no wine out here; that in the cellar was brought out in the ship with the regiment.

A dollar here goes about as far as a shilling would in England.

I have, &c.

3 April 1868. (signed) *Lane, Crawford & Co.*

PROCEEDINGS of a Board of Officers assembled at Yokohama, Japan, on the 16th April 1868, by order of Colonel Norman, C.B., Commandant, bearing date Yokohama, 15th April 1868, under instructions from his Excellency Major General Brunker, commanding the Forces, for the purpose of furnishing information relative to the cost of living at Japan.

President:

Colonel Norman, C.B., 1/10th Regiment.

Members:

V. C. Major Crowe, 1/10th Regiment.
D. A. C. General Hughes.
D. A. Purveyor Rains.
Lieut. Brinkley, R.A.

The Board having assembled pursuant to order, the letters of instructions, &c. were read by the President to the members.

The Board then adjourned for the purpose of gaining the necessary information, until noon on the 17th instant.

Yokohama, 17th April 1868.

The Board re-assembled this day pursuant to adjournment, and proceeded to compare the statements of the various expenses necessary at Japan, furnished by the following gentlemen, viz.:—

Mr. M. H. Smith, Club.
Messrs. Wilkin & Robison.
Messrs. M'Pherson & Marshall.
Messrs. Aspinall & Cornes.
The Manager of the Oriental Bank.
Agent of the P. and O. Company.
Augustine Heard & Co.
Messrs. Sitwell, Schoyer & Co.
Sewin Loreiro, Portuguese Consul.
Dr. Jenkins, M.D.
Mr. M'Donald.

From these documents the Board ascertained that, in mercantile houses, the subordinates receive a salary varying from 200 *l.* to 500 *l.* per annum; in addition to which, they have board, lodging, medical attendance, and in fact everything except the cost of personal servants and washing allowed them.

In banking houses and in the agency of the P. and O. Company, the salaries of the subordinates vary from 300 *l.* to 500 *l.* per annum; in addition, board, lodging, &c., as in mercantile firms is allowed.

These gentlemen also have the privilege of one year's leave of absence in every six, their passage being paid to and from Europe, by the firm; they receive salaries while on leave, varying from 300 *l.* to 500 *l.* per annum.

The manager of the Oriental Bank, who has not completed 14 years' service, receives a salary of 1,500 *l.* per annum, besides fuel, light, and a furnished house (not a wretched hut, but a handsome residence), also medical attendance.

The average cost of the messing of each subordinate would amount to 25 *l.* per mensem.

Washing varies from 12 *s.* 9 *d.* to 17 *s.* per 100 pieces; at the former rate it is done by Japanese, and the wear and tear of the linen makes the price exceed in reality the higher rate.

Four servants are absolutely necessary for a bachelor officer when the regimental mess is available.

The wages of a Chinese cook is	- - - - -	50 *l.* per annum.
„ Chinese house servant	- - - - -	50 *l.* „
„ Japanese coolie	- - - - -	14 *l.* „
„ Japanese labouring coolie	- - -	14 *l.* „

It is considered necessary by the residents at Yokohama, that at least one Chinese or European servant should be kept; Japanese servants being liable to be taken away by the Government officials.

None but coolies will do any other servants' work, and they are not able to do it.

An officer's messing, exclusive of all incidental expenses connected with the maintenance of the mess, is 14 *s.* per diem.

An officer's messing when living by himself, including fuel and cook, amounts to 1 *l.* 5*s.* per diem.

The Board have also to report the cost of the under-mentioned articles, &c. &c.

	£.	*s.*	*d.*	
Gloves, per pair	–	6	9	
Buckskin ditto	–	8	6	
A saddle of mutton	2	5	–	
Beer	–	12	–	per day.
Milk	–	1	–	per bottle.
Butter	–	3	–	per lb.
Coals	4	5	–	per ton.

while furniture and glass reach almost fabulous prices.

Officers at Japan are also under great disadvantages in respect of obtaining leave of absence to visit their friends in Europe, the cost of a passage there and back being 300 *l.*; thus rendering it utterly impossible for any officer who has not large private means ever to avail himself of any leave of absence which, under other circumstances, he might be able to obtain. Still more does this press heavily on married officers, who, from the absence of any schools where their children might be educated, are compelled to send them to Europe at a ruinous expense for this purpose, thus rendering void all hope of again seeing them until they themselves may be ordered home.

The Board attach to the original proceedings the documents which have guided them in forming their opinion.

H. Radford Norman, Colonel, 1/10th Regiment, President.

J. P. H. Crowe, Major, 1/10th Regiment.
E. Hughes, D. A. C. G.
Stephen W. Rains, Deputy Purveyor.
T. Brinkley, Lieut. R. A.
} Members.

Yokohama, 17 April 1868.

Submitted,

H. Radford Norman, Colonel Commandant.

Replies of *Aspinall, Cornes & Co.*

Questions.	*Answers.*
1. What are the salaries you pay the gentlemen in your employ, according to their term of service; and do you give them board and lodging, or other similar allowances in addition?	From 250 *l.* to 500 *l.* per annum; board, lodging, and medical attendance provided by the firm.
2. What do you estimate to be the cost for the messing of a gentleman in Yokohama, per month?	One hundred dollars per month.
3. What are the wages of the following servants in Yokohama, according to your experience, viz.:—	
Cook - - - - - -	25 dollars per month.
House boy - - - - -	15 „ „
Coolie - - - - - -	5 „ „
Boy (body servant) - - -	15 „ „
Betto (groom) - - - -	5 „ „
and how many of each denomination do you find indispensable in your house?	the number of servants employed depends entirely upon the wants of the establishment.
4. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	Chinese boys and Japanese coolies. Do not consider the employment of Chinese absolutely necessary, but advisable.
5. At what amount do you estimate the keep of a house per month?	One hundred and fifty dollars per month.
6. Have you found the cost of living in Yokohama to have increased of late, and have you found it necessary to make a proportionate increase in the salaries of your employés?	Considerably in the last two or three years. Employés being found by the firm, the salaries are not increased.
7. Do you think it likely that there will be a decrease in the price of living and general expenditure in Yokohama?	No; much more likely to be increased with increase of foreign population.

(signed) *Aspinall, Cornes & Co.*

Replies of the Agent of Messrs. *A. Heard & Co.*

Questions.	*Answers.*
1. What are the salaries you pay to the gentlemen in your employ, according to their term of service; and do you give them board and lodging, or other similar allowances in addition?	£. 300 to 500 *l.* per annum, including board and lodging; these are, however, for persons who have knowledge of specialties, as silk or tea.
2. What do you estimate to be the cost for the messing of a gentleman in Yokohama per mensem?	About 100 dollars, including food, wines, and all household expenses, except house-rent.

3. What are the wages of the following servants in Yokohama, according to your experience; viz.:—	
Cook - - - - - -	Chinese, 25 dollars; Japanese assistant, 12 dollars.
House boy - - - - -	Chinese, 15 dollars 20 cents.
Coolie - - - - - -	12 dollars, with rice; 16 dollars, without.
Boy (body servant) - - -	Chinese, 15 dollars; Japanese, 12 dollars, with rice.
Betto (groom) - - - -	Japanese, 12 dollars.
and how many of each denomination do you find indispensable in your house?	1 Chinese cook, 1 Japanese assistant, 1 house boy, and 1 boy for each gentleman; 2 house coolies.
4. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	I employ a Chinese house boy and Chinese cook; the former I consider indispensable.
5. At what amount do you estimate the keep of a horse per mensem?	28 dollars, including betto's wages.
6. Have you found the cost of living in Yokohama to have increased of late, and have you found it necessary to make a proportional increase in the salaries of your employés?	The cost of living has increased, as prices of many articles of food and wages are higher. Beef has increased from 12 cents to 15 cents, and within the past year to 20 cents per lb.; many other articles of food are also higher. We make no increase in salaries, as we provide everything for our employés.

REPLIES of Mr. *E. A. Schoyer*, of Messrs. *Sitwell & Co.*

Questions.	*Answers.*
1. What are the salaries you pay to the gentlemen in your employ, according to their term of service; and do you give them board and lodging, or other similar allowances in addition?	According to position, from 300 *l.* to 500 *l.* per annum, and board, lodging, and medical attendance.
2. What do you estimate to be the cost for the messing of a gentleman in Yokohama per mensem?	Eighty dollars.
3. What are the wages of the following servants in Yokohama, according to your experience, viz.:—	
Cook - - - - - -	Japanese, about boos 20; Chinese, 20 dollars.
House boy - - - - -	Japanese, boos 16; Chinese, 12 dollars.
Coolie - - - - - -	Japanese, boos 12.
Boy (body servant) - - -	Japanese, boos 16; Chinese, 12 dollars.
Betto (groom).	
and how many do you consider indispensable of each denomination to be kept in your house?	One cook, one house boy, one coolie, a body servant to each individual, and one groom to each horse.
4. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	I consider Chinese quite indispensable.
5. At what amount do you estimate the keep of a horse per mensem?	Including betto's wages, 9 dollars, if more than one is kept; if only one, fully 12 dollars.
6. Have you found the cost of living in Yokohama to have increased of late, and have you found it necessary to make a proportional increase in the salaries of your employés?	The cost of living has decidedly increased 50 % during the past year.

(signed) *E. A. Schoyer.*

REPLIES of Assistant Commissary-General *Murray*.

Questions.	*Answers.*
1. How long have you lived in Yokohama?	I lived one year as a bachelor, 1863-4, and have lived rather more than two years as a married man, 1866-7-8.
2. What has been the average amount per mensem it has cost you to provide a suitable table for yourself and family?	It is difficult to answer this question without many details, but a certain amount was always set aside and seldom exceeded; this was 100 dollars per month; occasionally it was less, sometimes more; but in the two years of my married experience by the housekeeping books, &c., that sum is within the average.
3. Have you found the prices of the necessaries of life to have increased during your residence in Yokohama, and if so, to what extent?	After the great fire of November 1866, owing to the destruction of large quantities of supplies, prices rose considerably, and did not fall again until very lately. In June 1866, by combined arrangements among the butchers, the price of beef was raised 25 per cent., and of mutton 33 per cent. Beef has not been reduced again, although mutton has. At present, Beef is –*s.* 10 *d.* sterling per lb. „ Mutton, 2 *s.* 1½ *d.* „ „ „ Bread, –*s.* 5 *d.* „ „ „ Milk, 1 *s.* 1 *d.* per bottle.
4. What staff of servants have you found indispensable to be kept, whether Chinese or Japanese, and do you consider it necessary for Chinese servants to be kept?	With a family, I have found it necessary to keep— One Chinese nurse, 25 dollars per month. One cook - 7 to 12 „ „ One boy - 7 to 12 „ „ Two coolies - 4 to 8 „ „ each. Chinese nurses are indispensable, and are kept by almost every married civilian with a family, as Japanese nurses or women servants cannot be relied on to stay; they leave at any moment without warning. China cooks, and China house-boys are constantly employed in general as a necessity, but occasionally as a check on Japanese, who leave without notice. If Japanese servants only are employed, a house may be left suddenly without a single domestic. In addition to the above, washing is done separately by a hired washerman.
5. What has been the average cost to you per mensem for the keep of a horse?	The contract price paid by Government, being the lowest tender after public competition, was 38 cents per diem per horse = 1 *s.* 7 *d.* per diem. A groom's wages are from about 18 *s.* to 20 *s.* per month, double what it was four years ago. Shoeing a pony costs 4 *s.* 6 *d.* to 7 *s.* 6 *d.* each time, the first being the native charge for bad work.
6. What has been the rate of wages you have had to pay your servants?	*See* Answer to 4. Those rates I have paid for more than two years every month, with the addition of a groom and washerman; my average monthly expenditure for wages and washing has been 65 dollars, or 13 *l.* 16 *s.* 3 *d.* per month; and, on the occasion of the birth of a child, the charge for a nurse for one month was 40 dollars, or 8 *l.* 10 *s.*, besides her keep. I can certify that this statement of average wages actually paid is not the least exaggerated.

7. Can you give any details as to the prices you have had to pay for furniture for your quarters?	For a drawing-room suite, consisting of a sofa and six chairs, I paid 150 dollars = 31 *l.* 17 *s.* 6 *d.*; dining-room table, 25 dollars = 5 *l.* 6 *s.* 3 *d.*; plain dining-room chairs, 5 dollars each = 1 *l.* 1 *s.* 3 *d.*; dumb waiter, plain, 15 dollars = 3 *l.* 3 *s.* 9 *d.*; four stoves (which are indispensable), 15 dollars each = 3 *l.* 3 *s.* 9 *d.* The above will give an idea of the cost of furniture of plain description.
8. What have you paid for washing?	*See* Reply to 6.

Yokohama, Japan, 17 April 1868. (signed) *Jas. W. Murray*, A. C. G.

On arrival here, when obliged to stop at an hotel, the charge for myself and wife was 10 dollars, or 2 *l.* 2*s.* 6 *d.* per diem, without wine or beer.

REPLIES of Mr. *Wilkin*, of Messrs. *Wilkin* and *Robinson*.

Questions.	*Answers.*
1. What are the salaries you pay to the gentlemen in your employ, according to their term of service; and do you give them board and lodging, or other similar allowances in addition?	From 200 *l.* to 300 *l.* per annum is the lowest for not long terms of service, say two or three years; in addition to this, board and lodging, and indeed everything but washing, personal servants, and medical attendance, is provided without expense to the employé.
2. What do you estimate to be the cost for the messing of a gentleman in Yokohama per mensem?	From 75 dollars to 135 dollars per person per month. It cannot be done for the former sum, except by living carefully at the *table d'hôte* of the club or elsewhere.
3. What are the wages of the following servants in Yokohama, according to your experience, viz.:—	
Cook - - - - - - -	20 dollars to 25 dollars, if a Chinaman.
House-boy - - - - -	The same.
Coolie - - - - - -	Boos 10, and rice, say boos 15.
Boy (body servant) - - -	Boos 15 to 20, without rice.
Betto (groom) - - - -	Boos 12 to 15.
and how many of each denomination do you find indispensable in your house?	One cook, one house boy to each person; a boy and two to three coolies for a household of four; a betto to each horse.
4. Do you employ Chinese or Japanese servants; and do you consider the employment of the former absolutely necessary?	Of late we have not employed Chinamen in the house, but we have a Portuguese cook. I consider the employment of a least one Chinaman desirable, if not indispensable, unless a coloured man is kept, or unless an unusually good Japanese servant as head boy can be obtained.
5. At what amount do you estimate the keep of a horse per mensem?	Of late it has cost 12 dollars or more per horse, including betto's wages.
6. Have you found the cost of living in Yokohama to have increased of late; and, have you found it necessary to make a proportional increase in the salary of your employés?	Wages of servants, cost of vegetables, meat, fowls, eggs, oil, &c., have very much increased of late; nearly doubled itself within the last four or five years. As our employés have board, &c. found them, it has not been necessary to make them any allowance in consequence.

(signed) *A. J. Wilkin.*

REPLIES of Dr. *Jenkins*, Civilian Medical Man.

Questions.	*Answers.*
1. What do you consider to be the cost of messing for a gentleman living by himself, or for a small family, in Yokohama, *per mensem*?	For a bachelor, 160 dollars, comfortably. For a small family, 280 dollars to 300 dollars.
2. What are the wages of the following servants in Yokohama, according to your experience, viz.:	

	Japanese.	Chinese.
Cook	12 dollars to 20 dollars.	
House-boy	8 „	20 „
Coolie	5 „	
Boy (body servant)	5 „	
Betto (groom)	5 „	

and how many of each denomination do you find indispensable in your house?	One of each for a small establishment. I consider a Chinese head servant indispensable.
3. Do you employ Chinese or Japanese servants; and do you consider the employment of the former absolutely necessary?	I employ a Chinese cook and Chinese head servant; the latter I have found almost indispensable.
4. At what amount do you consider the keep of a horse to come to *per mensem*?	Nine dollars, without groom's wages.
5. Have you found the cost of living in Yokohama to have increased of late?	It has steadily increased during the last five years.
6. Do you think there is a prospect of a decrease in the cost of living and general expenditure in Yokohama?	I have no reason to hope for any decrease in the prices of provisions and living generally.

REPLIES of Mr. *William Davison*.

Questions.	*Answers.*
1. What are the salaries you pay the gentlemen in your employ according to their term of service, and do you give them board and lodging or other similar allowances in addition?	Salaries of subordinates in China and Japan vary from 120 to 300 dollars per month; quarters, medical attendance, oil, coals, and candles, also cook and coolies.
2. What do you estimate to be the cost for the messing of a gentleman in Yokohama per month.	About 120 dollars per month.

3. What are the wages of the following servants in Yokohama, according to your experience, viz.:	
Cook - - - - - -	Chinese, 20 dollars.
House-boy - - - - -	Ditto 18 „
Coolie - - - - - -	Japanese, 6 „
Boy (body servant) - - -	Chinese, 14 „
Betto (groom)	
and how many of each denomination do you find indispensable in your house?	
4. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	Chinese butler and body servant, also cook, I find indispensable.
5. At what amount do you estimate the keep of a horse per month?	Including wages of groom, 14 dollars.
6. Have you found the cost of living in Yokohama to have increased of late, and have you found it necessary to make a proportionate increase in the salaries of your employés?	Cost of living has increased considerably and a general increase in the pay of our employés has been made in consequence.
7. Do you think it likely that there will be a decrease in the price of living and general expenditure in Yokohama?	No.

REPLIES of Mr. *William Marshall.*

Questions.	*Answers.*
1. What are the salaries you pay to the gentlemen in your employ, according to their term of service; and do you give them board and lodging, or other similar allowances in addition?	Silk inspector and book-keeper, 500*l.* a year; house found, and an allowance of 100 dollars per month each for mess.
2. What do you consider to be the cost of messing for a gentleman in Yokohama *per mensem*?	
3. What are the wages of the following servants in Yokohama, according to your experience, viz.:—	
Cook - - - - - -	20 dollars to 25 per month.
House-boy - - - - -	20 „ to 25 „
Coolie - - - - - -	12 „ 16 boos.
Boy (body servant) - - -	15 „
Betto (groom) - - - -	14 boos.
and how many of each denomination do you find indispensable in your house?	
4. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	I prefer Chinese, but do not think them absolutely necessary.
5. At what amount do you consider the keep of a horse to come to *per mensem*?	About eight dollars per month, exclusive of betto.
6. Have you found the cost of living in Yokohama to have increased of late, and have you found it necessary to make a proportionate increase in the salaries of your employés?	The cost of living has greatly increased within the last three years.
7. Do you think there is a prospect of a decrease in the cost of living and general expenditure in Yokohama?	I do not.

(signed) *William Marshall.*
H. Radford Norman,
Colonel, President

REPLIES of Mr. *M^c Donald*, Marine Surveyor, &c.

Questions.	*Answers.*
1. What do you consider to be the cost of messing for a gentleman living by himself, or for a small family, in Yokohama, *per mensem*?	For a small family, to live respectably I should say from three to four hundred dollars is the inside expense.
4. What are the wages of the following servants in Yokohama, according to your experience; viz.:—	
Cook - - - - - -	Japanese, 7 dollars; Chinese, { 20 to 25 dollars.
House-boy - - - - -	„ 6 „ „ 20 dollars.
Coolie - - - - -	„ 6 „
Boy (body servant) - - -	„ 6 „ „ 20 „
Betto (groom) - - - -	„ 6 „ „ 20 „
and how many of each denomination do your find indispensable in your house?	Ten, all told, Japanese and Chinese inclusive.
3. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	Both; and during my residence in Japan, dating from 1861, I have always had Chinese in my service.
4. What amount do you consider the keep of a horse to come to *per mensem*?	Twelve dollars *per mensem*.
5. Have you found the cost of living in Yokohama to have increased of late?	I have found a steady increase, year by year, since I first settled in Japan.
6. Do you think there is a prospect of a decrease in the cost of living and general expenditure in Yokohama?	None whatever: on the contary, my experience goes to prove that any increase of charges in any way in this country is sure to be maintained, as the Japanese fully understand a maximum in their charges, but never revert to a minimum.

Yokohama, 16 April 1868.

(signed) *William M^c Donald.*

H. Radford Norman,
Colonel, President.

REPLIES of Mr. *M. Smith*.

Questions.	*Answers.*
1. What are the salaries you pay to the gentlemen in your employ according to their term of service, and do you give them board and lodging or other similar allowances in addition?	To club stewards forty (40) dollars *per mensem*, and find them board and lodging.
2. What do you consider to be the cost of messing for a gentleman in Yokohama per month?	One of a number (say 30), 50 dollars per mensem; under that number, 60 dollars, without wines or extras, cooks, wood, &c.
3. What are the wages of the following servants in Yokohama, according to your experience?	
Cook - - - - - -	Chinese cook from 20 to 40 dollars *per mensem*.
House-boy - - - - -	7 to 12 dollars *per mensem*.
Coolie - - - - -	4½ to 5 „ „
Boy (body servant) - - - -	5 to 8 „ „
Betto (groom) - - - -	4½ to 7 „ „
and how many of each denomination do you find indispensable in your house?	
4. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	Chinese and Japanese: for strangers, I consider the employment of Chinese to be highly necessary.
5. At what amount do you consider the keep of a horse to come to per month?	Ten dollars without betto, but includes shoeing.
6. Have you found the cost of living in Yokohama to have increased of late, and have you found it necessary to make a proportionate increase in the salaries of your employés?	All articles of consumption have greatly increased within the last three years, and many things are double the price.

7. In addition to the 50 dollars per month for messing, what amount per month do you consider necessary to cover the expenses of wines, fuel, light, and servants?	Forty-five dollars.
8. What do you consider the fair rate of wages for a cook in charge of a mess of about 30 members?	Forty dollars.
9. What do you consider to be the extra cost of foreign articles of consumption?	Forty per cent.
10. Give us your opinion about the other extras necessary for a mess of 30?	English coal very dear, 22 dollars per ton, and Japanese coal very inferior at 12 dollars per ton. Oil, wick, lamp-glasses, &c., are very dear. Washing, 2 dollars 75 cents per 100.
11. Do you think it likely that there will be a decrease in the price of native articles of consumption?	No; on the contrary, an increase, on account of Yokohama becoming an important port in the East, and natives consuming articles of food hitherto only used by foreigners.
12. Can you give similar particulars regarding the messing, living, and general expenditure of individuals, or of a small family, as you have of a mess of 30?	No; my experience has only been confined to a large establishment.

(signed) *M. Smith,* Secretary,
Y. U. Club.
H. Radford Norman,
Colonel, President.

REPLIES of Mr. *Loureiro,* Portuguese Consul.

Questions.	*Answers.*
1. What do you consider to be the cost of messing for a gentleman living by himself, or for a small family, in Yokohama, *per mensem*?	For a bachelor, 200 dollars, comfortably.
2. What are the wages of the following servants in Yokohama, according to your experience, viz.:	
Cook - - - - - - -	Chinese, 20 dollars. Japanese, 5 dollars.
House-boy - - - - - -	„ 20 „ „ 6 „
Coolie - - - - - - -	„ 10 „ „ 5 „
Boy (body servant) - - - - -	„ 20 „ „ 6 „
Betto (groom) - - - - -	„ 20 „ „ 6 „
and how many of each denomination do you find indispensable in your house?	one of each at least, and one Chinese head servant indispensable.
3. Do you employ Chinese or Japanese servants, and do you consider the employment of the former absolutely necessary?	I employ one Chinese servant, and I consider it necessary to have, at least, one Chinese servant, and the rest Japanese.
4. At what amount do you consider the keep of a horse to come to *per mensem*?	10 dollars without betto's wages.
5. Have you found the cost of living in Yokohama to have increased of late?	I have found a steady increase every year since my first arrival here, in December 1857.
6. Do you think there is a prospect of a decrease in the cost of living and general expenditure in Yokohama?	None whatever; on the contrary, it is more likely to increase. The price of beef when I first came here was 6 cents per lb., and now is up to 20 cents, and I hear it is likely to be 25 soon.

Yokohama, 16 April 1868.

Major General *McMurdo* to the Assistant Adjutant General, Dublin.

INSPECTION OF THE 2/9TH REGIMENT.

Sir, Dublin, 7 October 1868.

I HAVE the honour to forward the enclosed representation from Colonel Knox, C.B., and the officers of the 2nd Battalion, 9th Regiment, with a view to the correspondence being laid before His Royal Highness the Field Marshal Commanding in Chief.

I have, &c.
(signed) *W. M. S. McMurdo*, Major General,
Inspecting Officer.

Submitted to the Deputy Adjutant General for transmission through the proper channel.

(signed) *A. Borton*, Major General,
8 October 1868. for Major General Commanding.

Adjutant General's Office, Dublin,
11 October 1868.

Referred to the Military Secretary.

The previous correspondence appears to have been sent to the Military Secretary, Horse Guards.

By Order,
(signed) *Kenneth D. Mackenzie*,
Deputy Adjutant General.

COLONIAL ALLOWANCES.

Sir, Dublin, 6 October 1868.

I HAVE the honour to enclose a Statement (A), made on behalf of myself and the officers of the 2nd Battalion, 9th Regiment, lately serving in Japan, accompanied by two copies of letters which I beg may be returned to me (B) and (C).

I trust that you will be good enough to transmit our claim to the Right Honourable the Secretary of State for War for settlement. The only answer I have received, in August last, on the subject, was to the effect that it was under consideration.

I have, &c.
(signed) *Thomas E. Knox*, Colonel,
Lieutenant Colonel Commanding 2nd Battalion, 9th Regiment.

Major General McMurdo, C.B.,
Commanding 1st Infantry Brigade,
Dublin.

(A.)

STATEMENT.

THE officers of the 2nd Battalion, 9th Foot, take this opportunity to inform the Major General that at the last inspection of the battalion at Yokohama, a complaint was submitted to the Major General Commanding in China and Japan, relative to the 25 per cent. deduction from the China scale of allowances enforced against the officers serving in Japan.

This complaint was accepted, approved of, and forwarded by the then Inspecting General.

It is known that a commission was appointed to inquire into the subject, and it is believed that the commission has sent in its report. It would not be right at this stage to re-state details, but feeling confident that the facts upon which the complaint referred to was grounded cannot be contested, and that the altered rates of exchange and consequent collapse of the Itziboo fund rendered the 25 per cent. deduction unfair and harsh, the officers of the 2nd Battalion 9th Regiment, respectfully request that it may be noted on this occasion for the information of His Royal Highness the Commander in Chief, that no reply has yet been received to the representations made by the officers of the battalion at the last inspection.

Thos. E. Knox, Colonel,
Lieut.-Colonel, Commanding 2/9th Regiment.

Richmond Barrack, Dublin, 6 October 1868.

(083—3—1461.)

The Assistant Under Secretary of State, War Office, to the Military Secretary, Horse Guards.

Sir, War Office, 18 November 1868.

With reference to your letters of the 31st August last, and 19th ultimo, transmitting, by direction of His Royal Highness the Field Marshal Commanding in Chief, certain correspondence relative to the scale of allowances for China and Japan, I am directed by Secretary Sir John Pakington to request that you will be good enough to inform His Royal Highness that he has applied for the consent of the Lords Commissioners of Her Majesty's Treasury to assimilate the rates allowed for Japan to those granted in China.

I have, &c.
(signed) *Douglas Galton.*

The Military Secretary, Horse Guards.

The Military Secretary, Horse Guards, to the Under Secretary of State, War Office.

Sir, Horse Guards, 30 November 1868.

Having laid before the Field Marshal Commanding in Chief your letter of the 18th instant, intimating that Secretary Sir John Pakington has applied for the consent of the Lords Commissioners of the Treasury to assimilate the rates of allowances for Japan to those granted in China, I am directed to acquaint you that His Royal Highness is gratified to learn that the above measure has been recommended to the Treasury, and presumes that it is intended to be retrospective to a certain extent, so as to meet the case of the officers of the 2nd Battalion (now serving in Ireland), 9th Foot, whose appeal on the subject was made in October 1867, and renewed in October last.

I am at the same time to observe, that as the reports forwarded by the general officer commanding the troops in China and Japan, clearly demonstrate the justice of increasing the allowances throughout the command, His Royal Highness trusts that an early decision will be arrived at on the general question, and also in regard to the advisability of there being no distinction of pay and allowance between the European officers of line and native regiments when serving together, and in reference to Major General Brunker's renewed application on the subject of the hardship of depriving staff and other officers of their consolidated allowances while proceeding on duty from one station to another in the command.

I have, &c.
(signed) *W. F. Forster.*

(083—3—1468.)

The Assistant Under Secretary of State, War Office, to the Military Secretary, Horse Guards.

Sir, War Office, 18 December 1868.

With reference to your letters of the 19th October last, and 30th ultimo, on the subject of the scale of consolidated allowances granted to officers stationed in China and Japan, as well as to the letter from this office, dated the 18th ultimo, upon the same subject, I am directed by the Secretary of State for War to acquaint you, for the information of His Royal Highness the Field Marshal Commanding in Chief, that the Lords Commissioners of Her Majesty's Treasury have declined to sanction any addition to the authorised scale of allowances.

I have, &c.
(signed) *Douglas Galton.*

(Pressing.)

The Military Secretary, Horse Guards, to the Under Secretary of State, War Office.

Sir, Horse Guards, 22 December 1868.

With reference to your letter* of the 18th instant, intimating that the Lords Commissioners of Her Majesty's Treasury have declined to sanction any addition to the authorised scale of allowances granted to officers stationed in China and Japan, I am directed by the Field Marshal Commanding in Chief, to request that you will let me know, for His Royal Highness's information, whether this decision affects the question of assimilating the rates allowed for Japan to those granted in China, a measure which it appears, from your letter† of the 18th ultimo, the Secretary of State for War had recommended for the approval of the Treasury.

* 083—3—1468.

† 083—3—1461.

I have, &c.
(signed) *E. B. Johnson*, Colonel,
For Military Secretary.

(083—3—1469.)

The Under Secretary of State, War Office, to the Military Secretary, Horse Guards.

Sir, War Office, 24 December 1868.

In reply to Colonel Johnson's letter, dated the 22nd instant, on the subject of the refusal of the Lords Commissioners of Her Majesty's Treasury to authorise any increase to the consolidated allowances issued in the China command, I am directed by the Secretary of State for War to acquaint you, for the information of His Royal Highness the Field Marshal Commanding in Chief, that the Treasury decision, which was communicated to you in the letter from this office of the 18th instant, had reference to the increase of the Japan scale of allowances, which increase the Secretary of State had recommended for their Lordships' favourable consideration, as notified in the letter addressed to you on the 18th ultimo.

I have, &c.
(signed) *Edward Lugard.*

The Military Secretary, Horse Guards, to the Under Secretary of State for War.

Sir, Horse Guards, 28 December 1868.

I have the honour to acknowledge the receipt of your letters‡ of the 18th and 24th instant respectively, intimating that the Lords Commissioners of Her Majesty's Treasury have declined to sanction any addition to the authorised scale of allowances granted to officers stationed in China and Japan; and I am directed by the Field Marshal Commanding in Chief to request you will express to Mr. Secretary Cardwell his Royal Highness's great regret that this decision should have been arrived at, notwithstanding the reports received from China showing the inadequacy of the present allowances throughout the command. The Duke of Cambridge cannot think that the Lords Commissioners would wish that officers of Her Majesty's army should be compelled to serve in a distant country on allowances which have been shown to be insufficient to maintain them, and far below the amount which is looked upon as necessary in the case of gentlemen in civil and mercantile employ.

‡ 083—3—1468 and 1469.

I have, &c.
(signed) *E. B. Johnson*, Colonel,
For Military Secretary.

— II. —

CORRESPONDENCE relative to the ALLOWANCES of STAFF OFFICERS in the CHINA COMMAND.

(3180.)

Major General *Guy* to the Secretary of State for War.

Head Quarters, Hong Kong,
9 December 1867.

Sir,

I HAVE the honour to forward for your favourable consideration the accompanying applications from the officers of the general staff in this command.

I am well aware that the representations contained therein are well founded, and that the officers in question are, as regards allowances, in a worse position than the regimental officers serving in China, while their expenses are much greater. I trust, therefore, that you will be pleased to take a favourable view of their claims, and place them upon at least the same footing as officers holding similar appointments in Ceylon.

I have, &c.
(signed) *P. M. N. Guy*, Major General,
Commanding H. B. M's
Troops in China and Japan.

(F.—4424.)

Quarter Master General's Office, Hong Kong,
4 December 1867.

Sir,

I HAVE the honour to request that you will lay before his Excellency the Major General Commanding, the following statement connected with my pay and allowances as Deputy Adjutant Quarter Master General in China, with a view to an increase to the same being recommended by him for the favourable consideration of the Secretary of State for War.

I am allowed 11 *s.* per diem consolidated allowance, in common with every other captain in the garrison, and being a mounted officer, I also draw 1 *s.* 6 *d.* per diem groom's allowance. This last is given to all officers entitled to keep a horse, if they do keep one, but is not supposed by the wording of the warrant to cover the expense of forage, for which a calculation is made and allowed to every officer in his consolidated allowance. Most officers in Hong Kong, not of field rank, who are entitled to keep a horse, do so in lieu of a chair. I am obliged to keep a horse as much as a field officer of a regiment, and I cannot perform my duties without a chair also, having to go constantly about during the heat of the day.

In the new scale of allowances recently published for Ceylon, a station much less expensive than this, the Deputy Adjutant Quarter Master General gets (in addition to the same staff pay of 9 *s.* 6 *d.* per diem which I draw) 11 *s.* 4 *d.*, captain's consolidated allowance, 2 *s.* 8 *d.* forage, and 3 *s.* per diem as head of his department; in all, 4 *s.* 6 *d.* per diem more than I do in Hong Kong, where living is dearer and the climate worse.

Contrasting my pay and allowances, in this command, with those of a regimental captain, there is less actual difference between mine and his than there would be were we both serving at Aldershot in similar positions, or in other words I receive less for serving on the staff in China than I should in England.

I need not observe that I have many expenses that a regimental captain has not, and I trust the Major General will recommend that such an increase may be made to my allowances as will bring them up to those of Ceylon.

I have, &c.
(signed) *Wilkinson Shaw*,
Deputy Adjutant Quarter Master General.

The Assistant Military Secretary,
Hong Kong.

(No. 3135.)

Military Secretary's Office, Hong Kong,
5 December 1867.

Sir,

I HAVE the honour to request that you will be good enough to forward to the Right Honourable the Secretary of State for War, this my application to be permitted to draw the same allowances as are granted to the staff officer holding my appointment in Ceylon, viz., the allowance granted to the head of a department, and 2 *s.* 8 *d.* per diem forage allowance. At present my staff pay is less than the staff pay of an officer holding a similar

similar staff appointment in England. I receive 9*s.* 6*d.* per day staff pay and 1*s.* 6*d.* per day groom's allowance, in addition to one ration of forage, which is included in my consolidated allowance and drawn in common with every officer in the garrison. In England I would receive the same rate of staff pay and forage as a field officer.

I may add that the Regent's allowance, a very great boon granted by War Office letter No. 083—3—1380 of the 14th April 1866, is not shared in by officers of the staff who are also, in consequence of the distance of their quarters from their offices, &c., compelled to keep a chair in addition to a horse, though drawing the same conveyance allowance as regimental officers, who are not obliged to keep either one or the other for the performance of their duties.

It is well known that Hong Kong is a much more expensive station than Ceylon, and a residence of six years in India enables me to affirm that the expense of living in that country is about half what it is in China.

I trust therefore that the Secretary of State for War will be pleased to give his favourable consideration to my request.

I have, &c.
(signed) *J. S. Roberts,*
Asssistant Military Secretary.

His Excellency Major General Guy, C.B.,
&c. &c. &c.

(F.—4426.)

Sir, Hong Kong, 7 December 1867.

I HAVE the honour to request that you will be good enough to submit to the Major General Commanding, for his favourable consideration, this my application to be granted such an increase to my allowances (viz., 4*s.* 6*d.* a day; that is, 3*s.* a day as head of a department, and 1*s.* 6*d.* a day, the difference between the sum of the consolidated and horse allowances here, and of the same allowances at Ceylon) as will make them equal to those granted to the Deputy Assistant Quarter Master General at Ceylon, as the head of his department. I would ask you to bring the following facts to his Excellency's notice. While China is in itself a more expensive station than Ceylon, and perhaps than any other in the world where British troops are quartered (India not excepted), it is also one where the expenses incurred by an officer serving on the staff are greater in comparison with those of a regimental officer of the same rank than they are elsewhere; but in this command the pay and allowances of the staff bear a smaller proportion to those of regimental officers than is the case in England; for while the latter when serving here receive an increase to their income in the shape of a consolidated allowance, the officers of the former receive precisely the same allowance, and nothing additional whatever, for being on the staff, unless it be 1*s.* 6*d.* a day, "groom's allowance," which they have in common with all officers, regimental or otherwise, who are entitled to, and who keep horses, and which amounts to very little more than one-half the cost of keeping one. Here an officer on the staff is obliged to incur numerous expenses from which one serving in a regiment is exempt, owing to the necessity (from the difficulty of procuring houses) of living at such a distance from the regimental messes as prevents his making use of them, to the impossibility of his carrying on his duties without keeping both a horse and a chair, to the absence of any advantage accruing to him from the "Regent's allowance," and to other causes.

Trusting that the Major General will take such a view of these circumstances as will induce him to recommend my case to the favourable consideration of the Right Honourable the Secretary of State for War,

I have, &c.
(signed) *R. Maxwell,* Captain,
Deputy Assistant Adjutant General.

The Assistant Military Secretary,
&c. &c. &c.
Hong Kong.

(7070—813.)

The Assistant Under Secretary, War Office, to the General Officer Commanding, China and Japan.

Sir, War Office, 22 April 1868.

WITH reference to your letter of 9th December last, forwarding applications from officers of the general staff at Hong Kong for an increase of their allowances, I am directed by Secretary Sir John Pakington to acquaint you that he regrets he is unable to make any alteration in the scale of allowances fixed for the stations.

I have, &c.
(signed) *Douglas Galton.*

ARMY (CHINA AND JAPAN).

COPIES of the CORRESPONDENCE which commenced in October 1867 between Major General *Guy*, C.B., then in Command of Her Majesty's Troops in *China* and *Japan*, and the War Office, relative to the SCALE of CONSOLIDATED ALLOWANCES promulgated in 1866, for the OFFICERS serving in *China* and *Japan*; and, of the STATEMENT handed by the Officer Commanding the Troops in *Japan* in October 1867 to the Major General at his Inspection of the 9th Regiment of Infantry relating to it.

FORTIFICATIONS.

RETURN to an Order of the Honourable The House of Commons, dated 16 July 1869;—*for*,

STATEMENT "showing the SCHEDULE of the FORTIFICATIONS (PROVISIONS FOR EXPENSES) BILL as compared with the SCHEDULE of the REPORT of the COMMITTEE on FORTIFICATIONS (1869), pp. xciv to ciii inclusive, and with the SCHEDULE of the ACT 30 & 31 Vict. c. 145."

War Office, July 1869.

EDWARD CARDWELL.

(*Mr. Secretary Cardwell.*)

Ordered, by The House of Commons, *to be Printed*, 16 *July* 1869.

STATEMENT showing the SCHEDULE of the FORTIFICATIONS (PROVISIONS FOR EXPENSES) BILL as compared with the SCHEDULES of the REPORT of the COMMITTEE on FORTIFICATIONS (1869), pp. xciv to ciii inclusive, and with the SCHEDULE of the ACT 30 & 31 Vict. c. 145.

To the Right Honourable *Edward Cardwell*, M.P., Secretary of State for War, &c. &c. &c.

Sir, War Office, S.W., July 1869.

I HAVE the honour herewith to submit a schedule which it is proposed to attach to the Fortifications (Provision for Expenses) Bill, about to be laid before Parliament.

I have prepared the schedule, in conformity with your instructions, on the following principles, viz.:—

1. That the loan shall now be finally closed, and that any further expenditure on account of fortifications which may hereafter be proposed should be submitted to Parliament in the usual manner in the Estimates.

2. That the total amount to be raised by loan shall not exceed that of the total Estimate in the schedule of the Act of 1867.

3. That any works which have been provided for in previous Acts, but which have not yet been commenced, shall, so far as the loan is concerned, be abandoned.

4. That the work already executed shall be utilised and the principal forts completed as economically as is consistent with leaving them in a sufficient state of defence.

Proceeding on these principles, I have taken as a basis the estimate in the Report of the Committee, dated 28th April 1869, of which Admiral the Honourable Sir F. Grey was President, viz., £. 7,951,437.

I have then made deductions as follows, viz.:

1st. On account of works not yet commenced (*see* Return A.), £.117,721.

2nd. On account of the adoption of the Moncrieff mode of mounting guns (*see* Return B.), £. 260,565.

3rd. On account of several items which it is proposed to defer for consideration in the annual Estimates of future years (*see* Return C.), £.184,316.

Thus leaving, with the additions, &c., shown in the accompanying Abstract (*see* Return D.), as the total sum to be provided by loan, £. 7,460,000.

It should be observed that the works include barrack accommodation for about 10,000 officers, non-commissioned officers, and men; and that the lands purchased absolutely for the works already yield an annual return of 6,647 *l.*, which sum will be increased when the works are completed.

The

The accompanying Return, marked E, shows the estimated cost of the several works, as stated in the schedule of the Act of 1867,—in the Report of the Committee on Fortifications,—and in the Bill now submitted. The Return also shows how the several reductions, now proposed in the amounts of some of the estimates of the Committee on Fortifications, have been made.

I have, &c.
(signed) *Wm. F. Drummond Jervois.*

The Right Hon. Edward Cardwell, M.P.
&c. &c. &c.
Secretary of State for War.

RETURN (A.)—WORKS not yet commenced, which it is proposed to omit from the Schedule.

Item in Report of Committee on Fortifications.	NAME OF WORK.	Total Estimated Cost of Work.
		£.
6	Gilkicker Mortar Battery	8,800
69	Chapel Bay Battery	13,754

Note.—In explanation of the large number of "Officers wanting to Complete."

The full Establishment of Officers has been given, whereas all appointments of Ensigns (Second Lieutenants in Artillery Corps) have been suspended since July 1860; two Supernumerary Lieutenants in lieu thereof being allowed to each Regiment.

The large number of "Privates wanting to Complete" is chiefly caused by the reduction made in August 1864 in the Effective Strength of all Regiments whose Establishments exceed 600 Privates.

The Order of August 1864 was cancelled in October 1867; but the Regiments have not yet recruited up to their full Establishments.

Jas. Lindsay, Major General,
Inspector General of Reserve Forces.

MILITIA REGIMENTS (FOREIGN SERVICE).

RETURN of the Militia Regiments of the United Kingdom which Volunteered for Foreign Service during the Crimean War and during the Indian Mutiny, with the Dates of their Offers of Service.

(*Major Walker.*)

Ordered, by The House of Commons, *to be Printed,*
13 *July* 1869.

ARMY (SUPERCESSION OF OFFICERS).

RETURN to an Address of the Honourable The House of Commons, dated 4 May 1869;—*for*,

"COPY of any CORRESPONDENCE which has taken place from OFFICERS of the QUEEN'S ARMY, complaining of their SUPERCESSION by JUNIOR OFFICERS of the INDIAN ARMY, promoted under a recent Warrant."

War Office, 6 May 1869.

EDWARD CARDWELL.

— No. 1. —

General *W. R. Mansfield* to the Military Secretary.

Sir, Head Quarters, Simla, 13 August 1865.

I HAVE the honour, with much deference, to solicit the attention of His Royal Highness the Field Marshal Commanding in Chief, to some very important considerations affecting the position of the superior officers of Her Majesty's British forces. Thus, under the operation of the rules of promotion in the several services, the following full Colonels of the British Army now serving in India, viz.: Colonel T. Williams,* C.B., 4th Foot; Colonel D. Rainier, 98th Foot; Colonel E. A. Holdich, C.B., 20th Foot; Colonel A. C. Errington, 51st Foot; Colonel S. T. Christie, C.B., 80th Foot; Colonel E. Haythorne, 1st Foot, have been superseded in India by the promotion to the rank of General Officer of Colonels in the local service.†

2. It is seen that all the colonels on the local lists in India of the year 1856 are now promoted to the effective rank of Major General.

3. According to the averages of promotion in the British Army the colonels of 1854 will probably not have been absorbed in the rank of major general till the year 1868.

4. The supersession of the colonels belonging to Her Majesty's British forces by the Indian local colonels cannot fail to go on at an accelerated ratio for the following reasons, viz., that the number of colonels on the British lists is immeasurably greater than that in the local Indian lists, in proportion to the number of general officers respectively borne on the two establishments. Thus the number of generals of the different degrees is 272, in the British service; the number of colonels, by June Army List, is 394; the number of generals on the local list is 208; the number of colonels, by the last Bengal Army List, is 123.

5. It

* Appointed Major General with temporary rank, February 1865.

† Colonel T. Williams has been superseded by all major generals on the Indian list between Sir W. Coghlan and Major General J. E. Landers, viz.: 13, including Major Generals Showers, C.B., McLeod, and Troup, C.B., commanding divisions.

Colonel Rainier, 98th, by all below Major General Lang, viz., 17, including the above-mentioned officers commanding divisions.

Colonel Holdich, 20th, by all below Major General Showers, viz., 16, including Major Generals McLeod and Troup, commanding divisions.

Colonel Errington, 51st, by all below Major General Welchman, viz. 12.

Colonel Christie, 80th, by all below Major General Welchman, viz. 12.

Colonel E. Haythorne, Adjutant General, by all below Major General Landers, viz., 6.

5. It has always been believed that the inequality to which attention has been invited, was in former times forbidden, under the orders of his late Majesty King William IV.

6. For some years the practice obtained of promoting all officers to the local rank of Major General in India, who were immediately senior to officers of the Indian service, who had been promoted by the Queen's brevet.

7. In 1854 a new system of promotion was established, the old general brevet being abolished. After some correspondence it was ruled by the late Lord Hardinge, when Commanding in Chief in England, that, as a consequence of the new system of promotion, the practice above alluded to, known under the name of Fane promotion of major generals, should no longer be permitted to exist.

8. Appeals against supersession have from time to time been made by colonels of the British service serving in India, which have been set aside under the ruling above quoted.

9. The question might therefore be allowed to rest, but for the fact that lately the Right Honourable the Secretary of State for India has, with regard to all other ranks, declared the very principle on the assertion of which the quondam promotion of Fane major generals rested; and, secondly the frequent supersession of British colonels which is now proceeding.

10. Thus it is now seen (*vide* Secretary of State's Despatch, D/ 17th June 1864) that lieutenant colonels, majors, captains, and lieutenants, are promoted in the local gazettes in India, to put them on a par in India with officers who obtained rank under the Staff Corps Warrant.

11. This having thus been practically asserted, with officers of inferior degree, the inquiry is now made by the old colonels serving in India, whether the like principle should not also be applied in the case of line colonels who have been superseded by major generals of the Indian service.

12. The argument against this is, that the Indian service is not the only one which presents a separate list of promotion, entailing such effects. Thus it is maintained that the Royal Artillery and Royal Marines being on separate lists, occasional supersession of the infantry and cavalry colonels takes place with regard to those branches of the service, and *vice versâ*.

13. It is then argued that, if it be not objected to in those cases, there can be no reason for making an attempt to set aside the inequality in the case of the Indian officers.

14. In the first place, it may be observed, in answer to this argument, that it was always understood in the army at large that it had been distinctly stipulated, when the rank of general was granted to the Indian officers, that the concession should not in any manner prejudice the condition of officers of like standing belonging to the Royal army.

15. But, secondly, there is a further reason; the analogy suggested by the Royal Artillery and Royal Marine services does not stand the test of examination. The officers of those branches of the service do not generally come into contact with cavalry and infantry officers.

16. Out of India, the ordinary divisional and brigade commands do not fall to them, whether in war or in time of peace.

17. In India, on the other hand, the Indian major generals, who are now superseding the colonels of the British army in considerable numbers, will most assuredly take command of the latter as generals of divisions in the several Indian Presidencies, the very result being thus produced, against which, as we know, it was deemed formerly necessary to guard.

18. With respect, then, to the principle adopted for other ranks, I would venture to intimate, for the general consideration of His Royal Highness, that no good reason can be assigned for making exception with regard to the particular rank of major general.

19. It

19. It has appeared to me, therefore, the subject would seem to me to be one which may be, with propriety, referred for the consideration of His Royal Highness and of the Right Honourable the Secretaries of State for India and War, with a view to the application of the old rule, by which the local rank of major general is given to officers having the rank of colonel, who are superseded by the promotion of officers of the local armies of Bengal, Madras, and Bombay.

20. Supposing the old rule to be re-established, as above suggested, it would appear necessary, with regard to the Indian service, on the other hand, that if that were to occur, which is apparently impossible from the constitution of the lists of the several armies—viz., the case of a line colonel being promoted in the ordinary course to the rank of major general, who might be junior to an Indian colonel, the latter should be promoted locally in India to the rank of major general, in order to preserve perfect uniformity and equality between the two services.

21. It is to be remarked that the rank of major general being conferred on Indian officers, not only for India, but for all the world, by the late changes, the state of things to which notice has been attracted, is even more serious for the officers of the British army than was originally contemplated when the remedy above alluded to was applied.

22. It may perhaps be assumed that, in practice generally, the two sets of officers would not come into contact, except in India.

23. The experience of the war of 1855-56 does, however, lead us to believe that in any development of the military resources of Great Britain for European war, this contingency would in all probability take place.

24. The argument contained in this letter would be hardly complete were I to omit to draw the attention of His Royal Highness to another general result of the constitution of the lists of Indian field officers.

25. Thus, owing to the number of colonels, lieutenant colonels, and majors being proportionately less to the general officers as compared with the like ranks in the British Army List, an officer in the former, having been promoted to the rank of field officer, runs through the several ranks more rapidly than an officer in the British service till the rank of general is reached.

26. Officers who became brevet majors in 1858 are now lieutenant colonels in ordinary succession in the Indian lists.

27. According to the last Royal Annual Army List, it is apparent that there are great numbers of majors of 1855.

I have, &c.
(signed) *W. R. Mansfield*, General,
Commander in Chief in India.

P.S.—I would more especially invite your attention to the very important correspondence which took place on the matter of this letter during the command in chief of the late Lord Hill. The letter, which more particularly lays down principles and rules, is that from his Lordship to the President of the Board of Control, dated March 25th, 1834, in which the relative position of the King's officers and those of the late Honourable East India Company is discussed in the most masterly manner; subsequent to the writing of that letter, took place the correspondence between the late Sir Henry Fane and the Government of India, which resulted in the conferring of the local rank of major general on such officers of the King's service as had been superseded by those of the Honourable Company. I gather that copies of that correspondence must be in existence in your office, and I therefore abstain from sending copies, unless you should wish me to do so.

(signed) *W. R. Mansfield.*

— No. 2. —

(Private.)

EXTRACT from LETTER of Colonel *R. De Salis*, dated London, 28 January 1869.

Dear General Forster,

YOU asked me to write to you privately on the subject of the supersession of Queen's officers by those of the Royal Indian army.

1. My personal grievance is, that I served in the mutiny war, and that 38 of the Indian officers who were then junior to me, and some of them actually under my command, are now promoted over me to be generals. (I give you a list.)

2. The colonels of 1863, in the Indian army, are now becoming generals, but in the Queen's army, the colonels of 1855, a difference of *eight years*.

3. The last Indian general promoted is Major General Galwey, who was a Colonel of 9th May 1863. In our own service, Colonel Thesiger (30th April 1863) was his senior, and I find in the monthly Army List, from Colonel Prince Edward of Saxe Weimar down to Colonel Thesiger, there are the names of 264 *colonels* who, like myself, have been superseded.

4. If we in this country feel the anomaly, it is much more obvious in India, where our officers actually in command of troops have to give way to juniors, and between the brigadier generals of the Royal Indian army and the Queen's, there is an average difference of about four years' rank as colonel.

Thus, in the artillery, a colonel who had belonged to the Company's service would receive a brigade some three or four years before another artillery colonel, and thus might actually command a senior officer of *his own corps*. Brigadier General Stock commands at Bombay, and is junior (as colonel of 1866) to both the lieutenant colonel and major of 1st battalion, 23rd regiment, which is stationed at Bombay under his command. Similarly at Mhow, Colonel Raines, 95th, as colonel, was senior to Major General Sir G. Malcolm, who commands the Mhow Division.

5. It is difficult to understand the Royal Warrant when it refers to the amalgamation in the Army Lists of 1861, 1862, 1863, and 1864. There appeared a list of *amalgamated colonels* which suddenly disappeared!!! There is now a *fresh* amalgamated list, commencing in 1866. Perhaps the promotions to the rank of general in the Indian army might be temporarily suspended until inquiry would be made.

— No. 3. —

Colonel *H. Greathed* to the Military Secretary.

Sir, United Service Club, 3 March 1869.

I HAVE the honour to request that you will be pleased to submit to His Royal Highness the Field Marshal Commanding in Chief, my most respectful appeal on the subject of the supersession of the colonels on the British list by those on the Indian list of Her Majesty's forces.

The Royal Warrant, 1st January 1862, provided for the promotion of both British and Indian Colonels in a manner which, looking at results, would have been fairly satisfactory to the officers of both services, and, apart from the accidents of service, would have been fairly equal in the distribution of promotion in both lists.

But, by the adoption of the Royal Warrant of 1864, the promotion of the colonels on the Indian list to the rank of major general, as compared with that of the colonels on the British list, is so excessive, that nothing but a suspension of the Warrant, as regards these ranks, until further inquiry, can mitigate the damage which has been done, not only to the colonels, but to every class of *field officer, at least*, on the British list. The last officer on the Indian list promoted

moted to the rank of major general, is a colonel of 1863, who thereby supersedes a colonel of 1855 on the British list.

The fears that were felt by officers of the Indian service of stagnation in promotion, have been so utterly falsified in the event, that I respectfully submit a strong case exists for the re-adjustment of rank, in which the fair equality of promotion intended by the framers of the Warrant of 1862 may be carried out.

As all officers in Her Majesty's service are now eligible for employment in all parts of the dominions of the Queen, *all* must have an equal interest in fair and equal promotion, this supersession may at any time become a very practical grievance, full of evil to the public service. It would not become me to do more than indicate this view of the question.

I have, &c.
(signed) *Edwd. H. Greathed,*
Colonel.

— No. 4. —

Colonel *H. J. Warre* to the Military Secretary.

44, Cadogan-place, London, S. W.,
Sir, 3 March 1869.

As the operations of the Royal Warrant for the amalgamation of the Indian with the Royal army are acting very prejudicially to colonels, and, indeed, to all officers of the Queen's Service, I take the liberty of drawing the attention of His Royal Highness the Field Marshal Commanding in Chief, to the large number of colonels of the former Indian army who are now obtaining the rank of major general, under the War Office Circular (No. 867) of the 15th June 1864.

Having served in India in command of the 57th Regiment, as brigadier in command at Mhow, and as acting military secretary to the general then commanding in chief (Lord Strathnairn), I had every opportunity of learning the provisions of the Royal Warrant, and was satisfied that it was formed in a spirit of justice to both armies; but I was not aware that its provisions had been altered, until my attention was recently called to the interpretation put upon the warrant by the circular above alluded to,

The officers of the late Indian army not only derive all the benefit of their rank in England, and in all Her Majesty's Possessions, instead of, as formerly, *only* in India; but the increased inducements offered to officers in pensions, &c., on retirement, have reduced the list of senior officers so rapidly that it is now 12 months since the separate list of Indian colonels was exhausted; and officers of rank far junior to those in the Queen's Service, have been promoted to the rank of major general, so that, if I am correctly informed, whereas colonels of the year 1855 are still unpromoted in the Queen's army, colonels of 1863 are now being promoted in the Madras service.

If such is the case, and I have every reason to believe that it is so, I feel sure that His Royal Highness will endeavour to correct the evil, and will pardon my trespassing upon his valuable time to support my own claims and those of my brother officers of Her Majesty's Royal Army.

I have, &c.
(signed) *H. J. Warre,* Colonel, Half-Pay,
late 57th Regiment.

— No. 5. —

Colonel *R. Wardlaw* to the Military Secretary.

United Service Club, London,
Sir, 6 March 1869.

I BEG leave respectfully to bring under the notice of His Royal Highness the Field Marshal Commanding in Chief, the great injustice under which the colonels of Her Majesty's army are suffering by being superseded by officers of the old East Indian Establishment, under the Amalgamation Warrant, and I venture to hope that His Royal Highness will give us his able assistance towards a remedy.

I have, &c.
(signed *R. Wardlaw*, Colonel, Half-Pay.

— No. 6. —

Major General *H. P. de Bathe* to the Military Secretary.

Sir, United Service Club, 8 March 1869.

I HAVE the honour to request that you will receive this my most respectful remonstrance against the present supersession of Her Majesty's officers by those of the late India Company's *officers.**

* *Sic* in orig.

I understand that by the altered Warrant of 1864, in one year or so the Indian generals will be placed on the same list as Her Majesty's present general officers, when I should find numbers of officers junior to myself at the time of the amalgamation, taking rank and command over me.

I trust, therefore, that His Royal Highness the Commander in Chief will be pleased to take such steps as may lead to the restoration of the former Amalgamation Warrant of 1862.

I have, &c.
(signed) *H. P. de Bathe*, Major General,
Late Scots Fusilier Guards.

— No. 7. —

Colonel *C. C. Shute* to the Military Secretary.

Sir, Brighton, 11 March 1869.

I HAVE the honour to state how much I feel the supersession by the colonels of the Indian army over those on the English list, consequent on the effect of the Warrant of June 1864.

This has been such a general subject of disappointment of late by the junior major generals and senior colonels of our army, that it is unnecessary for me to trouble you with details, and I would only respectfully express a hope that His Royal Highness the Field Marshal Commanding in Chief will be so kind as to exert his influence to have this grievous wrong remedied.

I have, &c.
(signed) *C. C. Shute*, Colonel,
Commanding 4th Dragoon Guards.

— No. 8. —

Colonel *Percy Hill* to the Military Secretary.

Sir, United Service Club, 24 March 1869.

Having understood that it is the intention of Her Majesty's Government to inquire into the causes of the supersession of colonels of the Royal army by the promotion to major general of very junior officers of the Indian service, I venture to place my individual case before His Royal Highness as one which affords a fair criterion of the manner in which those situated like myself are affected.

I am a colonel of 1857, and towards the end of the year 1866 I found myself passed over in rank for the first time. Since that date a very large number of Indian service colonels have obtained promotion, and thereby superseded me in a mode which I believe I am correct in stating was never contemplated by the Amalgamation Warrant.

In last night's "Gazette" a further promotion has appeared, and there is now a vacancy which, if filled, will promote an officer over the heads of myself and 283 other colonels of the Royal army.

Less than two years since, some of those who have superseded me were doing duty under my command.

Under these circumstances, I humbly submit that my petition is not more than is reasonable, in asking that further promotions may be stayed until due inquiry has been made, and that upon my own promotion to major general my rank may be antedated to such period as will reinstate me in the same relative position which I should have held had the original provisions of the Amalgamation Warrant been carried out.

I have, &c.
(signed) *Percy Hill*, Colonel, Half-Pay,
Rifle Brigade.

— No. 9. —

Colonel *Robert Bruce* to the Military Secretary.

Sir, Durdham Down, Bristol, 10 April 1869.

I have the honour to request you will be so good as to submit to His Royal Highness the Field Marshal Commanding in Chief my appeal against the injustice of being superseded by colonels of the Indian army far junior to me.

I have, &c.
(signed) *Robert Bruce*, Colonel, Half-Pay,
2nd Foot.

— No. 10. —

Colonel *G. V. Maxwell* to the Military Secretary.

Army and Navy Club, London,
Sir, 17 April 1869.

On my return to England within the last few days, after 11½ years' service in India. I have been informed that the constant supersession of colonels of the Royal by those of the Indian Army, has been brought to the notice of His Royal Highness the Commander in Chief.

Although smarting under the new system, and deeply feeling the mortification which every soldier feels at having his junior going over his head, a feeling of submission to orders has hitherto prevented me from venturing to express

that mortification; but as the subject has been mooted, I most respectfully beg to represent how I have been situated.

I have just had a five-year brigade command, and during that time was often in command of either the Lahore or Peshawar Division.

At the expiration of my command, I was the senior Brigadier General in the Bengal Presidency, and on returning to my regiment to prevent my having to serve under an officer of the Indian Army, who was five years my junior as a colonel, I was obliged to go on leave of absence, although I was in good health, and fit for any active service. Had I remained in India a few weeks more, I should have had an officer (of the Indian Army) promoted over me as major general, who was not a captain until more than two years after I had obtained my present rank of colonel.

I have, &c.
(signed) *G. V. Maxwell*,
Lieut. Col. 88th Foot,
and Colonel.

ARMY (SUPERCESSION OF OFFICERS).

COPY of CORRESPONDENCE from OFFICERS of the QUEEN'S ARMY, complaining of their SUPERCESSION by JUNIOR OFFICERS of the INDIAN ARMY, promoted under a recent Warrant.

ARMY (SUPERSESSION OF COLONELS).

RETURN to an Address of the Honourable The House of Commons, dated 24 June 1869; *for*,—

"COPY of REPORT of the WAR OFFICE COMMITTEE upon the SUPERSESSION of the COLONELS of HER MAJESTY'S ARMY by those of the late EAST INDIA COMPANY."

War Office, 25 June 1869.

EDWARD CARDWELL.

REPORT of the COMMITTEE appointed to inquire into the Question of the SUPERSESSION of BRITISH COLONELS by COLONELS of HER MAJESTY'S INDIAN ARMY.

Colonel C. R. EGERTON - - - *President.*
Major W. MARVIN, G. E. COCHRANE, Esq. - - - *Members.*

1. BEFORE the introduction of the promotion arrangements of 1854, the Lieutenant Colonels and Colonels of the Royal and East India Company's Services rose together to the rank of Colonel and Major General, by the operation of the General Brevets granted by the Crown, from time to time, at irregular intervals.

2. Irrespective of the General Brevets, the Lieutenant Colonels of the East India Company's Armies, under the different constitution of their Service, were occasionally promoted to the rank of Colonel by regimental line step, before they became entitled to that rank by the Royal Brevets. The Lieutenant Colonels of the Royal Service (those of the Royal Artillery and Royal Engineers excepted) were dependent solely on the Brevets for their rise to the rank of Colonel.

3. Complaints being made of the supersession to which the Royal Lieutenant Colonels were subjected from this cause, Her Majesty's Government, at the instance of the Duke of York, interfered, and the rise of the Company's Lieutenant Colonels to the rank of Colonel by regimental advancement was stopped (1806). This rank was subsequently (1829) restored, but only on the condition that a rule was to be established to protect the senior Lieutenant Colonels of the Royal Army serving in India from supersession by a junior Lieutenant Colonel of the Company's Army.

4. In the course of the discussion which took place, the Duke of Wellington laid down this principle:—*

"An Officer who has distinguished himself at the head of one of His Majesty's "Regiments, and who may thereby have rendered essential service at an im- "portant moment, must not be liable to be superseded by one junior to himself "in the rank of Lieutenant Colonel, either as Colonel, or, subsequently, as "Major General."

5. This

* Memorandum not dated. [1827.]

5. This principle was repeated by Lord Hill in his letter of the 25th March 1834 (*see* Appendix A).

6. In consequence of the understanding come to on this occasion, it was arranged that, on the promotion of a Company's Lieutenant Colonel by the regimental line step, the local rank of Colonel from the same date should be conferred on all the Lieutenant Colonels of His Majesty's Army serving in India who might be seniors as such to the Company's Officer so promoted, in order that they might hold the same position with him as Colonel which they had previously held as Lieutenant Colonels.

7. Another difficulty subsequently arose. The rank of the Company's Colonel, attained by the regimental line step, was permanent, and qualified its possessor to rise to Major General by the General Brevets; but the local rank granted to the Royal Lieutenant Colonels under the above arrangement, being temporary only,* did not qualify for promotion by the Brevets.

With the view, therefore, still further to maintain the principle insisted upon by the Duke of Wellington and Lord Hill, it was ruled, that when the Company's Colonel, promoted to that rank by the regimental line step, obtained promotion to Major General, by Royal Brevet, the local rank of Major General should be conferred on the local Colonels of His Majesty's Service in India, who were senior as such to the Company's Colonel so promoted.

8. This local rank ceased on the officers quitting India, and did not involve the loss of Staff Appointments, or of Command of Corps, which permanent possession would have carried with it, under the ordinary practice of the Service.

9. No steps were taken to protect the Royal Officers from supersession elsewhere than in India, simply, it is presumed, because at that time the East India Company's Officers held no rank except within the limits of their Charter, where the "Fane" Brevets also held good.

10. The Royal Warrant of 6th October 1854, inaugurated a new system of promotion. An establishment of General Officers, based on the supposed fair requirements of the respective armies, was set apart for each Service; and the performance of a certain amount of regimental or other duty—not standing in the list, as before—was henceforth to be the qualification for the rank of Colonel. No provision was made in this Warrant to secure the British Colonels from supersession by the East India Company's Officers in the rank of Major General.

11. The last General Brevet granted by Her Majesty (20th June 1854) had been issued just before the Royal Warrant of 6th October 1854, appeared. It promoted to Major General the Colonels of both Services of date on or before the year 1846.

12. At the date of the Warrant, the British and Indian Colonels started apparently on equal terms for the rank of General Officer. In proceeding, however, to carry out its provisions, a very great piece of good fortune fell to the Colonels of the Indian Service. In the British Service the fixed establishment of Generals was *less* than the numbers then existing, and the supernumeraries were ordered to be gradually absorbed. In the Indian Service the new establishment was *much larger* than the numbers then existing, and promotions were necessary to complete it. In making these no less than 95 Colonels of the Indian Service were raised, on the same day, to the rank of General Officer, some of them of 10 months' standing only as Colonels, and the promotions were carried down to 1st February 1854, or seven years in advance of the Colonels of the British Service.

13. The promotion of the Indian Colonels has also been accelerated by the amalgamation of the forces in 1860–61, particularly by the special annuities on retirement,

* "It is perfectly understood, from the nature of the respective Services of the King and Company, that in the former the Brevet must necessarily be temporary, and in the latter, permanent." (*See* letter from Lord Hill, dated 25th March 1834, Appendix A.)

retirement, offered in the latter year by the Secretary of State for India, of which many of the senior officers of the Indian Armies availed themselves.

14. In seeking for the causes of the more rapid rise of the Indian Officers, it must not be overlooked that the comprehensive system of retiring full pay pensions in force in the Indian Service has yearly relieved the Indian List of many of the senior officers, and thus cleared the way for the succession of their juniors to the rank of General Officer.

15. From the foregoing digest of the rules and regulations that have from time to time governed the promotion of officers to the higher grades in the Services of the Crown and the late Honourable East India Company, it will be seen, that from the arrangement of 1796 to the Royal Warrant of 1854, it was an admitted principle in regard to such promotion that it should proceed *pari passu* in each; and that the Officers of both the British and Indian Armies should be equally considered in a just participation of all advantages of military rank.

16. The frequent alterations and modifications of the rules which took place seem all to have had this end in view, and a reference to the voluminous mass of correspondence that is extant on the subject, between successive Commanders-in-Chief of the Imperial Army and the East Indian Authorities, very forcibly illustrates the jealous care with which the due balance of interests of the officers of either service was watched and protected.

17. The supersession of *one* Colonel of the British Army by a Colonel of the Indian Army in 1833, drew forth a correspondence which culminated in the letter of the late General Lord Hill to the President of the Board of Control, dated 25th March 1834 (*see* Appendix A), which is referred to by Sir William Mansfield (*see* Appendix B), and is considered by him to be "exhaustive of the "whole subject"; and in which his Lordship most peremptorily insists on the imperative necessity of maintaining the principle of equality of advancement to the higher grades.

18. His Lordship reiterates the dictum of the late Duke of Wellington on the subject, and in the course of an elaborate argument in support of the principle it involves, proceeds to remark:—

"The only safe and unerring principle on which the system of promotion can "be soundly and justly regulated as between the King's and the Company's "Officers in India, appears to be that which has been already alluded to; that "under no possible circumstances can it be permitted that a Lieutenant Colonel "in the King's Service should be superseded by one junior to himself in the rank "of Lieutenant Colonel, as Colonel, or subsequently as Major General."

Again,

"In all that has been said throughout the voluminous discussions which have "taken place upon the subject of Military promotions in India since 1796, the "ruling principle has ever been so to uphold the position of the King's Officers, "that they might not suffer in any collision of interests with the Officers of the "Company's Army in their character or military dignity."

19. It cannot be doubted that this principle of military equality in the higher ranks, so ably vindicated by the Duke of Wellington and Lord Hill, is the only safe and equitable basis upon which the promotion of two Armies, acting in conjunction, both in cantonments and in the field, serving the same Sovereign, and under the orders of one Government, should be regulated.

20. It appears that, at least up to the date of the Royal Warrant of 6th October 1854, it was as between the British and the Indian Armies, as far as practicable, always so regulated.

21. It remains to the Committee to point out how the case now stands, and how far in the effects of the before-mentioned Royal Warrant, as well as that of 15th June 1864, this principle has been departed from, and what grounds of complaint exist on the part of either Service.

22. The Committee find that the Generals now in course of promotion on the Indian List, were Colonels of the year 1863, and Lieutenant Colonels of 1858-59.

23. The last Indian General promoted (there are at the present time some vacancies unfilled), passed over and superseded no less than 230 Colonels of the British Service, the seniors of whom date as Colonels of 1854 and 1855, many of whom distinguished themselves at the head of Her Majesty's Regiments in the several actions in the Crimea, at Alma, Inkermann, and Balaklava, and were mentioned in despatches.

24. More marked, and more anomalous still are the cases of the Colonels of the British Army, who commanded brigades, or independent columns, or filled high Staff situations during the Indian Mutiny, and who are now in course of supersession by Officers of the Indian Army (many of whom no doubt took part in the same Field services), who, at that date, held only the rank of Major.

It is only necessary to enumerate the following :

Colonel Haythorne, C.B.
„ Sir E. Wetherall, C.B., K.C.S.I.
„ Sir J. Douglas, K.C.B.
„ Sir E. Greathead, K.C.B.
„ Sir J. Jones, K.C.B.
„ Sir D. Kelly, K.C.B.

25. By the Horse Guards Memorandum of 25th April 1855, the rank of Her Majesty's Indian Forces was, by Her Majesty's Command, made general, to give precedence with Officers of the Regular Forces in all parts of Her Majesty's dominions.

26. Supercession previously was only felt in India, but now it follows the Officers of the British Army, and affects them wherever they are associated with Officers of the Indian Service in all parts of Her Majesty's dominions.

27. It is now a more grave and substantial injury than at the time Lord Hill so forcibly condemned it.

28. It is not only in respect to the Senior Colonels of the British List that the operation of the Royal Warrant of 15th June 1864 has had an injurious effect; but the position and prospects of those Colonels of the Indian Staff Corps who head the Amalgamated List, and will have to rise on that List, have, if possible, been more grievously and detrimentally affected, and their case equally demands a remedy.

29. At the present average rate of promotion to the rank of Major General on the British List, it will take 15 *years* to promote the Colonel next before Colonel Salmon, a Staff Corps Officer, who heads the Amalgamated List.

30. At the present average rate of promotion to the rank of Major General on the Indian List, it will take three years to promote the Colonel next before Colonel Salmon on that List. Hence, under existing arrangements, there will be a difference of 12 years in the date of rank as Major General between Colonel Salmon and the next senior to him on the Indian List (Colonel Shakespear), although their commissions *as Colonel* date on the same day, and the former entered the service 14 *years before* the latter.

31. The Committee beg also to draw attention to the Appendix C, containing the names of Colonels of the British Army *now in India*, who have been superseded in the rank of General Officer by Officers of the Indian Army; and to refer especially to the cases of Colonel Goodwyn, 41st Regiment, and Colonel Maxwell, 88th Regiment, who are Colonels of 19th and 23rd March 1858, respectively, and are both commanding brigades in Bengal; whereas Major General J. D. Macpherson, Bengal Infantry, whose Colonelcy bears date 5th April 1858, attained the rank of Major General on the 24th January 1867, and is now serving as Commissary General in Bengal, where Colonels Goodwyn and Maxwell served with him as his seniors in the rank of Colonel. Goodwyn and Maxwell, who are still in Bengal as brigadiers, are therefore now liable at any moment to serve as subordinates to Major General Macpherson.

32. Colonel

32. Colonel Longden was in like manner superseded while holding the important appointment of Adjutant General of the Bengal Presidency.

33. His predecessor, Colonel Haythorne, was similarly superseded.

34. The Committee are of opinion that these supersessions should be remedied by the adoption of a system of local rank in the grade of Major General, corresponding with that which formerly prevailed in India, but based upon the dates of commission as Colonel instead of that of Lieutenant Colonel, as proposed in paragraph 42.

35. The circumstances which have occurred to accelerate the promotion of the Officers of Her Majesty's Indian Army, and to subject the Colonels of the British Army to constant supersession, having thus been brought to notice, the Committee now proceed to the consideration of the means of remedying the evil complained of.

36. To interfere with the rule laid down by the Royal Warrant of 15th June 1864, for the succession of the Colonels of the Indian Forces to the rank of Major General, does not seem possible. That rule was forced on Her Majesty's Government by the remonstrances of the Officers, and the proceedings in Parliament in connection therewith. It cancelled Regulations which but a short time before had been carefully considered, and specifically fixed by Warrant. The members of an expiring service were pronounced on all sides to have the strongest claims to indulgent consideration, and the privilege of continuing to rise, as before the amalgamation, on their own list, has been distinctly promised to the comparatively few Indian Officers remaining in the Service. To now cancel this asurance appears to the Committee to be impracticable.

37. Had it been provided (in April 1855, when the rank of the Indian Officers was declared by Lord Hardinge to be good in all parts of Her Majesty's dominions), that the rank of the Indian Colonel promoted to Major General should be local only until his senior as Colonel of the British Service had been likewise promoted, and had the system of local rank to the British Colonels in India been continued, the difficulty now complained of could not have arisen. Any condition tending to this result is now, however, not to be thought of. On the other hand, to augment the British List of General Officers to such an extent as would completely equalize the promotion in the two Services must be held to be impossible, so great would be the expense which such a measure would entail.

38. Eventually there will be between 90 and 100 General Officers added to the British Establishment,* on account of the Indian Staff Corps. Of these, about one-half will be transferred in a batch, as provided by Article 24 of the Warrant of 3rd February 1866; and, if the provisions of Article 23 of the same Warrant were to be strictly enforced, the remainder (say 45) would be added from time to time in the order in which the Indian Staff Corps Colonels would have been promoted had they remained on the Indian Establishment, instead of being placed on the Amalgamated List of Colonels of the British Army.

The latter addition would probably commence about the end of the year 1871, and terminate in 1877.

39. Although, for the reasons stated in the latter part of paragraph 37, *complete* equalization of promotion in the two Services cannot at present be secured, the

---

* There is to be one General Officer for every 28 Officers. There are in the Staff Corps of the three Presidencies (Indian Army List, 1868):—

Officers		2,317
Holding Staff Appointments but not in the Staff Corps:—		
Bengal	267	
Madras	121	
Bombay	98	
		486
Total		2,803

the Committee beg to recommend, as a partial amelioration of the present condition of the Colonels of the British Army (including the Staff Corps Colonels on the Amalgamated List), that 45 additional Major Generals be forthwith created, in anticipation of the promotions (about eight annually) which, under the operation of Article 23 of the Warrant of 3rd February 1866, would become due to the British Establishment in the years from 1871 to 1877, on account of the Indian Staff Corps.

40. The immediate expense of such a measure (as shown in detail in Appendix D.) amounts to about 32 *l.* 4 *s.* 6*d.* a-day, or 11,762 *l.* 2 *s.* 6 *d.* a-year. This, however, would only be a temporary charge on Imperial funds, as, probably, in the year 1871, the first eight of these additional General Officers at 25 *s.* a-day each, amounting in the aggregate to 3,600 *l.* a-year, would become chargeable to Indian revenues, so that, in little more than three years, commencing in 1871, it may be expected that the Imperial funds would be entirely relieved of the proposed additional charge.

41. It may be here mentioned that the diminution of this charge in so short a period as three years arises from the circumstance that while the charge to the Imperial Government for each Colonel promoted, under the recommendation in paragraph 39, amounts to an average of 14 *s.* 5 *d.* a-day only, being the difference between the half-pay of the promoted Colonel, and the established pay of a General Officer, the credit from the Indian Government for each General Officer, as he is brought on the establishment on account of the Staff Corps, will be 25 *s.* a-day.

42. That, simultaneous with these promotions, the dates of the Commissions of all the present Major Generals of the British Army whose Colonelcies bear date on or after the 28th November 1854, should be so altered as to place them in the same relative position with the General Officers of the Indian Army as they held with such Officers in the rank of Colonel.

43. That the Commission of the Major Generals to be promoted under the recommendation in paragraph 39, and of those who may hereafter be promoted, should also be ante-dated, as recommended in paragraph 42.

44. That in no case should the proposed alteration of dates carry back pay or occasion any Brevet promotion in the lower ranks; nor should the creation of 45 additional Major Generals, as recommended in paragraph 39, cause any such promotion.

45. That on the promotion to the rank of Major-General of a Colonel of Her Majesty's Indian Army who may be junior as Colonel to any Colonel of the British Army actually serving in India, the latter should have the local rank of Major General, with corresponding date, so as to enable him to maintain his former seniority.

46. No expense will be occasioned to Imperial funds by the adoption of the local rank of Major General to Officers of the British Army, as recommended in the preceding paragraph.

47. Appendix E shows, in italics, how the Indian Major Generals intersect the British Major Generals, and the extent to which the latter have been superseded by the former.

48. The process of rectification which has special reference to the Cavalry and Infantry of the Line, will equally apply to the Artillery and Engineers, if supersessions have occurred in either Corps; or should any Colonel of Indian Artillery or Engineers, or of Indian Cavalry or Infantry, have been superseded by a British Colonel of any of the corresponding services respectively, such Colonel will also be entitled to rectification of date.

49. The Appendices D and E have been prepared from data obtained from Hart's Annual Army List and the Indian Army List, the dates therein and the estimated cost of the proposed promotions will, therefore, be subject to correction in the promotion branch of the War Office.

50. If, as the Committee have recommended, 45 Colonels on the British List be

be at once promoted and added to the establishment of Major Generals, the following result would be obtained:—

1st. That number of the Senior Colonels will be relieved at once from supersession, including those who have been referred to by name as having held high commands and positions in the Crimea, India, and elsewhere.

2nd. The difference of rank between Colonels of the Indian List and those next or near them on the Amalgamated List, on their becoming Major Generals, will be shortened from 12 to 9 years.

3rd. The promotion will go on with an Establishment increased by 45 Major Generals; and when the Major Generals of the Staff Corps come on the British List, in about three years, as before stated, then promotion will proceed at once on a total increased Establishment of 95 Major Generals.

51. In conclusion, the Committee would desire to call the attention of the Secretary of State for War to a fact, in their opinion, of great importance in the consideration of this question. The Establishment of General Officers of the British Forces is called on to provide for the Officers on the Half-pay List as well as for the Officers on Full-pay, whilst the demands on the Establishment of General Officers fixed for the Indian Officers are confined exclusively to the Colonels of the three Presidencies serving on Full-pay. The Establishment of General Officers in each service having been originally fixed on nearly the same proportion of one General to every 28 *Full-pay* Combatant Officers, no provision has been made for the drain on the British List on account of the Colonels on Half-pay. Hence, in a great degree, the disadvantage at which the Colonels of the British Army are placed; and hence, also, a strong argument in favour of the remedial temporary increase of Establishment the Committee have recommended.

For the India Office.

War Office, 5 January 1869.

Appendix A.

My dear Mr. Grant, Horse Guards, 25th March 1834.

I HAVE had the honour to receive your letter of the 31st January, transmitting, in reference to my official letters of the 31st December 1832, 19th January 1833, and 10th January 1834, two series of propositions, suggested with a view to overcome certain evils alleged to exist on the promotion of the higher ranks of the Company's Army—the one series purporting to emanate from the Chairman and Deputy Chairman, and to be an amendment upon the other.

Having given the whole of the matter contained in these several propositions, and in your observations upon them, my most deliberate attention, and having looked into the voluminous mass of correspondence that has taken place on the subject of the relative advantages and disadvantages of the King's and Company's officers since 1796, I now beg leave to lay before you the following as the result of my best consideration:—

The regulations which govern the promotion of officers in both Services in India have been framed, from time to time, under the joint consideration of the Court of Directors and the Commander-in-Chief for the time being; and although it has not been practicable to prevent the occurrence of some cases of individual hardship, yet every such case has been rectified, as it might best be, when duly brought forward, without any material departure from the general principles under which the promotion in both services has hitherto been governed.

There cannot be any doubt, and in every discussion upon the point it has been fully admitted, that the King's troops employed in India are an auxiliary force; but it is equally true that it is the duty of the officer entrusted with the command of the King's forces to take care that, whatever arrangement may be made for the advancement and advantage of the Company's officers, the fair claims of the officers of the King's Army are equally considered,

sidered, in a just participation of all matters regarding military rank, pay, and allowances, whether in garrison or in the field.

The difficulties which have always occurred, and which now again present themselves, to any arrangement that shall give unqualified satisfaction to the officers of both Services, are to be found in the difference of principle under which the system of promotion is respectively governed in each.

In the Army of the East India Company the promotion takes place by seniority, and consequently in an army of so large a size, few, if any, officers can attain to the rank of Major General until after a very protracted period of service in the subordinate ranks, and when they have reached an age which nearly disqualifies them for active employment; while in the King's Army, under a system of promotion wholly different, that rank has hitherto been attained after a service of less duration, and at a time of life considerably less advanced.

It was in the hopes of removing some part of this inconvenience that the whole system of promotion of both Services underwent a full reconsideration in 1828-9; and it was then agreed that every Lieutenant Colonel of the East India Company's Service, who should at that time be Commandant of a regiment of Cavalry or Infantry, or battalion of Artillery or Engineers, should be allowed the rank of Colonel by brevet in the territorial possessions of the Company, and that every Lieutenant Colonel who should in future be appointed Commandant of a regiment or battalion, be also promoted at the same time to the rank of Colonel in India; and in order to provide for the interests of the officers of the King's Army in India, and to take care that their fair claims should not be passed over on such particular occasions, that the local rank of Colonel by brevet should be granted to any Lieutenant Colonel who should be superseded by a junior officer of the Company's Service, on his nomination to the command of a regiment or battalion serving in the same Presidency.

It was also provided that the officers of the Company's Army should be allowed to participate in the advantages enjoyed by the King's officers for distinguished services in the field, and this is the regulation which now obtains with respect to the points of promotion under consideration.

The very slow rate of promotion under the system of seniority, in the Company's Service, is now felt in a nearly if not an equal ratio in the King's Army, although arising from a different cause—the continuance of peace for a period of 20 years—so that the Lieutenant Colonels date back to the year 1814, and the Majors to the same year; and it must be evident that no change of regulation could be acquiesced in by me which could have the effect either of superseding or of deteriorating the interests of the King's officers under such discouraging circumstances.

The nature of the different Services necessarily occasions a diversity in the rates of promotion of the officers of each Service respectively; and the employment of the King's Army, dispersed as it is over all parts of the world, consisting as it does of individuals of all classes and descriptions, liable as it is to perpetual variation of numbers and establishments, and to the system of promotion by purchase and sale, renders all comparison between the rates of promotion to the rank of Lieutenant Colonel, of the officers of the King's Army, with the rate of promotion to the same rank of the officers of any other Army, quite useless.

The object of every regulation on the subject of promotion, in regard to the officers of the two Armies, ought therefore to be, as it has ever been, to keep each officer in his relative position with his brother officers of both Services from this rank forwards; and it is a principle long admitted in the Military Service, and which should never on any account be departed from, that officers holding commissions of the same denominations, ought to rank according to seniority of date of that commission.

Allowing every commendation to the Army of the East India Company, to the utmost extent to which its most zealous advocates can desire, and to which that Army has upon every occasion proved itself to be justly entitled, it has never been doubted that the safety of the European dominion in India depends essentially upon the gallantry, efficiency, reputation, honour, and spirit of the European officers and troops, and particularly those in His Majesty's Service.

The Company's Army in India being in fact principals, and that of His Majesty being only auxiliaries, the officers of the Company's Army must necessarily possess many important advantages over those of the King; they naturally fill all the efficient appointments of the General Staff of the Army, and, with few exceptions, all the situations of emolument; and however brilliant may be the services of His Majesty's troops, and however necessary and indeed indispensable in every enterprise of importance, any effort to alter this relative position would only tend to establish it the more firmly, it being rooted in the nature of the political Government—in its separation from that of His Majesty, and in the nature of the service, of the language of the country, and of the climate.

But in whatever view this wide and important subject may be regarded, too much care cannot be taken to uphold, by every practicable and just measure, the spirit of the auxiliary Army, and under no possible circumstances can it ever be permitted that an officer who may have distinguished himself at the head of one of His Majesty's regiments at an important moment, should be superseded by one junior to himself in the rank of Lieutenant Colonel, either as Colonel, or subsequently as Major General. Such act of supersession

supersession would be quite at variance with the settlement of 1796, and wholly inconsistent with every arrangement and regulation which have been subsequently established.

As a reference has not unfrequently been made to the system of promotion by seniority of the officers of the King's Artillery and Engineers, with a view of assimilating it to the system of seniority of promotion of the officers in the East India Company's Army, by which a Lieutenant Colonel becomes a Colonel on succeeding to that rank regimentally, it may be useful to obserwe in this place, that no just comparative inference can be drawn from this consideration, for the following reasons:—

These services in the King's Army are confined exclusively to their own arm. It very rarely happens that a sufficient body of Engineers or of Artillery is employed to give occasion for the active employment of an officer of the rank of Colonel. If the body of Artillery or of Engineers is large, the nature of the service of those arms, the horses and the matèriel which must be sent with that body, generally require the employment of a General Officer of those arms, and in all probability the service of such bodies of Artillery and Engineers would be with an Army with which there would be numerous General Officers of all ranks.

The supersession, therefore, by the officers of the Artillery and Engineers of the rank of Lieutenant Colonel of those of the Army of the Line in His Majesty's Service cannot occasion frequent or even inconvenient collision, as would most undoubtedly be the case if the Lieutenant Colonels of the King's Army in India were to be superseded by the Lieutenant Colonels of the Company's regiments of Artillery and Engineers on their respective promotions regimentally to the command of corps.

The only safe and unerring principle on which the system of promotion can be soundly and justly regulated as between the King's and the Company's officers in India, appears to be that which has been already alluded to, that under no possible circumstances can it be permitted that a Lieutenant Colonel in the King's Service should be superseded by one junior to himself in the rank of Lieutenant Colonel, or Colonel, or subsequently as Major General.

It must here be observed, that it was a direct violation of this principle that induced me to call your attention to the supersession of Colonel Thomas, of His Majesty's 20th Regiment, by Colonel Gilbert, of the Company's Service, an officer not only junior to Colonel Thomas in the Army, and superseding him in military rank, but who by such act of supersession was placed in the command of the division in which the regiment of Colonel Thomas was actually serving.

As this principle appears to be the only safe rule upon which, as General Commander in Chief, I can rest my conduct in the arrangement of all Regulations regarding the promotion of King's officers in India, I propose to adopt it as the foundation of the detailed discussions upon each of the propositions which you have forwarded.

There is one point in the propositions in each of the projects which must, however, be first adverted to, as it cannot be passed over without a more particular notice, and this is, that in which it is proposed to give a Colonel of the King's Army a pecuniary consideration on his being withdrawn from active duty, to avoid a collision; or, in other words, to pay him for the endurance of a military degradation. In all that has been said throughout the voluminous discussions which have taken place upon the subject of military promotions in India since 1786, the ruling principle has been to uphold the position of the King's officers, that they might not suffer in any collision of interests with the officers of the Company's Army in their character or military dignity, and thus to maintain them in the enjoyment of their full share of just and reasonable professional emoluments and advantages; but it could never be contemplated that the personal, pecuniary, and private interests of any individual should be sustained at the expense of the general and infinitely more important interests of the King's Military Service; and were this proposition to be adopted, that a Colonel of the King's Army could be withdrawn from active duty in favour of a junior Colonel in the Company's Army, and a sum of money paid to him as a compensation, the transaction could bear no other construction, in a professional sense, than that he had by such act consented to compromise the prospects of military honour and reputation for the immediate enjoyment of pecuniary advantage, and instead of tending to uphold the character of the King's officers, it must have a direct tendency to the contrary, and to deteriorate them individually and collectively in the estimation of their profession and of their country.

The proposition that such Colonel so superseded should be allowed to remain in India, until otherwise provided for, is liable also to very great objections in another point of view, inasmuch as the one act of supersession in his individual case, would be the cause of an act of injustice to the officers to whose prejudice he might hereafter be posted to a vacancy, and thus the usual and expected course of promotion, in so far, be impeded.

My object is exactly the same as that avowed by you: "To secure to the officers of "each Service their fair proportion of commands, and in so doing, to remove, in as far "as may be practicable, a fruitful source of jealousy between the two Services;" but this desirable end would not be attained by laying down any precise rule regulating the exact proportion of General Officers to each of the two Services, as such a rule would very soon be found to clash with the military rank of the claimants at each successive promotion or brevet. This end, therefore, can only be secured through the judicious and impartial conduct of the local and higher authorities, and by a close adherence to the principle laid down in the foregoing part of this letter.

With regard to the first proposition, that the General Officers of the Company's Army shall be increased to 90 from a combined list of the senior Colonels of the several Presidencies, and that their commissions shall be of the same validity, and be issued and signed in the same manner as such commissions now are, it must be observed that this measure would be in practice a partial brevet granted to the East India Company's Colonels at the expense of the Colonels of His Majesty's Army ; or if it should also be intended to include those Colonels of equal rank in the King's Service, conformably to the principle above laid down, the practical effect must inevitably be that as there would be a greater number of claimants for the same number of commands, the inconvenience now complained of by the clashing of the interests of the two Services would be increased in a proportionate ratio.

I must likewise remark that this proportion is brought forward at the moment the most unfavourable for its discussion, inasmuch as the officers of the King's Army appear generally to entertain the apprehension that inattention to the recent recommendation of the Committee of the House of Commons upon Navy and Army Appointments, the system of periodical brevets will no longer be resorted to, and consequently that those who have not yet attained the rank of General Officer have little chance of ever reaching it.

The second proposition depending upon the decision of the first, it is not necessary to enter upon the discussion of it.

The third proposition states, " That the rank of Brigadier General be continued to be " conferred as at present, to enable the Indian Governments to fill the Division Com- " mands, &c. ;" and to this there does not appear to be any objection, provided it be always understood that no supersession of a King's Officer take place, as in the case of Colonel Thomas by Colonel Gilbert, already alluded to, the military principle in all armies being that a Colonel shall not upon the same service be superseded by a junior Colonel.

Upon the fourth proposition there does not appear to be any objection, as far as the King's Officers are concerned, that the rank of Colonel should be given to all Lieutenant Colonels in India, whenever a junior obtains that rank regimentally, but with this understanding, that when the number of Field Officers may be too small in camp or quarters, Colonels not commanding brigades will be placed on the Field Officers' roster, adhering of course to the regulation as it now stands, that all King's Lieutenant Colonels so superseded should receive the brevet of Colonel.

The fifth and sixth propositions, containing the arrangements for the compensation of the Colonels of the King's Service who may happen to be superseded by the effect of any regulation, having been already admitted to, it is unnecessary to say more than that I could not, upon any view of the matter, concur in them.

The seventh proposition, that the number of Brigadier Commands to be held by His Majesty's and the Company's Officers respectively, be in the proportion of one of His Majesty's to four of the Company's, does not appear objectionable, being considered in proportion to the relative strength of the two Armies.

In so far as the King's Officers are concerned, there does not appear to be any objection to the eighth proposition of the Chair :—" That local Colonel's commissions be granted to " all Lieutenant Colonels, whether of the King's or the Company's Service, whose com- " missions as Lieutenant Colonel are of anterior date to the Lieutenant Colonels' com- " missions of officers who have succeeded to regiments under the present system, and that " officers of the rank of Colonel who have obtained regiments, shall have such an anterior " revised date of commission of Colonel, as will place them in the correct relative seniority " which they previously held as Lieutenant Colonels."

The rank of Colonel granted to a King's Aide-de-camp is permanent Army rank, and entitles him to the advantages belonging to that rank, for all military purposes, wherever he may be employed, according to the date of his commission as Colonel, and the number of Colonels of this description forming so very small a proportion as compared with the whole number of Colonels, that it is not probable that any inconvenience can be found from interference on their part in India.

Having now, I believe, touched upon every material point contained in your letter, and enclosures, I will at once conclude with the expression of my regret that I have been under the unavoidable necessity of occupying so much of your valuable time and attention.

I have, &c.

The Right Hon. Charles Grant. (signed) *Hill.*

Appendix B.

Sir, Head Quarters, Simla, 13 August 1865.

I HAVE the honour, with much deference, to solicit the attention of His Royal Highness the Field Marshal Commanding in Chief, to some very important considerations affecting the position of the superior officers of Her Majesty's British forces. Thus, under the operation of the rules of promotion in the several services, the following full Colonels of the British Army now serving in India, viz.:—Colonel T. Williams, C.B.,* 4th Foot; Colonel D. Rainier, 98th Foot; Colonel E. A. Holdich, C.B., 20th Foot; Colonel A. C. Errington, 51st Foot; Colonel S. T. Christie, C.B., 80th Foot; Colonel E. Haythorne, 1st Foot, have been superseded in India by the promotion to the rank of General Officer of Colonels in the local service.†

2. It is seen that all the Colonels on the Local Lists in India of the year 1856 are now promoted to the effective rank of Major General.

3. According to the averages of promotion in the British Army, the Colonels of 1854 will probably not have been absorbed in the rank of Major General till the year 1868.

4. The supersession of the Colonels belonging to Her Majesty's British forces by the Indian local Colonels cannot fail to go on at an accelerated ratio for the following reasons: viz., that the number of Colonels on the British Lists is immeasurably greater than that in the local Indian Lists, in proportion to the number of General Officers respectively borne on the two establishments. Thus the number of Generals of the different degrees is 272, in the British Service; the number of Colonels, by June Army List, is 394; the number of Generals on the Local List, is 208; the number of Colonels, by the last Bengal Army List, is 123.

5. It has always been believed that the inequality to which attention has been invited, was in former times forbidden, under the orders of His late Majesty King William IV.

6. For some years the practice obtained of promoting all officers to the local rank of Major General in India, who were immediately senior to officers of the Indian Service, who had been promoted by the Queen's Brevet.

7. In 1854, a new system of promotion was established, the old General Brevet being abolished. After some correspondence, it was ruled by the late Lord Hardinge, when Commanding in Chief in England, that, as a consequence of the new system of promotion, the practice above alluded to, known under the name of Fane promotion of Major Generals, should no longer be permitted to exist.

8. Appeals against supersession have from time to time been made by Colonels of the British Service serving in India, which have been set aside under the ruling above quoted.

9. The question might therefore be allowed to rest, but for the fact that lately the Right Honourable the Secretary of State for India has, with regard to all other ranks, declared the very principle on the assertion of which the quondam promotion of Fane Major Generals rested; and, secondly, the frequent supersession of British Colonels which is now proceeding.

10. Thus it is now seen (*vide* Secretary of State's Despatch, D/ 17th June 1864) that Lieutenant Colonels, Majors, Captains, and Lieutenants, are promoted in the local Gazettes in India, to put them on a par in India with officers who obtained rank under the Staff Corps Warrant.

11. This having thus been practically asserted. with officers of inferior degree, the inquiry is now made by the old Colonels serving in India, whether the like principle should not also be applied in the case of Line Colonels who have been superseded by Major Generals of the Indian Service.

12. The argument against this is, that the Indian Service is not the only one which presents a separate list of promotion, entailing such effects. Thus it is maintained that the

---

* Appointed Major General with temporary rank, February 1865.

† Colonel T. Williams has been superseded by all Major Generals on the Indian List between Sir W. Coghlan and Major General J. E. Landers, viz., 13, including Major Generals Showers, C.B., McLeod, and Troup, C.B., Commanding Divisions.

Colonel Rainier, 98th, by all below Major General Lang, viz., 17, including the above-mentioned Officers Commanding Divisions.

Colonel Holdich, 20th, by all below Major General Showers, viz., 16, including Major Generals McLeod and Troup, Commanding Divisions.

Colonel Errington, 51st, by all below Major General Welchman, viz., 12.

Colonel Christie, 80th, by all below Major General Welchman, viz., 12.

Colonel E. Haythorne, Adjutant General, by all below Major General Landers, viz., 6.

the Royal Artillery and Royal Marines being on separate Lists, occasional supersession of the Infantry and Cavalry Colonels takes place with regard to those branches of the Service, and *vice versâ*.

13. It is then argued that, if it be not objected to in those cases, there can be no reason for making an attempt to set aside the inequality in the case of the Indian officers.

14. In the first place, it may be observed, in answer to this argument, that it was always understood in the Army at large that it had been distinctly stipulated, when the rank of General was granted to the Indian officers, that the concession should not in any manner prejudice the condition of officers of like standing belonging to the Royal Army.

15. But, secondly, there is a further reason the analogy suggested by the Royal Artillery and Royal Marine Services does not stand the test of examination. The officers of those branches of the Service do not generally come into contact with Cavalry and Infantry officers.

16. Out of India, the ordinary divisional and brigade commands do not fall to them, whether in war or in time of peace.

17. In India, on the other hand, the Indian Major Generals, who are now superseding the Colonels of the British Army in considerable numbers, will most assuredly take command of the latter as Generals of Divisions in the several Indian Presidencies, the very result being thus produced, against which, as we know, it was deemed formerly necessary to guard.

18. With respect, then, to the principle adopted for other ranks, I would venture to intimate, for the general consideration of His Royal Highness, that no good reason can be assigned for making exception with regard to the particular rank of Major General.

19. It has appeared to me, therefore, the subject would seem to me to be one which may be, with propriety, referred for the consideration of His Royal Highness and of the Right Honourable the Secretaries of State for India and War, with a view to the application of the old rule, by which the local rank of Major General is given to officers having the rank of Colonel, who are superseded by the promotion of officers of the local armies of Bengal, Madras, and Bombay.

20. Supposing the old rule to be re-established, as above suggested, it would appear necessary, with regard to the Indian Service, on the other hand, that if that were to occur, which is apparently impossible from the constitution of the lists of the several armies, viz., the case of a Line Colonel being promoted in the ordinary course to the rank of Major General, who might be junior to an Indian Colonel, the latter should be promoted locally in India to the rank of Major General, in order to preserve perfect uniformity and equality between the two Services.

21. It is to be remarked that the rank of Major General being conferred on Indian officers, not only for India, but for all the world, by the late changes, the state of things to which notice has been attracted is even more serious for the officers of the British Army than was originally contemplated when the remedy above alluded to was applied.

22. It may perhaps be assumed that, in practice generally, the two sets of officers would not come into contact, except in India.

23. The experience of the war of 1855–56 does, however, lead us to believe that in any development of the military resources of Great Britain for European war, this contingency would in all probability take place.

24. The argument contained in this letter would be hardly complete were I to omit to draw the attention of His Royal Highness to another general result of the constitution of the lists of Indian Field Officers.

25. Thus, owing to the number of Colonels, Lieutenant Colonels, and Majors being proportionately less to the General Officers as compared with the like ranks in the British Army List, an officer in the former, having been promoted to the rank of Field Officer, runs through the several ranks more rapidly than an officer in the British Service till the rank of General is reached.

26. Officers who became Brevet Majors in 1858 are now Lieutenant Colonels in ordinary succession in the India Lists.

27. According to the last Royal Annual Army List, it is apparent that there are great numbers of Majors of 1855.

I have, &c.
(signed) *W. R. Mansfield*, General,
Commander in Chief in India.

P.S.—I would more especially invite your attention to the very important correspondence which took place on the matter of this letter during the command in chief of the late Lord Hill. The letter which more particularly lays down principles and rules is that from

from his Lordship to the President of the Board of Control, dated 25th March 1834, in which the relative position of the King's Officers and those of the late Honourable East India Company is discussed in the most masterly manner; subsequent to the writing of that letter, took place the correspondence between the late Sir Henry Fane and the Government of India, which resulted in the conferring of the local rank of Major General on such officers of the King's Service as had been superseded by those of the Honourable Company. I gather that copies of that correspondence must be in existence in your office, and I therefore abstain from sending copies, unless you should wish me to do so.

(signed) *W. R. Mansfield.*

The Military Secretary,
Horse Guards, London, S.W.

Appendix C.

List of Colonels of the British Forces serving in *India*, who have been superseded in the Rank of Major General by their Juniors of the Indian Forces.

Name.	Corps.	Date of Rank as Colonel.	How Employed.

ARMY (SUPERSESSION OF COLONELS).

COPY of Report of the War Office Committee upon the Supersession of the Colonels of Her Majesty's Army by those of the late East India Company.

(*Colonel North.*)

Ordered, by The House of Commons, *to be Printed,*
28 *June* 1869.

283.

Under 2 *oz.*

RETURN to an Address of the Honourable The House of Commons, dated 1 June 1869;—*for*,

"COPY of a LETTER written by General Lord *Hill* to the President of the Board of Control, dated the 25th day of March 1834, with reference to the relative Position of the ROYAL OFFICERS and those of the late Honourable EAST INDIA COMPANY."

War Office, 7 June 1869.

EDWARD CARDWELL, Secretary.

My dear Mr. Grant, Horse Guards, 25 March 1834.

I HAVE had the honour to receive your letter of the 31st January, transmitting, in reference to my official letters of the 31st December 1832, 19th January 1833, and 10th January 1834, two series of propositions, suggested with a view to overcome certain evils alleged to exist on the promotion of the higher ranks of the Company's Army; the one series purporting to emanate from the chairman and deputy chairman, and to be an amendment upon the other.

Having given the whole of the matter contained in these several propositions, and in your observations upon them, my most deliberate attention, and having looked into the voluminous mass of correspondence that has taken place on the subject of the relative advantages and disadvantages of the King's and Company's officers since 1796, I now beg leave to lay before you the following as the result of my best consideration.

The regulations which govern the promotion of officers in both Services in India have been framed, from time to time, under the joint consideration of the Court of Directors and the Commander in Chief for the time being; and, although it has not been practicable to prevent the occurrence of some cases of individual hardship, yet every such case has been rectified, as it might best be, when duly brought forward, without any material departure from the general principles under which the promotion in both services has hitherto been governed.

There cannot be any doubt, and in every discussion upon the point it has been fully admitted, that the King's troops employed in India are an auxiliary force; but it is equally true that it is the duty of the officer entrusted with the command of the King's forces to take care that, whatever arrangement may be made for the advancement and advantage of the Company's officers, the fair claims of the officers of the King's Army are equally considered, in a just participation of all matters regarding military rank, pay, and allowances, whether in garrison or in the field.

The difficulties which have always occurred, and which now again present themselves, to any arrangement that shall give unqualified satisfaction to the officers of both Services, are to be found in the difference of principle under which the system of promotion is respectively governed in each.

In the Army of the East India Company the promotion takes place by seniority, and consequently in an army of so large a size, few, if any, officers can attain to the rank of Major General until after a very protracted period of service in the subordinate ranks, and when they have reached an age which nearly disqualifies them for active employment; while in the King's Army, under a system of promotion wholly different, that rank has hitherto been

attained after a service of less duration, and at a time of life considerably less advanced.

It was in the hopes of removing some part of this inconvenience that the whole system of promotion of both Services underwent a full reconsideration in 1828–9; and it was then agreed that every Lieutenant Colonel of the East India Company's Service, who should at that time be commandant of a regiment of Cavalry or Infantry, or battalion of Artillery or Engineers, should be allowed the rank of colonel by brevet in the territorial possessions of the Company, and that every Lieutenant Colonel who should in future be appointed commandant of a regiment or battalion, be also promoted at the same time to the rank of colonel in India; and in order to provide for the interests of the officers of the King's Army in India, and to take care that their fair claims should not be passed over on such particular occasions, that the local rank of Colonel by brevet should be granted to any Lieutenant Colonel who should be superseded by a junior officer of the Company's Service on his nomination to the command of a regiment or battalion serving in the same Presidency.

It was also provided that the officers of the Company's Army should be allowed to participate in the advantages enjoyed by the King's officers for distinguished services in the field, and this is the regulation which now obtains with respect to the points of promotion under consideration.

The very slow rate of promotion under the system of seniority in the Company's Service is now felt in a nearly if not an equal ratio in the King's Army, although arising from a different cause, the continuance of peace for a period of 20 years; so that the Lieutenant Colonels date back to the year 1814, and the Majors to the same year; and it must be evident that no change of regulation could be acquiesced in by me which could have the effect either of superseding or of deteriorating the interests of the King's officers under such discouraging circumstances.

The nature of the different Services necessarily occasions a diversity in the rates of promotion of the officers of each Service respectively; and the employment of the King's Army, dispersed as it is over all parts of the world, consisting as it does of individuals of all classes and descriptions, liable as it is to perpetual variation of numbers and establishments, and to the system of promotion by purchase and sale, renders all comparison between the rates of promotion to the rank of Lieutenant Colonel of the officers of the King's Army with the rate of promotion to the same rank of the officers of any other Army quite useless.

The object of every regulation on the subject of promotion, in regard to the officers of the two Armies, ought therefore to be, as it has ever been, to keep each officer in his relative position with his brother officers of both Services from this rank forwards; and it is a principle long admitted in the Military Service, and which should never on any account be departed from, that officers holding commissions of the same denominations ought to rank according to seniority of date of that commission.

Allowing every commendation to the Army of the East India Company, to the utmost extent to which its most zealous advocates can desire, and to which that Army has upon every occasion proved itself to be justly entitled, it has never been doubted that the safety of the European dominion in India depends essentially upon the gallantry, efficiency, reputation, honour, and spirit of the European officers and troops, and particularly those in His Majesty's service.

The Company's Army in India being in fact principals, and that of His Majesty being only auxiliaries, the officers of the Company's Army must necessarily possess many important advantages over those of the King; they naturally fill all the efficient appointments of the General Staff of the Army, and, with few exceptions, all the situations of emolument; and however brilliant may be the services of His Majesty's troops, and however necessary and indeed indispensable in every enterprise of importance, any effort to alter this relative position would only tend to establish it the more firmly, it being rooted in the nature of the political Government, in its separation from that of His Majesty, and in the nature of the service, of the language of the country, and of the climate.

But in whatever view this wide and important subject may be regarded, too much care cannot be taken to uphold, by every practicable and just measure, the spirit of the auxiliary Army, and under no possible circumstances can it ever

ever be permitted that an officer who may have distinguished himself at the head of one of His Majesty's regiments at an important moment should be superseded by one junior to himself in the rank of Lieutenant Colonel, either as Colonel, or subsequently as Major General. Such act of supercession would be quite at variance with the settlement of 1796, and wholly inconsistent with every arrangement and regulation which have been subsequently established.

As a reference has not unfrequently been made to the system of promotion by seniority of the officers of the King's Artillery and Engineers, with a view of assimilating it to the system of seniority of promotion of the officers in the East India Company's Army, by which a Lieutenant Colonel becomes a Colonel on succeeding to that rank regimentally, it may be useful to observe in this place, that no just comparative inference can be drawn from this consideration, for the following reasons:

These services in the King's Army are confined exclusively to their own arm. It very rarely happens that a sufficient body of Engineers or of Artillery, is employed to give occasion for the active employment of an officer of the rank of Colonel. If the body of Artillery or of Engineers is large, the nature of the service of those arms, the horses and the matèriel which must be sent with that body, generally require the employment of a General Officer of those arms, and in all probability the service of such bodies of Artillery and Engineers would be with an army with which there would be numerous general officers of all ranks.

The supercession, therefore, by the officers of the Artillery and Engineers of the rank of Lieutenant Colonel of those of the Army of the Line in His Majesty's service cannot occasion frequent or even inconvenient collision, as would most undoubtedly be the case if the Lieutenant Colonels of the King's Army in India were to be superseded by the Lieutenant Colonels of the Company's regiments of Artillery and Engineers on their respective promotions regimentally to the command of corps.

The only safe and unerring principle on which the system of promotion can be soundly and justly regulated, as between the King's and the Company's officers in India, appears to be that which has been already alluded to, that under no possible circumstances can it be permitted that a Lieutenant Colonel in the King's Service should be superseded by one junior to himself in the rank of Lieutenant Colonel, or Colonel, or subsequently as Major General.

It must here be observed, that it was a direct violation of this principle that induced me to call your attention to the supersession of Colonel Thomas, of His Majesty's 20th Regiment, by Colonel Gilbert, of the Company's Service, an officer not only junior to Colonel Thomas in the army, and superseding him in military rank, but who, by such act of supersession was placed in the command of the division in which the regiment of Colonel Thomas was actually serving.

As this principle appears to be the only safe rule upon which, as General Commander in Chief, I can rest my conduct in the arrangement of all Regulations regarding the promotion of King's officers in India, I propose to adopt it as the foundation of the detailed discussions upon each of the propositions which you have forwarded.

There is one point in the propositions in each of the projects which must, however, be first adverted to, as it cannot be passed over without a more particular notice, and this is that in which it is proposed to give a Colonel of the King's Army a pecuniary consideration on his being withdrawn from active duty, to avoid a collision, or, in other words, to pay him for the endurance of a military degradation. In all that has been said throughout the voluminous discussions which have taken place upon the subject of military promotions in India since 1786, the ruling principle has been to uphold the position of the King's officers, that they might not suffer in any collision of interests with the officers of the Company's Army in their character or military dignity, and thus to maintain them in the enjoyment of their full share of just and reasonable professional emoluments and advantages; but it could never be contemplated that the personal, pecuniary, and private interests of any individual should be sustained at the expense of the general and infinitely more important interests of the King's Military Service; and were this proposition to be adopted, that a Colonel of the King's Army could be withdrawn from active duty in favour of a junior Colonel in the Company's Army, and a sum of money paid to him as a compensation, the transaction could bear no other construction, in a profes-

sional sense, than that he had by such act consented to compromise the prospects of military honour and reputation for the immediate enjoyment of pecuniary advantage, and, instead of tending to uphold the character of the King's officers, it must have a direct tendency to the contrary, and to deteriorate them individually and collectively in the estimation of their profession and of their country.

The proposition that such Colonel so superseded should be allowed to remain in India until otherwise provided for is liable also to very great objections in another point of view, inasmuch as the one act of supersession in his individual case would be the cause of an act of injustice to the officers to whose prejudice he might hereafter be posted to a vacancy, and thus the usual and expected course of promotion, in so far, be impeded.

My object is exactly the same as that avowed by you, "To secure to the "officers of each Service their fair proportion of commands, and, in so doing, to "remove, in as far as may be practicable, a fruitful source of jealousy between "the two Services"; but this desirable end would not be attained by laying down any precise rule, regulating the exact proportion of General officers to each of the two Services, as such a rule would be very soon be found to clash with the military rank of the claimants at each successive promotion or brevet. This end, therefore, can only be secured through the judicious and impartial conduct of the local and higher authorities, and by a close adherence to the principle laid down in the foregoing part of this letter.

With regard to the first proposition, that the General Officers of the Company's Army shall be increased to 90 from a combined list of the senior Colonels of the several Presidencies, and that their commissions shall be of the same validity, and be issued and signed in the same manner as such commissions now are, it must be observed that this measure would be in practice a partial brevet granted to the East India Company's Colonels at the expense of the Colonels of His Majesty's Army; or, if it should also be intended to include those Colonels of equal rank in the King's Service, conformably to the principle above laid down, the practical effect must inevitably be that, as there would be a greater number of claimants for the same number of commands, the inconvenience now complained of by the clashing of the interests of the two Services would be increased in a proportionate ratio.

I must likewise remark that this proportion is brought forward at the moment the most unfavourable for its discussion, inasmuch as the officers of the King's Army appear generally to entertain the apprehension that in attention to the recent recommendation of the Committee of the House of Commons upon Navy and Army Appointments, the system of periodical brevets will no longer be resorted to, and consequently that those who have not yet attained the rank of General Officer have little chance of ever reaching it.

The second proposition, depending upon the decision of the first, it is not necessary to enter upon the discussion of it.

The third proposition states, "That the rank of Brigadier-General be con-"tinued to be conferred as at present, to enable the Indian Governments to fill "the Division Commands, &c."; and to this there does not appear to be any objection, provided it be always understood that no supersession of a King's Officer take place, as in the case of Colonel Thomas by Colonel Gilbert, already alluded to, the military principle in all armies being that a Colonel shall not upon the same service be superseded by a junior Colonel.

Upon the fourth proposition there does not appear to be any objection, as far as the King's Officers are concerned, that the rank of Colonel should be given to all Lieutenant Colonels in India, whenever a junior obtains that rank regimentally, but with this understanding, that when the number of Field Officers may be too small in camp or quarters, Colonels not commanding brigades will be placed on the Field Officers' roster, adhering, of course, to the regulation as it now stands, that all King's Lieutenant Colonels so superseded should receive the brevet of Colonel.

The fifth and sixth propositions, containing the arrangements for the compensation of the Colonels of the King's Service who may happen to be superseded by the effect of any regulation, having been already admitted to, it is unnecessary to say more than that I could not, upon any view of the matter, concur in them.

The

The seventh proposition, that the number of Brigadier Commands to be held by His Majesty's and the Company's Officers respectively be in the proportion of one of His Majesty's to four of the Company's does not appear objectionable, being considered in proportion to the relative strength of the two Armies.

In so far as the King's Officers are concerned, there does not appear to be any objection to the eighth proposition of the Chair, " That local Colonels' " commissions be granted to all Lieutenant Colonels, whether of the King's or " the Company's Service, whose commissions as Lieutenant Colonel are of " anterior date to the Lieutenant Colonels' commissions of officers who have " succeeded to regiments under the present system, and that officers of the " rank of Colonel who have obtained regiments, shall have such an anterior " revised date of commission of Colonel, as will place them in the correct " relative seniority which they previously held as Lieutenant Colonels."

The rank of Colonel granted to a King's Aid-de-Camp is permanent Army rank, and entitles him to the advantages belonging to that rank, for all military purposes, wherever he may be employed, according to the date of his commission as Colonel, and the number of Colonels of this description forming so very small a proportion as compared with the whole number of Colonels, that it is not probable that any inconvenience can be found from interference on their part in India.

Having now, I believe, touched upon every material point contained in your letter and enclosures, I will at once conclude with the expression of my regret that I have been under the unavoidable necessity of occupying so much of your valuable time and attention.

I have, &c.

The Right Hon. Charles Grant. (signed) *Hill.*

EAST INDIA (OFFICERS).

COPY of a LETTER written by General Lord *Hill* to the President of the Board of Control, dated 25 March 1834, with reference to the relative Position of the ROYAL OFFICERS and those of the late Honourable EAST INDIA COMPANY.

(*Colonel North.*)

Ordered, by The House of Commons, *to be Printed*,
8 *June* 1869.

ROYAL ENGINEERS

REPORT OF THE PROGRESS

OF THE

ORDNANCE SURVEY

AND

TOPOGRAPHICAL DEPÔT,

To the 31st December 1868.

Presented to both Houses of Parliament by Command of Her Majesty.

LONDON:
PRINTED BY GEORGE EDWARD EYRE AND WILLIAM SPOTTISWOODE,
PRINTERS TO THE QUEEN'S MOST EXCELLENT MAJESTY.
FOR HER MAJESTY'S STATIONERY OFFICE.

REPORT.

SECTION I.

1. In the "Exposition Universelle" at Paris last year, specimens of all the maps, plans, and publications produced in the Topographical Departments of France, Switzerland, Belgium, Netherlands, Great Britain, Prussia, German States, Grand Duchy of Hesse, Baden, Bavaria and Wurtemberg, Austria, Russia, Sweden and Norway, Denmark, Spain, Portugal, Italy, Roman States, Greece, Danubian Provinces, Tunis, and Egypt were exhibited; and in the Report of the Military Commission appointed by M. le Maréchal Niel, Minister of War, it is stated at page 265: "Il est à peine nécessaire de "faire ressortir l'importance de l'œuvre poursuivie par l'Ordnance Survey, œuvre sans "précédent, et qui devrait servir de modèle à toutes les nations civilisées."

2. The grant for the survey during the year 1868–9 was increased beyond the grant for 1867–8 by the sum of 30,255*l.*, the amounts having been 118,600*l.* and 88,345*l.* respectively. This increase in the amount of the grant has enabled me to increase the number of persons employed from 1,272 to 1,580; but as it is impossible to increase the draughtsmen simultaneously with the surveyors, who have first to make the field survey, the full number which the increase of the grant will cover has not yet been reached. A considerable portion of this increase has therefore been devoted to the required enlargement of the office at Southampton, and to the purchase of a large stock of copper plates, and a large number of surveying instruments, which will be required when the full complement of employés is made up.

3. General Statement of Progress.

England and Wales.

All the plans of *Middlesex*, with the exception of the sheets of the heart of London, have been published both on the $\frac{1}{2500}$ and 6 inch to a mile scales, and those of the centre of London have been published in outline on the latter scale, as well as on the 60 and 12 inch to a mile scales. The survey of the Metropolis, which, on the scale of 60 inches to a mile, is comprised in 819 sheets, has been a most formidable undertaking, and has greatly retarded the general progress of the survey, if we look only to the extent of the area which has been surveyed. I have altered the numbers on the sheets to give greater facilities for reference, and to meet any possible extension of the plans on the 60-inch scale.

The survey of the county of *Surrey* will be finished by the 31st March next; and the plans of a large portion of the county have already been made and published.

The survey of the county of *Kent* is steadily proceeding; and nearly two-thirds of the county are finished, and a great number of the parish plans published. A special survey of the *Rother Levels* has been undertaken at the request of the Commissioners; this survey will form part of that of the county, but the applicants have undertaken to pay one-third of its cost, in consideration of the survey being made immediately.

Essex.—About one-sixth of this county, adjoining Middlesex and along the course of the Thames, has been surveyed and the plans published. Harwich and the part of Suffolk adjoining, as far as Ipswich, have been surveyed, and also the towns of Chelmsford and Braintree.

Buckingham.—This county has been commenced, and the town of Eton and the country round it surveyed.

Hertford.—Only a small portion of this county, adjoining Middlesex, has been surveyed.

Hampshire.—Nearly two-thirds of this county have been surveyed, and the plans of the principal towns drawn.

The Lords Commissioners of Her Majesty's Treasury have directed that the increase to the annual grant for the survey should be applied, in the first instance, principally to the survey of the mineral districts, for which the Ordnance Plans on the $\frac{1}{2500}$ scale are of the greatest importance, and may be said to have a double value as compared with the value of the plans of the non-mineral districts.

The published plans of the north of England on the large scales extend from the borders of Scotland to the south of Lancashire and Yorkshire. I have, therefore, stationed an officer at Macclesfield with a party of surveyors for the purpose of surveying the coal and other mineral districts of Cheshire and Derbyshire, which are extensions of those of Lancashire and Yorkshire.

Another officer with a party of surveyors is stationed at Chester for the purpose of surveying the counties of Flint and Denbigh, which are also rich in minerals, and from which Government has received several memorials requesting that those counties may be surveyed.

The plans of the town and neighbourhood of Aberdare have been made and published, the inhabitants having undertaken to pay two-thirds of the cost of making these plans, in consideration of their being made at an earlier period than they otherwise would have been.

Scotland.

We shall finish the surveys of the counties of Aberdeen, Banff, and Elgin, and in fact complete the survey of all the cultivated country from Berwick up to Beauly, beyond Inverness, by the 31st March next.

In expectation that the plans of all the parliamentary burghs would be required for a Boundary Bill for Scotland, the plans of the towns of Fortrose, Tain, Thurso, Cromarty, Dingwall, Dornoch, Wick, and Kirkwall have been made; and consequently the plans of every town in Scotland are finished. The plans of Oban have been published on the $\frac{1}{500}$ scale, the inhabitants having engaged to pay part of the cost. From the circumstance that nearly all the cultivated country in Scotland has been surveyed, we shall shortly be able to transfer a large number of surveyors to England, and proceed more rapidly there. Arrangements are now being made for taking up the survey of Caithness and the cultivated districts of the east of Ross-shire and Sutherlandshire as soon as the surveyors leave the Highlands in the autumn. For the survey of Caithness an officer will be stationed at Thurso.

The *survey of the Highlands* is greatly retarded in consequence of the numerous deer forests in them, the proprietors of which object to the surveyors working in them between the 1st July and the 20th October; and from the circumstance that it is not possible to work in the Highlands before April or after November in consequence of the severity of the weather and the snow lying on the mountains so late in the year.

Ireland.

The plans of the county and city of Dublin and of the city of Cork have been revised for the purposes of the valuation, and the plans of the cities of Limerick and Waterford will be revised by the 31st March. The surveys of the northern counties were originally very imperfect, from the circumstance that the necessity of surveying every field for the tenement valuation was not anticipated; but the plans of the counties of Antrim, Armagh, Donegal, Down, Fermanagh, Londonderry, Louth, Monaghan, and Tyrone have now been made complete. The revision of the plans of the remaining counties which were originally made more complete is now in progress; and from the slight changes which have been made in the enclosures since, the revision is very easily made, although it entails the necessity of going over all the ground again. I am, therefore, in hopes that the revision will now proceed at such a rate that the plans of every part of Ireland will be revised once in 15 years, which Sir Richard Griffiths, Bart., the late chief valuator, considers to be sufficiently often.

Isle of Man.

The survey is finished, and the plans of a great part of the island have been zincographed. The cost of this survey will be paid out of the revenue of the island.

4. Map of the United Kingdom on the Scale of One Inch to a Mile.

The map of England and Wales will be finished about the end of the present year. The hill draughtsmen who were employed in England were first transferred to Scotland, where, when added to those previously employed, they soon overtook the work of the surveyors, and the hill sketching is kept close up to the survey. This has enabled me to transfer several of the hill sketchers to Ireland, where they are now making rapid progress, and one-third of that country only remains to be sketched. The one-inch map of the whole of Ireland in outline has been published.

5. *Maps of the Catchment Basins* of England and Wales, and also of Ireland, on the scale of 10 miles to an inch, have been engraved and published.

6. Plans of Boundaries in North America.

Two sets of plans of the boundaries between the British possessions and those of the United States in North America have been directed to be copied by photozincography for the use of the *Foreign Office*.

The *first set* consists of seven plans of the boundary between the 48th and 49th parallels of latitude, and between the meridians of 89° 20′ and 93° 20′ west longitude, from surveys of the boundary from the Lake of the Woods to Lake Superior, made under Article 7 of the Treaty of Ghent of 1814. These have been printed.

The *second set* consists of plans of the land boundary along the 49th parallel, from the Gulf of Georgia to the Rocky Mountains, from surveys made under the 1st Article of the Treaty of Washington of the 15th June 1846. These plans are on the scales of $\frac{1}{63360}$, or one inch to a mile, $\frac{1}{120000}$ with index maps on the scale of $\frac{1}{800000}$, and $\frac{1}{1200000}$ in 21 sheets. These will be printed before the 31st March.

7. Plans of Abyssinia.

One thousand and eight copies of the Abyssinian Route Map, on the scale of 10 miles to an inch, have been printed.

Five of the maps made by Lieutenants T. T. Carter, A. E. Dummler, and T. H. Holdich, of the Royal Engineers, of the country between Annesley Bay and Magdala have been photozincographed, and will be published with the official report on the operations of the army in Abyssinia, now being prepared in the Topographical Depôt. These MS. plans are on the scale of two miles to an inch, and have been photozincographed on the scale of four miles to an inch.

8. Plans of Malta.

The plan of the city and environs of Valetta, which is included in 16 sheets on the $\frac{1}{2500}$ scale, has been printed and reduced to the six-inch scale to serve as an index.

9. Plans of Gibraltar.

The plan of the $\frac{1}{600}$ scale in 32 sheets has been reduced by photography to the $\frac{1}{2500}$ scale and printed. Thirteen of the sheets on the $\frac{1}{600}$ scale have also been printed. These plans have also been reduced to the scale of six inches to a mile, to serve as an index to the plans on the larger scales.

10. Canada.

The plans of the country about *Sorel*, which have been made by Lieutenant Sitwell and a party of non-commissioned officers and sappers of the Royal Engineers from the Ordnance Survey, have been zincographed on the scale of $\frac{1}{2500}$, and photozincographed on the 6-inch and 1-inch to a mile scales: 3,800 impressions have been supplied.

The plans made by the same party of the country about *Lachine* and *Caughnaways* have also been printed on the same scales, and 4,040 impressions supplied.

The reconnoissance map of the country between the *Rivers St. Francis* and *Nicolet*, which was made by officers under the direction of the Quartermaster-General in Canada, has been zincographed, and 180 impressions supplied.

11. Geological Survey.

All the geological lines and notes on the published geological maps are engraved at the Ordnance Survey Office on electrotyped duplicate plates, and from the increased progress of that survey, consequent on the large increase to the number of geologists recently made, the work for producing the number of geological plates required has been proportionally increased.

II.

1. Survey of Jerusalem.

The whole series of plans, photographs, &c. have been published for some time. The demand for the plans is less than might have been anticipated, but the demand for the photographs has been very great, and there has been an actual profit to the Government from their sale of 462*l.* 5*s.* 7*d.*

2. Survey of Sinai.

This survey has been undertaken with the sanction of the Right Honourable Sir John Pakington, late Secretary of State for War, on the same conditions as the Survey of Jerusalem was made, with the sanction of the Right Honourable Lord de Grey and Ripon when holding that office, viz., permission was given to me to send out a party of Royal Engineers to make this survey, provided those at whose desire it has been undertaken find the money to pay for the entire cost of it. The principal mountains in the peninsula of Sinai, viz., Jebel Musa and Jebel Serbal, with a considerable extent of country round them, have been surveyed in great detail. The route sketches and all that it is proposed to do this year will be finished in April.

III.

1. Facsimile of Domesday Book.

The sale of this work proceeds steadily, and there will be a profit to the Government of 627*l.* on this publication. At the Paris Exhibition of last year a silver medal was awarded for the production of the Facsimiles of Domesday Book and of the National Manuscripts of England and Scotland; but through some mistake it was given to the Master of the Rolls instead of to the Director of the Ordnance Survey, by whose process and by whom the facsimiles were made.

2. National Manuscripts.

The fourth and last volume of the Facsimiles of the National Manuscripts of *England* has been published. The second volume of the *Scotch series* is far advanced; but in consequence of the delay in sending the manuscripts from Scotland we are unable to make as much progress as we ought to do, and this volume will not be published for some time yet.

A list of the documents, which would form an interesting *Irish series*, has been made out, but no instructions have yet been given for producing and publishing the facsimiles of them.

3. Tower Records.

The Tower Records which were sent to the Ordnance Survey Office, Southampton, to be arranged and catalogued have been bound in five volumes, which with the index in a separate volume were returned to the Tower on the 1st December 1868.

IV.

1. Comparisons of National Standards of Length.

The progress in this important work has been delayed from various causes. We have not had a sufficiently low range of temperature this season to enable us to proceed with the comparison of the standard metres sent to us by the United States, at such low temperatures as is desirable. The Spanish Government have not yet sent their standard double toise for comparison, probably on account of the great revolution and change of Government which has taken place in Spain. A second Russian double toise has been received for comparison; and a second Austrian standard klafter is to be sent to us.

2. Local Attraction at Cowhythe.

During the last season we have prosecuted the inquiry into this very remarkable phenomenon. The relative extent to which the plumb line and the levels of our astronomical instruments are affected in a country where there is nothing on the surface of the ground to account for it may be judged from the fact that it is nearly double the amount of the deflection on Schehallion mountain, 3,547 feet high, with the instrument placed on the sides of the mountain itself, at one-third of its altitude, the position to produce the greatest effect from the mass of the mountain on the plumb lines.

We have, however, as I think, very decided indications that its cause is in the granitic rocks which extend in a south-west direction from Cowhythe through Banffshire, and which are highly impregnated in some parts with magnetic iron in a metallic state. The range of mountains on the south-east of Banffshire culminates in Ben Muich Dhui, 4,295 feet high, which, after Ben Nevis, 4,406 feet high, is the highest mountain in Scotland.

But the great amount of the attraction at Cowhythe, and along the coast to the east and west of Portsoy, cannot be explained by anything visible on the surface, and obliges us to imagine the existence of some large and very dense mass of matter underneath it.

I hope to resume this very important inquiry during the incoming season; and the geological structure, as well as the mineral character, of the rocks will be carefully investigated by the Director of the Geological Survey of Scotland.

V.

1. Survey of India.

The training of officers and men for the Indian Government causes a very frequent demand upon our resources. During the last year Lieutenant Waterhouse has made himself acquainted with our photographic processes, in order to enable him to introduce them into the Topographical Departments in India. I have also received directions to give Colonel Anderson, of the Bombay Staff, all the aid and information in my power to enable him to understand all the processes and modes of working in use here, and to supply him with one or two trained photozincographed printers for employment in the Topographical Department of the Bombay Government.

Colonel Thuillier, the officer in charge of the Topographical Department of the Bengal Presidency, says in a letter to me of the 22nd December 1867, from Calcutta: "I have "to thank you very much for your kind aid and assistance to Lieutenant Waterhouse, "and indeed to all our Indian surveyors, who all seem to flock to see the wonders and "beauties of your establishment." The art of photozincography has been now very generally and successfully adopted by the Government surveying departments in India.

2. Foreign Officers.

The Prussian Government would seem to be determined to act on the suggestion contained in the Report of the French Military Commission, and to take the Ordnance Survey as a model for the national survey of Prussia. In September last Colonel Zimmerman, of the General Staff of the Prussian Army, Director of the Topographical Department, was sent over by order of His Majesty the King of Prussia to make himself thoroughly acquainted with the organization and methods of conducting our survey; and in order to do so the more effectually he has visited our surveying parties both in the office and in the field. He has been furnished with specimens of all our maps, plans, and publications, and will in the first instance survey a portion of country near Berlin, the plan of which he proposes to bring over to this Office, in order that we may see how far he has accurately adopted our system of working.

VI.

ENGLAND AND WALES.

Area, 58,000 square miles.

1. Survey (vide Index Map, No. 1).

The progress made in the survey of England is as follows:—

	Area Square Miles.	Surveyed Square Miles.
Cumberland, Durham, Lancashire, Northumberland, Westmoreland, Yorkshire	13,260	13,260
Essex	1,657	246
Flint	244	32
Hants	1,672	1,004
Hertford	630	37
Kent	1,624	941
Middlesex	282	282
Surrey	748	579
Isle of Man	225	225
Other counties	—	497
Total		17,103

The area surveyed during the year 1868 was 592 square miles.

2. Publication of the Parish Plans on the $\frac{1}{2500}$ Scale.

The Parish plans have been published of Cumberland, Durham, Northumberland, Westmoreland, Middlesex, and those parts of Cornwall, Devonshire, Dorsetshire, Pembrokeshire, and Staffordshire, which were surveyed for military purposes. The publication is now in progress of Essex, Hampshire, Kent, Surrey, and the Isle of Man. The total area for which plans on the $\frac{1}{2500}$ scale were published during the year was 679 square miles, making a total of 7,176 square miles in England and the Isle of Man published on this scale.

3. Six-inch Map.

The six-inch maps of Lancashire, Yorkshire, Durham, Westmoreland, Northumberland, and Cumberland are published; and the engraving of Middlesex, Kent, Hampshire, and Surrey, and of some small portions of other counties which were surveyed for military purposes, is in progress. The number of square miles published last year was 978, and the total area of England published on this scale amounts now to 13,846 square miles.

4. One-inch Map (vide Index Map, No. 2).

Eight quarter sheets, containing 1,145 square miles, were published during last year There now remain only five quarter sheets in hand, and when the engraving of these is completed, which will be about the end of the present financial year, the whole map of England and Wales will be completed and published.

5. Towns.

Considerable progress has been made in filling in the details on the block plan of London, on the scale of 5 feet to the mile, and several of the completed sheets have been engraved and published. Plans have also been made of several towns in the southern counties.

The state of progress of the survey of towns in England is now as follows, viz.:—

		Sheets.
Engraved in outline and published -	London on 5-feet scale -	819
	London on 12-inch scale	44
	London on 6-inch scale -	15
Engraved and published on 10-feet and 2-feet scales.	Alnwick.	
Engraved and published on scale of 12 inches to a mile.	Plymouth.	

Engraved or zincographed and published on 10-feet or $\frac{1}{500}$ scale.

Aberdare.	Newport.
Appleby.	Pembroke.
Barnard Castle.	Pembroke Dock.
Bishop Auckland.	Penrith.
Blyth.	Plumstead.
Carlisle.	Plymouth.
Chatham.	Portsmouth.
Cockermouth.	South Shields.
Cowes.	North Shields.
Dartford.	Romsey.

	Howden.	Ulverstone.
	Huddersfield.	Wakefield.
	Hull.	Warrington.
	Keighly.	Whitby.
	Knaresborough.	Wigan.
		York.

Surveyed and drawn on $\frac{1}{500}$ scale.	Brixham.	Petersfield.
	Croydon.	Romsey.
	Lymington.	Southampton.
	Maidstone.	Woolwich.

Surveyed and drawn on 5-feet scale.	Eton.	Windsor.

6. Revision and Repair of the One-inch Map.

The one-inch map is kept up to the present state, as regards the railways which are surveyed, as soon as possible after they are opened. Unfortunately many of the copper-plates of this map were nearly worn out by constant printing before the process of electrotype was discovered and applied to the maintenance of perfect plates, and though something has been done from time to time towards the repair of the worst plates, there is still a considerable number of plates from which the more delicately engraved lines, especially of the hills, are nearly obliterated. A considerable number of engravers have been employed upon this work during the last year, and it is intended to push it on as quickly as possible, until all the copperplates of this important map are in such a state as to give presentable impressions to the public.

VII.

SCOTLAND.

Area, 30,000 square miles.

1. Survey (vide Index Map, No. 3).

The following counties have been surveyed, viz. :—Ayr, Bute, Berwick, Clackmannan, Dumbarton, Dumfries, Edinburgh, Fife, Forfar, Haddington, Kincardine, Kinross, Kirkcudbright, Lanark, Linlithgow, Peebles, Nairn, Perth, Renfrew, Roxburgh, Selkirk, Stirling, Wigton, and Isle of Lewis; and the survey is now in progress in Aberdeenshire, Banffshire, Argyllshire, Elginshire, and Inverness-shire, the two first counties with Elginshire being on the eve of completion. The total area now surveyed is 19,499 square miles, of which 1,334 square miles were surveyed during the year.

2. Publication of Parish Plans on $\frac{1}{2500}$ Scale.

The plans of parishes on the $\frac{1}{2500}$ scale have been published for the counties of Ayr, Berwick, Bute, Clackmannan, Dumbarton, Dumfries, Forfar, Kincardine, Lanark, Linlithgow, Peebles, Perth, Renfrew, Roxburgh, Selkirk, and Stirling; and the publication is now in progress for Banffshire, Aberdeenshire, Argyllshire, Elginshire, and Inverness-shire. The area published in the course of last year was 737 square miles, and the total area published on this scale amounts to 8,083 square miles.

3. Six-inch Map.

The six-inch maps have been published of the following counties, viz. :—Ayr, Berwick, Clackmannan, Dumbarton, Dumfries, Edinburgh, Forfar, Fife, Haddington, Kincardine, Kinross, Kirkcudbright, Lanark, Linlithgow, Peebles, Perth, Renfrew, Roxburgh, Selkirk, Wigton, Stirling, and the Isle of Lewis; and the maps of Aberdeenshire, Argyllshire, Banffshire, and Buteshire are in progress of engraving. The area published during last year was 240 square miles, making a total area of 13,177 square miles published on the 6-inch scale.

4. One-inch Map (vide Index Map, No. 4).

One sheet, including 432 square miles, was published during the year.

5. Towns.

The survey of the towns in Scotland is completed. The following list shows the towns which have been surveyed on the scales adopted for the survey of large towns :—

Published on $\frac{1}{500}$ or 10-feet scale.

Airdrie.	Galashiels.	Maybole.
Alexandria and Bonhill.	Girvan.	Montrose.
Alloa.	Glasgow.	Oban.
Annan.	Greenock.	Paisley.
Arbroath.	Hamilton.	Peebles.
Berwick.	Hawick.	Perth.
Brechin.	Irvine.	Port Glasgow.
Campbelton.	Jedburgh.	Rothesay.
Coatbridge.	Kelso.	Rutherglen.
Dumbarton.	Kilmarnock.	Stonehaven.
Dundee.	Kirkintilloch.	Strathavon.
Falkirk.	Kirriemuir.	Stirling.
Forfar.	Lanark.	

Engraved and published on 5-feet scale.

Ayr.	Kirkcudbright.
Cupar.	Linlithgow.
Dalkeith.	Musselburgh.
Dumfries.	Selkirk.
Dunfermline.	St. Andrew's.
Edinburgh.	Stranraer.
Haddington.	Wigton.
Kirkcaldy.	

Surveyed and drawn on $\frac{1}{500}$ scale, but not yet published.	Aberdeen.	Inverness.
	Douglas.	Nairn.
	Elgin.	Peterhead.
	Forres.	

VIII.

IRELAND.

1. Revision of the Northern Counties (vide Index Map, No. 5).

The revision of the northern counties, the plans of which were not made with that amount of detail which was subsequently found to be essentially necessary for the local valuation and assessment, has been brought to a close. There are still some counties the maps of which are imperfect in the same way, though not to the same degree; but the revision of these has been postponed in order to meet the requirements of the valuation, and the revision is now in progress in the counties of Dublin and Kildare, which were originally surveyed in the fullest detail. The plans of the former county are being drawn and published on the $\frac{1}{2500}$ scale, at the request of the Chief Commissioner of Valuation, who represented that it would be necessary for the purposes of the valuation that this county should be mapped on a larger scale than that of the published 6-inch map; and the revision of Kildare is being made for the purpose of inserting on the engraved map all the alterations and additions which have taken place since the original survey was made.

The following are the counties of which revised maps have been made and published:—

Antrim.	Donegal.	Fermanagh.	Monaghan.
Armagh.	Down.	Londonderry.	Tyrone.

And the engraving of the revised map of Louth is nearly completed.

2. Towns.

The engraving of Kingstown and the populous district between it and the city of Dublin is in progress on the 5-feet scale, and the township of Bray, in the county of Wicklow, is being surveyed on the $\frac{1}{2500}$ scale, with supplementary plans on the $\frac{1}{500}$ scale of the town portion for the purposes of the valuation. The plans of the cities of Cork and Limerick on the 5-feet scale are being revised before engraving them.

Drawn and published on the scale of 5 ft. to a mile - - -	Ballymena.
	Belfast.
	Dublin.
	Enniskillen.
	Lurgan.
	Portadown.

Drawn and published on the scale of $\frac{1}{500}$	Ardglass.	Holywood.
	Armagh.	Keady.
	Ballybay.	Kilkeel.
	Ballynahinch.	Killyleagh.
	Banbridge.	Lisburn.
	Bangor.	Markethill.

3. One-inch Map (vide Index Map, No. 6).

Area of Ireland, 32,813 square miles.

The whole of this map is engraved and published in outline, and the engraving of the hills is being proceeded with. The area published with hills is 8,168 square miles, of which 880 square miles were completed during the year.

4. Plans for the Landed Estates Court.

Maps of 154 estates, containing 86,207 acres, were completed; and 102,181 lithographed rental maps, and 390 conveyance maps, were supplied to the Commissioners during the year, the whole cost of the work being charged against the sale of the estates.

IX.

Distribution of the Officers and Men.

Colonel Cameron is the executive officer in charge of the general correspondence, examination of the accounts, and engraving of the maps of Great Britain, at Southampton.

Captain A. R. Clarke has charge of the trigonometrical branch of the work, and of the initial levelling.

Captain Parsons has charge of the examination of the manuscript plans, and of the zincographing of the $\frac{1}{2500}$ plans, and their reduction to the 6-inch and 1-inch scales.

Colonel Bayly has charge of the boundary department of England, and of the survey of London.

Officers in charge of divisions, and the districts upon which they are employed:—

England and Wales.	The Hon. Captain Trench (at London)	Surrey. Essex. Herts.
	Captain Sanford (at Southampton)	Hants.
	Captain Palmer (at Tunbridge)	Kent.
	Captain James (at Guildford)	Surrey.
	Captain Courtney (at Macclesfield)	Chester.
	Captain Stewart (at Chester)	Flint.
Scotland:—	Captain Wilson (at Inverness)	Elginshire. Inverness-shire. Ross-shire.
	Captain Bolland (at Inverness)	Elginshire. Inverness-shire.
	Captain Melville (at Oban)	Argyllshire. Aberdeenshire.
	Lieutenant Jones (at Banff)	Aberdeenshire. Banffshire. Inverness-shire.

Ireland:—Captain Wilkinson has charge of the engraving and publication of the maps, and of the office in the Phœnix Park, together with the Surveys for the Landed Estates Court.

Lieutenant Engledue has charge of the revision surveys.

In England:—The levelling and contouring are carried on under Captain James, who is stationed at Guildford.

In Scotland:—These duties and the hill drawing are in charge of Captain White, who is stationed at Edinburgh.

In Ireland:—The hill drawing is executed under the direction of Captain Wilkinson.

* The large proportion of assistants employed in England is accounted for by the head-quarters of all the Surveys being at the Ordnance Survey Office, Southampton.

The annual charge arising from the pay of civil assistants and labourers as above enumerated is (approximately)—

Civil Assistants - - -	£51,500
Labourers - - - -	18,000

XVI.

OFFICE BUILDINGS.

The survey offices are in good repair, and have been fitted with every convenience for the advantageous prosecution of the work, with the exception of a chimney to the steam boiler of the printing office; and a sum has been inserted in the estimates for 1869–70 for this requirement.

XVII.

TOPOGRAPHICAL AND STATISTICAL DEPARTMENT, WAR OFFICE.

1. GENERAL STATEMENT OF PROGRESS.

The series of plans of barracks and forts in Great Britain and Ireland have been continued. Since the last report was issued, those for the eastern and manufacturing districts have been completed and bound into atlases for the use of the military authorities. Those for the Aldershot, London, Northern, South-western, Shorncliffe, Brighton, Belfast, and Dublin districts have been issued in previous years. The plans of the greater part of the Dover district have also been lithographed and issued. These plans are largely made use of by Commanding Engineers for illustrating reports and estimates, 1,677 having been printed for that purpose during the year.

The work commenced in 1862, showing the strength, composition, and organization of the British Forces, has been kept complete. A new edition will be issued for 1869. This work is sold through Her Majesty's Stationery Office at 1*s.* 6*d.* a copy.

The plates illustrating the dress of the Guards have been completed during the year, and are for sale at 5*s.* a plate.

The officers (Lieutenants Carter, Dummler, and Holdich, of the Royal Engineers) who executed the survey of the country traversed by the British Expedition in Abyssinia have been employed in the Topographical Department, at the request of the Secretary of State for India, laying down the result of their surveys. The work extends from Annesley Bay to Magdala, and is based partly on triangulation, but, owing to the rapidity of the

march of the Expedition, it was not possible to complete the triangulation for the whole extent, and the remainder is laid down by traversing only. The map is on a scale of four miles to an inch, and is in five sheets, which will be for sale at 1*s.* a sheet.

Views of the capture of Magdala and the action at Arogee, from sketches made on the spot by Lieut.-Colonel Baigrie, D.A.Q.M.G., have been lithographed.

Major Holland, Assistant Quartermaster-General Bombay Army, late Military Secretary to Lieut.-General Sir Robert Napier, now Lord Napier of Magdala, and Captain Hozier, who was for some time also attached to Sir Robert Napier's staff, are now employed in drawing up the official report of the Expedition into Abyssinia.

Captain Barrington, R.A., has been almost exclusively employed in assisting in the preparation of that part of the new army warrants which relates to the equipment of the army.

The interchange of the sheets of the Ordnance Survey Great Britain and Ireland, with those of the Government surveys of foreign countries has been continued, and we receive very valuable contributions to our collection of maps in return.

---

2. Return showing Persons employed from the 1st January to 31st December 1868.

Lieut.-Colonel A. C. Cooke, C.B., R.E., Executive Officer.

2nd Captain, J. T. Barrington, R.A., Topographical Staff.

Captain H. M. Hozier, 3rd Dragoon Guards, Topographical Staff.

1 Serjeant, R.E., in charge of accounts, stores, registering minutes, and general correspondence.

1 Corporal, R.E. (from 1st January to 24th October inclusive), making out returns, keeping account of stationery, &c.

1 Sapper, R.E., making out returns, keeping account of stationery, &c., and examining colouring.

1 Sapper, R.E., in charge of Day book, and sale of Topographical Maps, making out agents' accounts, &c.

1 Librarian.

1 Assistant do.

1 Translator and Compiler.

7 Lithographic Writers and Draughtsmen.

1 Lithographic Writer, writing forms, &c., for transfer (discharged on reduction, from 4th April).

1 Lithographic Writer, and employed on miscellaneous duties.

2 Lithographic Printers.

3 Lithographic Form Printers (printing circulars, returns, &c.)

2 Pressmen.

2 Stone Grainers and Cleaners.

1 Office Messenger.

1 Commissionaire.

ARMY PRIZE MONEY.

THE ACCOUNT of ARMY PRIZE MONEY paid over to the COMMISSIONERS of CHELSEA HOSPITAL, from 18th January 1809 to the 31st December 1868; directed to be laid before the Houses of Parliament by the Act 2 Will. 4, c. 53.

Dr.

	£.	s.	d.
To 5 per Cent. deducted from Prize Money granted to the Commissioners for Distribution (pursuant to the Act 2 Will. 4, c. 53), for necessary expenses, &c., as per last Return	2,325	6	11
To Cash arising from Shares of Prize Money awarded to the Army from Grants made by the Crown, including Unclaimed Shares in the hands of Prize Agents and others, transferred by them to the Commissioners for Distribution, &c., pursuant to Statute	1,585,234	–	8
To Cash arising from Dividends or Interest upon Investments occasionally made since the year 1809, in the Public Funds, &c., to be afterwards realized to meet current demands	263,019	18	6
Balance (*see* Memorandum below)	1,845	16	3
£.	1,852,425	2	4

Cr.

	£.	s.	d.	£.	s.	d.
By Cash paid to Claimants				1,103,954	7	1
By Expenses in executing Acts from 18th January 1809 to 31st December 1868				66,088	13	4
By Sums paid to the Royal Hospital to the 1st March 1842, in diminution of the Annual Votes for In and Out Pension	556,752	6	6			
By Sums paid to the Royal Hospital since 1st March 1842	44,485	14	9			
By Sums since the above date transferred to the Exchequer by the Paymaster General, in conformity with the Treasury Minutes	41,144	–	8			
				642,382	1	11
By Sums paid to the Commissioners for Works and Buildings, by virtue of the Acts 11 & 12 Vict. c. 103, and 17 & 18 Vict. c. 61, for appropriation in purchasing the Site of the Royal Military Asylum, and improving such Asylum				40,000	–	–
			£.	1,852,425	2	4

Memorandum.—Although this Account appears to show that the Expenditure exceeded the Receipts, yet the Commissioners held at the close of the year Stock in the Public Funds to the amount of 90,000 *l.* and Cash in the hands of the Paymaster General to the amount of 5,854 *l.* 17 *s.* 10 *d.*, which sums, in addition to the Balance of the Account, have arisen from the profit realized from time to time on the sale of Stock which had been purchased at low prices, principally in the early years of this century, the transactions in such purchases and sales not appearing in this Account. From these sums, and the Interest derivable therefrom, are met all current claims to Prize Money, the expenses of executing Acts, of maintaining the Hospital Grounds, and of other minor useful works for the benefit of the Hospital, under the provisions of the Act 2 Will. 4, c. 53, s. 42, and with the sanction of the Lords of Her Majesty's Treasury.

The shares of Prize Money paid to Soldiers or their representatives during the past year amounted to 110,636 *l.* 7 *s.* 9 *d.*

Royal Hospital, Chelsea,
5 July 1869.

George Hutt,
Secretary to the Commissioners.

ARMY PRIZE MONEY.

ACCOUNT of Army Prize Money paid over to the Commissioners of Chelsea Hospital, from 18 January 1809 to 31 December 1868; directed to be laid before the Houses of Parliament by the Act 2 Will. 4, c. 53.

(Presented pursuant to Act of Parliament.)

Ordered, by The House of Commons, *to be Printed,*
6 *July* 1869.

RIFLED GUNS.

RETURN to an Address of the Honourable The House of Commons, dated 6 April 1869;—*for*,

"RETURNS of the present Number of Serviceable RIFLED GUNS and CARRIAGES; A.— for LAND SERVICE; B.— for SEA SERVICE; given in Detail as to Class, Calibre, Weight, Systems of Rifling and Venting, Systems of Construction and of Manufacture, Material, and including Converted Guns, adopted into Her Majesty's Service:"

"Of the Average Endurance of each Kind, and Highest Number of ROUNDS fired from any one GUN of each Class without serious Injury to the Gun; also the Charges and Kind of Powder, and Weight and Nature of Projectiles used in such Trials; stating also, for Comparison, the usual Service and Battering Charges for each Class of Guns:"

"Of the Ranges of GUNS of each Class, with Service and Battering Charges, up to Highest Elevation in use, and the Penetrative Power respectively of Shot and Shell upon Iron Armour-Plates backed proportionately with 'Warrior' Backing, so far as ascertained:"

"Of the Cost of each Description of GUN as produced; Cost of Sighting and Finishing; Cost of Carriages and Platforms, and other Appliances for Working and Training:"

"Of the Cost of a Single PROJECTILE and GUN CHARGE of each Nature for each Class of Guns, specifying Service and Battering Charges:"

"Of the Number of GUNS required for the FORTIFICATIONS as designed; Extent of FORTIFICATIONS completed; and what Forts are ready to receive their Armaments; the Number of Guns and their Classes at this time placed in those Works; and the Number and Classes of Guns available for Supply within the coming Official Year being not delivered or under order for Manufacture; the Number and Classes of Guns still required to complete such Armaments:"

"Of the Number and Classes of GUNS required for the IRON-CLAD SHIPS, Numbers supplied, in course of Manufacture, and under Order; the same as to Carriages:"

"Of the Number of GUNS (stating the Details of Numbers in each Class) under Manufacture and Ordered, and intended to be Ordered, for the coming Official Year at the Royal Arsenal at *Woolwich*; the Number of Guns the existing Plant is capable of producing per Month; the Cost of Steam-power and Supervision, and Wear and Detriment to Plant (A.) at full work, and (B.) at slack work, as at this present time; the Number of Hands that could be properly employed in the Gun Factories, and the Number of Hands now engaged:"

"Of Time required for the production of a single Weapon of each Class; the same as to Carriages and Platforms, &c.:"

"And, to state the Mode of estimating the Cost of Manufacture of Guns, with the Per-centages now added in comparison with the Mode of making Estimates previously in vogue at the Royal Gun Factories."

War Office,
5 August 1869.

EDWARD CARDWELL.

(*Lord Elcho.*)

Ordered, by The House of Commons, *to be Printed*,
10 *August* 1869.

RETURN of the present Number of Serviceable RIFLED GUNS; (A.) for LAND SERVICE and (B.) for SEA SERVICE; giving in detail the Class, Calibre, Weight, System of Rifling and Venting, Systems of Construction and of Manufacture, Material (including converted Guns adopted into Her Majesty's Service).

Note.—The guns under the Columns A. and B. have been fitted and issued expressly for the Service named, but the whole of the guns in this Return are available for either Land or Sea Service, the fittings being supplied as required. Those under the heading "both Services" require no change in the rights to make them available for either Service, but simply the addition of a guide plate and crutch or pin friction as required, to use them for Sea Service. The guns and vents are prepared to receive these fittings.

RETURN of the present Number of Serviceable CARRIAGES for RIFLED GUNS; (A.) for LAND SERVICE, (B.) for SEA SERVICE; giving, in Detail, the Class, Weight, System of Construction, and Material; also showing the Cost of Carriages and Platforms, and other Appliances for Working and Training, and the Time required for the Production of One of each.

STATEMENT of the Number of HANDS that could be properly employed in the ROYAL GUN FACTORIES; and the Number of Hands now engaged.

NUMBER of hands that could properly be employed - - 2,000
Number of hands now engaged - - - - - - 750

(signed) *F. A. Campbell*, Colonel, R.A.,
14 May 1869. Superintendent Royal Gun Factories.

STATEMENT of the Time required for the Manufacture of a single GUN of each Class, in the ROYAL GUN FACTORIES.

THE time required for the manufacture of wrought-iron muzzle-loading rifled guns is best stated as one week for each inch of calibre; thus, a 7-inch gun requires about seven weeks to manufacture it up to proof.

This reply assumes that the guns are being made in numbers, and the factory is well employed (a single gun could not be manufactured in the time named), and that they are of natures of which we already have patterns.

(signed) *F. A. Campbell*, Colonel, R.A.,
14 May 1869. Superintendent Royal Gun Factories.

STATEMENT of the Mode of estimating the Cost of Manufacture of GUNS, with the per-centages now added; in comparison with the Mode of making Estimates previously in vogue at the ROYAL GUN FACTORIES.

THE difference between the present mode, and that formerly adopted, in preparing the estimate for guns, is that now all indirect labour and material expended for the repair of furnaces, steam hammers, and machines, used solely for the production of guns is charged as a *special* per-centage on the labour and material of the *guns* manufactured, whereas formerly these amounts were included in the *general* per-centage, which was charged upon sights, fittings, &c., of guns, *and every other article* produced in the department.

VOLUNTEER CAPITATION GRANT.

RETURN to an Address of the Honourable The House of Commons, dated 8 April 1869;—*for*,

"COPIES of MEMORIAL to the Secretary of State for War relative to the VOLUNTEER CAPITATION GRANT, presented by Peers and Members of the House of Commons serving in the Volunteer Force:"

"And, of the REPLY of the Secretary of State to the said Memorial."

War Office, 8 April 1869. } EDWARD CARDWELL.

Lord *Elcho* to the Secretary of State for War.

Sir, St. James' Place, 3 March 1869.

I HAVE the honour to submit for your consideration the accompanying Memorial unanimously agreed to at a meeting of "Volunteer" Peers and Members of Parliament that was recently held on the subject of the Capitation Grant.

I have, &c.
(signed) *Elcho.*

MEMORIAL.

WE, the undersigned Peers and Members of Parliament, being members of the Volunteer force, have met to consider its position as regards the Capitation Grant.

We have had before us the Report upon this subject that was laid before Parliament in 1867 (Parliamentary Paper, 184). This Report was drawn up after careful inquiry by a committee of metropolitan volunteer commanding officers, and such Peers and Members of Parliament as happened at the time to be members of volunteer corps, and resident in London.

The views there set forth may therefore be said to fairly represent the opinions of the force in general, and not of any section in particular; and we think the recommendations therein contained, as to increased aid to volunteer corps, deserve the serious attention of Government.

We do not now urge the concession of an increased capitation grant; that is a question of policy to be determined by Government and by Parliament. But, speaking simply as citizens, and not as volunteers, we are strongly of opinion that a volunteer army such as we now possess, forms a valuable and economical element of national defence; and we are further of opinion that those who, without pay, give their time and service to the State, should not be called upon personally to spend money in providing for the necessary expenses of the force.

A difference of opinion, however, is said to exist as to the sufficiency or insufficiency of the present grant to cover necessary expenses, and we therefore respectfully urge such an inquiry as will definitively and satisfactorily determine this disputed point, as thus only can Government and Parliament

 rightly

rightly judge whether the present Capitation Grant ought or ought not to be increased.

In conclusion, we would also express an opinion that the organization of the force might be greatly improved, and its consequent efficiency increased, without reference to any increase of the Parliamentary grant, and without imposing any additional tax upon the time and service of the volunteers.

The Under Secretary of State for War to Lord *Elcho.*

My Lord, War Office, 17 March 1869.

I AM directed by the Secretary of State for War to acknowledge the receipt of your letter of the 3rd instant, enclosing a Memorial on the subject of the Capitation Grant of the Volunteer Force, agreed to at a meeting of Volunteer Peers and Members of Parliament, and I am to request that you will have the goodness to inform the memorialists that the question, whether any increase of the present Grant ought to be asked for from Parliament, shall receive the careful consideration of Her Majesty's Government, in connection with the question, which is now also receiving their serious attention, as to what measures it may be expedient to take for the better organization of the Reserve Forces, as a support, in time of emergency, to the Regular Forces of Her Majesty.

I have, &c.

The Lord Elcho. (signed) *Northbrook.*

RETURN to an Address of the Honourable The House of Commons, dated 12 April 1869;—*for*,

"COPIES of the REPORTS sent to the Secretary of State for War by the Officers Commanding on occasion of the VOLUNTEER REVIEWS held at *Manchester*, *Durham*, *Newcastle-on-Tyne*, *Carlisle*, and *Edinburgh*, in the Year 1868."

War Office, 16 April 1869. EDWARD CARDWELL.

REPORTS sent to the Secretary of State for War by the Officers Commanding on occasion of VOLUNTEER REVIEWS held at *Manchester*, *Durham*, *Newcastle-on-Tyne*, *Carlisle*, and *Edinburgh*, in the Year 1868.

MANCHESTER.

My Lord, Manchester, 14 September 1868.

Review, N. Dist.

I HAVE the honour to report, for the information of his Royal Highness the Field Marshal Commanding in Chief, that, in accordance with the instructions conveyed in your letter of the 29th ultimo, I assumed command on Saturday last, the 12th instant, at Heaton Park, of a combined force of Regular troops and Volunteers.

It consisted of the Inniskilling Dragoons and the 68th Light Infantry from Manchester, the 2—7th Fusiliers from Bury, of Lancashire Artillery, with four field guns, and of battalions of Rifle Volunteers from the counties of Lancaster and Leicester. A party of 37 men, well mounted, Light Horse Volunteers, acted as my escort.

The force numbered altogether 6,171.

Many of the regiments were present at the review at Liverpool in October last, and I am glad to state that they maintain the very creditable appearance which drew forth the expression of his Royal Highness's approval on that occasion.

The ground set apart for the purposes of the review being somewhat circumscribed for so large a force, I endeavoured to meet the difficulty, as far as possible, by my disposition of the troops.

After marching past, the Inniskilling Dragoons, with the 7th Fusiliers and the 68th Light Infantry, and four field guns, under command of Colonel Greer of the 68th, took up a position on a slight eminence at the extremity of the park. The Volunteer infantry, in three brigades, under command respectively of Lieutenant Colonel Cunliffe, the Honourable Algernon Egerton, and Lieutenant Colonel Gamble, and formed in three lines, attacked this position. The advance was covered by a battalion of skirmishers, which drove in the light troops of the enemy; and the first line, having halted and opened fire, then charged, and endeavoured to capture the guns. In this it failed; and, being driven back, passed through the second line, which succeeded in carrying the position.

At this moment the cavalry showed from a hollow, in which it had been concealed, and prepared to charge. On this the attacking infantry let go its hold of the guns, and the three lines retired in direct échelon of battalions from the right. The Dragoons charged them in this formation, when squares

were formed, through the long length of which the Inniskillings passed at a gallop, making a return charge and regaining their old ground.

While this was going on, Colonel Greer, having recovered his guns and limbered up, took ground to his left, and endeavoured to turn the right flank, which rested on a small copse. This movement was met by a change of front to the right of the third line, which besides, on the enemy showing a disposition to get round to the original rear of the attacking force, threw back its right battalion on the left the eighth of a circle. The first and second lines formed in rear of the third, and the force, moving forward in this order, covered by skirmishers, dislodged the enemy from the copse which he had occupied, and drove him from the field.

The movements here ended.

Colonel Greer deserves credit for the readiness and rapidity with which he handled the troops forming the enemy, and I had pleasure in observing the comparative ease with which the volunteer brigadiers and commanding officers performed their work.

As this is the first occasion of the kind on which I have met Colonel Wilkinson, the lately appointed Inspector of Volunteers, I would observe that he appears most efficient.

I have, &c.
(signed) *John Garvock*, Major General,
Commanding Northern District.

The Adjutant General,
&c. &c. &c.
Horse Guards.

DURHAM.

Sir, Durham, 1 September 1868.

I HAVE the honour to report that, in obedience to the order of the Secretary of State for War, I assumed command of the volunteer force assembled yesterday on the race-course near this city.

Review—Durham, 1868.
Corps.
1st Newcastle Artillery.
2nd Durham ditto.
4th Ditto ditto.
1st Ad. Batt. Durham R. V.
2nd Ditto ditto.
3rd Ditto ditto.
4th Ditto ditto.
3rd Durham or Sunderland Batt.
1st Newcastle-on-Tyne Batt. Rifle Volunteers.
15th North Yorkshire Rifle Volunteers.

After marching past, I engaged the force in a sham fight, the guns of Sir H. Williamson's brigade and some garrison artillery acting as the enemy.

Although there was no programme issued, the movements were performed in a most satisfactory manner, with very great steadiness, regularity, and silence. The field battery of the 1st Newcastle-on-Tyne Artillery Volunteers, commanded by Lieut. Colonel Allhusen, does great credit to that branch of the volunteer force, and were ably commanded by that officer.

The conduct of the volunteers at the railway stations, on arrival and departure, was most orderly and correct, not a case of irregularity of any kind throughout the day.

I beg to enclose a copy of the field state, with the names of the officers who acted as brigadiers and on the staff.

I have, &c.
(signed) *Edward Roche*, Colonel,
Assistant Inspector, Reserve Forces.

The Under Secretary of State,
War Office, London, S. W.

NEWCASTLE-ON-TYNE.

My Lord, Newcastle-on-Tyne, 20 July 1868.

I HAVE the honour to report that, in accordance with the orders of his Royal Highness the Field Marshal Commanding in Chief, conveyed to me by your Lordship, I reviewed here, on the 18th instant, a mixed force of regular infantry, yeomanry and artillery, and rifle volunteers.

It

It numbered altogether 4,138, and was composed of eight companies of the 2-22nd Foot, a squadron of Sir Matthew Ridley's regiment of yeomanry cavalry, 18 field guns, and seven battalions of volunteer rifles and foot artillery.

The 22nd Regiment, as usual, was all that could be desired; the yeomanry and the volunteers generally presented a very creditable appearance, and the field batteries were equipped and horsed in a manner to call forth unqualified approbation.

The immediate neighbourhood of Newcastle affords very excellent and extensive ground for manœuvring; but former experience having shown the impracticability of "keeping" it, the race-course was selected on the present occasion. The movements, which were under the immediate direction of Colonel Roche, Assistant Inspector of Reserve Forces, were necessarily therefore of a somewhat circumscribed character, but nevertheless such as to test the efficiency of the volunteers.

The troops having marched past, Lieutenant Colonel Allhusen of the Newcastle Volunteer Artillery, with 12 guns and some companies of infantry, took up a position, and was opposed by the remainder of the force. A cavalry piquet, with videttes, was thrown out to watch his movements, and on this being driven in by Colonel Allhusen, the infantry advanced in two lines to meet him, covered by a battalion in skirmishing order, six guns, under Lieutenant Colonel Potter, keeping up a fire from the right.

The second line then relieved the first line.

Colonel Allhusen then detached some guns and infantry under cover of a wood, and endeavoured to turn the left flank of the force opposed to him. This was met by the second line changing front to its left, and advancing in direct échelon, the artillery conforming, and squares were then formed by both lines.

The movements were then brought to a close.

I have the honour to convey, for his Royal Highness's information, my entire approval of the troops generally on this occasion, and the satisfaction to report that perfect order and regularity prevailed; and that the review was attended by no accident of any description.

I have, &c.

(signed) *John Garvock*, Major General,
Commanding Northern District.

The Adjutant General,
&c. &c. &c.
Horse Guards.

CARLISLE.

Sir, Carlisle, 29 August 1868.

I HAVE the honour to report that, in obedience to War Office letter (Review, Cumberland, 31), 22nd August 1868, I took command of the force named in the margin, assembled at Carlisle yesterday.

Review—Cumberland.

Cumberland and Westmoreland Yeomanry Cav.
Detachment 70th Regiment.
Cumberland Artillery Volunteers.
1st Ad. Batt. Cumberland Rifle Volunteers.
1st Ad. Batt. Dumfries Rifle Volunteers.
1st Ad. Batt. Galloway Rifle Volunteers.
1st Ad. Batt. Westmoreland Rifle Volunteers.

After a sham fight, which lasted for about two hours, I put the force through several divisional and brigade movements.

With the steadiness and absence of noise or confusion on the part of the rank and file, I was greatly pleased, and taking into consideration the few opportunities the officers have of obtaining instruction in brigade drill, I have reason to be satisfied with the manner the brigades and corps were handled.

The conduct of the corps on their arrival and departure by train, and throughout the day, was excellent, not a single complaint of irregularity of any kind.

I beg to enclose a copy of the field state.

I have, &c.

(signed) *Edward Roche*, Colonel,
Assistant Inspector, Reserve Forces.

The Under Secretary of State,
War Office,
Pall Mall, London, S. W.

EDINBURGH.

My Lord, Edinburgh, 7 July 1868.

I HAVE the honour to report, for the information of the Field Marshal Commanding in Chief, that in compliance with the desire of his Royal Highness, communicated in your letter of the 16th ultimo, the regular troops in this garrison were brigaded with the volunteers assembled, to hold a review at Edinburgh on the 4th instant (detail herewith enclosed), and that I assumed command of the whole force.

As the ground in the Queen's Park, the site selected for the review, is somewhat limited for the movements of large bodies of men in lines, I divided the force into two parts, sending the second infantry division, under Colonel Graham, 18th Regiment, with three guns, to operate to the southwards to meet the feint attack of a supposed enemy in that direction; while the cavalry, the remainder of the battery, and the first division of infantry, under Colonel Roche, Assistant Inspector of Reserve Forces, were moved to the eastward to resist the supposed real attack.

Major General the Honourable James Lindsay superintended the movements of the second division, whilst I remained with the first division.

The volunteers assembled in a very regular order at 1 p.m., and the appearance of the men was most creditable in every respect.

The divisions were formed and began to move at 2 p.m. The skirmishing deployments and advances in line were admirably executed, and the movements in general were performed with a steadiness far surpassing my expectations.

As it was considered indispensable that the volunteers who had to travel some distance by rail, should leave Edinburgh at an early hour, the movements were brought to a termination at 4 p.m., when the whole force was collected for the purpose of marching past, and I cannot speak in too high terms of the steady and soldier-like bearing and marching of the volunteers upon this occasion, the only fault being that in some of the corps the length of pace was somewhat shortened, resulting from a want of confidence.

The advance of the columns in contiguous order, preparatory to the general salute at the close of the proceedings was exceedingly good, and I had every reason to be perfectly satisfied with the performances of the day, as well as with the officers commanding the several brigades and battalions, who were most attentive, active, and zealous in the discharge of their duties; great credit is due to those officers who have devoted much time and great attention to the training of their corps; and likewise to the volunteers who have attended to avail themselves of the instruction thus proffered and afforded.

In conclusion, I beg to tender my best thanks to Major General the Honourable James Lindsay, for the hearty co-operation and support which he rendered me on this occasion, and also to Colonel the Honourable F. Colborne, Assistant Adjutant General, Colonel Graham, 18th Regiment, Colonel Roche, Colonel Bulwer, C.B., and Lieutenant Colonel Boldero, Assistant Inspectors of Reserve, all of whom were most indefatigable in their exertions, and of the greatest assistance during the day.

I have, &c.

WIMBLEDON REVIEW.

RETURN to an Address of the Honourable The House of Commons, dated 10 August 1869;—*for*,

"COPY of the REPORT of His Royal Highness the Field Marshal Commanding in Chief on the REVIEW of REGULAR TROOPS and VOLUNTEERS at *Wimbledon*, on the 17th day of July 1869."

War Office, August 1869. } NORTHBROOK.

His Royal Highness the Field Marshal Commanding in Chief to the Secretary of State for War.

Sir, Horse Guards, 22 July 1869.

HAVING taken personal command of the combined force of Regulars and Volunteers assembled at Wimbledon on Saturday the 17th instant, I deem it right to report to you the result of the day's proceedings.

A flying column from the Aldershot force, composed as below, had been brought to Wimbledon to take part in the day's evolutions, to which was added the Cavalry Regiment, 17th Lancers, stationed at Hounslow. This force was under the command of Major General Sir Alfred Horsford.

CORPS.	Officers.	Men.	Horses.	Guns.	Waggons.	Carts.	Forge Carts.	Pack Saddles.	Ambulance.
10th Hussars	2	404	333	–	–	–	–	–	–
C. Brigade, R.H.A., E Battery	8	142	145	6	11	–	–	–	–
11th Brigade, R.A., D Battery	5	133	100	6	11	–	–	–	–
Detach. R.E. Train, B Troop	2	100	73	–	8	8	–	–	–
Royal Engineers, 6th Company	7	167	74	–	15	–	–	–	–
Military Train	7	177	198	–	50	–	1	4	4
2nd Battalion 3rd Regiment	26	454	7	–	–	–	–	–	–
2nd Battalion 23rd Regiment	24	452	5	–	–	–	–	–	–
34th Regiment	24	441	5	–	–	–	–	–	–
2nd Battalion Rifle Brigade	29	452	5	–	–	–	–	–	–
TOTAL	134	2,922	945	12	95	8	1	4	4

The Volunteers consisted of about 8,000 men of all arms, and the force on the ground thus constituted was formed into three Divisions, under Major Generals Hamilton, Russell, and Sir Alfred Horsford.

The Divisions of Major Generals Hamilton and Sir Alfred Horsford were told off as the defending force; the attacking one was under Major General Russell.

The combination of Regular Troops with Volunteers was, I think, a great advantage in the proceedings of the day, and added much to the general effect of the scene, whilst it enabled me to commence the evolutions at a stated period

 not

not too late in the day, an advantage which cannot be over-estimated, when operations on a larger scale are to be conducted.

Considering the very limited space at my command for purposes of manœuvre, I was, on the whole, well satisfied with the proceedings of the day.

The several regiments of Volunteers appeared on the ground at the hours intimated, and the efficiency of most corps was very creditable to those concerned. I regretted, however, to observe a great falling off in the numbers of the men of the several battalions. This I consider a great drawback, and one which I should wish to see amended. I can easily understand that it is difficult for the men who have regular and paid avocations to be able to absent themselves from their civil duties on too many occasions during the year, but I think that this inconvenience should be met by corps only appearing at a certain number of the larger gatherings, care being taken that, when they do turn out, a large proportion of the entire corps, both in officers and men, should invariably be in the ranks, and that the attendance of the corps should in some measure depend upon the numbers of it which can be brought into the field. This is the only way in which the corps can do justice to themselves, and in which these extended drills can prove of real utility in the way of instruction to the Volunteer force generally.

A combination in one battalion of a variety of regiments unaccustomed to drill together, must tell very injuriously on the general appearance, as well as efficiency of a battalion thus composed.

I think it would also be most desirable, as much as possible, to brigade together those corps which have been in the habit of drilling together, or should this system not as yet have been adopted, I think an effort should be made to arrive at such an arrangement.

The value of some officers of the army on each brigade staff cannot be overrated; and I was sorry to observe that many brigade staffs were exclusively composed of Volunteer officers who, with every desire to make themselves useful, could not possess the experience so necessary for carrying out extended evolutions.

The individual drill of the corps seemed to me satisfactory and improving; and though some corps showed a much greater amount of drill than others, still all exerted themselves to do credit to the forces to which they belonged.

Hoping that these observations may lead to the efficiency of the Volunteer Force for future gatherings,

I am, &c.
(signed) *George.*

The Right Honourable
the Secretary of State for War.

The Secretary of State for War to His Royal Highness the Field Marshal Commanding in Chief.

Sir, War Office, 6 August 1869.

I HAVE the honour to acknowledge the receipt of your letter of the 22nd ultimo, and to express my gratification at the favourable report made by your Royal Highness of the Review of Regular and Volunteer Forces, which took place at Wimbledon on Saturday the 17th ultimo.

I have at the same time to thank your Royal Highness for drawing my attention to the several points alluded to in the latter part of your letter.

I have, &c.
(signed) *Edward Cardwell.*

To His Royal Highness
the Field Marshal Commanding in Chief,
&c. &c. &c.

346	13 February 1861 - - - (G. 32—498; 57—Woolwich 3156.)	Repairing two 40-pounder and one 20-pounder, W. I. breech-loading guns, R., as follows: cutting off and boring out old tube of 40-pounder, No. 259, of Elswick manufacture; coiling, welding, facing, and uniting coils to form the 1 A tube; rough and finish boring and turning the tube, and shrinking it into the gun; turning muzzle, boring, broaching, rifling, lapping, screwing for copper, coppering and finishing inside after proof. Filing flaws of 40-pounder gun, No. 570; filing flaws and removing dents and bruises of 20-pounder, No. 111. Altering 11 7-inch vent pieces, and making them in conformity with sealed pattern. Forging, turning, and bending 26 shackles, and fitting the same to 13 7-inch vent-pieces. Repairing two 40-pounder and eight 20-pounder vent-pieces, and fitting them with new copper rings.	42 18 –	38 2 2¼	18 18 4	99 18 6¼	111 18 6¼
343	13 February 1861 - - - (G. 39—419; 57—Woolwich 3156.)	Repairing two 7-inch 82 cwt. breech-loading guns, R., and 13 vent-pieces, as follows: boring out old tube and breaking out shell of 7-inch breech-loading gun, No. 324; coiling, welding, facing, and uniting together five coils to form a 1 A tube; taper boring the gun, rough and finish boring and turning the tube, and shrinking it into the gun; boring, broaching, rifling, and chambering, fitting in single bush, and finishing inside after proof. Filing up flaws in the bore of 7-inch 82 cwt. breech-loading gun, R., No. 403. Altering five 7-inch vent-pieces, and making them in conformity with sealed patterns. Forging, turning, and bending 16 shackles, and fitting them to eight 7-inch vent-pieces.	34 12 11	45 11 9½	16 11 2	96 15 10½	108 8 2½
361	13 February 1861 - - - (G. 45—227.)	Filing bruises on the trunnions of three 9-inch guns, Nos. 108, 115, and 121, these guns having been dropped in transit, through the chain breaking.	– 9 4	- -	– 4 10	– 14 2	– 15 10
420	14 March 1867 - - - (G. 39—541; 73—3—7986.)	Manufacturing two sets of sighting instruments for 7-inch and 9-inch W. I. muzzle-loading guns, R., for duplicate patterns.	9 14 8	4 2 4¼	4 19 9	18 16 9¼	21 1 11¼
416	4 March 1867 - - - - (G. 45—43; 73—3—7969.)	Converting 22 12-pounder breech-loading guns from sea service to land service, as follows; screwing for elevating eyes, stamping sights, coppering, and browning.	7 19 6	1 17 6	4 2 –	13 19 –	15 12 6
297	4 May 1867 - - - - (G. 48—4; 73—3—8018.)	Manufacturing 42 brass tangent slides, of various natures, for duplicate patterns.	6 17 4½	1 17 9½	3 10 6	12 5 8	13 15 2
295	20 February 1867 - - - (G. 45—87; 85—G. N.—1005.)	Manufacturing sockets for sights, as follows: moulding, casting, turning, and fitting two sockets with screws for hind centre sights, and three tangent scales, for sealing, as patterns.	2 19 4	– 17 4¼	1 10 6	5 7 2¼	6 – -¼

404	13 February 1861 - - - (G. 45—22; 57—Woolwich—3156.)	Repairing 150-pounder W. I. gun, of Elswick manufacture, as follows: making pattern, moulding, casting, and fitting two elevating patches; adjusting sights, turning and screwing copper vent; re-venting gun and adjusting sights; turning and fitting two steel pivots and eight fixing screws.	7	16	6	2	11	1½	4	–	3	14	7	10½	16	2	5½						
282	13 February 1861 - - - (G. 32—345; 57—Woolwich—3156.)	Manufacturing three iron breech rings, and fitting them to 7-inch 82 cwt. breech-loading guns, No. 238, Royal Gun Factory, and 130 Elswick Ordnance Company. Cutting off and boring out old tube and breaking out the shell of 20-pounder eight cwt. breech-loading gun, No. 492; coiling, welding, facing, and uniting coils to form the tube, and shrinking it into the gun; finish boring gun, chambering, lapping, rifling, screwing for copper, manufacturing copper ring, coppering, and finishing inside, after proof.	9	4	9	2	–	3¾	3	18	5	15	3	5¾	16	19	10¾						
336	13 July 1864 - - - - (73—3—5454.)	Altering and repairing 33 7-inch breech screws, including rough turning and parting to receive new steel ends; parting, turning, boring, screwing, and tempering the ends; re-boring, re-plugging, fitting, and finishing them complete; also drilling out old plugs, and removing steel ends; plugging up the old holes, and refitting the tempered ends; facing and polishing the breech screws.	119	7	3	308	2	1½	61	4	8	488	14	–½	548	8	2½						
342	13 February 1861 - - - (G. 45—191.)	Altering 28 stamps, from 1867 to 1868, as follows: four metal and 24 iron.	2	16	–	-		-	1	8	8	4	4	8	4	14	10						
372	20 February 1867 - - - (G. 48—175; 85—G. N.—1005.)	Preparing drawings of 32-pounder 25 cwt. gun, 13-inch 100 cwt., S. S. mortar, 10-inch 52 cwt. S. S., and 13-inch L. S. 36 cwt.	6	5	–	-		-	3	4	1	9	9	1	10	11	10						
382	13 February 1861 - - - (G. 48—196.)	Manufacturing six copper rings for 9-pounder vent-pieces, and repairing six 9-pounder vent-pieces.	1	16	6	–	6	3½	–	18	8	3	1	5½	3	8	9½						
385	28 January 1868 - - - (G. 48—195; 61—Portsmouth Factory.)	Preparing drawings of scales, wood, for 6-pounder bronze guns - -	–	12	6	–	1	–	–	6	5	–	19	11	1	2	4						
396	20 February 1867 - - - (G. 48—218; 85—G. N.—1005.)	Planing and filing section of a Chinese bronze gun, with wrought-iron lining, for Rotunda Museum.	1	10	–	-		-	–	15	4	2	5	4	2	10	9						
398	20 February 1867 - - - (G. 45—263; 85—G. N.—1005.)	Preparing drawings of turret sights, for sealing, to guide manufacture -	2	2	8½	–	2	6	1	1	11	3	7	1½	3	15	2½						
273	13 February 1861 - - - (G. 39—249; 57—Woolwich 3156.)	Repairing two 40-pounder W. I. breech-loading guns, and fittings, as follows: boring out old tubes, and breaking out shells of 40-pounder 32 cwt. breech-loading guns, R., Nos. 119 and 175; coiling, welding, facing, and uniting together 10 coils to form 1 A tubes; rough and finish turning and boring the tubes, and shrinking them into the guns; boring, broaching, lapping, chambering, turning muzzles, rifling and finishing inside after proof. Filing flaws of the bore of 7-inch 82 cwt. W. I. breech-loading, R., No. 241, of Elswick manufacture. Bevelling breech, thread, and enlarging water-holes of two 6-pounder W. I. guns, R., Nos. 40 and 76, and adjusting breech screws. Manufacturing six 40-pounder and two 6-pounder breech copper rings, and two 40-pounder vent copper rings. Repairing four 7-inch vent-pieces, 11 40-pounders, and three 12-pounders.	55	18	8	50	2	–¼	25	1	2	131	1	10¼	146	16	10¼

281	19 July 1864 - - - - (G. 45—375; 73—3—5512.)	Altering 40-pounder 32-cwt. wrought-iron breech-loading guns, R., as follows: Enlarging vent slots of 19; enlarging powder chambers of 3; screwing breach thread into water holes of 6; shaping tops of 9; turning and fitting studs to vent holes of 21 guns.	41 6 7	– 8 7	21 4 –	62 19 2	70 10 5
311	16 June 1866 - - - - (G. 39—310; D. 2056—9.)	Manufacturing duplicate patterns; viz., two preserving screws, I pattern; two spring spikes for 7-inch muzzle-loading guns, R.; two cross-heads for 7-inch vent-pieces; two wood side scales for 7-inch muzzle-loading guns, and four tin cup extractors for 7-inch breech-loading sea service guns. Two sets of breech tangent sight scales for rifled ordnance. Preparing drawings of two sets of sights for turret ships, two sets for smooth-bore guns, and two sets for various natures of rifled ordnance.	53 9 –¾	14 9 –¼	22 13 10	90 11 11	101 9 7
326	13 February 1861 - - - (G. 39—358; 57—Woolwich —3156.)	Repairing guns, vent-pieces, sights, &c., as follows:—Cutting off and boring out old tubes of 40-pounder 35-cwt. breech-loading guns, R., Nos. 11, of Royal Gun Factory make, and Nos. 524 of Elswick make; coiling, welding, facing, and recessing 10 coils, and uniting them together to form 1 A tubes; rough and finish boring and turning the tubes, and shrinking them into the guns; finish boring, lapping, rifling, chambering, turning muzzle, screwing for copper, coppering, and finishing inside of guns after proof. Adjusting sights of six 12-pounder guns, Nos. 5, 11, 45, 61, 65, and 68. Repairing 29 40-pounder vent-pieces, and 17 12-pounders. Making 20 40-pounder breech copper rings, and six 12-pounders; also four 40-pounder vent copper rings, and nine 12-pounders, and finishing the whole complete.	53 4 8¾	81 15 1½	22 15 1	157 14 11¼	176 14 –¼
338	13 February 1861 - - - (G. 45—184; 57—Woolwich —3156.)	Repairing one 12-pounder vent-piece, as follows:—Forging, turning, shaping, and fitting cross head and shackles, facing and polishing the vent piece, and fitting on copper ring.	– 14 1	– 2 6	– 7 2	1 3 9	1 6 7
352	13 February 1861 - - - (G. 39—428; 57—Woolwich —3156.)	Repairing two 40-pounder 32-cwt. breech-loading guns, R., Nos. 34 and 83, with 1 A tubes, as follows:—Boring out old tubes, and breaking out shells; coiling, welding, facing, and uniting coils; rough and finish boring, and turning the tubes, and shrinking them into the guns; turning muzzles, finish boring guns, broaching, chambering, rifling, screwing for copper, coppering, and finishing inside after proof. Repairing one 7-inch vent-piece, and one 40-pounder, and making them in conformity with sealed patterns.	34 5 –	69 19 –	14 17 9	119 1 9	133 7 10

365	13 February 1861 - - - (G. 48—155; 57—Woolwich—3156.)	Repairing, facing, and polishing 187 vent-pieces, for breech-loading guns; viz., 99 7-inch, 60 40-pounders, 20 20-pounders, and eight 12-pounders. Manufacturing 40 40-pounder copper rings for vent-pieces, 20 20-pounders, and six 12-pounders, and fitting them to the vent-pieces.	103 17 4½	13 16 6½	53 5 7	170 19 6	191 14 5	
391	13 February 1861 - - - (G. 48—204; 57—Woolwich—3156.)	Stamping 263 trunnion and centre fore sights with the words "Trunnion" and "Centre fore."	1 7 4¾	- -	- 14 1	2 1 5¾	2 6 5¾	
289	13 February 1861 - - - (G. 39—255.)	Repairing 7-inch 82-cwt. breech-loading gun, No. 9, of Royal Gun Factory make, with a 1 A tube, as follows: Coiling, welding, facing, and uniting together five coils to form a 1 A tube; boring out old tube, and breaking out shell, taper boring gun, rough and finish boring, and turning the tube and shrinking it into the gun. Boring, broaching, chambering, and rifling the gun, fitting in single bush, and completing ready for proof.	17 15 10	40 6 3¼	8 6 10	66 8 11¼	74 8 9¼	
292	20 February 1867 - - - (G. 39—571; 85—G. N.—1005.)	Manufacturing various articles for sealing as patterns; viz.: One vent punch, one centre fore, one hind, one tangent, and one trunnion sight for 13-inch 23-ton muzzle-loading gun, R.; also forging and making complete one derrick and shot bearer for the same.	34 15 4¾	12 11 -¼	17 16 9	65 3 2	72 19 9	
283	15 April 1867 - - - - (G. 45—79; S. No. 5—4313.)	Altering two 13-inch 23-ton wrought-iron muzzle-loading guns, R. (of Elswick manufacture), as follows: Re-boring, broaching, lapping after boring, and rifling the guns; rounding muzzles, engraving, shaping tops, filing rifle grooves, drilling sight holes, altering trunnions, fitting patches, cutting grooves, sighting, and painting. Preparing the necessary drawings for the above service.	78 8 7	7 11 7½	40 4 8	126 4 10½	141 8 2½	
369	14 November 1867 - - - (G. 48—141; 73—3—8282.)	Repairing and plugging six iron and six steel 7-inch vent pieces - -	3 12 -	- -	1 16 10	5 8 10	6 1 11	
378	20 February 1867 - - - (G. 48—183; 85—G. N.—1005.)	Preparing drawings of turret sights for sealing, to guide manufacture -	1 2 11	- 2 6	- 11 9	1 17 2	2 1 8	
375	21 January 1868 - - - (G. 45—254; 57—2—17,043.)	Preparation of drawings of 12-inch 23-ton and 11-inch 23-ton guns -	1 18 4	- 4 -	- 19 7	3 1 11	3 9 4	
368	11 December 1867 - - - (G. 48—164; 57—2—16,853.)	Preparing three tracings of the following muzzle-loading guns:—10-inch 18-ton (made for H. M. S. "Hercules"), 7-inch 6½-ton, and 9-inch 12-ton, F. construction.	- 17 4	- 2 -	- 8 10	1 8 2	1 11 7	
400	5 March 1868 - - - - (G. 45—267; 57—2—17,474.)	Engraving scale of yards on eight breech tangent sights and four hind sights.	2 - 4	- -	1 - 8	3 1 -	3 8 4

392	13 February 1861 - - - (G. 32—211; 57—Woolwich—3156.)	Completing the repair of 20-pounder breech-loading gun, R., No. 69, including boring and turning second 1 A tube (the first having been defective), shrinking it into the gun, turning muzzle, boring, broaching, chambering, screwing for copper, coppering, and finishing inside after proof.	7 11 1¼	- -	3 17 6	11 8 7¼	12 16 1¼
384	13 February 1861 - - - (G. 39—117; 57—Woolwich—3156.)	Completing the repair of 20-pounder gun, No. 2, as follows: boring, broaching, turning muzzle, chambering, rifling, and finishing inside after proof.	4 7 1	– 9 2	2 4 8	7 – 11	7 17 10
386	23 September 1865 - - - (G. 32—200 to 204; 57—Woolwich—3156.)	Completing the repair of two 7-inch 82-cwt. breech-loading guns, Nos. 83 and 530, as follows: rough and finish turning and fitting in tubes, cutting off ends, finish boring, rounding muzzle, broaching, chambering, and rifling.	17 16 1	– 17 2½	9 2 8	27 15 11½	31 2 9½

347	13 February 1861 - - - (G. 48—108; 57—Woolwich—3156).	Manufacturing three vent copper rings, facing and polishing 4, 12 and 9-pounder vent-pieces, forging, turning, fitting, and finishing two crossheads and shackles, and fitting them to the vent-pieces.	2	7	4¼	-	-	1	4	4	3 11 8¼	4 - 4¼
413	22 December 1865 - - - (G. 45—270; 80—Woolwich—906.)	Unloading, examining, and taking impressions of two 9-inch muzzle-loading, Whitworth, steel-tempered rifled guns, of 15 tons; also preparing plates and bolts for vent arrangements.	6	9	-¾	19	3 5¼	3	6	2	28 18 8	32 8 1
293	13 February 1861 - - - (G. 27—320; 57—Woolwich—3156.)	Repairing 7-inch 82-cwt. and 40-pounder 35-cwt. breech-loading guns, R., as follows: boring out old tubes and breaking out the shells of 7-inch 82-cwt. breech-loading guns, Nos. 12 and 316, and 40-pounder 35-cwt., No. 172; coiling, welding, facing, and uniting the coils to form the tubes, rough and finish turning, boring, and shrinking them into the guns; boring, lapping, chambering, rifling, fitting in breech rings, and finishing inside after proof.	47	17	-½	166	3 1¾	22	-	9	236 - 11¼	264 8 1 ¼
323	13 February 1861 - - - (G. 45—149; 57—Woolwich—3156.)	Repairing one 7-inch vent-piece - - - - - - - - -	-	18	-	-	-	-	9	3	1 7 3	1 10 6
327	23 August 1867 - - - (G. 48—85; 73—3—8182.)	Lengthening the trunnions of 218 wrought-iron muzzle-loading guns, to make them in conformity with the established pattern.	644	4	5¼	115	3 6½	330	9	9	1,089 17 8¾	1,221 14 10¾
407	10 August 1864 - - - (G. 45—25; 85—9—620.)	Manufacturing sights, various, for wrought-iron guns, for sealing as patterns, one each of 9-inch, 8-inch, 7-inch, and 64-pounder guns, and four centre hind sights.	11	10	9⅓	-	11 -½	5	2	6	17 4 4	19 5 9
274	20 February 1867 - - - (G. 39—547; 85—G. N.—1005.)	Preparing drawings and specifications of various natures of wrought-iron muzzle-loading guns, for sealing as patterns.	5	7	-½	-	15 -	2	14	11	8 16 11½	9 18 2½
299	13 February 1861 - - - (G. 32—366; 57—Woolwich 3156.)	Repairing 6-pounder guns and fittings, &c., as follows: bevelling breech thread and enlarging vent-holes of 6-pounder breech-loading guns, Nos. 23 and 28, adjusting breech-screws, refacing 40-pounder vent-piece; also manufacturing one 40-pounder breech copper ring, and five 6-pounders.	1	17	1	1	10 -¾	-	15	9	4 2 10¾	4 12 9¾
309	29 May 1866 - - - - (G. 32—392—61—Portsmouth Factory—233 and 234.)	Manufacturing gun fittings, as follows: drifting and finishing 8 buckles, forging, fitting, engraving, and blueing 10 land service and 10 sea service breech tangent sights, finishing and fitting one buckle for 9-inch breech tangent sight, for duplicate pattern, engraving scale of yards on three 9-inch and 64-pounder breech tangent sights.	19	19	3	6	1 11¾	8	9	6	34 10 8¾	38 13 8¾
356	13 February 1861 - - - (G. 39—442.)	Repairing one 7-inch vent-piece, with new shackle, &c., and repairing and adjusting the sight of 40-pounder, No. 87.	2	6	7	-	-	-	19	10	3 6 5	3 14 5
359	13 February 1861 - - - (57—Woolwich—3156.)	Repairing 40-pounder, No. 187, and 20-pounder, No. 86, breech-loading guns, with 1 A. tubes, &c., as follows: cutting off and boring out old tubes, and breaking out the shells, coiling, welding, facing, and uniting coils to form the tubes, rough and finish-boring and turning the tubes, and shrinking them into the guns; boring, chambering, lapping, rifling, coppering, and finishing inside after proof. Repairing seven 7-inch vent-pieces, 11 40-pounders, and 36 12-pounders.	68	10	-½	97	17 6¾	31	3	-	197 10 7¼	221 15 4¼

393	10 August 1864 - - - (G.45—5; 85—Gen.No.—620.)	Manufacturing one set of tools for venting heavy ordnance, including the preparation of drawings, moulding and casting five gun metal boring heads, and four cast-iron collars; forging bars and other necessary forgings, turning, drilling, and fitting the whole complete, for sealing as patterns.	45 17 5¾	19 14 8¾	20 2 9	85 14 11½	96 2 3½
339	13 February 1861 - - - (G. 39—403; 57—Woolwich—3156.)	Repairing 40-pounder 35 cwt. breech-loading gun, No. 212, as follows:—Cutting off and boring out old tube, coiling, welding, facing, and uniting coils to form the tube, turning and boring the tube, and shrinking it into the gun; boring gun, lapping, chambering, and rifling; also making and fitting the gun with a new 2 C. coil, and finishing inside after proof. Refacing and repairing one 20-pounder vent piece.	18 19 4	34 11 4½	8 8 4	61 19 -½	69 7 10½
406	13 February 1861 - - - (G. 32—286; 57—Woolwich—3156.)	Completing the repair of 20-pounder gun, breech-loading, R., No. 28, as follows:—Rough and finish-boring 1 A. tube, and shrinking it into the gun; boring, broaching, turning muzzle, chambering, lapping, rifling, coppering, and finishing inside after proof.	5 16 5	- 9 2	2 19 9	9 5 4	10 7 6
288	13 February 1861 - - - (G. 27—270; 57—Woolwich—3156.)	Repairing 7-inch 82 cwt. breech-loading guns, R. as follows:—Boring out the tubes of No. 7, Elswick Ordnance Company, and 57 and 61, Royal Gun Factory, breaking out the shells, and taper-boring the guns; forging, turning, boring, and fitting the tubes, and shrinking them into the guns; cutting off ends of tubes, boring, broaching, chambering, and rifling manufacturing iron breech-rings, fitting them into the guns, and finishing inside after proof, altering vent holes, and repairing breech-screws. Manufacturing 11 iron breech-rings, and fitting them into the following guns:—Nos. 20, 94, 95, 102, 113, 116, and 119 of Elswick Ordnance Company, and Nos. 35, 95, 189, and 143 of Royal Gun Factory manufacture.	103 18 5½	130 17 6½	47 19 10	282 15 10	316 15 4
306	13 February 1861 - - - (G. 39—294; 57—Woolwich—3156.)	Repairing six wrought-iron targets, including forging ends of stays, turning and fitting the same; also fitting and preparing the targets for service.	3 18 6	- 1 -½	1 13 4	5 12 10½	6 6 5½
291	13 February 1861 - - - (G. 27—304; 57—Woolwich—3156.)	Repairing eight breech-loading guns, as follows:—Fitting iron breech rings in Nos. 87 and 90, 7-inch 82 cwt. breech-loading guns. Boring out old tubes and breaking out the shells of five 7-inch 82 cwt. breech-loading guns of Royal Gun Factory manufacture, and one of Elswick Ordnance Company; forging, turning, and boring the 1 A tubes, and shrinking them into the guns; boring, broaching, chambering, and rifling; manufacturing iron breech-rings, and fitting them into the guns, and finishing inside after proof. Repairing wedge of 40-pounder breech-loading, wedge, gun, and fitting it with new locking pin.	160 11 10	328 18 2¾	73 19 4	563 9 4¾	631 3 5¾

16	- - - - - -	Incomplete 7-inch breech-loading wedge guns issued to the Principal Superintendent of Stores, as follows: five guns, Nos. 1, 2, 3, 4 and 6, shrunk up; two B. tubes rough turned and finish bored; two C. coils rough turned and finish bored; two D. coils rough turned and finish bored; two E. coils rough turned and finish bored; one trunnion finished, eight wedges shaped, and 16 slide bars and handles.	1,068 14 3½	2,938 3 7	659 5 9½	4,666 3 8	5,226 16 1

511	20 February 1867 - - - - (G. 45—69; 85—G. N.—1005.)	Bisecting two 7 inch vent-pieces, and planing the bisected faces, showing the channel of the vent, and stamping the nature and number on the face of each.	1 4 –	- -	– 12 4	1 16 4	2 – 8
513	20 February 1867 - - - - (G. 39—566; 85—G. N.—1005.)	Reducing 68-pounder block (Jeffrey's) one calibre in length, for further experiment.	1 8 –	- -	– 14 5	2 2 5	2 7 7
519	20 February 1867 - - - - (G. 48—9; 87—G. N.—1005.)	Fitting trunnion sights of 12-pounder shunt rifled gun, Sir W. Armstrong's Experimental No. 339, also preparing 12-pounder brass gun, Experimental No. 340, for experiment, including boring up to a calibre of five inches, rifling in three plain grooves, preparing sights, and sighting.	13 13 8	1 12 8¼	7 – 3	22 6 7¼	25 – 3¼
520	20 February 1867 - - - - (G. 48—11; 85—G. N.—1005.)	Preparing a 9-inch wrought-iron muzzle-loading gun, rifled, Experimental No. 298, to test Pellett powder, including reducing to a length of 54-inch bore, and re-sighting.	2 18 –	- -	1 9 9	4 7 9	4 18 4
521	20 February 1867 - - - - (G. 48—10; 85—G. N.—1005.)	Preparing a 68-pounder brass block, to ascertain the most suitable powder for heavy ordnance, including boring the gun up to eight inches, drilling for, and fitting plugs at the respective distance of 64 and 104 inches.	6 4 9	– 10 3¾	3 4 –	9 19 –¾	11 2 11¾
529	20 February 1867 - - - - (G. 48—36; 85—G. N.—1005.)	Engraving inscription on trunnion and base of the 13-inch wrought-iron muzzle-loading Horsfall gun, presented to the British Government by the Mersey Steel and Iron Company.	3 8 –	- -	1 14 10	5 2 10	5 15 2
522	20 February 1867 - - - - (G. 45—97; 85—G. N.—1005.)	Turning and testing specimens of iron girders for gun carriages and platforms.	– 18 10	- -	– 9 8	1 8 6	1 12 –
523	20 February 1867 - - - - (G. 48—15; 85—G. N.—1005.)	Examining and taking impressions of the 15-inch Rodman gun, the object being to ascertain whether the gun, which has been proved in America, is in a condition which would warrant its acceptance under the regulations for receiving cast-iron guns adopted in this country.	1 18 4	2 17 9	– 19 8	5 15 9	6 9 8
528	20 February 1867 - - - - (G. 48—31; 85—G. N.—1005.)	Manufacturing a steel vent with platinum end, taking out old vent and re-venting 9-inch muzzle-loading gun, Experimental No. 329, also taking impressions of the bore after proof.	2 14 7¾	4 1 8	1 8 –	8 4 3¾	9 4 –¾
530	30 April 1864 - - - - (G. 48—38; 180—52.)	Altering a 12-pounder brass gun for the Gun Cotton Committee, including cutting 9·3 inches off the muzzle, moulding and casting a gun-metal dispart for the muzzle, and fitting the same to the gun.	1 18 9½	– 5 2	– 19 10	3 3 9½	3 11 5½
531	20 February 1867 - - - - (G. 48—45; 85—G. N.—1005.)	Graduating four hind sights, sighting and preparing four cast-iron carronades, required for experiment to test the effect of old pattern gun case, and grape shot, when fired from carronades of corresponding calibre, L. S. and S. S., bronze howitzers.	3 6 –	- -	1 13 10	4 19 10	5 11 10
535	8 July 1867 - - - - - (G. 45—141; D.—2225.)	Lining and sighting 10-inch 84 cwt. cast-iron gun, Experimental No. 345, lined on Major Palliser's principle, with a coiled tube, and rifled.	– 10 9	- -	– 5 6	– 16 3	– 18 2

534	20 February 1867 - - - (G. 45—135; 85—G. N.—1005.)	Preparing a 7-inch wrought-iron muzzle-loading gun, R., Experimental No. 299, for further experiment, as follows: cutting grooves for hand-spikes, drilling sight holes, making copper vent, drilling for vent, and re-venting, drilling for and fitting patches, plugging up old vent hole, engraving gun, and adjusting sights; cleaning gun, and taking impressions of the bore.	11 2 5	2 17 2	5 14 –	19 13 7	22 – 10
540	20 February 1867 - - - (G. 48—81; 85—G. N.—1005.)	Bisecting a gun through the centre longitudinally, planing the bisected face, and testing specimens of the metal, for Rotunda Museum.	6 10 11	– 2 1½	3 7 –	10 – –½	11 4 –½
546	20 February 1867 - - - (G. 45—180; 85—G. N.—1005.)	Boring and screwing the trunnions of 9-inch wrought-iron muzzle-loading gun, R., Experimental No. 327; forging, turning, and screwing two steel bolts, and fitting them to the trunnions, for experiment at Shoeburyness, in connection with the subject of the best plan of slinging wrought-iron guns when mounted on wrought-iron carriages.	3 12 –	– 6 2	2 19 6	6 17 8	6 17 8
580	4 March 1863 - - -	Cutting up wrought-iron armour plates into square pieces, showing the indentations, and damage done by the fire of various natures of ordnance and projectiles; marking the damaged pieces; describing the nature of ordnance and projectile used.	12 12 2¾	- -	6 9 4	19 1 6¾	21 7 4¾
524	20 February 1867 - - - (G. 45—107; 85—G. N.—1005.)	Turning and testing studs, in order to ascertain the most suitable alloy for studs for muzzle-loading rifled gun projectiles.	28 19 6	2 1 11½	14 17 3	45 18 8½	51 9 1½
543	20 February 1867 - - - (G. 48—90; 85—G. N.—1005.)	Reducing Jeffrey's 68-pounder block, one calibre in length, viz. 5·1 inches, for experiment.	1 10 –	- -	– 15 5	2 5 5	2 10 10
564	20 February 1867 - - - (G. 45—152; 85—G. N.—1005.)	Reducing Jeffrey's 68-pounder block, one calibre in length, for experiment.	1 10 –	- -	– 15 5	2 5 5	2 10 10
555	22 October 1867 - - - (G. 48—133; 80—G. N.—1225.)	Stamping sights, and sighting one 8-inch 65 cwt., and one 32-pounder 58 cwt., cast-iron guns, which had been lined on Major Palliser's principle, for service on board H. M. S. "Excellent."	1 13 4	- -	– 17 1	2 10 5	2 16 5
556	20 February 1867 - - - (G. 48—137; 85—G. N.—1005.)	Preparing drawings of a 68-pounder 95 cwt. cast-iron gun, condemned for having fissures round the vent.	– 6 1½	– 1 –	– 3 2	– 10 3½	– 11 6½
557	20 February 1867 - - - (G. 48—144; 85—Gen. No.—1005.)	Preparing drawings showing the sighting of 7-pounder muzzle-loading gun, R.	1 7 1	– 2 6	– 13 10	2 3 5	2 8 8
562	20 February 1867 - - - (G. 48—147; 85—Gen. No.—1005.)	Preparing drawings showing the rifling of the 8-inch gun proposed to be bored, and re-rifled on the Woolwich system.	– 4 4½	– – 6	– 2 3	– 7 1½	– 7 11½

552	20 February 1867 - - - (G. 48—123; 85—G. N.—1005.)	Manufacturing one set of sights for 7-pounder steel muzzle-loading gun, R., as follows: one sight, fore, in the rough, one socket, metal, for tangent scale, one tangent scale, spare, steel, and one wood.	1 7 5½	- -	- 14 1	2 1 6½	2 6 6½	
567	- - - - - - -	Cleaning inside and outside, and taking impressions of a 5-inch bronze gun.	- 3 6	1 15 10½	- 1 9	2 1 1½	2 6 -½	
561	20 February 1867 - - - (G. 48—146; 65—Gen. No.—1005.)	Plugging up three 7-inch vent pieces, required for experiment in connection with the proposition to add to the efficiency of 7-inch breech-loading Armstrong guns, by venting them through the body, and supplying solid blocks for use in stopping the breech, instead of the vent pieces.	1 - -	- -	- 10 3	1 10 3	1 13 10	
514	20 February 1867 - - (G. 45—84.)	Preparation of drawings of 11-inch muzzle-loading gun, R., as proposed by Captain Heath, R.N., of 23 and 21 tons respectively.	2 3 9	- 3 6	1 2 6	3 9 9	3 18 2	
533	20 February 1867 - - - (G. 45—134.)	Preparation of drawing of a 9-inch 12-ton wrought-iron muzzle-loading gun, R.; also of furnace and large tongs.	1 1 10½	- 2 -	- 11 3	1 15 1½	1 19 4½	
582	20 February 1867 - - - (G. 45—257; 85—G. N.—1005.)	Proving 64-pounder Palliser gun, Experimental No. 348; examining and taking impressions from time to time during the experiment.	5 14 9¾	5 2 1¼	2 18 10	13 15 9	15 8 10	
588	20 February 1867 - - - (G. 45—261; 85—G. N.—1005.)	Preparation of drawings of the fittings of carriages for turret guns -	- 7 3½	- 1 -	- 3 9	- 12 -½	- 13 5½	
517	20 February 1867 - - - (G. 45—92; 85—G. N.—1005.)	Preparing appliances for moving heavy ordnance, as proposed by Mr. Anderson, including the manufacture of a cone, bush, taps, &c.; also the attendance of an artificer at Shoeburyness in connection with the above service.	10 1 6½	5 8 10½	6 15 -	22 5 5	24 4 3	
544	8 August 1867 - - - (G. 45—166; 73—3—8179.)	Preparation of drawings of howitzers for siege purposes - - -	3 - 10	- 5 -	1 11 2	4 17 -	5 8 8	
577	20 February 1867 - - - (G. 48—201; 85—G. N.—1005.)	Squaring off the muzzle of 7-inch wrought-iron muzzle-loading gun, R., No. 194, to enable them to carry out an experiment to ascertain the velocity of projectiles when fired with air spaces of different lengths between the projectiles and cartridges.	1 2 -	- -	- 11 3	1 13 3	1 17 3	
578	20 February 1867 - - - (G. 48—206; 85—G. N.—1005.)	Manufacturing two bits vent, land and sea service; two drifts vent, garrison, and two prickers or priming irons, garrison; the whole 23 inches long, for guns of 18 tons and upwards.	- 4 3¼	- - 7	- 2 2	- 7 -¼	- 7 10¼	
584	20 February 1867 - - - (G. 45—359; 85—G. N.—1005.)	Drilling two gun-metal plugs, required in connection with an experiment to test the most suitable powder for use with guns of large calibre.	- 5 -	- -	- 2 7	- 7 7	- 8 6	
586	20 February 1867 - - - (G. 45—262; 85—G. N.—1005.)	Manufacturing copper vent, and re-venting 64-pounder muzzle-loading gun, Experimental No. 348, which had been lined on Captain Palliser's principle.	- 9 10¾	- 2 6	- 5 1	- 17 5¾	- 19 6¾

599	1 May 1866 - - - - (G. 39—262.)	Repairing 20-pounder wrought-iron breech-loading gun, No. 36, as follows: cutting off and boring out old tube, and broaching B. tube, forging and uniting 4 coils, to form the 1 A tube, turning and boring the tube and shrinking it into the gun; turning muzzle, boring, broaching, chambering, rifling, screwing for copper, coppering, screwing for sight ring, and finishing, cutting lines and eye for chain, drilling and plugging sight holes, finishing inside, and sighting. Manufacturing four breech tangent sights, four trunnion sights, and re-sighting 20-pounder wrought-iron, breech-loading, L. S. gun, No. 13, and 6-pounder, No. 16.	43 13 1	24 4 6	22 7 7	90 5 2	101 2 1
699	10 April 1864 - - - - (G. 45—42; 85—G. N.—620.)	Moulding, casting, trimming, boring, rifling, and fitting three cast-iron cylinder gauges, similar to the bores of the undermentioned wrought-iron muzzle-loading guns, rifled, viz., 9-inch, 8-inch, and 7-inch.	39 4 4½	5 13 4	20 2 4	65 - -½	72 16 2½
575	20 February 1867 - - - (G. 48—190, and G. 45—250; 85—G. N.—1005.)	Manufacturing two copper vents, and re-venting twice, 64-pounder muzzle-loading Palliser gun, Experimental No. 348, to continue the test of endurance.	- 17 -	- 5 -	- 8 8	1 10 8	1 14 4
572	20 February 1867 - - - (G. 48—170; 85—G. N.—1005.)	Boring and rifling 5-inch bronze rifled muzzle-loading gun, Experimental No. 340, for further reference in connexion with the subject of rifled bronze guns.	1 10 -	- 3 -	- 15 5	2 8 5	2 14 3
571	20 February 1867 - - - (G. 48—237; 85—G. N.—1005.)	Preparing a drawing showing the size of groove, portion of bore, and position of centre of curve of 10-inch 18-ton muzzle-loading gun, rifled.	- 4 4½	- - 6	- 2 3	- 7 1½	- 7 11½
548	20 February 1867 - - - (G. 45—192; 85—G. N.—1005.)	Manufacturing 100 brass connecting screws for use in experiment with electro-ballistic apparatus.	5 16 8	- 15 7½	2 19 9	9 12 -½	10 15 1½
547	20 February 1867 - - - (G. 48—99; 85—G. N.—1005.)	Rendering assistance in carrying out the experiment to test a steel carriage for 7-pounder steel muzzle-loading gun, rifled, 150 lbs.	- 5 -	- -	- 2 7	- 7 7	- 8 6
536	10 August 1864 - - - (G. 48—60; 85—G. N.—620.)	Sighting and completing a 12-inch 23-ton wrought-iron muzzle-loading gun, rifled, and fitting studs on the muzzle to support a quadrant, for experiment at Shoeburyness.	5 11 -	- 6 -	2 16 11	8 13 11	9 14 10
658	- - - - - - -	Testing the endurance of three 9-inch 12-ton wrought-iron guns, muzzle-loading rifled, Experimental Nos. 329, 330, and 331; examining, and taking gutta-percha impressions of the bores from time to time during the proof.	46 5 -	142 14 6½	39 17 7	228 17 1½	256 7 -½

512	21 March 1867 - - - - (G. 45—71; 85—G. N.—1034.)	Stamping letters and numbers on the stocks of various natures of small arms.	– 18 9	- -	– 9 8	1 8 5	1 11 11
545	20 February 1867 - - - (G. 45—170; 85—G. N.—1005.)	Examining and taking impressions of the bore of 10-inch muzzle-loading gun, 18 tons, Experimental No. 318.	– 16 –	5 15 6	– 8 2	6 19 8	7 16 6
568	20 February 1867 - - - (G. 45—333; 85—G. N.—1005.)	Attendance of military at proof butt, to fire 10 rounds from a 32-pounder 46-cwt. cast-iron gun.	– 5 –	- -	– 2 7	– 7 7	– 8 6
581	13 August 1859 - - - (85—G. N.—3100.)	Preparation of drawings, as required from time to time - - - -	8 11 1½	– 7 6	4 7 8	13 6 3½	14 18 3½
583	30 April 1864 - - - - (G. 22—334; 180—152.)	Examining guns at proof butt - - - - - - - - -	2 14 –¼	1 10 4	1 7 8	5 12 –¼	6 5 5¼
549	14 September 1867 - - - (G. 48—104; 73—3—8234.)	Manufacturing one sight with deflection vernier - - - - -	4 16 9½	– 7 6	2 9 7	7 13 10½	8 12 4½
553	9 September 1867 - - - (G. 48—125; 80—P.—278.)	Proving two cast-iron guns which had been converted on the Palliser principle, for Her Majesty's Ship "Excellent."	2 2 6	1 14 9¾	– 16 2	4 13 5¾	5 14 7¾
573	20 February 1867 - - - (G. 48—181; 85—G. N.—1005.)	Temporary sighting 9 inch Palliser gun, Experimental No. 293, proving and taking gutta percha impressions of the bore from time to time during the proof.	16 13 –¼	25 16 –¾	8 10 8	50 19 9	57 2 3
656	10 August 1864 - - - (G. 32—516; 85—G. N.—620.)	Manufacturing a shot bearer for 9-inch experimental gun, No. 333 -	4 16 7½	– 5 6¾	2 9 6	7 11 8¼	8 9 11¼
701	12 August 1864 - - - (G. 39—539.)	Manufacturing a shot bearer for 12-inch muzzle loading gun, including forging plates and bars, turning studs and handles, moulding and casting 12 gun-metal castings, and fitting the whole complete.	8 17 1½	1 5 5½	4 10 9	14 13 4	16 8 7
663	10 August 1864 - - - (G. 39—421; 85—G. N.—620.)	Converting a 32-pounder 46-cwt. cast-iron gun into a breech-loader, on Krupp's principle, including the preparation of drawings, cutting a hole through the breech to receive the wedge, forging wedge and lever, turning, planing, and fitting the same to breech opening; boring, re-venting, and preparing it for proof; preparing sights, and completing the gun after proof.	53 8 11½	11 – 5¾	23 1 1	87 10 6¼	98 – 10¼
619	10 August 1864 - - - (G. 32 - 396.)	Preparing patterns for elevating patch, and bracket for sight, forging, turning, and fitting sight and pivot, and sighting gun on one side; also making shot bearer for the same.	23 19 4¾	7 14 1	12 5 11	43 19 4¾	49 5 –¾

741	11 December 1867 - - - (G. 48—168.)	Manufacturing the following spare fittings, viz.:—Bushes, breech, copper, 9-pounder, 12; bushes, copper, vent-piece, 9-pounder, sets, 12; eyes, elevating, with bolts, washers, and pins, 9-pounder, 2; pieces, vent, iron, 12; pins, keep for levers, 12 or 9-pounder, 12; and rings, copper vent piece, 12 or 9-pounders, 61.		23 9 2	16 9 6	11 19 9	51 18 5	58 3 2

737	3 September 1867 - - - - (G. 48—126; 57—16—2550 and 2647.)	Manufacturing stores, various, for Indian Government, consisting of 12 sets of bushes, copper, for 12-pounder vent-pieces; 20 copper rings, breech, 6-pounder; and 18 copper rings, vent piece, 6 pounder.	3 4 6	3 12 2¼	1 13 1	8 9 9¼	9 10 1¼
750	29 July 1867 - - - - - (G. 48—77; 57—17—1275.)	Moulding and casting 800 sets of brass chain marks, for Ordnance Survey Office, Southampton.	1 7 9¼	5 14 11	– 14 3	7 16 11¼	8 15 9¼
796	2 April 1867 - - - - - (Reg. No. 34,819.)	Manufacturing 10 wrought-iron tubes for Inspector of Works, for service at the proof butt.	32 – –	25 7 6¾	16 8 4	73 15 10¾	82 12 8¾
732	21 September 1867 - - - (G. 45—189; 57—20—4505.)	Engraving trunnion caps; altering and repairing the 9-inch gun carriage, manufactured at Elswick, for the Colony of Victoria.	5 13 –	- -	2 18 –	8 11 –	9 11 6
727	6 August 1867 - - - - - (G. 45—152; 57—16—2560.)	Manufacturing the undermentioned articles, various, for India Store Department, Bengal (spare fittings for four batteries of 12-pounder Armstrong guns), as follows:—Forging, turning, fitting and finishing 24 elevating eyes, and 48 pins, keep; cutting off bars, hammering, drilling, turning, screwing, and fitting 48 bushes, breech, copper; 48 rings, copper, for vent-pieces, and 48 bushes, copper, for vent-pieces; turning, fitting, and finishing complete, with cross-heads, &c., 48 vent-pieces; making the necessary castings, forging, fitting, and finishing complete, four sets of facing implements.	126 19 –¾	47 11 8¾	64 8 7	238 19 4½	267 13 7½
734	17 October 1867 - - - (G. 45—207; 57—16—2653.)	Preparing drawings of spikes, common, and punches (one of each), for the Military Secretary, India Office.	– 8 2	– 1 6	– 4 2	– 13 10	– 15 6
721	8 March 1867 - - - - (G. 48—49; 57—6—2349.)	Manufacturing stores, various, for India, as follows:—Instruments for taking impressions of vents in gutta percha, eight sets; pots for softening gutta percha, eight; rimers, vent, seven; scrapers, forerright, 24, and scrapers, half-round, 24; gauges, vent, four sets; scrapers, vent spring, eight, and scrapers, vent, half round, eight; tongs for grinding scrapers, eight; and tools for grinding searcher points, eight.	60 5 8	16 2 10	30 18 6	107 7 –	120 4 11
719	16 May 1867 - - - - - (G. 45—103; 57—20—4366.)	Preparing drawings of shot bearer for 9-inch 12-ton muzzle-loading gun, for Major Scratchly, Royal Engineers, Woolwich.	– 10 5	– 2 –	– 5 4	– 17 9	– 19 11
731	28 August 1867 - - - (G. 48—95; 57—20—4476.)	Manufacturing two shot and shell bearers for 7-inch muzzle-loading guns, for Colony of Victoria; also moulding and casting four gun-metal joints; forging and fitting a plate for impression instruments, supplied on a former demand.	3 5 6¼	– 15 6¾	1 13 7	5 14 8	6 8 5
726	8 July 1867 - - - - - (G. 48—63; 57—16—2520.)	Manufacturing eight sets of 12 pounder facing implements, two sets of 9-pounders, and two sets of 6-pounders; 24 bushes, copper, breech, for 9 pounder guns; 24 rings, copper, vent-piece, for 9 pounder guns; repairing 24 12-pounder elevating eyes, and 17 9-pounders; and manufacturing 41 pins, keep, for the same, for India Store Department.	72 17 –¼	18 15 6¼	37 7 5	128 19 11½	144 9 10½

445 R. O. F.—533.	10 December 1867 -	Removing the span shackle of the bowsprit of the military store-vessel "Wellington," and forging, boring, and fitting a new shackle, covering it with leather, and fixing it complete.	1 14 2	- 6 3½	1 - 1	3 - 6½	3 9 4½
467 R. O. F.—533.	20 December 1867 -	Repairing a hand-cart for removing shot and shell by making and fitting new bottom; repairing the iron handle and prop stay; making new ash cross bar, and forging four rivets for fastening the same; also repairing a wadmiltilt.	- 12 6	- 17 5½	- 7 5	1 17 4½	2 2 10½
473 R. O. F.—533.	2 January 1868 - -	Sawing 50 deals into 7,608 lineal feet - - - - - - -	- 16 7	- -	- 9 10	1 6 5	1 9 10
499 R. O. F.—533.	13 January 1868 - -	Repairing the main beam or girders of the hold of the military store-vessel "Lord Panmure."	5 5 6½	1 11 -	3 2 8	9 19 2½	11 8 2½
502 R. O. F.—533.	14 January 1868 - -	Repairing a 4-wheel drug, including the moulding, casting, boring, and fitting of four iron wheels.	- 16 10	1 9 8	- 9 11	2 16 5	3 4 9
514 R. O. F.—533.	23 January 1868 - -	Sawing 20 deals into 7,680 lineal feet - - - - - - -	- 16 8½	- -	- 9 10	1 6 6½	1 9 11½
561 R. L.—533	30 October 1867 - -	Repairing the copper funnel of the military store-vessel "Hardinge."	- 4 -	- 1 1¾	- 2 4	- 7 5¾	- 8 7¾
613 R. L.—533	29 November 1867 -	Securing the hand-rail of an accommodation ladder by making and fixing two new spurs; also making and fixing a moveable hand-rail to a main-hold ladder, including the manufacture of two copper stays for securing and fitting the same on board floating powder-magazine "Grampus," Fareham Creek, including the conveyance of artificers and labourers to and from the vessel.	1 19 6	1 - 3¼	1 3 7	4 3 4¼	4 15 7¼
625 R. L.—533	10 December 1867 -	Re-covering with tanned hide the bolts and knees in the hold of the military store-vessel "Gorilla;" covering the keelson with 40 feet of deal boards, and the combings with sheet copper.	1 4 9	6 13 8	- 14 10	8 13 3	9 18 8
639 R. L.—533	19 December 1867 -	Making and fixing new spring and copper wire-pull to bell in magazine.	- 5 6	- 1 -	- 3 4	- 9 10	- 11 4

654 R.L. - 480 R.O.F. 533	4 January 1868 - -	Removing 12 scupper lights; making patterns, moulding, casting, boring, turning, screwing and fitting 12 metal plugs, 8 rods, 8 nuts, and 24 rivets; fitting and fixing the same together; re-covering the plugs with fearnought and tallow, bound with copper wire, and fitting the whole complete on board the floating magazine "Grampus."	10 19 2	13 10 7¾	6 10 3	31 - -¾	35 10 5¾
551 R.O.F.— 533.	10 February 1868 - -	Sawing 20 deals into scantling 24′ × 11″ × 2″ - - - -	- 5 1	- -	- 2 11	- 8 -	- 9 2
552 R.O.F.— 533.	13 February 1868 - -	Moulding, casting, and cleaning 34 lbs. of gun fittings for shell barrow in course of alteration by the Military Store Department, for submission to the O. S. Committee; material supplied by the M. S. Department.	- 3 6	- -	- 2 -	- 5 6	- 6 4
594 R.O.F.— 533.	7 March 1868 - -	Repairing the iron handle of a hand cart used for removing shot and shell, by making new ash cross bar, and repairing the iron work of pole, and fixing complete; repairing a four-wheel drug, by making new ash pole and handle; forging and screwing four bolts and nuts; forging one split key and chain, four rivets, and four linch-pins and washers; repairing 18 screw bolts and nuts, and fixing the whole complete; also adjusting a sling wagon, and fitting four ash levers to the same.	1 19 -	1 12 11¼	1 3 4	4 15 3¼	5 9 2¼
608 R.O.F.— 533.	17 March 1868 - -	Re-making a wrench for removing the breech screws of 7-in. B. L. guns.	- 7 1½	- -	- 4 1	- 11 2½	- 12 10½
655 R.L. - 481 R.O.F.— 533.	4 January 1868 - -	Making a cutlass-rack 8 feet long, fitted with 11 pegs; making a clothes rack 17 feet × 1″ × 4″; making 54 feet running of peg rails, including pegs, and fixing the whole complete, and painting with two coats of paint, on board floating powder magazine "Grampus."	2 5 7½	1 1 5	1 7 1	4 14 1½	5 7 10½
659 R.L. - 497 R.O.F.— 533.	7 January 1868 - -	Moulding, casting, and drilling an iron hawse pipe, and forging and fitting two bolts, removing the old pipe, and fixing the new on board Her Majesty's vessel "Hardinge"; also repairing the bulwarks.	1 3 9	- 1 10½	- 14 1	1 19 8½	2 5 6½
660 R.L.—533	7 January 1868 - -	Repairing the undermentioned stores during the quarter ended 31st March 1868, viz.:— Soling and heeling one pair of water boots; repairing 13 iron powder cylinders by hammering out all the dents, japanning the inside, and painting the outside, and making nine new leather washers; forging and screwing five new bolts; soling and heeling seven pairs, and soling three pairs of magazine shoes; forging and fitting new bottom to an ammunition wagon with a drag shoe; repairing two ammunition wagons by making two new felloes, 12 spokes; cutting and re-shutting the tire of wheel; forging and screwing eight bolts and nuts; re-nailing the canvas covers, and fastening the hooks of three ammunition wagons. Repairing six railway wagons, viz.:— 1st. One new panel, new top complete with stops, and painting and varnishing complete. 2nd. Casting and fitting two metal hinges, new leather to top joint, and fitting stops to the top; making two new panels for end, and painting and varnishing complete. 3rd. Making one pair of new doors and one top, casting and fitting two small hinges, and painting and varnishing complete. 4th. Repairing two doors and panels, fitting top with stops, casting and fitting one metal hinge, and painting and varnishing. 5th. Casting and fitting three hinges; new leather to top joint, and fitted with stops; painted and varnished. 6th. Casting and fitting three hinges and one metal bar, making new end, fitting top with stops, and new leather to top joints, and painting and varnishing complete.	5 8 7½	2 8 11½	3 4 -	11 1 7	12 13 11

694 R. L.—623 R. O. F.—533.	20 January 1868 - -	Repairing three boats— 1st. Making new bottom boards, new stern sheets, and repairing the gunwales. 2nd. Making new pulling chock and stretcher. 3rd. Forging and fitting new rudder irons complete, forging and fitting iron band to stern gunwale, making new mast thawt, repairing the fore and after sheets and bottom boards; the whole copper fastened, tarred outside, and painted inside.	2 18 10	– 16 9¾	1 15 1	5 10 8¾	6 6 11¾
717 R. L.—533	4 February 1868 - -	Removing a hut from the end of Priddy's Hard stage, and fixing it on the Ferry Hard, by driving piles, preparing and laying new floor; making and fixing sash and frame, re-hanging the doors, removing the bar from the outside, covering the roof with canvas, and painting complete, with three coats of paint.	4 3 6	3 2 11	2 9 8	9 16 1	11 4 8
731 R. L.—580 R. O. F.—533.	18 February 1868 - -	Lining the hut lately fixed at the Hard with wrought and beaded match-boarding, and making and fixing desk with drawer, cupboard and book shelves; staining and varnishing the whole complete.	3 13 6½	3 – 3	2 3 8	8 17 5½	10 3 6½
529 R. L.—384 R. O. F.—533.	15 October 1867 - -	Repairing the military store vessel "Annie," by making one new thawt, two knees, 30 feet running of moulding, 25 feet of planking; repairing the stern, stem, gunwales, bottom boards, stern-benches, all copper fastened; scraping, caulking, tarring, and painting complete.	2 7 4	1 1 3½	1 8 –	4 16 7½	5 10 8½
619 R. O. F.—533.	23 March 1868 - -	Repairing a Flander's wagon by making and fixing new rave, and new ash-pole; forging and fitting six iron plates, forging and screwing four iron bolts and nuts, forging seven iron stays and two hooks, making and fitting new bottom of elm; fixing and painting the whole complete.	2 7 8	2 12 7¾	1 8 2	6 8 5¾	7 4 9¾
		Experimental Services.					
87—450 -	8 April 1867 - - -	Cost of making an index-plate for a 9-in. 12-ton gun, of a form suggested by Mr. Broome, gunner, Her Majesty's ship "Excellent," for indicating accurately the elevation and depression when firing shot and shell with various charges; including the making of patterns, casting, turning, fitting, and graduating three metal plates fixed together with 4⅜-in. screws, and fitted with two jamming screws and nuts for tightening the plates when adjusted; making a steel pointer and fixing it to the capstan head of elevating spindle; also the attendance of workmen on board Her Majesty's ship "Excellent"; fixing the plate and pointer to the bracket of an iron carriage, by drilling and tapping four ⅜-in. holes, and forging, turning, and screwing of four screws (metal supplied).	3 15 9½	– – 8½	2 5 3	6 1 9	6 19 6

155—450 -	24 May 1867 - - - (57—2—15,554.)	Making the following alterations to a 9-inch 12-ton iron carriage, mounted in the third turret of Her Majesty's ship "Royal Sovereign," in accordance with the suggestion of Captain C. P. Coles, R. N., viz.:	41	5	8	5	11	11	24	11	1
		Lowering the front rollers of the carriage to take a bearing when thrown on its rear eccentrics; making parallel holes in the drum heads of the eccentric rear rollers, by dovetailing pieces of iron to prevent the lever slipping, and altering the end of the lever to fit the hole; forging, boring, slotting and bending an iron lever for the purpose of raising the carriage on its front rollers; making an iron pointer for marking the degrees of elevation and depression, and fixing it to the trunnion of the gun; making patterns, casting, fitting, graduating, and stamping a metal arc, and fixing to the carriage by drilling and tapping five $\frac{3}{8}$-in. holes, and providing five $\frac{3}{8}$-in. screw bolts; drilling and tapping the two pauls, and fitting them with chains and eyes; making and fixing two hooks and two eyes, and fitting the same to the brackets of carriage by drilling and tapping eight $\frac{1}{2}$-in. holes; lengthening by six inches; welding an iron lever; making and fitting four iron studs and plates for stops of levers of rear eccentrics; preparing an iron plate and fastening the same to drum head, by drilling and tapping two $\frac{1}{2}$-in. holes, and making two bolts for fixing it on; making four studs, drilling and tapping four $\frac{3}{4}$-inch holes, removing the clips from the carriage, and planing off a quarter of an inch from the clips, so as to allow the carriage to be raised higher when thrown on its front rollers. Forging, fitting, and drilling an eye and cleat, and fastening them to bracket of carriage by drilling and tapping two $\frac{1}{2}$-inch holes, and making screws for fixing. Lengthening two metal buffer bars six inches; cutting two cotter holes, and making keys for the same; making a wooden chock, six inches in thickness, and securing it with four $\frac{3}{4}$-inch screw bolts and nuts to the front of carriage, to prevent the gun running out too far; manufacturing a shot or shell bearer, in accordance with plans suggested by Captain Coles, R. N., for picking up shot or shell from the deck, including the forging, turning, screwing, drilling, and fitting complete.									
		Again lengthening the buffer bars an additional six inches, by cutting two extra cotter holes, and making two iron collars for the same.									
		Forging, drilling, boring, turning, and fitting an iron lever, fitted with metal sheave; also altering an iron lever, and fitting it with a metal sheave with falls, for the purpose of lifting the carriage on its rollers, including the casting, turning, and boring the metal sheaves and iron pins for the same.									
		Manufacturing two iron double blocks, with metal sheaves, for reeving the falls to the levers when throwing the carriage on its rollers; forging, turning, and fitting two rings and six levers for drum heads of elevating racks, so as to form a wheel, with handles, to elevate and depress the gun by hand, instead of using the elevating lever; forging and fitting complete two wrought-iron brackets, and fixing the same to the brackets of the carriage by drilling and tapping six $\frac{1}{2}$-in. holes, and making six $\frac{1}{2}$-in. screw bolts; also drilling two $\frac{1}{4}$-in. holes in the rear of the carriage, to hold the priming irons.

			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
239—450 -	23 July 1867 - -	Removing the buffer bar from a 9-in. 12-ton iron carriage, straightening it, and making two iron keys and washers; repairing the elevating wheels by removing the screws and substituting six $\frac{5}{8}$-in. iron rivets; boring six $\frac{1}{2}$-in. holes in the drum heads and spindles of elevating gear, and riveting the same together, including the attendance of artificers and labourers on board Her Majesty's ship "Royal Sovereign"; removing and refixing the above fittings.	- 17 2	- - 7$\frac{1}{3}$	- 10 1	1 7 10$\frac{1}{3}$	1 11 11$\frac{1}{2}$
401—450 -	13 November 1867 (71—1—525) -	Cost of manufacturing eight experimental hollow metal rollers, in accordance with suggestion of Major Fraser, R.A., including the making of patterns; casting, turning, and fitting the same with a patent lubricating grease to prevent corrosion as much as possible, and the frequent necessity of removing the rollers for the purpose of lubrication; the attendance of artificers on board Her Majesty's ship "Excellent" to fit these rollers to a 9-in. 12-ton iron carriage and slide for experimental purposes.	4 15 7	18 15 3	2 16 9	26 7 7	30 4 7
588—450 -	4 March 1868 - -	Making a mahogany wad former for a 64-pounder M. L. R. gun in accordance with drawings furnished from Her Majesty's ship "Excellent."	- 2 -	- 2 2	- 1 2	- 5 4	- 6 1
		Services on Board Her Majesty's Ships and Forts:					
17—524 -	31 July 1866 - -	Attendance of artificers on board Her Majesty's ship "Mersey" for the purpose of graduating the cascable of a 7-in. 6$\frac{1}{2}$-ton gun, laying the gun and adjusting the side scale.	- 8 8	- -	- 5 4	- 14 -	- 16 3
45—524 -	4 February 1867 - -	Drilling twelve $\frac{5}{8}$-in. holes in three 7-in. 6$\frac{1}{2}$-ton iron slides on board Her Majesty's ship "Hector," and fitting, boring, and fixing six metal blocks for stop handspikes. (Materials supplied.)	1 - 7	- -	- 12 6	1 13 1	1 18 -
58—424 -	1 March 1867 - -	Fitting the 8-in. 9-ton iron sliding carriages with loops for side tackle on board the following vessels, viz.: Four on board "Achilles," two on board "Hector," and one on board "Excellent," including the forging, turning, and screwing of 17 iron loops and nuts, and drilling holes in the brackets of carriages for the reception of the loops. (In progress last year.)	1 3 9	- -	- 14 1	1 17 10	2 3 4

61—524	-	7 March 1867	-	-	Attendance of artificers on board Her Majesty's ship "Royal Alfred," in harbour and at Spithead, altering the buffer blocks of ten 9-in. 12-ton gun carriages, including the making of 20 wooden blocks, one inch in thickness; lengthening and re-screwing 40 iron bolts for securing the wooden blocks to the front of carriage; repairing one 9-inch slide by making and fixing a new buffer block with India-rubber rings; housing ten 9-in. guns; raising the housing chocks on ten 9-in. carriages to carry the muzzles of the guns to their proper position when not in action; fitting two dismounting chocks for 6½-ton wooden slides, and adjusting the side scales. (In progress last year.)	6	19	1½	-	13	5¼	4	2	8	11	15	2¾	13	9	9¼
62—524	-	11 March 1867	-	-	Adding wooden blocks, one inch in thickness, to the buffers of the gun carriages of the following ships in Portsmouth Harbour and Spithead, including the making of 98 blocks, and lengthening and re-screwing 198 bolts for securing the blocks to the front of carriage, viz.: 14 9-in. 12-ton carriages, 9 on board "Bellerophon," and 5 at Gun Wharf. 4, 4, 2, 1 8-in. 9-ton carriages on board "Achilles," "Lord Clyde," "Hector," "Warrior." 3 7 in. 6½-ton carriages on board "Bellerophon." 20 7-in. 6½-ton carriages on board "Minotaur," and at Gun Wharf. (In progress last year.)	10	2	8	-	19	1	6	-	8	17	2	5	19	12	6
65—524	-	21 March 1867	-	-	Attendance of artificers at Spithead for the purpose of housing the 9-in. 12-ton guns on board Her Majesty's ship "Bellerophon." (In progress last year.)	-	4	6	-		-	-	2	8	-	7	2	-	8	4
68—524	-	26 March 1867	-	-	Cleaning, connecting, and putting in working order the various fittings of the four 9-inch and the twenty-two 7-inch iron carriages and slides on board Her Majesty's ship "Minotaur," at Spithead. (In progress last year.)	23	6	6	-	8	3	13	17	7	37	12	4	43	2	6
74—524	-	1 April 1867 23 March 1867 (75—7—1689.)	-	-	Attendance of artificers as follows, drilling and tapping the undermentioned W. I. guns for friction pins: 4 9-in. 12-ton guns, Portsmouth Dockyard. 4 9-in. 12-ton " on board Her Majesty's ship "Minotaur." 6 8-in. 9-ton " at Gun Wharf. 22 7-in. 6½-ton " on board Her Majesty's ship "Minotaur." 26 7-in. 6½-ton " at Gun Wharf. 2 64-pr. 64-cwt. guns on board Her Majesty's ship "Orwell."	3	10	10	-		-	2	2	-	5	12	10	6	9	5
92—524	-	10 April 1867	-	-	Artificers attending on board Her Majesty's ship "Minotaur," Portsmouth Harbour; housing four 9-in. 12-ton guns, and eighteen 7-in. 6½-ton guns; raising the housing chocks 1¾ inches, by fitting on pieces of elm planking, and securing the same with wooden screws to suit the housing of the guns; fitting the sights, laying the guns, and adjusting the side scales to twenty-two 7-in. 6½-ton, and four 9-in. 12-ton guns.	13	-	6½	1	6	2	7	14	9	22	1	5½	25	5	10½

			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
100—524 -	30 April 1867 - -	Fitting blocks for train whip tackle to the rear of slides on board Her Majesty's gunnery ship "Excellent," including the forging and fitting of six blocks complete; casting, turning, and boring 16 metal sheaves, and fitting same to rear of carriages for preventor ropes; forging, turning, and drilling six pins for the same; also casting, turning, boring, and fitting three metal sheaves for train whip block, in rear of slides.	12 7 4½	5 10 8¼	7 7 4	25 5 4¾	28 19 1¾
102—524 -	23 April 1867 - - 6 April 1867. (57—2—15,282.)	Cleaning, fitting, and putting together the fittings of a 9 in. iron carriage on board Her Majesty's ship "Royal Sovereign," Portsmouth harbour.	8 5 3	- 5 2¾	4 18 2	13 8 7¾	15 7 10¾
109—524 -	27 April 1867 - -	Attendance of artificers on board Her Majesty's ship "Bellerophon" at Spithead and Portland, removing and straightening the iron brackets of front rollers of three 9 in. slides, for 12-ton guns; boring out 12 1¾-in. holes in slides and brackets for bolts of a strengthened pattern; forging, turning, and screwing 12 1¾-in. bolts for same, and refixing complete; also removing the pins of rollers which had become set fast through corrosion; cleaning, oiling, and refixing.	7 19 2½	- 15 10½	10 1 10	18 16 11	21 12 -
112—524 -	29 April 1867 - -	Boring a ¾-in. hole in the tripper of a 7-in. M.L.R. slide belonging to Her Majesty's ship "Chanticleer," to take a lanyard to be used for the purpose of keeping the tripper up, when using the slide for drill purposes.	- - 7	- -	- - 4	- - 11	- 1 1
121—524 -	2 May 1867 - - -	Artificers attending on board Her Majesty's ship "Royal Sovereign," Portsmouth harbour, altering the position of a socket for the rear turret sight, so as to enable it to be clamped outside the turret instead of inside, including the preparation of drawings and patterns; casting, turning, drilling, and fitting of gun metal socket, and drilling, tapping, and fixing two ⅝-in. holes in top of turret.	1 10 10½	- 6 11¾	- 18 4	2 16 2¼	3 4 5¼
123—524 -	4 May 1867 - - -	Cleaning and putting together the fittings of the following iron carriages and slides on board Her Majesty's ship "Warrior," viz.:— 28 7-in. and 4 8-in slides. 28 7-in. and 4 8-in. carriages.	25 2 7	- 9 9½	14 18 3	40 10 7½	46 8 11½
144—524 -	18 May 1867 - - - 4 June 1867. (57—2—15,255.)	Artificers attending on board Her Majesty's ship "Minotaur" in harbour, cleaning and attaching the sights and fittings to two 12-pounder and two 9-pounder guns.	- 8 -	- -	- 4 8	- 12 8	- 14 6

165—524	-	29 May 1867	- -	Attendance of artificers on board Her Majesty's ship "Minotaur" at Spithead, at various times, examining the fore rollers of the slides and making good the defects; including the forging, drilling, and turning of two 2-inch bolts, ten inches in length for the fore rollers of the 7-inch 6½-ton iron slides, to replace two which were broken on being removed; forging, turning, and screwing one 7/8-inch screw bolt, also forging and fitting 40 ½-inch split pins for bolts of rollers; forging and welding a handle on one self-acting compressor lever, turning off the points of 48 2-inch pins, and easing the same so as to enable them to work more easily in the front rollers; removing 88 brackets ftom the slides to enable the pins of front rollers to be removed; taking off the running-in and out gear of two 9-inch slides, and cleaning, repairing, and refixing the same; also repairing 352 screw bolts.	20	1	5¾	1	4	3¾	11	18	6	33	4	3½	38	1	3½
176—524	-	7 June 1867 - - - 6 June 1867 (54—Marines—2,678.)		Cost of manufacturing three copper vents, and sending artificers and labourers to Fort Cumberland to drill one 8-inch 65 cwt., one 6-pounder S. B. gun, and one 10-inch mortar, screw in the new vents, and fit the guns with studs for friction tube loops, and guide plates for lanyards.	3	3	2	–	16	5½	1	17	5	5	17	-½	6	14	2½
183—524	-	13 June 1867 - .		Forging, turning, screwing, and fitting seven 3/4-inch bolts for elevating arcs of 7-inch M.L. guns, and attendance of artificers on board Her Majesty's ship "Calcutta," drilling out one of the old screw bolts, and re-tapping and fitting one of the new.	–	13	-½	–	1	–	–	7	9	1	1	9½	1	4	11½
184—524	-	14 June 1867 - - 11 November 1865 (75—7—1,377.)		Attendance of artificers at the Coast Guard Station, Little Hampton, for the purpose of drilling and tapping two holes in a 32-pounder gun to take friction pins, also fitting the pins to the gun.	–	5	–	-		-	–	19	2	1	4	2	1	7	8
186—524	-	14 June 1867 - -		Attendance of artificers on board Her Majesty's ship "Hector," Portsmouth Harbour, in order to remove the sights and fittings from the undermentioned guns, viz.:— 4 7-inch - - - - B. L. R. 6 100-pounder - - - 6¼ ton. 10 68-pounders. 2 20 „ - - - B. L. R. 1 6 „ - - - Bronze.	–	11	2	-		-	–	6	7	–	17	9	1	–	5
190—524	-	15 June 1867 - -		Artificers attending on board Her Majesty's ship "Royal Sovereign" in harbour, refitting the sockets on turrets for two hind and two fore sights; adjusting the sights; cutting out two 2-inch holes in turrets to receive the hind sockets; drilling and tapping four 5/8-inch holes in turrets for screwing on the sockets for tangent sights; cutting of socket guards and fitting same to turret sights; drilling and tapping 12 ½-inch holes in turrets; forging, turning, and screwing 12 ½-inch bolts for securing the foresights to the turrets, and casting and fitting of two lead flanges for raising foresights to the required height; making pattern, casting, turning, and boring two metal stays for supporting the guards of tangent sights; making four ½-inch screw bolts and fastening the same to roofs of turrets; also drilling and tapping two 5/8-inch holes in roof of turrets and fixing two guides for lanyards.	7	4	10½	–	7	10¼	4	6	2	11	18	10¾	13	13	8¾

			£. s. d.	£. s. d.	£. s. d.	£ s. d.	£. s. d.
191—524 -	17 June 1867 - -	Attendance of artificers on board Her Majesty's ship "Royal Sovereign" in harbour, removing side plate compressor bolts from a 12-ton gun carriage; altering them in the R.O.F., and re-placing them on the carriages on board.	1 8 9	- -	– 17 1	2 5 10	2 12 8
195—524 -	18 June 1867 - - 12 June 1867. (57—2—15,757.)	Artificers attending on board Her Majesty's ship "Warrior," in harbour, and at Spithead, adjusting the chocks of four 8-in. 9-ton, and 22 7-in. 6½-ton guns on the main deck, in order to raise the muzzles of the guns to their proper position when the ship is not in action.	4 9 2½	1 7 3½	2 12 6	8 9 –	9 13 8
197—524 -	21 June 1867 - -	Fitting the sights and fittings to the under-mentioned guns on board Her Majesty's ship "Mersey:" 4 7-in. - - - B.L.R. 20 10-in. - - - S.B. 1 6-pounder - - Bronze. 12 7-in. - - - B.L.R. 2 12-pounder - - „ 2 9-pounder - - „	2 4 9½	- -	1 6 6	3 11 3½	4 1 8½
199—524 -	21 June 1867 - - 23 March 1867. (75—7—1,689.)	Attendance of artificers on board Her Majesty's ship "Mersey" in harbour, and drilling and tapping a second hole for friction pins in the following ordnance: 4 7-in. - - - M.L.R. 20 10-ins. - - - S.B. 1 6-pounder - - Bronze. 12 7-in. - - - B.L.R. 2 12-pounders - - „ 2 9-pounders - - „	1 4 6	- -	– 14 5	1 18 11	2 4 7
201—524 -	21 June 1867 - - 18 June 1867. (54—Marines—2,699.)	Attendance of foremen and artificers at Fort Cumberland, cutting ten holes in the brackets of 8-in. 65 cwt. gun-carriages for breeching ropes similar to those in 64-pounder carriages.	1 5 5	- -	– 15 –	2 – 5	2 6 3
202—524 -	20 June 1867 - -	Drilling, turning and screwing a new copper vent for a 32-pounder gun, in charge of the coast-guard at Littlehampton, and attendance of artificers at that place, drilling out the old vent, re-tapping the guns, and re-fitting the new vent.	– 13 6	– 5 4½	1 4 1	2 2 11⅓	2 9 3½
203—524 -	14 June 1867 - - 12 June 1867. (57—2—15,757.)	Attendance of artificers on board Her Majesty's ship "Warrior," in harbour, fitting the sights and fittings to, and adjusting, the side scales of the under-mentioned guns, viz.: 4 8-in. - - - 9-ton. 28 7-in. - - - 6½-ton. 3 12-pounder - - B.L.R. 1 9-pounder - - „	3 4 8	- -	1 18 2	5 2 10	5 17 11

207—524 -	25 June 1867 - -	Altering the degrees of elevation and depression on two tangent sights from six to four degrees, on board Her Majesty's ship "Royal Sovereign"; also re-casting, turning, drilling, and fitting two metal sheaves for preventor ropes; forging, turning, and fitting two iron pins for the same; and attendance of artificer on board Her Majesty's ship "Excellent," fitting the same to a carriage for a 7-inch Whitworth gun.	– 8 10	– – 4½	– 5 3	– 14 5½	– 16 7½
211—524 -	29 June 1867 - -	Cost of artificers attending on board Her Majesty's ship "Royal Sovereign" in harbour, removing the socket of tangent sight from the fourth turret, and replacing another.	– 8 4	- -	– 4 10	– 13 2	– 15 2
215—524 -	4 July 1867 - - 29 June 1867. (71—1—482.)	Attendance of artificers on board Her Majesty's ships "Bellerophon," "Minotaur," "Warrior," "Hector," "Excellent," and "Ariadne," at Spithead and Portsmouth Harbour; fixing pins to the iron carriages for keeping the rear rollers in their places, removing the brackets, drilling and preparing them in the R. O. F. to receive the pins.	31 8 4¼	1 6 3	18 13 2	51 7 9¼	58 17 7¼
219—524 -	5 July 1867 - -	Fitting together the 150-pounder wooden carriage, and adjusting the fittings in the fourth turret of Her Majesty's ship "Royal Sovereign," Portsmouth Harbour.	1 4 3	- -	– 14 3	1 18 6	2 4 1
224—524 -	6 July 1867 - - 23 March 1867. (75—7—1,689.)	Cost of artificers attending on board Her Majesty's ship "Dauntless," at Spithead, fitting the under-mentioned guns with a second hole for friction pins, viz.: 1 68-pounder, 20 8-inch, 9 32-pounders; 1 12-pounder howitzer, and 1 6-pounder bronze. Also, fitting four 32-pounder guns with double studs.	1 9 3	- -	– 17 5	2 6 8	2 13 6
235—524 -	18 July 1867 - -	Artificers attending on board Her Majesty's ship "Bellerophon," at Spithead, repairing the left-hand shaft of the running-in gear of the Woolwich gun carriage and slide; forging, turning, and fitting a new shaft and four ¾-inch bolts for the same; removing and cleaning the running in and out gear, cutting oil tracks in the wheels, straightening the links of the chains, and putting the whole in thorough working order; forging and screwing one eye-bolt and nut, and fixing the same in rear of a 9-inch 12-ton iron gun carriage to secure the gun when at sea.	3 5 –½	– 1 10½	1 18 7	5 5 6	6 – 11
240—524 -	24 July 1867 - -	Artificers attending on board Her Majesty's colonial ship "Nelson," in Portsmouth Harbour, laying and housing the guns, 20 32-pounders and 20 64-pounders; also, graduating 120 beds and coins.	8 – 10	– 19 –½	4 15 7	13 15 5½	15 15 7½
242—524 -	24 July 1867 - -	Adjusting two 7-inch B. L. R. slides on board Her Majesty's ship "Mersey"; making one iron loop, and fixing to rear of slide; forging eight iron bolts, and fitting the same to the heads of the slides; also, repairing four lugs and four iron plates.	2 14 11	– 12 2	1 12 6	4 19 7	5 14 1
249—524 -	27 July 1867 - -	Attendance of artificers on board Her Majesty's ship "Warrior," Portsmouth Harbour; removing the trippers from 28 7-inch slides; conveying the trippers to R. O. F., drilling and fitting the same for lanyards, and replacing them on the slides in the above ship.	– 19 10½	- -	– 11 10	1 11 8½	1 16 3½

No. 7.—Royal Ordnance Factories, Portsmouth—Statement (F.) Miscellaneous Services—*continued.*

Number of Order.	Date of Requisition and Authority.	DESCRIPTION.	Labour.	Material.	Indirect Expenditure.	TOTAL COST per Balance Sheet, No. 1.	TOTAL COST per Balance Sheet, No. 2.
			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
256—524 -	30 July 1867 - -	Artificers attending on board Her Majesty's ship "St. George," in Portsmouth Harbour, examining the Armstrong guns, examining and re-adjusting the sights and fittings of 26 8-inch guns, 22 32-pounders, one 24-pounder, and one 6-pounder bronze gun; also forging, turning, slotting and shaping a trunnion sight of old pattern, boring out the old sights and adjusting the new ones.	6 6 5½	- 6 6	3 15 1	10 8 -½	11 18 4½
258—524 -	31 July 1867 - -	Repairing the gun carriages in the third turrret of Her Majesty's ship "Royal Sovereign," by disconnecting the gear leading from centre to rear eccentric shaft for raising the carriage on the front rollers; drilling and tapping four holes in the brackets for rear eccentric rollers of carriages; forging and drilling four keys for steadying rear eccentric shaft; making patterns, casting, turning, and fitting two metal rear eccentric rollers; forging and fitting one strong iron eye-loop, and fixing the same to the rear of the carriage for attaching the running in and out gear; cutting two semicircular holes, 2½ inches diameter, in the bottom of the carriage for chains of running in and out gear to pass through; forging and fitting one strong chain strap to be used for the running in and out gear in case the other should be carried away; forging, turning, and screwing six ⅝-in. bolts, enlarging six holes from ½-in. to ⅝-in., and tapping them in brackets of carriages for fixing two wrought iron brackets; attaching the blocks for heaving up the rear roller levers when required to run the carriage in and out; forging, turning, and screwing two 1⅛-in. nuts for jamming iron loops in sides of carriages; filing the teeth of the elevating racks to remove bruises; plugging, drilling, six ¼-in. holes for fixing steadying pins in pointer of trunnion, and fitting two iron brackets and fixing them to a rear clip of carriage to be used as rests for rear levers; forging, turning, and screwing of six ¾-in. bolts and nuts, and drilling and tapping six ¾-in. holes; forging, turning, and screwing 10 ¾-in. bolts and nuts; drilling and tapping 10 ¾-in. holes in the side of carriages; forging, turning, boring, and shaping two iron flanges and shrinking same on to the ends of two spindles for fixing pauls, turning the spindles to receive them, and drilling 10 13-in. holes and fixing same to side of carriage; making a girder of angle and T iron 4 ft. ¾ in. × 6 ft. 3½ in. with a wooden backing 5¼ in. × 2¾ in., and fixing it to front of carriage to prevent the elevating racks being thrown out of gear by the depression of the gun; drilling and tapping 12 ⅝-in. holes, and forging, turning, and screwing 20 ⅝-in. bolts and nuts for securing the wood backing to the girder, and the girder to the front of the carriage; altering the position of the lanyard guide on the top of the gun by drilling and tapping one ½-in. hole in the reverse side of the gun; tightening up and securing all bolts and nuts shaken loose.	21 - 9½	4 18 5	12 10 2	38 9 4½	44 1 6½
266—524 -	3 August 1867 - -	Cleaning and connecting the fittings of 10 7-in. 6½ ton iron carriages and slides on board Her Majesty's ship "Excellent" in Portsmouth Harbour.	4 15 1	- -	2 16 5	7 11 6	8 13 7
270—524 -	5 August 1867 - -	Cost of artificers attending on board Her Majesty's ship "Bruiser," Portsmouth Harbour, fitting the side scales, laying the guns, and adjusting and re-stamping four wood side scales of the 64-pounder guns.	- 9 4	- -	- 5 6	- 14 10	- 17 1

274—524	7 August 1867 6 June 1867. (57—2—15,664.)	Attendance of artificers on several occasions on board Her Majesty's ship "Minotaur," at Spithead, for the purpose of fitting stops and blocks to 26 7-inch 6½-ton iron slides, to prevent the sockets of the front eccentric traversing rollers dropping on the deck.	3 8 4	- -	2 – 4	5 8 8	6 4 5		
279—524	10 August 1867	Cost of artificers attending on board Her Majesty's ship "Excellent," Portsmouth Harbour, adjusting the iron carriages and slides; including the forging, fitting, and screwing of one side loop, and fixing it to the rear of a 9-inch iron slide; making six copper pins for keeping the india-rubber buffer rings on their studs, and forging and fitting 40 split pins for spindle of front and rear rollers.	1 19 3	– 1 6	1 3 8	3 4 5	3 13 9		
282—524	12 August 1867 6 June 1867. (57—2—15,664.)	Fitting bolts and stops to the front eccentric rollers of the iron slides on board the following ships, to prevent the sockets dropping on the decks, viz.:— Her Majesty's ship "Pallas" - - 4 „ "Hector" - - 3 „ "Excellent" - - 2 „ "Warrior" - - 32	5 15 7¾	– 1 9	3 8 10	9 6 2¾	10 13 5¾		
293—524	20 August 1867	Cleaning, connecting, and adjusting the fittings of four 7-inch iron carriages and slides on board Her Majesty's ship "Ariadne."	3 2 9¼	– 1 9½	1 17 4	5 1 10¾	5 16 8¾		
297—524	22 August 1867 29 July 1867. (57—2—16,022.)	Drilling, tapping, and fitting 16 64-pounder guns for friction tubes on board Her Majesty's ship "Nelson," also drilling the guns, and fitting them with guide plates.	2 3 7	- -	1 6 1	3 9 8	3 19 11		
298—524	22 August 1867	Cost of artificers attending on board Her Majesty's ship "St. George," Portsmouth Harbour, repairing two 7-inch B. L. guns, Nos. 54 and 60, including the cutting out of the copper breech bouches, and re-bouching with double iron bouches, also re-facing the breech bouches of three 40-pounder B. L. guns, Nos. 170, 185, and 474.	4 8 9	1 8 2¼	2 12 7	8 9 6¼	9 14 2¼		
301—524	26 August 1867	Artificers attending on board Her Majesty's coast guard vessel, Portsmouth Harbour, for the purpose of re-venting 11 32-pounder 58-cwt. cast iron guns, and one 6-pounder bronze gun; boring, turning, and screwing 12 new copper vents, re-tapping the guns, screwing in, cutting off, and filing the new vents; preparing and fitting 34 8-inch 65-cwt. guns, and one 6-pounder bronze gun to receive pins for friction tubes with loops, also enlarging the vents of the above guns to the proper size.	12 4 7½	2 1 9¼	7 5 5	21 11 9¾	24 14 9¾		
303—524	27 August 1867	Attendance of artificers on board Her Majesty's ship "Ariadne," Portsmouth Harbour, laying and housing 18 10-inch guns, and adjusting and graduating 54 beds and coins for the same; also laying, housing, and adjusting the side scales of four 7-inch 6½-ton guns on the main deck; and adjusting the side scales for four 64-pounder guns on the upper deck.	8 11 1	1 9 5¼	5 1 6	15 2 –¼	17 6 –¼		

No. 7.—Royal Ordnance Factories, Portsmouth—Statement (F.) Miscellaneous Services—*continued.*

309—524 -	29 August 1867 - - (57—2—16,215.) 24 August 1867.	Preparing four 32-pounder guns on board Her Majesty's ship "Asia," for friction tubes, with loops, by drilling and tapping them with a second hole to receive pins.	– 8 4	- -	– 4 11	– 13 3	– 15 3
310—524 -	29 August 1867 - -	Moulding, re-casting, fitting, filing, and polishing a metal yoke for the rudder of a boat for Quartermaster General's Department, Portsmouth.	– 5 1	– 3 1¼	– 2 11	– 11 1¼	– 12 9¼
312—524 -	30 August 1867 - -	Forging, boring, slotting, planing, and fitting a compressor lever for a 9-inch 12-ton gun carriage; forging, turning, and fitting one bolt with eye for joint of side plate experimental compressor, and attendance of workmen on board Her Majesty's ship "Excellent," for the purpose of fitting the same, adjusting the carriage, and putting the whole in working order.	1 17 6	– 3 2	1 – 2	3 – 10	3 9 8
319—524 -	2 September 1867 - - (54—Marines—2,746.) 23 August 1867.	Attendance of artificers at the head-quarters of the Royal Marine Artillery, at Fort Cumberland, re-venting a 7-inch B. L. R. W. I. gun, No. 164, and repairing a 9-pounder B. L. R. limber.	4 3 6	– 4 9½	2 9 8	6 17 11½	7 18 1½
324—524 -	9 July 1867 - -	Altering and repairing a platform (No. 437) for a 9-inch 12-ton gun, on board Her Majesty's colonial ship "Nelson," including the removal of two iron brackets, by cutting away the iron rivets, removing eight bolts, plugging up 12 holes, and refixing the brackets to the platform.	3 2 11	– 1 –	1 17 4	5 1 3	5 16 –
328—524 -	10 September 1867 -	Attendance of foremen and artificers on board Her Majesty's ship "Calcutta," Portsmouth Harbour, examining the bolts of the elevating arcs of the 7-inch M. L. R. guns, the pins and sheaves of preventer ropes of the 7-inch and 100-pounder guns; afterwards, forging, screwing, and fitting 20 ¾-inch bolts for securing the arcs to the guns; moulding, casting, turning, and boring seven metal sheaves for preventer ropes; forging, turning, and fitting four studs for sheaves of carriages, and two pins for slides.	2 15 9	– 3 3	1 13 2	4 12 2	5 5 8
331—524 -	14 September 1867 - (57—2—15,246.) 17 April 1867.	Adjusting the housing-beds of ten 100-pounder or 7-inch M. L. R. wrought-iron carriages, on board Her Majesty's ship "Excellent," to enable the muzzles of the guns to be secured to the top of ports when not in use.	1 2 1	- -	– 13 2	1 15 3	2 – 5
342—524 -	23 September 1867 - (57—2—16,022.) 29 July 1867.	Adjusting the sights and fittings of sixteen 64-pounder Palliser guns, and twenty 32-pounder S. B. guns, on board Her Majesty's colonial ship "Nelson," in Portsmouth Harbour, cleaning and connecting the fittings of two carriages and slides.	5 19 1	– 1 8¾	3 11 2	9 11 11¾	11 – 2¼

344—524	24 September 1867	Cost of examining, altering, and repairing a 100-pounder carriage and slide, and a 7-inch M. L. gun, on board Her Majesty's ship "Excellent," including the making of patterns, moulding, casting, turning, and fitting two metal front rollers; forging, boring, slotting, planing, shaping, and fitting an iron joint for plate on head of slide, to receive an elongated flap; repairing the running in and out gear, by shaping an iron plate, ¼-inch in thickness, and drilling and tapping eight ¾-inch holes, and making two guides for the same; repairing the thread of six 1-inch bolts; also making and fitting a light iron platform for rear of slide.	5 5 6½	3 12 –½	3 2 11	12 – 6	13 15 7
346—524	- - - - -	Repairing a 7-inch M. L. R. gun (No. 6) on board Her Majesty's ship "Calcutta," to receive a new vent.	1 4 10	- -	– 14 10	1 19 8	2 5 6
349—524	29 September 1867	Repairing the breech tangent sight of a 7-inch B. L. R. gun, belonging to Her Majesty's ship "Gladiator," including the making of new top, graduating and engraving the bar; straightening and adjusting the vernier screw; making and fitting a new collar and pin, and repairing the leaf.	– 10 7½	– – 2	– 6 5	– 17 2½	– 19 11
354—524	5 October 1867	Re-venting a 100-pounder S. B. gun, including the manufacture of a new copper vent, and attendance of artificers on board Her Majesty's ship "Calcutta;" boring out the old and fitting the new vent.	1 6 4	– 6 –	– 15 7	2 7 11	2 15 1½
363—524	14 October 1867	Making a new copper vent, drilling out an old vent and screwing in the new, and finishing off, to a 64-pounder, M. L. R. gun, No. 183, on board Her Majesty's ship "Excellent," Portsmouth Harbour.	1 10 4	– 5 5	– 17 11	2 13 8	3 1 8
368—524	15 October 1867	Altering an iron carriage in the third turret of Her Majesty's ship "Royal Sovereign," as suggested by Captain Hood, of Her Majesty's ship "Excellent," and approved by the Admiralty, including the forging, turning, and screwing of two eye-bolts and nuts for the running-in chains; forging, turning, and screwing two 1¾-inch bolts and six ⅞-inch bolts and nuts; drilling and tapping two 1¾-inch holes and two 2½-inch holes; making and fixing a wrought-iron plate for securing the eye-bolts to the carriage, and strengthening the bottom of carriage; also, refitting and adjusting the housing-bed, and adjusting the shackles and chains.	4 17 8	1 – 2	2 18 2	8 16 –	10 1 8¾
369—524	16 October 1867	Forging, turning, and screwing 33 bolts for securing the elevating arcs to guns on board Her Majesty's ship "Excellent," and attendance of workmen; boring out nine broken bolts, and re-tapping and fitting nine new ones to a 100-pounder S. B. gun.	1 19 8	– 2 6	1 3 8	3 5 10	3 15 5½
371—524	19 October 1867	Lengthening the eye-bolts of a slide on board Her Majesty's ship "Royal Sovereign;" forging and fitting two iron washers 5 inches diameter; making two india-rubber washers, 1 inch × 4½ inches, and attendance of artificers fitting the same to the slide in the third turret.	– 4 9½	– 12 3	– 2 10	– 19 10½	1 2 9

No. 7.—Royal Ordnance Factories, Portsmouth—Statement (F.) Miscellaneous Services—*continued.*

Number of Order.	Date of Requisition and Authority.	DESCRIPTION.	Labour.	Material.	Indirect Expenditure.	TOTAL COST per Balance Sheet, No. 1.	TOTAL COST per Balance Sheet, No. 2.
			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
377—524 -	22 October 1867 - -	Repairing the stage for housing the Lieutenant Governor's barge "Portsmouth," including the forging and fitting of two iron loops, and providing 56 feet of ¾-inch chain for making the stage fast to the moorings. Repairing the floor of stage by turning and fitting four wooden rollers; forging and fitting 10 studs and 20 plates, and boring and fitting an iron band; also making four stools for supporting the barge on an even keel, and repairing the bow board.	7 15 -	6 - 7¾	4 12 2	18 7 9¾	21 1 7¾
388—524 -	2 November 1867 -	Attendance of artificers on board Her Majesty's ship "Excellent," Portsmouth Harbour, cleaning and connecting, for an experiment, the fittings of a 7-inch M. L. R. carriage and slide.	1 12 11	- -	- 19 8	2 12 7	3 - 6
390—524 -	2 November 1867 -	Making and fitting, for Her Majesty's ship "Excellent," a housing-chock for a 9-inch gun to answer the purpose of a platform for rear of slide, when not otherwise required. Making and fitting a chock to an 8-inch gun, and repairing the axletrees of an 8-inch gun carriage, including the forging and fitting of iron straps, and attendance of artificers fitting the same. Repairing the stops for the sockets of the rear rollers of the 9-inch and 8-inch gun carriages; also repairing an 8-inch shell extractor.	3 18 2½	- 19 -½	2 6 11	7 4 2	8 5 6
391—524 -	6 November 1867 - (57—2—16,622.) 31 October 1867.	Fitting the sights and adjusting the slide scales of two 7-inch 6½-ton guns, and four 64-pounder guns on board Her Majesty's ship "Danæ;" also, laying the 64-pounder guns for the guidance of the dockyard authorities in cutting out the port buckles.	- 13 5	- -	- 7 9	1 1 2	1 4 3
393—524 -	9 November 1867 -	Cost of attendance of foreman on board Her Majesty's ship "Excellent," and receiving instructions for making the undermentioned alterations to a 64-pounder gun carriage; afterwards making new rear axletree and depression chock, boring holes in same for the socket of the elevating screw, and bouching the socket with gun metal. Making pattern, moulding, casting, turning, boring, and fitting the metal nut of elevating screw in the top of socket. Setting the elevating screw at the required angle, to enable the head of the screw to take fairly under the head of breech, and give all the depression the port would allow. Making an elm chock one inch in thickness, and fixing the same to the fore axletree to raise the carriage to main-deck height; also, forging, turning, and fitting a new ring with square stud, to fit the socket and prevent the handle turning when elevating or depressing the gun; and forging, turning, and fitting a new end to a lever of an elevating screw.	6 15 5½	4 7 1½	4 - 6	15 3 1	17 7 4
394—524 -	9 November 1867 -	Cost of attendance of foreman on board Her Majesty's ship "Excellent," Portsmouth Harbour, examining the buffer chocks of a gun carriage.	- 3 -½	- -	- 1 9	- 4 9½	- 5 6

406—524	15 November 1867	Repairing the side-plate compressor of a 100-pounder S. B. gun on board Her Majesty's ship "Excellent," including the attendance of artificers on board; removing the same from the carriage, and forging, turning, screwing, and fitting new ends.	– 9 –	– 1 –	– 5 5	– 15 5	– 17 9
407—524	16 November 1867	Raising the housing chocks of a 7-inch 6½-ton iron carriage on board Her Majesty's ship "Excellent," to enable the muzzle of the gun to reach its proper position at the top of the port.	– 5 –	- -	– 2 11	– 7 11	– 9 2
408—524	16 November 1867	Repairing the buffer block of a 9-inch 12-ton gun carriage on board Her Majesty's ship "Royal Sovereign."	1 5 5½	- -	– 15 5	2 – 10½	2 6 10½
415—524	19 November 1867	Repairing a 9-inch 12-ton gun on board Her Majesty's ship "Excellent." (Still in progress.)	– 19 3	– 5 8½	– 11 8	1 16 7½	2 2 –½
419—524	21 November 1867 20 November 1867. (54 Marines—2826.)	Inspecting and reporting upon the ship battery "Forton," previous to arrangements being made for the reception of the new armament.	– 8 4	- -	– 4 11	– 13 3	– 15 3
428—524	29 November 1867	Repairing the Lieutenant Governor's barge, including the making and fitting of iron keel band, and repairing stern gratings, gang board, seats, and metal work of boom.	1 12 9½	– 7 –¾	– 19 7	2 19 5¼	3 8 1½
442—524	7 December 1867	Manufacturing a copper vent for a 32-pounder 39 cwt. gun in charge of the Coast Guard at Hurst Castle, Isle of Wight, and sending workmen to drill out the old and fit the new vent; also, cost of sending workmen to Hove, Brighton, 39 Tower, Hastings, Camber, Hastings, and Bembridge, Isle of Wight, for the purpose of repairing and fitting one 32-pounder 42-cwt. gun at each place with guide plates and friction pins; also, enlarging the vents for quill friction tubes with loops.	4 4 10	– 2 9	12 11 1	16 18 8	19 8 –
446—524	10 December 1867	Fitting ten 7-inch 6½-ton iron slides on board Her Majesty's ship "Excellent" with the improved elastic buffer arrangement, including the making of 20 elastic buffers and 20 brackets for rear of slide, and 40 elastic buffers for front of slide; also, forging, turning, and fitting 10 iron studs and 10 bollards, for securing the carriages and slides with preventor ropes.	99 6 7½	28 3 6	59 – 2	186 10 3½	213 11 2½
447—524	10 December 1867	Making three copper vents, and sending men on board Her Majesty's ship "Calcutta," Portsmouth Harbour, for the purpose of drilling out the old vents and fitting the new in the following guns; viz.: One 100-pounder S. B., W. I. One 8-inch S. B., C. I. One 32-pounder S. B., C. I.	4 15 7	– 17 –¼	2 16 11	8 9 6¼	9 14 2¼
459—524	10 December 1867	Repairing an iron water tank belonging to the military store vessel "Anne," by cutting out the old bottom, and punching, drilling, and rivetting on a new one; recaulking, making water tight, and painting complete.	1 2 6	– 4 2	– 13 4	2 – –	2 5 10

463—524	18 December 1867	Removing the iron brackets for roller handspikes from a 7-inch 6½-ton gun carriage on board Her Majesty's ship "Excellent," Portsmouth Harbour, boring a hole in bottom of carriage, and making, riveting, and fitting an iron stud.	– 14 10	– – 1¾	– 8 9	1 3 8¾	1 7 1¾
488—524	7 January 1868	Altering and repairing the 9-inch 12-ton gun slides and gear used in connection with the working of the guns and carriages on board Her Majesty's ship "Minotaur," at Spithead, including the forging, turning, boring, and fitting of two steel bolts for front rollers of slides, and attendance of artificers on board fitting the same, laying the guns, and adjusting the tangent scales, also turning down the ends of 94 compressing and adjusting levers.	10 7 5½	3 9 4¾	6 3 –	19 19 10¼	22 18 –¼
493—524	9 January 1868	Cost of sending an artificer on board Her Majesty's ship "Excellent," Portsmouth Harbour, and removing a broken compressing lever from a 9-inch 12-ton gun carriage; welding on a new end, filing, fitting, and adjusting the same.	– 11 7½	– 1 5	– 6 6	– 19 6½	1 2 3½
498—524	11 January 1868	Repairing a 7-inch B. L. rear chock carriage on board Her Majesty's ship "Excellent," and repairing and adjusting the depression chocks and beds of two 32-pounder 58-cwt. guns.	2 4 8½	– 7 4¾	1 6 5	3 18 6¼	4 9 11¼
527—524	30 January 1868 3 December 1867. (57—2—16,817.)	Cost of laying four 20-pounder B. L. guns on board Her Majesty's ship "Pandora," and easing the transoms of four 20-pounder rear chock carriages, so as to give the guns as much depression as the port sills would allow.	– 10 5½	- -	– 6 2	– 16 7½	– 18 11½
529—524	30 January 1867	Repairing the claw of one of the rear eccentrics of an 8-inch M. L. R. slide, on board Her Majesty's ship "Hector," including the removing the claw to the R. O. factory for the purpose of setting.	– 13 6	- -	– 7 11	1 1 5	1 4 8
533—524	3 February 1868	Making 20 copper vents for 18-pounder S. B. guns; also making 48 iron clouts for the axletrees of twelve 18-pounder gun carriages, and attendance of workmen on board Her Majesty's training ship "St. Vincent," Portsmouth Harbour, drilling out the old vents from the guns, and screwing in, fitting, and cleaning off the new; also removing 48 old clouts, plugging up the nail holes, fixing the new clouts, and turning off the trucks.	12 1 6½	4 5 1	7 3 7	23 10 2½	26 18 9½
534—524	3 March 1868	Removing eight brackets of rear eccentric rollers from four 8-inch 9-ton gun carriages on board Her Majesty's ship "Pallas," boring, cutting, and filing 16 holes in the brackets to receive keys for supporting the eccentrics in their proper position; forging, filing, boring, and fitting 16 keys, and fixing them to the gun carriages.	1 8 10½	– 1 9¾	– 17 3	2 7 11¼	2 14 11¼
535—524	2 March 1868 2 April 1867. (57—2—15,255.)	Fitting a centre hind sight to a 9-inch 12-ton gun on board Her Majesty's "Minotaur," Portsmouth Harbour.	– 4 4½	- -	– 2 6	– 6 10½	– 7 11½

540—524 -	4 February 1868 - -	Cost of making a new copper vent, and sending workmen to coast-guard station, Blatchington, Brighton division, for the purpose of drilling out the old vents, and screwing in and finishing of the new in a 32-pounder 42-cwt. gun; also boring, screwing, and fitting two studs for the use of friction tubes with loops, and fitting a guide plate to the breech of the gun.	2 2 11½	– 3 –¾	6 7 7	8 13 7¼	9 19 –¼	
541—524 -	1 February 1868 - -	Removing two 20-pounder boat slides from Her Majesty's ship "Avon," Portsmouth Harbour, to the R. O. factory for the purpose of making the following alterations and additions, viz.:— *Bow slide.*—Taking out and remaking two cross bars, one fitted with fighting bolt hole, the other to suit the position required for the traversing bolt; raising two friction plates by adding blocks of wood 1-inch in thickness, for the purpose of giving more clearance from the platform, and rounding off the corners of the head of the slide to allow the necessary training. *Stern slide.*—Taking out and fitting two cross bars, one fitted with fighting bolt hole, the other to fit the rear block; making an elm block 23 inches in depth, and fitting the same to rear of slide; moulding, casting, boring, turning, filing, and fitting together one gun metal flap, and one gun metal catch for pivot flap; forging and screwing three iron bolts and nuts for securing the block to the slide, and forging and boring two iron stays for strengthening the same; forging and screwing eight coach screws and four bolts and nuts for securing the stays to the block and slide; forging, boring, and fitting two iron brackets with loops and rivets, and fitting to the rear block; altering three fighting bolts to suit the slides, and making one new key with chain, rounding off the head of slide to allow of the necessary training; also the cost of attendance of workmen making various alterations in accordance with the sugges tions of the officer commanding Her Majesty's ship "Excellent."	9 1 3	3 2 –½	5 7 9	17 11 –½	20 2 3½	
549—524 -	10 February 1868 - -	Cost of sending artificers and labourers to Her Majesty's ship "Minotaur," Portsmouth Harbour and Spithead, to repair four 9-inch 12-ton slides and carriages, by lengthening and steeling the tops of four trippers, and re-boring the stud holes, welding a new end to a broken adjusting lever, and forging, turning, and screwing five bolts for securing pivots to head of slide; also altering to new pattern the trippers of twenty-two 7-inch 6½-ton gun slides, by steeling the top of each, and re-boring the stud holes, and forging and fitting 18 split keys for roller pins of eccentrics.	10 11 11½	– 12 10¾	6 5 11	17 10 9¼	20 1 9¼	
550—524 -	8 February 1868 - -	Altering on board Her Majesty's ship "Excellent," the numbers on a 32 pounder gun 58-cwt., from 1,668 to 354, and an 8-inch 65-cwt. gun from 1,741 to 353; these guns were fitted on Major Palliser's principle; also attendance on board the mortar gun-boat attached to "Excellent," and repairing a 13-inch mortar bed, by removing the socket for receiving the trail, and refixing a new one of gun metal.	1 13 11	– 13 5	1 – 2	3 7 6	3 17 5	

No. 7.—Royal Ordnance Factories, Portsmouth—Statement (F.) Miscellaneous Services—*continued.*

			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
560—524 -	15 February 1868 - -	Attendance of workmen on board Her Majesty's ship "Excellent," Portsmouth Harbour, for the purpose of housing and adjusting the beds and coins of one 7-inch 6½-ton B. L. rear chock gun carriage, and one 32-pounder 58-cwt. common carriage.	- 15 2½	- 5 10	- 8 11	1 9 11½	1 14 4½
567—524 -	20 February 1868 - -	Making a gun-metal flap six inches longer than the service pattern, including the preparation of drawings; moulding, casting, turning, boring, and filing the flap, and attendance of artificers on board Her Majesty's gun-vessel "Stork," for the purpose of fitting it to a 7-inch M. L. R. gun slide.	1 - 5	1 10 6½	- 12 1	3 3 -½	3 12 3½
573—524 -	25 February 1868 - - 23 March 1867. (75—7—1689.)	Boring and tapping twenty 18-pounder 22-cwt. guns, and one 12-pounder howitzer, for the purpose of receiving studs for quill friction tubes with loops, including the conveyance of workmen and tools to and from Her Majesty's training ship "St. Vincent," Portsmouth Harbour.	- 16 10	- -	- 10 -	1 6 10	1 10 10
575—524 -	26 February 1868 - -	Cost of attendance of foreman on board of Her Majesty's ship "Hector," Portsmouth Harbour, and examining three iron slides.	- 2 7½	- -	- 1 7	- 4 2½	- 4 9½
577—524 -	27 February 1868 - - 20 January 1868. (57—2—17,067.)	Attendance of workmen on board Her Majesty's ship "Hector," Portsmouth Harbour, cleaning and adjusting the fittings of sixteen 7-inch 6½-ton gun carriages and slides. (Still in progress.)	9 5 10	- 6 3½	5 10 4	15 2 5½	17 5 5½
578—524 -	27 February 1868 - - 7 February 1868. (57—2—17,298.)	Cleaning and putting together a 7-inch 6½-ton iron gun carriage and slide on board Her Majesty's ship "Avon."	1 2 9	- - 10	- 13 6	1 17 1	2 2 5
582—524 -	29 February 1868 - - 27 February 1867. (57—2—17,456.)	Altering a 7-inch 6½-ton double plate iron carriage on board Her Majesty's ship "Excellent," including the forging and drilling, casting, turning, boring, and fitting of two iron brackets fitted with gun-metal sheaves, and fixing them to the sides of the carriage, to be used as snatch blocks for the winches of the running-in-and-out gear; forging, turning, and screwing two iron bollards with wooden bodies, and fixing the same to the slide for securing the ends of the training tackle when in a rough sea; forging the iron work complete for four swivel blocks, and moulding, casting, turning, boring, and fitting on four gun-metal sheaves; forging and turning one stud with T head for securing the end of preventor rope to the carriage; enlarging the two rear loops of slide, so as to take the swivel blocks and hooks of training gear at the same time.	17 2 -	1 6 -	10 3 4	28 11 4	32 14 7

586—524 -	3 March 1868 - -	Fitting two metal blocks to the fore part of an 8-inch 9-ton slide for the use of the stop handspike when training, and attendance of workmen on board Her Majesty's ship "Hector," drilling and lapping the slide, fixing the blocks, and adjusting the two front rollers; also painting a 7-inch 6½-ton gun slide.	2 - 7½	1 14 3¾	1 4 1	4 19 -¼	5 13 5¼
596—524 -	10 March 1868 - - 31 October 1867. (57—2—16,598.)	Cleaning and putting together the fittings of a 7-inch 6½-ton iron gun carriage and slide on board Her Majesty's ship "Ringdove."	- 11 8	- -	- 6 10	- 18 6	1 1 2
602—524 -	16 March 1868 - -	Sending workmen to Her Majesty's ship "Minotaur" at Spithead for the purpose of fitting hollow rollers filled with grease to a carriage, in order to test the general efficiency of the rollers when at sea and the guns firing battering charges.	- 17 1½	- -	- 10 2	1 7 3½	1 11 3½
607—524 -	17 March 1868 - -	Removing a broken hinged block from the rear of a 7-inch 6½-ton gun slide; forging, boring, and fitting a new hinge strap, and attendance of workmen on board Her Majesty's ship "Hector," Portsmouth Harbour, refixing the same to the slide.	- 9 5½	- 1 6	- 5 7	- 16 6½	- 19 -½
613—524 -	19 March 1868 - - 13 March 1868. (57—2—17,535.)	Fitting the sights, and adjusting the side scales to a 64-pounder, and four 20-pounder B. L. guns on board Her Majesty's ship "Pandora."	1 4 6	- -	- 14 6	1 19 -	2 4 10
628—524 -	26 March 1868 - -	Sending workmen to Her Majesty's ship "Bellerophon" at Spithead, for the purpose of taking a 9-inch 12-ton iron carriage and slide to pieces previous to being returned to store.	1 10 1	- -	- 17 9	2 7 10	2 14 10
632—524 -	30 March 1868 - - 7 December 1867. (57—2—16,862.)	Cleaning and putting together the fittings of an 8-inch 9-ton, and a 7-inch 6½-ton carriage and slide on board Her Majesty's ship "Royal Oak," including the conveyance of artificers and labourers to and from the ship.	1 6 11	- - 10½	- 16 -	2 3 9½	2 10 2½
544—530 -	6 February 1868 - - 5 February 1868. (57—2—17,253.)	Manufacturing a 20-pounder B. L. stern slide (for ships of the "Avon" class) of English oak, framed and fitted together with screw eye-bolts and nuts, raised upon a rear block made of elm, strengthened with two strong iron stays, secured with screw bolts and nuts, and fitted with gun-metal catch and flap for pivot, and iron brackets with loops for training purposes, including the forging, turning, and fitting complete the self-acting compressor arrangement; and forging, turning, and fitting one fighting bolt with three keys and chains. Also altering a bow slide by taking out and remaking two cross bars, one fitted with fighting bolt, the other to suit the position required for the traversing bolt. Raising two friction plates by adding blocks of wood one inch in thickness, for the purpose of giving more clearance from the platform, and rounding off the head of the slide to allow the necessary training, finishing, and painting both sides complete, and handing them over to the Military Store Department for transmission to Woolwich, to be sealed as patterns by the Ordnance Select Committee.	6 12 9	4 16 5¾	3 18 10	15 8 -¾	17 12 -¾
592—530 -	6 March 1868 - -	Making working drawings with figured dimensions of the bow and stern 20-pounder slide (for ships of the "Avon" class), for guidance of future manufacture.	- 8 4	- -	- 4 11	- 13 3	- 15 5

		Repairs for Commissariat Department:	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
82—530 -	5 April 1867 - -	Repairing a bread wagon by forging and fitting on a new scroll iron, and forging and screwing one bolt and nut, and painting the new work.	- 7 5	- 1 2	- 4 3	- 12 10	- 14 10
91—530 -	9 April 1867 - -	Repairing a bread wagon by making one pair of new shafts, forging and screwing eight bolts, forging two iron stays and key for bolt of shafts.	1 1 4	- 2 2	- 12 8	1 16 2	2 1 6
95—530 -	16 April 1867 - -	Repairing a bread wagon by making one pair of ash shafts, and fitting the same with the old ironwork; forging and fitting two iron plates, one staple, one ring, one clip for spring, two split keys, and forging and screwing nine bolts and nuts.	1 10 2	- 3 10	- 18 8	2 12 8	3 - 6
140—530 -	16 May 1867 - - -	Repairing a bread wagon by forging and fitting one scroll iron, and forging and screwing five bolts and nuts for fixing the same to the wagon.	7 1	- 1 -	- 4 1	- 12 2	- 14 1
141—530 -	16 May 1867 - - -	Repairing the fore carriage of a bread wagon, including the forging and screwing of two bolts and nuts.	- 6 11	- - 1	- 4 -	- 11 -	- 12 9
151—530 -	22 May 1867 - - -	Making slight repairs to the fittings of two meat wagons - - -	- 5 10	- -	- 3 5	- 9 3	- 10 7
157—530 -	27 May 1867 - - -	Making a new front for a bread wagon and fixing it complete, including the forging of four angle irons, and forging and screwing 14 bolts and nuts; also repairing the footboard and apron.	1 6 5	- 2 8¼	- 15 9	2 4 10¼	2 11 5¼
182—530 -	13 June 1867 - - -	Repairing a meat wagon by forging and fitting two scroll irons, and repairing one scroll iron and bolts and nuts of the fore carriage; making new pillow bed, forging and screwing six bolts and nuts; forging iron thimble-ring for splinter-bar, and two split keys for the locking and drag bolts; making and fixing ventilator to the side of wagon; repairing the head, and painting the whole complete, ready for use.	2 7 8	- 7 1	1 8 3	4 3 -	4 15 2
193—530 -	18 June 1867 - -	Repairing a meat wagon by forging and fitting new iron to splinter-bar; forging and fitting one chain and two split keys; forging and screwing five bolts and nuts; forging and fitting one linch-pin and washer; repairing the footboard and top of wagon, and painting the new work.	- 11 8	- 8 11¾	- 6 10	1 7 5¾	1 11 5¾
196—530 -	20 June 1867 - - -	Repairing a bread wagon by forging and fitting one scroll iron; forging and screwing eight bolts and nuts; forging splinter-bar plate, one pillow plate with socket for locking bolt and three staples, and repairing three chains for the fore carriage; forging and screwing four bolts and nuts; making new spring block and chain guide; repairing two scroll irons and one bolt with nut for the hind carriage; repairing the ironwork of the two doors, and hanging same; hardening up all the bolts and nuts, and painting the new work.	1 12 2	- - 5¼	- 19 1	2 11 8¼	2 19 6¼

210—530 -	26 July 1867 - - -	Repairing a bread wagon by forging and screwing 12 bolts and nuts; forging two eyes for splinter-bar; forging and fitting one long bolt with chain and key for fixing the shafts to the carriage; forging and fitting chain and key for locking scroll iron, stay chains, door shutter, and painting complete.	1 6 2	- 1 6	- 15 6	2 3 2	2 9 6	
216—530 -	3 July 1867 - - -	Repairing a wheel for a bread wagon, including new felloes, and bending, shutting, and re-shrinking on new tire.	- 19 1½	- 12 2	- 11 5	2 2 8½	2 8 11½	
227—530 -	9 July 1867 - - -	Repairing a bread wagon, including the making of a pair of ash shafts, and forging and fitting all necessary ironwork for the same; making new splinter-bar with two eye-bolts and nuts; one chain and key for locking bolt; forging and fitting one long bolt for connecting the shafts to the carriage with key and chain; forging and screwing two bolts and nuts, and band with eye for securing the roof; repairing six bolts and nuts for futchells; re-lining the wagon with ¾-inch boarding; screwing up and making secure all bolts and nuts, and repainting the whole ready for use.	1 19 4	- 18 7½	1 3 5	4 1 4½	4 13 2½	
234—530 -	16 July 1867 - - -	Repairing a meat wagon by making of new felloes, and bending, shutting, and shrinking four new tires; forging and fitting two linch-pins and washers for axles; forging and fitting three thimble eyes for splinter-bar; forging and fitting a long bolt with key and chain for connecting the shafts to the carriage; forging and fitting new clip for spring; making new rave, new catch for doors, two chains and staples for the top, and covering the same with canvas bound with leather, and painting the whole complete.	2 17 6⅓	2 12 -	1 14 1	7 3 7½	8 5 4½	
251—530 -	29 July 1867 - - -	Repairing a meat wagon by making and fitting new felloes to the four wheels, and bending the same with four iron tires, new ash shaft, and cross-bar; re-laying the arms of two axletrees; forging, turning, and fitting two new axle arms and four washers; forging and screwing four bolts and nuts for securing the springs; forging and fitting one eye and chain for splinter-bar, and one scroll iron, and re-setting two scroll irons; forging and fitting one plate and catch for the doors, and two staples for chain of doors; fixing the whole complete, ready for use.	4 7 6	2 14 -	2 11 10	9 13 4	11 2 2	
276—530 -	7 August 1867 - -	Repairing a meat wagon, including the forging and fitting of an iron hook for swingletree; forging and screwing two bolts and nuts for fastening irons to splinter-bar; forging and fitting four linch-pins and washers, repairing one spring and scroll iron, and painting the new work.	- 15 5	- 1 -	- 9 1	1 5 6	1 9 5	
285—530 -	14 August 1867 - -	Repairing a bread wagon by making a new splinter bar; forging and screwing 19 bolts and nuts; casting, turning, and fitting a metal bush, and plugging the same in box of wheels; forging and fitting two scroll irons, two stays for futchells, two linch-pins and washers, and iron for swingletree; one clip for splinter-bar and two split keys; re-laying the arms of two axletrees; repairing clip of spring; re-lining the body of wagon with ⅜-inch boarding; screwing up and securing all bolts, and painting ready for use.	2 19 6	- 11 5½	1 15 5	5 6 4½	6 1 11½

277	13 February 1861 (G. 45—290.)	Repairing various natures of vent pieces, as follows:—Facing and polishing 14 20-pounders; forging five 12-pounder and three 9-pounder crossheads and shackles; turning, shaping, and fitting the same to the vent-pieces.	2 18 4	6 13 4	4 2 3	13 18 11	15 14 4

278	26 February 1868 - - - (G. 45—304.)	Resighting eight 100-pounder 6¼-ton muzzle-loading guns, S. B., Nos. 4, 10, 12, 14, 22, 29 and 30, including manufacturing 10 sights breech tangent, 16 pivot patches, 64 screws preserving, and 64 screws fixing pivot patches, 16 pins keep, 8 pins friction tube, 8 plates guide, and 16 screws preserving plates guide; adjusting sights, drilling screw holes, fitting patches, cutting graduations on cascable loop, sighting, and preparing drawings showing the position of the elevating pivots.	14	18	5½	105	1	-½	62	10	3	182	9	9	205	15	11
279	13 February 1861 - - - (G. 45—74; 57—Woolwich—3156.)	Repairing guns and fittings, as follows:—Manufacturing copper vent, and re-venting 8-inch muzzle-loading gun, Experimental No. 244; coiling, welding, facing, and uniting five coils to form 1 A tube; boring out old tube, and breaking out the shell of 40-pounder breech-loading gun, Elswick Ordnance Company No. 101; rough and finish boring and turning the tube, and shrinking it into the gun; boring, lapping, chambering, rifling, screwing for copper, coppering, and finishing inside of gun after proof; repairing two 20-pounder breech-loading guns (Nos. 68 and 90), with 1 A tubes, as above, and finishing inside after proof; filing flaws in the bore of 40-pounder breech-loading gun No. 170; repairing one 40-pounder vent-piece, and fitting it with new crosshead and shackle, also repairing three 20-pounders, 37 12-pounders, and one 9-pounder; making one 40-pounder; copper ring for vent-piece, three 20-pounders, 18 12-pounders, and one 9-pounder.	90	-	-½	65	9	4¼	34	4	-	189	13	4¾	213	17	8¾
281	19 July 1864 - - - - (G. 24—375; 73—3—5512.)	Altering one 40-pounder 32 cwt. wrought-iron breech-loading gun R., as follows: enlarging vent slot and fitting studs to vent-hole.	-		-	1	5	7⅓	-	15	3	2	-	10½	2	6	1½
282	13 February 1861 - - - (G. 48—254; 57—Woolwich—3156.)	Repairing six 12-pounder vent-pieces, including forging, turning, and bending new shackles; forging, turning, and fitting new crossheads; making and fitting copper rings; facing and polishing vent-pieces, and altering crutch.	-	12	8	3	12	11	2	2	5	6	8	-	7	4	4
283	15 April 1867 - - - - (G. 45—77; 5—Gen. No.—4313.)	Manufacturing the undermentioned fittings for sealing as patterns (one of each nature): crutches, iron 40-pounder with screws. Gauges, vent, sets of four and nine. Instruments, taking impressions of vents with gutta percha. Knives, cleaning ordnance 3-pounder. Lead, packing for hind and fore sights. Rings, copper vent-piece, 40, 20, 12, 9, and 6-pounders. Scales, brass tangent for 3 and 24-pounder guns and 5½-inch howitzer. Scales, wood tangent, L. S. for 8-inch, 60 cwt.; 32-pounders, 50, 48, 45, 40, and 32 cwt.; 18-pounders, 22, 20, and 15 cwt.; 9-pounders, 28 and 24 cwt., and 6-pounder, 17 cwt. Scales, wood side for 24-pounder bronze howitzer. Sights, with screws and lead packing, for cast-iron guns, 8-inch 60 and 50 cwt., hind and fore; 32-pounders, 50, 48, 45, 40, 39, and 32 cwts.; 18-pounders, 22, 20, and 15 cwt., hind and fore; carronades, 9-pounder, 24 cwt., 6-pounder, 17 cwt., hind and fore. Sights, fore, for 6-pounder bronze gun, L. S.; centre hind and tangent scale for W. I. 150-pounder S. B. gun. Springs for holding knives 3-pounders. Tools sighting, drills and taps for fixing screws, angular spirit level, punches steel, scribers, wrenches for tap, vents copper; and each article labelled in accordance with the vocabulary 1867.	4	2	-½	44	2	4¼	26	5	1	74	9	5¾	83	19	7¾

300	13 February 1861 - - - (G. 45—98; 57—W—3156—Store.)	Repairing one 7-inch breech-loading gun, R., No. 177, and one 12-pounder breech-loading gun, R., No. 11, with new 1 A tubes, boring out old tubes and breaking out shells, coiling, welding, facing, and uniting ten 1 A coils to form tubes, turning, boring, gauging, and shrinking into guns, cutting off end of tubes, broaching, chambering, rifling, and finishing inside; also repairing seven 40-pounders, six 20-pounders, and 17 12-pounder vent pieces. Adjusting sights and browning six 12-pounder guns, and fitting three new sight-rings.	75 5 9	83 3 10¾	43 14 7	202 4 2¾	228 - 8¾
301	16 June 1868 - - - - (G. 48—381; 57—2—18,093.)	Repairing muzzle of 8-inch 9-ton muzzle-loading gun, No. 87, by filing and lapping bore, and facing muzzle; adjusting screw holes and sighting.	- -	1 10 -	- 17 11	2 7 11	2 14 1
302	13 February 1861 - - - (G. 45—106; 57—Woolwich—3156.)	Repairing 7-inch breech-loading gun, R., No. 341, with new 1 A tube, boring out old tube and breaking out shell, coiling, welding, facing, and uniting five 1 A coils to form tube, turning, boring, gauging, and shrinking into gun, cutting off end of tube, broaching, chambering, rifling, and finishing inside (in broaching, the tube was found defective and had to be replaced); vent pieces repaired, 7-inch, five, 40-pounder, 10, and 20-pounder, one; filing flaws of 7-inch and 20-pounder guns, manufacturing rings copper vent, 40-pounders, eight, and 20-pounder, one; re-venting, adjusting sights, and fitting new steel stopper to 64-pounder breech-loading wedge gun, No. 83.	78 8 1½	59 18 5½	33 2 5	171 9 -	193 6 11
303	13 February 1861 - - - (G. 39—290; 57—Woolwich—3156.)	Repairing nine wrought iron breech-loading guns as follows: boring out old tubes, and breaking out the shells of five 7-inch 82 cwt., Nos. 11, 18, 74, 76, and 106, and taper boring the guns, coiling, welding, facing, and uniting the tubes, rough and finish boring and turning the same, and shrinking them into the guns, finish boring, lapping, chambering, rifling, fitting iron breech-rings, and finishing inside after proof. Repairing with 1 A tubes, as above, two 40-pounders, 35 cwts., Nos. 12 and 146, one 20-pounder, No. 75, and one 6-pounder, No. 73, and fitting them with copper breech rings. Repairing six 7-inch vent pieces, one 40-pounder, four 12-pounders, and one 9-pounder.	167 8 8	147 5 4½	66 5 5	380 19 5½	429 12 6½
309	13 February 1861 - - - (G. 48—291; 57—W—3156.)	Repairing nine 7-inch vent pieces, and four 20-pounders, as follows: forging, turning, and fitting new shackles to four 7-inch vent pieces, facing and polishing nine; also facing and polishing four 20-pounders, and fitting them with new copper rings.	- 13 3¼	8 12 -	5 2 5	14 7 8¼	16 4 2¼

310	13 February 1861 - - - (G. 45—356.)	Completing 9-inch wrought iron 12-ton muzzle-loading gun, R., experimental, No. 331, for drill purposes, as follows: drilling sight holes, and cutting axis lines, cutting grooves for handspikes, drilling screw holes for pivot, fitting patches, turning screw pin, making four fixing screws, turning, screwing, and fitting two steel pivots, cutting graduations, repairing cascable, milling, boring, and finishing end, adjusting sights, and sighting gun.	– 14 1	11 5 11	6 14 6	18 14 6	21 2 4	
313	13 February 1861 - - - (G. 39—316; 57—Woolwich—3156.)	Repairing five 40-pounders and one 6-pounder breech-loading guns, R., Nos. 70, 94, 95, 117, 190, and 85, with new 1 A tubes, boring out old tubes and breaking out shells, coiling, welding, facing, and uniting 1 A coils to form tubes, turning, boring, gauging, and shrinking into guns, cutting off ends of tubes, broaching, chambering, rifling, and finishing inside (in broaching the 6-pounder, the tube was found defective, and had to be replaced); vent-pieces repaired, 40-pounders, 16; 20-pounders, three; 12-pounders, four; manufacturing breech screws, 40-pounders, five; indicator rings, five, bushes, breech-irons, 7-inch, two; bushes, breech copper, 40-pounders, 22; 20-pounders, five; 12-pounders, one; 9-pounders, three; 6-pounders, three; rings, copper, vent, 40-pounders, 14; 12-pounders, four; adjusting sights of 20-pounders breech-loading guns, R., Nos. 14 and 15.	354 16 –½	113 13 3¼	50 5 4	518 14 7¾	584 19 7¾	
314	25 July 1868 - - - - (G. 48—301.)	Preparing drawings of guide plates, for Ordnance Factory, Portsmouth	– – 6	– 1 9	– 1 –	– 3 3	– 3 8	
316	3 September 1868 - - - (57—2—18,584.)	Attendance of examiner at Devonport, to examine four 9-inch guns on board H. M. S. "Royal Albert;" the cost for travelling is included under the head of General Expenses.	-	3 12 10	5 13 10	9 6 8	9 6 8	
321	20 February 1867 - - - (G. 45—377; 85—G. N.—1005.)	Altering 7-pounder muzzle-loading gun, R., No. 80, as proposed by Colonel Milward, including cutting off old cascable, boring and screwing breech, turning, screwing, and fitting new cascable, making steel breech tangent and trunnion sights, and fitting them to the gun. Preparing the necessary drawings for the above service.	– 16 9	13 9 1	8 – 1	22 5 11	25 2 7	
322	23 August 1866 - - - (G. 48—317.)	Repairing three cast-iron guns, as follows: cone venting, one 24-pounder 50-cwt., one 32-pounder 58-cwt., and through venting, one 18-pounder 42-cwt.	– 12 6	1 8 2	– 16 9	2 17 5	3 4 10	
323	13 February 1861 - - - (G. 45—380.)	Moulding, casting, turning, screwing, and fitting 10 metal patches, making ten steel pivots, ten keep pins, and 80 preserving screws; preparing five 9-inch 6½-ton wrought-iron muzzle-loading guns for H.M.S. "Windsor Castle," as follows: drilling and tapping screw holes, cutting graduations, adjusting sights, and sighting.	6 11 2¾	38 2 2	22 13 6	67 6 10¾	75 18 10¾	
324	13 February 1861 - - - (G. 48—322.)	Attendance of artificer at Woolwich Dockyard for the purpose of adjusting sights of guns on board H.M.S. "Rocket."	- -	– 10 7½	– 6 4	– 16 11½	– 19 3½

361	13 February 1861 - - - (G. 45—446; 57—Woolwich —3156.)	Artificer disconnecting the elevating arcs from guns at the Royal Marine Barracks, Woolwich.	- -	- 2 6	- 1 6	- 4 -	- 4 7
364	13 February 1861 - - - (G. 39—455; 57—Woolwich 3156.)	Repairing three 7-inch, Nos. 88, 204, and 411, two 40-pounders, Nos. 53 and 108, and one 12-pounder, No. 74, breech-loading guns, R., with 1 A tubes; boring out old tubes and breaking out shells, coiling, welding, facing, and uniting 1 A coils to form tubes, turning, boring, gauging and shrinking into guns, cutting off ends of tubes, broaching, chambering, rifling, and finishing inside (in broaching No. 88 the tube was found defective and had to be replaced); also repairing four 7-inch and one 12-pounder vent-pieces with new cross heads and shackles, and filing flaws off bore of 20-pounder gun, No. 113.	258 11 2¾	128 12 5¾	66 12 5	453 16 1½	511 15 3½
366	13 February 1861 - - - (G. 39—466; 57—Woolwich 3156.)	Repairing one 7-inch, No. 262, three 40-pounders, Nos. 134, 282, and 292, and one 20-pounder, No. 40, breech-loading guns, R., with new 1 A tubes; boring out old tubes and breaking out shells, coiling, welding, facing, and uniting 1 A coils to form tubes; turning, boring, gauging, and shrinking into guns, cutting off ends of tubes, broaching, chambering, rifling, and finishing inside (in boring the tube for No. 134 it was found defective, and had to be replaced). Vent pieces repaired; 25 7-inch, eight 40-pounders, 13 20-pounders, four 12-pounders, and one 9-pounder. Forging, turning, screwing, and fitting handles to nine 40-pounder levers. Manufacturing bushes, breech irons, 13 7-inch, rings, copper vent, two 40-pounders, four 20-pounders, and five 12-pounders.	180 3 2¼	104 8 9½	51 11 2	336 3 1¾	379 1 9¾
370	20 November 1866 - - - (G. 32—541; 73—3—7789.)	Repairing 7-inch 6½-ton wrought-iron muzzle-loading gun, R., No. 1, Experimental No. 297, with new steel tube, as follows: boring out old tube and breaking out the shell, rough turning and boring steel block, and tempering it in oil, finish turning after tempering, and shrinking it into the gun; rough and finish turning, and screwing cascable, and fitting it in the gun, cutting gas channel, finish boring, broaching, lapping, rifling, venting, fitting muzzle studs, cutting graduations, rounding hole of cascable, and adjusting sights.	154 7 8¼	29 6 5	16 19 8	200 13 9¼	226 6 4½
376	13 February 1861 - - - (G. 32—550; 57—Woolwich 3156.)	Repairing 20-pounder, No. 59, breech-loading gun, R., with new 1 A tube; boring out old tube and breaking out shell; coiling, welding, facing, and uniting 1 A coils to form tube; turning, boring, gauging, and shrinking into gun, cutting off ends of tube; broaching, chambering, rifling, and finishing inside (in chambering, the tube was	57 15 4½	34 1 11	17 18 -	109 15 3½	123 15 7½

		found defective and had to be replaced) repairing 7-inch breech-loading gun, R., No. 235, with new E. coil; vent pieces repaired, 7-inch, one; 40-pounder, 15; 12-pounder, two; manufacturing bushes, breech irons, 7-inch, two; rings, copper, vent, 40-pounder, 15; 12-pounders, two.													
377	13 February 1861 - - - (G. 39—479; 57 — Woolwich —3156.)	Repairing 7-inch breech-loading gun, No. 273, and 9-pounder gun, No. 4, with new 1 A tubes; boring out old tubes and breaking out shells; coiling, welding, facing, and uniting 1 A coils to form tubes; turning, boring, gauging, and shrinking into guns; broaching, chambering, rifling, and finishing inside; repairing 7-inch gun, No. 257, 40-pounder gun, No. 472, with new breech bushes, &c., and repairing four vent pieces for 7-inch breech-loading guns; four 40-pounders, and one nine pounder, including making new copper rings for the same.	47	6	11	64	11	5	32	6	6	144	4	10	162	13	4
379	13 February 1861 - - - (G. 45—244; 57—Woolwich 3156.)	Repairing 61 68-pounder shot bearers, 21 32-pounders, 30 Addison's, one 7-inch 82 cwt., and one 64-pounder, three 68-pounder gauges for hot shot, and 62 32-pounders; also repairing 73 pairs of tongs for shot furnaces.	7	10	11½	49	19	5½	29	14	8	87	5	1	98	7	11
383	13 February 1861 - - - (G. 39—498; 57—Woolwich 3156.)	Repairing 7-inch, No. 42, breech-loading gun, R., with new 1 A tube; boring out old tube and breaking out shell; coiling, welding, facing, and uniting 1 A coils to form tube; turning, boring, gauging, and shrinking into gun; cutting off ends of tube, broaching, chambering, rifling, and finishing inside; vent pieces repaired, 7-inch, two; 40-pounder, 15; 12-pounder, two; 9-pounder, one, and 6-pounder, one; manufacturing bushes, breech irons, 7-inch, three; rings, copper, vent, 40-pounder, 14, and 12-pounder, two; enlarging water hole, and bevelling breech thread of 6-pounder breech-loading gun, R., No. 32.	62	6	5½	36	2	8	18	16	1	117	5	2½	132	4	6½
386	23 September 1865 - - - (G. 32 — 200 and 204; 57 —Woolwich—3156.)	Completing repairs of 7-inch 82-cwt. breech-loading gun, R., finish turning and boring chase, gauging and shrinking B tube, finishing inside, &c.	2	17	10	7	6	–	4	5	4	14	9	2	16	5	11
388	13 February 1861 - - - (G. 46—207; 57—Woolwich —3156.)	Adjusting sights, manufacturing two copper vents, and re-venting two 68-pounder cast-iron guns, Experimental Nos. 283 and 284, converted on Major Palliser's principle.	–	7	11¼	1	2	3	–	13	3	2	3	5¼	2	9	–¼
397	13 February 1861 - - - (G. 32—260.)	Completing the repair of 7-inch 82-cwt. breech-loading gun, R., No. 15, including extra and finish boring, chambering, broaching, rifling, fitting single bush, and finishing inside after proof.	–	10	9	10	14	2	5	14	9	16	19	8	19	2	10
401	13 February 1861 - - - (G. 32—272.)	Repairing one 7-inch breech-loading gun, R., with new 1 A tube; boring out old tube, and breaking out shell; coiling, welding, facing, and uniting 1 A coils to form tube; turning, boring, gauging, and shrinking into gun, cutting off end of tube, broaching, chambering, rifling, and finishing inside.	26	2	1	12	7	7	7	7	4	45	17	–	51	14	1

411	13 February 1861 - - - (G. 48—230; 57—Woolwich—3156.)	Manufacturing 95 gun-metal clamps for scales tangent wood, for 7-inch 6½ ton muzzle-loading guns, R., including moulding, casting, and fitting with screw pins, &c.	4 11 4	24 17 5¼	14 16 –	44 4 9¼	49 17 9¼
417	13 February 1861 - - - (G. 45—47; 51—Woolwich—3156.)	Repairing one 20-pounder 13-cwt. breech-loading gun, R.; cutting off and boring out old tube, broaching B tube; coiling, welding, facing, and uniting four 1 A coils to form 1 A tube; boring, turning, gauging, and shrinking it into the gun. Boring, broaching, screwing for copper, coppering, chambering, rifling, and completing up to proof; also facing and polishing two vent pieces.	13 7 –¾	11 2 11	5 15 7	30 5 6¾	34 2 10¾
418	13 February 1861 - - - (G. 48—229; 57—Woolwich—3156.)	Repairing 7-inch 6½-ton wrought-iron muzzle-loading gun, R., as follows: cutting grooves for handspikes, drilling and tapping screw holes for pivot patch, turning, screwing, and fitting brass patch for pivot, shortening trunnion, and cutting axis lines, plugging up old sight holes, repairing sights, and re-sighting.	– 16 10	5 19 6	3 11 2	10 7 6	11 13 11
422	6 February 1868 - - - (G. 48—439; 57—Devonport—1883.)	Manufacturing stores for Devonport, including two drilling posts, six pairs of swedge blocks, nine moulding boxes, two fullers, and two cutters.	18 9 6¼	42 19 9½	25 11 8	87 – 11¾	98 3 2¾
423	13 February 1861 - - - (G. 45—278; 57—Woolwich—3156.)	Repairing and cutting arrow on 18 stamps, for marking iron work -	- -	1 10 –	– 17 11	2 7 11	2 14 1
424	26 March 1868 - - - (G. 45—280; 80—G. N.—1323.)	Examining and taking impressions of 12-pounder bronze gun, Experimental No. 337.	– 11 –½	– 16 3	– 9 8	1 16 11½	2 1 8½
474	27 March 1865 - - -	Expenses in connection with the instruction of officers and non-commissioned officers of the Royal Artillery, including salary and military pay of captain instructor.	39 13 4½	284 3 6¼	480 3 7	804 – 5¾	830 8 5¾
477	20 February 1867 - - - G. 45—281; 85—Gen. No.—1005.)	Manufacturing four spikes, spring, of various lengths, required for sealing as patterns to govern the manufacture of the same.	– – 3¾	– 1 10¾	– 1 1	– 3 3½	– 3 7½
478	13 February 1861 - - - (G. 45—288.)	Repairing and cutting new thread of three taps, parts of tools for venting ordnance.	- -	– 6 9½	– 4 –	– 10 9½	– 12 1½

479	10 December 1867 - - - (G. 48—249; 57—22—10,261.)	Manufacturing six gun-metal bushes, as follows:—Moulding, casting, turning, and fitting them for service on board H. M. S. "Lord Panmure," also casting a copper hammer, weighing 2 lbs.	1 6 5	– 15 7½	– 9 4	2 11 4½	2 17 10½	
481	29 September 1868 - - - (G. 48—323.)	Manufacturing tools for venting 9-inch ordnance, at Devonport, consisting of the under-mentioned articles:—One cone rimer, with spring, four taps, two pointers, and two routers. Artificer to Devonport to re-vent 9-inch M. L. 12-ton guns R. Cost of travelling is included under the head of General Expenses.	1 19 3½	8 16 9	10 13 9	21 9 9½	22 12 8½	
511	2 April 1868 - - - - (G. 45—287.)	Turning, drilling, and finishing a platinum and steel vent, and reventing 9-inch gun, Experimental No. 333.	4 2 3	2 2 –	1 5 –	7 9 3	8 8 3	
513	4 April 1868 - - - - (G. 48—245; 57—8—5640.)	Cutting an armour plate in two pieces, for Edinburgh Museum of Science and Art.	- -	2 10 –	1 9 10	3 19 10	4 10 –	
514	20 February 1867 - - - (G. 45—290; 85—G. N.—1005.)	Manufacturing nine spikes, spring, for various natures of ordnance, for sealing as patterns.	– 1 9¾	– 3 10½	– 2 4	– 8 –¼	– 9 –¼	
515	20 February 1857 - - - (G. 48—246; 85—G. N.—1005.)	Drilling and fitting two screw plugs into 68-pounder bronze Experimental gun, No. 202, and marking on the screw heads the axis of the bore, and arrow indicating the direction of muzzle.	- -	– 15 –	– 9 –	1 4 –	1 7 1	
516	20 February 1867 - - - (G. 45—293; 85—G. N.—1005.)	Attendance of examiner and labourer at Shoeburyness, to examine and take impressions of 10-inch 18-ton wrought-iron muzzle-loading gun, R., Experimental No. 323, and remove burr caused by the bursting of a shell in the bore. The cost of travelling is included under the head of General Expenses.	8 13 10¼	4 – 4½	5 16 –	18 10 2¾	18 10 2¾	
517	20 February 1867 - - - (G. 45—292; 85—G. N.—1005.)	Coiling, parting, and planing face of parting of wrought iron plate, for experiment to test plate made as proposed by Captain F. M. Smith, Royal Artillery, also flattening the plate under the steam hammer.	117 17 4	38 17 9	23 2 10	179 17 11	202 17 5	
518	20 February 1867 - - - (G. 45—295.)	Sighting and completing one 9-inch and one 8-inch wrought iron muzzle-loading howitzers, R., including manufacturing sights, pivot patches, shot bearer (for 9-inch), drawings, tools, gauges, &c.	9 – –	26 7 –	15 13 7	51 – 7	57 10 11	
520	20 February 1867 - - - (G. 45—311.)	Drilling and screwing holes in 68-pounder, Experimental bronze gun, No. 202, turning, screwing, and drilling cylinders and plugs, and fitting them in the gun for further experiment, also fitting two Rodman's pressure gauges.	2 5 6¼	21 15 –	12 18 10	36 19 4¼	41 13 9¼	
522	20 February 1867 - - - (G. 45—314; 85—G. N.—1005.)	Stamping the weight, breech preponderance, and Experimental No. 361, on one of the trunnions of Mr. Whitworth's 9-inch steel 15-ton muzzle-loading gun, R., also making and fitting studs on the muzzle to support a quadrant.	- -	– 18 –	– 10 9	1 8 9	1 12 5	
523	20 February 1867 - - - (G. 45—317; 85—G. N.—1005.)	Preparation of drawings of 9-inch 12-ton guns on Mr. Krupp's, and Mr. Stewart's improved systems.	– 10 6	10 3 2	6 1 –	16 14 8	18 17 2	
524	20 February 1867 - - - (G. 45—319; 85—G. N.—1005.)	Reducing 68-pounder Jeffrey's block, Experimental No. 93, one calibre in length for further experiment.	- -	1 10 –	– 17 11	2 7 11	2 14 1

525	20 February 1867 - - - (G. 48—24; 85—Gen. No.—1005.	Converting a 10½-inch smooth bore muzzle-loading gun into a 9-inch muzzle-loading gun, R., Experimental No. 203; boring out cascable, rough turning steel block, and tempering in oil, forging, turning, screwing, and fitting in new cascable; boring out old tube, boring and turning steel block and shrinking it into the gun; finish boring, broaching, lapping, rifling, rounding muzzle, adjusting sights, casting and fitting pivot patches, venting, fitting studs on muzzle, and completing the gun for experiment.	323 18 1¼	65 13 -½	38 5 4	427 16 5¾	482 10 2¾
527	20 February 1867 - - - (G. 48—258; 85—G. N.—1005.)	Examining a bronze gun, in order to ascertain how much the calibre should be increased to insure a true bore, and the thickness of metal throughout.	- -	- 12 6	- 7 5	- 19 11	1 2 5
529	27 May 1868 - - - - (G. 48—262; 57—24—9916.)	Manufacturing a wrench for elevating racks for H.M.S. "Excellent"	- 2 11¼	- 18 9¼	- 11 2	1 12 10½	1 17 -½
531	20 February 1867 - - - (G. 48—266; 85—Gen. No.—1005.)	Preparing 10-inch muzzle-loading 18-ton gun, Experimental No. 362, for experiment; boring, broaching, and rifling, as proposed by Mr. Charles Lancaster; making vent with iridio platinum tip, venting gun, rounding muzzle, fitting studs to support a quadrant; also preparing gauges, fitting up tangent bar and rifling head.	11 10 4	27 18 4	16 12 4	56 1 -	63 4 2
532	20 February 1867 - - - (G. 45—126; 85—Gen. No.—1005.)	Repairing two 8-inch muzzle-loading 9-ton guns, R., Experimental Nos. 198 and 199, with steel tubes, as follows:—Removing cascables, forging, turning, screwing, and fitting in new cascables, boring out old tubes, rough and finish boring, turning and tempering steel tubes and shrinking them in the gun; coiling, welding, facing, turning, and boring coils for jackets or chase, turning off old chase and shrinking on the new ones, rough and finish turning outside of guns, boring, broaching, lapping and rifling, rounding muzzle, drilling sight holes, venting, cutting grooves for handspikes, fitting studs for quadrant, and sighting complete.	362 19 9¼	128 19 8½	73 6 6	565 5 11½	637 9 4½
534	- - - - - (G. 48—290.)	Attendance of examiner and labourer at Shoeburyness to examine and take impressions of 10-inch 18-ton W. I. muzzle-loading gun, R., Experimental No. 328. The cost of travelling is included under the head of "General Expenses."	7 14 6½	2 4 4½	3 12 4	13 11 3	13 11 3
535	20 February 1867 - - - (G. 48—287; 85—G. N.—1005.)	Preparation of drawing, boring, rifling, and adjusting sights of 12-pounder 8-cwt. wrought iron muzzle-loading gun, Experimental No. 342.	- -	3 8 -	2 - 5	5 8 5	6 2 1

536	20 February 1867 - - - (G. 48—294.)	Drilling two holes in 11-inch armour plate, and a hole two inches in diameter and seven inches deep into a steel shot (which had been fired at the 11-inch plate), to enable it to be set up; also making stand for shot.	1 15 2½	4 7 8½	2 12 2	8 15 1	9 17 5
537	20 February 1867 - - - (G. 48—67; 85—G. N.—1005.)	Cutting off muzzle section of two condemned barrels of 7-inch breech-loading and 64-pounder guns, cleaning and stamping the pieces with the calibres, &c.	- -	1 10 –	– 16 8	2 6 8	2 12 8
538	20 February 1867 - - - (G. 45—151.)	Sighting and completing 11-inch muzzle-loading 23-ton gun, R., including the manufacture of sights, pivot patches, derrick, shot bearer, drawings, tools, gauges, &c.	6 3 –	24 18 –	14 16 4	45 17 4	51 14 6
540	27 July 1868 - - - - (G. 45—351.)	Sighting and finishing after proof one 9-inch muzzle-loading 12-ton gun, R., including cost of sights, gauges, tools, &c. for experiment.	4 8 7¾	16 10 4½	9 13 4¾	30 12 5	34 10 8
542	20 F bruary 1867 - - - (G. 48—299; 85—G. N.—1005.)	Moulding and casting two gun metal patches, turning and fitting two steel pivots and two keep pins, and making a drawing showing the elevating patch, &c.; also the attendance of an artificer at Shoeburyness fitting patches to 10-inch 18-ton W.I. muzzle-loading gun, R., Experimental No. 323, to adapt it to the muzzle pivoting carriage of Lieut.-Colonel Inglis' construction; attendance of examiner and labourer at Shoeburyness. The cost of travelling is included under the head of "General Expenses."	1 17 4	10 14 9	11 4 4	23 16 5	24 16 4
545	20 February 1867 - - - (G. 45—368.)	Forcing a shot through a 12-pounder 8-cwt. breech-loading gun, R., which had become jammed in the bore while firing at Shoeburyness.	- -	2 10 –	1 9 9	3 19 9	4 9 11
546	20 February 1867 - - - (G. 45—372; 85—G. N.—1005.)	Lining, and sighting with 68-pounder sights 8-inch muzzle-loading gun, Experimental No. 347, to test Mr. Parsons' method of lining cast iron guns with internal tubes.	- -	– 15 9	– 9 4	1 5 1	1 8 4
547	20 February 1867 - - - (G. 45—371; 85—G. N.—1005.)	Attendance of an examiner at Shoeburyness to examine 9-inch wrought iron muzzle-loading gun, R., Experimental No. 327; the cost of travelling is included under the head of "General Expenses."	7 13 11¾	1 13 7	1 12 2	10 19 8¾	10 19 8¾
548	20 February 1867 - - - (G.45—374; 85—G.N.—1005.)	Cutting off section of 6-pounder breech-loading gun, No. 55, for examination.	- -	– 8 –	– 4 9	– 12 9	– 14 4
549	- - - - - G. 48—307.)	Cleaning, taking impressions, and reducing Jeffrey's 68-pounder block, No. 93, one calibre in length.	- -	1 15 –	1 – 10	2 15 10	3 3 –
550	20 February 1867 - - - (G. 48—308; 85—G. N.—1005.)	Repairing injuries in bore of 9-inch 12-ton W.I. muzzle-loading gun, R., Experimental No. 327, cutting axis lines, sighting, cutting grooves for handspikes, drilling sight holes, and fitting muzzle studs, fitting studs for quadrant, tapping screw holes in gun, fitting old pivot patches, and plugging up old sight socket holes, adjusting breech tangent sight socket, and venting gun.	1 14 8	15 – 3	8 18 8	25 13 7	28 19 2
551	20 February 1867 - - - (G. 48—318; 85—Gen. No. —1005.)	Repairing 68-pounder 95-cwt converted gun, R., Experimental No. 347, as follows:—Manufacturing steel and copper vent, removing old vent, and venting gun, and carrying out the programme of experiment at proof butt.	4 5 6¼	11 7 9	8 19 11	24 13 2¼	27 16 3¼

552	20 February 1867 - - - (G. 45—382; 85—Gen. No.—1005.)	Cutting off, turning, testing and marking respectively from one to six pieces from the following specimens of armour-plates (in connection with the subject of the late experiments against iron casemates) of rolled *versus* hammered iron plates, viz.:—Piece of 15-inch rolled plate; piece of 15-inch hammered plate; piece of exterior plate, Plymouth Breakwater Fort Target; piece of 5-inch plate, Plymouth Breakwater Fort Target; piece of inner plate, below port, Plymouth Breakwater Fort Target; piece of exterior plate, experimental casemate.	- -	8 12 10	5 2 10	13 15 8	15 10 9
553	20 February 1867 - - - (G. 48—328.)	Fitting 7-inch 7-ton wrought-iron muzzle-loading gun, R., No. 28, with two pivot patches, two keep pins, and eight preserving screws. Manufacturing vent, re-venting, drilling holes for friction pin, and guide plate.	1 5 -¼	3 17 3½	2 5 11	7 8 2¾	8 7 7¾
554	20 February 1867 - - - (G. 48—332; 85—G. N.—1005.)	Repairing 12-pounder wrought-iron breech-loading gun, R., No. 8, as follows:—Manufacturing copper breech ring, and re-coppering gun, repairing one vent-piece, and fitting it with new copper breech ring, &c.	- 1 5¼	- 11 2	- 6 8	- 19 3¼	1 1 9¼
555	- - - - - - - (G. 45—397; 3778—O.S.C.; 5911—3198.)	Two brass plates engraved, bearing the following inscription:—"This model of Gibraltar completed 1865, from surveys of Lieutenant Charles Warren, R.E., under the direction of Major General Fromes, R.E., coloured after nature by Captain B. A. Branfill, 86th Regiment, 1868; scale $\frac{1}{600}$, or 50 feet to one inch."	- 12 4¾	5 - -	2 19 6	8 11 10¾	9 13 10¾
557	20 February 1867 - - - (G. 45—392; 85—G. N.—1005.)	Cutting four pieces from various parts of 9-inch wrought-iron breech-loading gun, R., No. 281, which burst at proof.	- -	3 10 -	2 1 8	5 11 8	6 6 -
559	6 November 1867 - - - (G. 45—214; 80—Gen. No.—1229.)	Sighting and finishing after proof a 7-pounder steel muzzle-loading gun, 150 lbs., R., similar to those on service with the Abyssinian Expedition (the material for sights was included in the cost of gun. *See* Balance Sheet 1867–8.)	- -	7 18 3	4 7 9	12 6 -	13 17 2
560	20 February 1867 - - - (G. 45—395; 85—G. N.—1005.)	Lining and sighting 64-pounder cast-iron gun which had been converted from 32-pounder on Major Palliser's principle.	- -	- 15 4	- 9 1	1 4 5	1 7 7
561	20 February 1867 - - - (G. 48—146; 85—Gen. No.—1005.)	Attendance of examiner and labourer at Shoeburyness, to examine and take gutta percha impressions of 10-inch 18-ton muzzle-loading gun, R., Experimental No. 323. The cost of travelling is charged under the head of "General Expenses."	4 8 -	1 17 7	2 7 2	8 12 9	8 12 9
563	20 February 1867 - - - (G. 48—148; 85—G. N.—1005.)	Testing the endurance of two 64-pounder guns, Experimental Nos. 348 and 349, lined on Major Palliser's principle; also taking impressions of the bores in gutta percha.	23 - 10½	16 8 4	8 8 4	47 17 6½	53 19 9½

564	20 February 1867 - - - (G. 45—401; 85—Gen. No.—1005.)	Repairing instruments for ascertaining the velocity of projectiles, manufacturing two spanners, and attendance of an artificer at the proof butt to render assistance to Sir W. Armstrong's foreman; repairing and fitting several broken plugs, and making new ones; also extracting shot from bore for experiment with Captain Noble's chronograph.	– – 3½	4 14 10	2 16 5	7 11 6½	8 11 4½
566	20 February 1867 - - - (G. 45—410.)	Manufacturing steel and platinum vent, and attendance of an artificer at Shoeburyness to re-vent 10-inch 18-ton wrought-iron muzzle-loading gun, R., Experimental No. 323.	4 3 3	7 5 –	8 – 10	19 9 1	19 16 3
567	20 February 1867 - - - (G. 45—409.)	Fitting eccentric trunnion hoop to 12-inch 25-ton wrought-iron muzzle-loading gun, R., required for experiment to test service carriage and platform for 12-inch guns.	1 5 2	9 6 5	5 10 11	16 2 6	18 3 5
568	20 February 1867 . - - (G. 45—415; 85—G. N.—1005.)	Manufacturing steel and platinum vent, and attendance of an artificer at Shoeburyness to re-vent 12-inch 25-ton wrought-iron muzzle-loading gun, R, Experimental No. 335. The cost of travelling is included under the head of "General Expenses."	4 5 3	6 4 8	7 9 8	17 19 7	18 6 9
569	20 February 1867 - - - (G. 48—352; 85—G. N.)	Altering die for stamping papers, from Ordnance Select Committee, to Director General of Ordnance, Royal Arsenal.	- -	1 2 –	– 13 1	1 15 1	1 19 7
570	20 February 1867 - - - (G. 48—169; 85—Gen. No.—1005.)	Converting a 40-pounder breech-loading 35-cwt. gun, R. (of obsolete pattern) into a muzzle-loading, for experiment with the Rev. F. Bashforth's chronograph, as follows:—Forging, turning, boring, and shrinking on a breech coil; turning breech of gun to receive coil and cascable; forging, turning, screwing, and fitting cascable and breech complete; boring the gun up to five inches, re-rifling, marking Experimental "No. 350" on one of the trunnions, adjusting sights, fitting studs on muzzle to support a quadrant, and completing the gun for experiment (an additional breech coil had to be made for this gun in place of one defective).	25 16 10½	31 6 2	16 11 9	73 14 9½	83 3 1½
571	20 February 1867 - - - (G. 48—353; 85—G. N.—1005.)	Marking Experimental No. 367 on one of the trunnions of 1-pounder 3-cwt. bronze gun.	- -	– 2 6	– 1 6	– 4 –	– 4 7
572	21 December 1868 - - - (G. 48—356.)	Examining the bore of 2-inch bronze gun in use at proof butt, in experiment with gunpowder.	- -	– 6 5½	– 3 10	– 10 3½	– 11 7½
573	30 December 1868 - - - (G. 48—358.)	Preparing drawings of reflecting sights for H.M.S. "Monarch" -	– 8 6	2 10 5	1 9 11	4 8 10	5 – 1
574	25 January 1868 - - - (G. 48—192; 57—2—17,070.)	Manufacturing one 12-pounder and one 9-pounder wrought-iron muzzle-loading guns, with steel tubes for trial as boat guns. These guns were completed up to the stage of rifling, when the order was cancelled.	77 – 10	57 19 6	33 10 9	168 11 1	190 1 7
576	20 February 1867 - - - (G. 48—194; 85—G. N.—1005.)	Manufacturing sights, with reflector &c.; engraving and graduating the same; required for experiment to test Captain Moncrieff's plan of making carriages and platforms; preparing the necessary drawings for the above, while in course of manufacture.	7 14 4½	48 13 5½	26 12 1	82 19 11	93 11 11

577	12 January 1869 - - - (G. 45—428; 6033—3306.)	Extracting steel tube for examination of 68-pounder 95-cwt. gun, Experimental No. 347, lined by Mr. Vavasseur on Mr. Parsons' plan.	- -	1 16 -	1 1 5	2 17 5	3 4 10
581	13 August 1859 - - - (85—Gen. No.—3100.)	Trifling services performed by drawing office for Ordnance Survey Committee.	- -	1 17 2	1 2 1	2 19 3	3 6 10
583	30 April 1864 - - - - (G. 22—334; 180—152.)	Trifling services performed for Gun Cotton Committee - - -	- -	- 10 3½	- 6 1	- 16 4½	- 18 5½
585	20 February 1867 - - - (G. 48—212.)	Fitting sights and pointers on 7-inch 7-ton wrought-iron muzzle-loading gun, R., No. 55, to test Captain Moncrieff's plan of making carriages and platforms.	- -	5 1 3	2 19 11	8 1 2	9 1 9
589	5 March 1868 - - - (G. 48—220.)	Tempering steel tube and jacket (Mr. Parsons) for a gun under conversion.	- 18 8	2 4 5	1 4 8	4 7 9	4 19 -
591	20 February 1867 - - - (G. 45—296; 85—Gen. No.—1005.)	Manufacturing one set of rimers vent, complete, required at Shoeburyness, for use in experiments.	- - 8½	- 13 11	- 8 3	1 2 10½	1 5 9½
592	20 February 1867 - - - (G. 48—238.)	Examining and painting Experimental No. 356 on trunnion of howitzer or light shell gun for field service (as proposed by Sir Wm. Armstrong).	- -	- 4 9	- 2 10	- 7 7	- 8 7
640	10 August 1864 - - - (G. 32—123.)	Coiling, welding, facing, uniting, gauging, and shrinking 1 A. tube for repair of 7-inch breech-loading gun, R., No. 257. (At this stage the order was cancelled.)	45 - 1¼	6 4 8	3 3 11	54 8 8¼	61 7 8¼
703	16 February 1868 - - - (G. 48—243.)	Altering and repairing six 12-pounder 8-cwt. breech-loading guns for India, as follows: Nos. 215 and 320 of Royal Gun Factory make repaired with wrought-iron 1 A. tubes; levers and tappets repaired, guns resighted, and altered in conformity with sealed pattern. Nos. 272 Royal Gun Factory, and 52, 58, and 61 Elswick Ordnance Company; powder chambers enlarged, levers and tappets repaired and made in conformity with sealed pattern. Manufacturing six steel breech screws, six steel vent-pieces, six sight rings, 12 copper handles, 12 eyes for chain, 12 breech tangent and trunnion sights, and fitting them to the above guns.	63 13 -	121 8 7½	70 15 11	255 17 6½	288 13 1½

704	30 April 1868 - - - - (G. 45—301; 80—Gen. No. 1352.)	Making tracings of plant and machinery in Royal Gun Factory for Colonel Maxwell, and tin case to hold the same.	- 11 6¾	22 19 10	13 13 8	37 5 -¾	42 - 2¾	
705	16 March 1868 - - - - (G. 45—341; 57—16—2798.)	Manufacturing stores for India Government, as follows: six 12-pounder vent-pieces complete, with crossheads, copper rings, &c., one lever, one tappet, and one breech screw.	10 1 5¾	11 6 4½	6 10 5	27 18 3¼	31 9 7¼	
707	12 June 1868 - - - - (G. 45—331; 80—Gen. No.—1372.)	Making bar, repairing breech block, and upsetting copper cup in bore of 8-inch Palliser gun, No. 1829.	6 6 10¾	5 11 4	3 6 3	15 4 5¾	17 3 1¾	
715	10 August 1868 - - - - (G. 45—329; 57—16—2882.)	Sighting and finishing, after proof, 40 9-inch muzzle-loading guns R., including the manufacture of sights, gauges, tools, &c. for India Store Department.	177 5 10	660 15 -	386 15 10	1,224 16 8	1,381 5 3	
716	3 July 1865 - - - - (G. 45—343; 57—10—4813.)	Preparing steel block for, and upsetting copper cup in, bore of 64-pounder muzzle-loading gun, R.; also firing six rounds from same gun.	6 10 11½	6 4 2	4 17 11	17 13 -½	19 17 10½	
717	9 July 1868 - - - - (G. 45—346; 57—16—2924.)	Manufacturing five sets of facing implements, including moulding and casting the necessary castings, forging, turning, and fitting the whole complete, also packing stores for India Store Department.	10 14 10¾	30 10 8	18 3 4	59 8 10¾	67 - 8¾	
719	2 June 1868 - - - - (G. 45—324; 57—20—4785.)	Sighting and finishing, after proof, two 10-inch muzzle-loading 18-ton guns, R., including the manufacture of sights, gauges, tools, &c. for turret vessel "Abyssinia."	8 11 5½	30 12 7	18 1 1	57 5 1½	64 11 4½	
720	20 February 1868 - - - (G. 48—274; 57—16—2899.)	Manufacturing 10 bushes breech copper, as follows:—Cutting off bars, hammering, drilling, turning, and screwing; also, packing four 12-pounder breech-loading guns for India Store Department.	1 18 1¾	1 19 7	1 3 7	5 1 3¾	5 14 2¾	
721	1 September 1868 - - - (G. 48—309; 80—P.—376.)	Fitting screw-pin in cascable, and two ½-inch screws in muzzle of 9-inch gun, converted from 150-pounder, for Mr. Parsons.	- -	- 16 3	- 9 8	1 5 11	1 9 3	
722	2 June 1868 - - - - (G. 45—324.)	Sighting and finishing, after proof, two 10-inch muzzle-loading 18-ton guns, R., including the manufacture of sights, gauges, tools, &c. for turret vessel "Cerberus."	8 11 5½	30 12 7	18 1 1	57 5 1½	64 11 4½	
725	30 October 1868 - - - (G. 45—396; 57—16—3049.)	Manufacturing three steel breech screws for 9-pounder guns, including boring, turning, screwing, tempering in oil, shaping, and fitting complete, also facing and polishing after proof.	8 2 6	3 12 5½	2 3 2	13 18 1½	15 13 5½	
726	16 January 1869 - - - (G. 48—363; 57—8—6245.)	Turning, bending, slotting, and testing samples of steel supplied by contractors.	- - 2	3 17 -	2 5 10	6 3 -	6 18 9

(Examined) *James C. Hurst,*
Accountant, and Auditor to the Manufacturing Departments.

G. Fraser, Superintendent.

STATEMENT (F.)—MISCELLANEOUS SERVICES.

Number of Order.	Date of Requisition and Authority.	DESCRIPTION.	Labour.	Material.	Indirect Expenditure.	TOTAL COST per Balance Sheet, No. 1.	TOTAL COST per Balance Sheet, No. 2.
		No. 1.—Experimental Services:	£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
1—68	31 March 1867	Making and fitting two iron brackets with metal sheaves, and two bollards with bolts for securing them to a 7-inch 6½-ton gun carriage on board Her Majesty ship "Excellent;" also four iron swivel blocks for training purposes; making one iron stud and fixing it on lower plate of carriage for use of preventor rope, and enlarging the two rear eye bolts of slide.	8 9 3	– 12 8	6 9 2	15 11 1	18 6 5¾
1—78	23 June 1867 (83—C.—332.)	Fixing Mr. Cunningham's training gear to a platform at Southsea Castle, including the manufacture of six ⅞-inch bolts, and two plates for securing the gear.	1 5 8	– 3 11	– 19 7	2 9 2	2 17 11
1—122	23 April 1868	Manufacturing a pattern iron plate for upright bollard in the centre of a 9-inch 12-ton slide, and making some slight alterations in accordance with the suggestions of Captain Hood, R.N.	– 4 11	– – 11	– 3 9	– 9 7	– 11 2¾
1—135	29 April 1868 (57—2—17,715.)	Cost of making and fitting three sets of experimental winch gear for Her Majesty's ships "Warrior," "Minotaur," and "Ringdove."	30 14 5½	6 14 5	22 16 10	60 5 8½	71 4 4½
1—173	22 May 1868 - 57—2—17,846.)	Altering an experimental carriage on board Her Majesty's gunboat "Staunch," made by Sir W. Armstrong, in order to take a 9-inch 12-ton gun.	– 6 8½	- -	– 5 1½	– 11 10	– 13 11¼
1—178—257	22 May 1868 (57—2—17,956.) 20 July 1868. (57—2—17,956.)	Making and fitting six sets of winch gear for Her Majesty's ship "Royal Oak," at Spithead, including the manufacture of six bollards for rear of slide, with twenty-four ¾-inch bolts; 12 bollards for carriages with forty-eight ⅝-inch screws; 12 snatch blocks with sheaves for brackets, with twenty-four ⅝-inch bolts; 36 swivel blocks with sheaves, and six studs for preventor ropes.	71 10 –	15 12 3¼	52 12 –	139 14 3¼	164 19 1¼
1—180	26 May 1868 (57—2—17,715.)	Cost of sending artificers and labourers to Portland, and fitting two sets of running-in gear, one on board "Minotaur," and one on board "Warrior," each set consisting of two bollards, two snatch blocks, one stud for preventor rope of carriage, and two eye bolts and one bollard for slide.	7 16 9	– 5 7	19 11 8	27 14 –	32 16 2¼
1—193	17 June 1868 (57—2—18,028.)	Making a catch or bracket for securing an 8-inch 9-ton gun carriage to slide for transmission to the Ordnance Select Committee.	– 5 11	– 1 5	– 4 6½	– 11 10½	– 13 11¾
1—197. 303	4 June 1868 13 August 1868.	Altering 22 eccentrics for 7-inch 6½-ton gun slides on board Her Majesty's ship "Excellent," by welding a ball on the outer end of each, and then boring out to take the end of the iron-pointed lever in lieu of the socket.	6 19 5	– 13 2½	5 6 6	12 19 1½	15 5 2½
1—291. 466	7 August 1868 (57—2—18,435.) 24 November 1868. (75—12—3,583.)	Altering 150 64-pounder M. L. R. shells, by turning off the rear studs flush to the body.	1 8 2½	– 4 2½	1 1 3½	2 13 8½	3 3 2½

No. 7.—Royal Ordnance Factories, Portsmouth—Statement (F.) Miscellaneous Services—*continued.*

Number of Order.	Date of Requisition and Authority.	DESCRIPTION.	Labour.	Material.	Indirect Expenditure.	TOTAL COST per Balance Sheet, No. 1.	TOTAL COST per Balance Sheet, No. 2.
			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
1—313	18 August 1868 (57—2—118,447.)	Re venting a 64-pounder experimental gun, No. 354, altered on Major Palliser's principle, including the manufacture of the vent and the preparation of the tool according to drawing supplied to the department.	1 8 7	– 3 7½	1 1 4	2 13 6½	3 3 –
1—478	1 December 1868	Altering a 7-inch 6½-ton gun slide and carriage, on board Her Majesty's ship "Juno," by making two metal sheaves, two iron brackets with four ⅞-inch and four ¾-inch bolts; altering two blocks by supplying additional hooks, and making and fitting a plate for top of bollard in centre of slide.	2 5 –½	– 8 8¼	1 14 4¼	4 8 1	5 3 10
1—515	28 December 1868 (57—2—19,327.)	Manufacturing an experimental iron barrow, with four metal wheels, for conveyance of 10-inch M. L. R. projectiles.	6 6 11	3 3 9	4 16 11	14 7 7	16 18 10
1—553	25 January 1869 (57—2—5220.)	Making an experimental rammer for a 12-inch M. L. R. gun, with metal bands and eye loop at outer end of stave; afterwards making some slight alterations in accordance with the views of Captain Hood, of Her Majesty's ship "Excellent."	– 9 8	– 12 –	– 7 6	1 9 2	1 14 3
1—563	8 February 1869	Forging and fitting six additional spokes, with handles, for elevating wheel of a 9-inch 12-ton gun carriage, on board Her Majesty's ship "Royal Sovereign;" also forging and fitting two iron bands for supports of breeching, with eight ⅞-inch bolts (still in progress).	2 14 7½	– 8 2½	2 1 7	5 4 5	6 2 11¾
		Repairs, Alterations, &c., to Steam Cranes.					
523—73	18 April 1868	Repairing a 12-ton hand crane with two new metal bushes; fitting a pinion with two new teeth; refitting and refixing with new key the crane wheel on main post; cutting new keyway in pinion, and fitting on new key; also stripping two brasses.	2 18 6	– 4 9	2 4 7	5 7 10	6 6 11½
523—128	25 April 1868	Wheels removed from shafts of No. 10 hand crane, and fitted with five new keys; re-cutting and filing keyways, lining up shaft, and fitting it to gear; making two metal bushes for pinion shaft; adjusting a panel, repairing handle, and casting and fitting a new fly-wheel.	5 8 9	– 7 7½	4 3 –½	9 19 5	11 14 11
523—181	26 May 1868	Repairing a 20-ton steam crane by removing broken pinion shaft and bracket and making a pattern; casting, boring, slotting, and fitting a new gun-metal pinion; forging seven iron keys, and fitting them to wheels and brackets; planing one bed, and chipping and adjusting three others; fitting two strips to frame, in order to bring the gear level; making six steady pins; boring brackets, and making and fitting bolts and nuts for fixing the brackets.	8 7 2	5 – 2¾	5 17 6	19 4 10¾	22 15 8¾

523—214	-	11 June 1868	-	-	Repairing a 5-ton steam crane by making a new non-return gun metal valve; making and fitting new man-hole door, an iron sheave on head of jib, and one ash-pan bottom; repairing one conducting roller, one furnace-door hinge, and one man-hole door; adjusting one safety valve, stripping two brasses on crank shaft, opening and examining two engines, and making fresh joints; packing two piston and two valve rods and one pump; taking down funnel and fitting on two new fastenings.	14	1	3½	2	15	4	10	4	9	27	1	4½	31	19	4½
523—252	-	16 July 1868	-	-	Repairing a 20-ton steam crane by turning friction wheel on foot of jib, and adjusting it to sole plate; making two pedestal brackets, eight keys, and two iron brackets for guide bars; stripping and fitting two brass bushes; making a new stop bracket for reversing gear, and two drain pipes for cylinders; taking off the wheel from crank shaft, and fitting it with a new key.	8	18	1½	–	6	3¾	6	5	10	15	10	3½	18	7	4
523—348	-	3 September 1868	-	-	Repairing No. 5 hand crane by stripping and adjusting two brass bushes and making and fitting two new ones; making and fitting five keys for wheels, repairing two handles, the shaft of slew gear and crane post necessitating the taking down and re-erection of the crane.	10	–	8½	–	4	3	7	3	2	17	8	1½	20	11	10½
523—377	-	19 September 1868	-	-	Repairing No. 6 hand crane by making and fitting new shafts, pinions, bushes, and keys.	3	5	2½	–	3	6½	2	9	9	5	18	6	6	19	8
523—395	-	3 October 1868	-	-	Repairing the 20-ton steam crane by removing funnel and exhaust pipes, repairing bolts and nuts, and refixing the same.	–	13	1½	–	–	3	–	9	9½	1	3	2	1	7	3¼
523—405	-	6 October 1868	-	-	Manufacturing and fitting a new feed pump to a 10-ton steam crane	10	10	8	–	5	8¼	7	10	8½	18	7	-¾	21	14	2¼
523—458	-	14 November 1868		-	Removing and repairing the indicator taps of the 5 and 10-ton steam cranes, and repairing and refixing the pressure gauge of the 20-ton steam crane.	1	13	7½	–	–	5½	1	5	4½	2	19	5½	3	9	11
523—549	-	21 January 1869	-	-	Repairing the slew gear of a 10-ton steam crane by making and fitting a new friction block shaft; fitting three covers, cutting three keyways and fitting three keys; also stripping block and bush.	2	10	3	–	2	10	1	18	3	4	11	4	5	7	6½
523—560	-	4 February 1869	-	-	Repairing the slew gear of No. 8 hand crane by making seven bolts and two cast-iron blocks, and fitting and adjusting the blocks and wheel on sole plate.	2	8	3½	–	2	4	1	17	9	4	8	4½	5	4	3¾
					SERVICES FOR THE COMMISSARIAT DEPARTMENT.															
535—87	-	-	8 April 1868	-	A bread wagon fitted with new scroll and shackle iron, 12 bolts, two clips, two linch pins, four split keys, one iron plate, and two wooden blocks for springs; 14 bolts, one scroll iron, two clips and two springs repaired; bottom of wagon and axletree lined and strengthened.	2	11	2½	–	7	3½	1	19	11	4	18	5	5	15	10
535—108	-	17 April 1868	-	-	Two bread wagons fitted with two wheels, two brass boxes, two linch-pins and washers, front splinter-bar, footboard, doors, shaft, cross-bar, five bolts and nuts, two clips and split pins; body, head, and tailboard of wagon repaired, side relined and painted throughout.	7	18	3½	6	9	8¼	6	2	1¾	20	10	1½	24	3	1¾

No. 7.—Royal Ordnance Factories, Portsmouth—Statement (F.) Miscellaneous Services—*continued.*

Number of Order.	Date of Requisition and Authority.	DESCRIPTION.	Labour.	Material.	Indirect Expenditure.	TOTAL COST per Balance Sheet, No. 1.	TOTAL COST per Balance Sheet, No. 2.
			£. s. d.	£. s. d.	£. s. d.	£. s. d.	£. s. d.
535—129 -	27 April 1868 - -	Repairing a meat wagon by making and fitting two wheels, two boxes for axletrees, two linch pins, washers and keys, four clips for spring, bed pillar, one iron plate, and twenty bolts; relining two axletrees; repairing three clips, twenty-eight bolts with nuts, two wheels, four iron plates for door, and the wood work of front carriage, body and head.	6 13 1	5 12 7½	5 2 6	17 8 2½	20 10 2½
535—156 -	14 May 1868 - -	A bread wagon fitted with thirteen iron plates, shaft, four pins for wheels, two clips for splinter bar, one scroll iron, one thimble eye, eighteen bolts with nuts, one swingletree, four linch pins, split keys and washers, and four leather straps with buckles; body, head, bottom, and tail doors of wagon repaired; and two axletrees relined.	6 6 4	1 18 3¾	4 16 5	13 1 -¾	15 7 6¾
535—192 -	2 June 1868 - -	One wagon (No. 10) and one meat wagon (No. 1) repaired; No. 10 fitted with pair of shafts, stay irons and bolts; front carriage, scroll iron, and spring repaired; No. 1 fitted with new wheels, futchels, sweep piece, bed pillar, two new plates with bolts, nuts, and split keys; body of wagon repaired and relined.	8 5 -	5 8 10½	6 5 11	19 19 9½	23 11 -
535—208 -	12 June 1868 - -	Repairing a bread wagon by making new wheels, swingletree, two thimbles, and swivel; repairing body of wagon, scroll iron and spring.	2 3 9	- 6 2	1 13 2	4 3 1	4 17 10
535—232 -	26 June 1868 - -	No. 10 bread wagon fitted with shafts and cross bars, with plates, bolts, and nuts, and two plates, four iron staples, and back board repaired.	1 18 4	1 3 9	1 9 1	4 11 2	5 7 4¼
535—233 -	30 June 1868 - -	A bread wagon fitted with new splinter bar and thimble eyes, two plates, four clips, nine bolts, and two swingletrees repaired.	2 13 5	- 7 8¼	2 - 7	5 1 8¼	5 19 9¼
535—204 -	10 June 1868 - -	Repairing a Flanders wagon for the use of the Commissariat Department.	4 9 6	- 15 8	3 8 8	8 13 10	10 4 9
535—366 -	14 September 1869 -	Two Commissariat wagons fitted with shafts, wheels, plates, clips, linch pins, and washers, bolts and rivets; body and springs repaired.	8 13 10	5 19 8½	6 2 8	20 16 2½	24 12 -½
535—370 -	17 September 1868 -	No. 4 bread wagon fitted with splinter bar, thimble eyes, rivets, bolts, and split key; one swingletree, six bolts, iron plate, and painted work repaired.	1 - 10	- 6 1½	- 16 -	2 2 11½	2 10 6½
535—536 -	8 January 1869 - -	Two bread and two meat wagons thoroughly repaired; painted and fitted with new covers.	6 15 8½	1 8 8	5 3 7	13 7 11½	15 15 6½
535—543 -	19 January 1869 - -	Repairing and painting three Commissariat wagons, and fitting them with new splinter bars, bed pillar, tail board, twenty-eight bolts, two scroll irons, two wheels and two tail boards.	16 5 1	7 - 9½	11 18 2	35 4 -½	41 11 2½
535—572 -	14 February 1869 - -	Three wagons repaired and painted, and fitted with two new splinter bars, swingletree hooks, scroll iron, split keys, washers, and linch pins.	2 14 10	- 13 5¼	2 2 5	5 10 8¼	6 10 4¼

535—580	24 February 1869	Making four linch pins, one splinter bar, two futchels, three bolts, two split keys, one street lock, three eyes for shaft bolts, two irons, and four rivets for taildoors for one meat and one bread wagon, and performing the necessary repairs.	5 3 6½	1 10 1¼	3 18 10	10 12 5	12 10 1
535—273	28 July 1868	One bread and one meat wagon repaired; the meat wagon fitted with new ventilator, crossbar, and iron plate, seven bolts, three linch pins, washers, and split keys, three wheels repaired; the bread wagon fitted with six split keys, one pair of shafts, bed pillar, futchel, splinter bar, leaf to spring, two iron plates, two clips, and four linch pins with washers; an axletree relined and strengthened; two wheels, 14 bolts, two clips, and two doors repaired.	6 14 11½	1 16 7	5 3 –½	13 14 7	16 3 5
535—289	7 August 1868	No. 4 bread wagon fitted with four linch pins, six split keys, and six bolts with nuts, four wheels, cross spring, sides, tailboard, and top of wagon repaired.	2 19 9	– 13 5¼	2 5 5	5 18 7¼	6 19 7¼
535—310	18 August 1868	No. 1 meat wagon fitted with shafts, scroll irons, bolts, and split keys; two irons and three bolts with nuts repaired.	2 13 8½	1 3 6¼	2 – 9	5 17 11¾	6 18 10½
535—311	14 August 1868	A bread wagon fitted with two ventilators, a pair of shafts, plates, bolts, and split keys; front wheels and body of wagon repaired, and top covered with canvas.	2 11 4	– 12 2	1 19 –	5 2 6	6 – 9¼
535—319	21 August 1868	Body, front, tailboard, and springs of No. 3 meat wagon repaired and fitted with new shafts.	3 16 11½	– 7 8¼	2 18 9	7 3 4¾	8 8 10¾
535—337	28 August 1868	Repairing two meat wagons by making 16 bolts with nuts, two axletrees, two scroll irons, four split keys with chains, two staples, two linch pins, two futchels, one backbar to front carriage, and two sweeps; 26 bolts, seven springs, two futchels, one sweep, and one body repaired.	5 2 –	1 17 2¾	3 19 –	10 18 2¾	12 16 11¾
535—109	17 April 1868	One bread and two local wagons repaired and fitted with new boxes for wheels, washers, linch pins, and keys, sweep plates, shafts, stays, locking plates, clips, staples, pillar plate, new bed head and tailboard; the three wagons painted throughout.	27 16 10	10 18 10¼	20 5 –	59 – 8¼	69 14 6¾
		Services for Royal Artillery.					
504—422	19 October 1868	Repairing a sling wagon by making 42 new felloes, one crossbar for hind carriage, two iron handles, two linch pins, and one washer; and repairing 280 bolts.	8 19 1	5 5 6	6 16 6½	21 1 1½	24 16 1½
504—425	21 October 1868	A sling wagon and sling cart repaired by making 28 felloes, six spokes, two linch pins with washers, crossbar, and 168 bolts repaired; also, making two iron plates with studs for shifting bar.	13 5 8½	9 8 2	9 12 10	32 6 8½	38 3 7¾
		Services for the Royal Marine Artillery.					
505—201	8 June 1868 (54—Royal Marines—2993.)	Fitting an ambulance with four steel springs, eight scroll irons, four iron buffers, with indiarubber rings, eight bolts, eight coach screws, one linch pin with washer, one split key, five hooks, and six iron plates; hind carriage and four plates repaired.	8 8 7	3 11 5½	6 8 6	18 8 6½	21 14 1½
505—325	24 August 1868 (56—Marines—3096.)	A 16-feet triangle gyn fitted with new pole and cleat, two iron plates, and complete set of ironwork for windlass; two stays repaired and painted, complete.	22 9 9½	12 4 8	16 3 7	50 18 –½	60 2 9
505—404	6 October 1868	Repairing a 12-pounder travelling carriage by making new top, six staples, splinter bar, one trail, two hounds, four screws, crossbar, 18 iron rivets, 18 bolts and thimble eye; 16 bolts and one bed pillar repaired.	11 3 10½	5 16 2¼	8 10 8½	25 10 9¼	30 1 9
